A copy of the ASB is contained in Rules Docket Number 86-ANE-4, in the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

**FOR FURTHER INFORMATION CONTACT:** James Jones, Engine Certification Branch, ANE-141, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7121.

**SUPPLEMENTARY INFORMATION:** A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to include a new AD requiring inspection of the combustion chamber outer case for cracks adjacent to the rear flange and around the periphery of PS4 and drain boss welds on certain PW JT8D engines was published in the Federal Register on July 8, 1986, (51 FR 24716). The proposal was developed when the FAA determined that combustion chamber outer cases develop cracks during service. These cracks result from low cycle fatigue initiating in high stressed areas of the case. Analytical studies, substantiated by service experience, identify the high stressed areas to be in the periphery of the PS4 and drain boss welds, and the rear flange bolt holes. Cracks which develop along the circumference of the PS4 or drain boss welds or at the rear flange bolt holes can result in combustion chamber outer case ruptures.

There have been a total of ten reported combustion chamber outer case ruptures, four of which occurred during 1985 and one in 1986. Two of the ten ruptures occurred from a PS4 boss weld crack, and six occurred from drain boss weld cracks. The remaining two ruptures resulted from rear flange cracking, which prompted AD 86-04-01, Amendment 39-5236 (51 FR 5311). These ruptures caused both engine cowling and airframe damage.

On February 13, 1986, AD 86-04-01, Amendment 39-5236 (51 FR 5311), was published in the Federal Register requiring initial and repetitive visual inspections of the combustion chamber outer case for cracks adjacent to the rear flange bolt holes on certain PW JT8D engines. Fatigue cracks, which initiate in the rear flange bolt holes, can

propagate into the wall of the case and progress in an axial direction until the case ruptures. The purpose of the inspection is to identify and remove from service, combustion chamber outer cases which have developed rear flange bolt hole cracks. This AD adjusts the requirements of Amendment 39–5236 by reducing the initial threshold levels from 35,000 cycles to 30,000 cycles for JT8D–1 through –7B engines; 30,000 cycles to 25,000 cycles for JT8D–9 through –11 engines; and 25,000 cycles to 20,000 cycles for JT8D–15 through –17AR engines. The repetitive inspection intervals remain unchanged from those of Amendment 39–5236. An alternate rear flange inspection, using an eddy current procedure, has been added that allows increased repetitive inspection intervals of 12,000 cycles for JT8D–1 through –11 engines and 8,000 cycles for JT8D–15 through –17AR engines.

Notes (1) and (2) of this amendment have been reworded for clarification and consistency with the engine manual. Note (1) considers case boss fluorescent penetrant and eddy current inspection methods accomplished in the shop, in accordance with PW JT8D engine manual, P/N 481672, as an equivalent means of inspection to Appendix B of PW ASB 5676. The rear flange visual in shop inspection and Appendix A references have been deleted. Note (2) considers in shop fluorescent penetrant inspection (FPI) of the rear flange as an equivalent means of inspection to Appendix C of PW ASB 5676. The reference to eddy current inspection has been deleted.

Two additional notes have been added. Note (5) adds provisions for not reinspecting engines inducted into the shop for other causes whose cases were recently inspected in accordance with this AD within a limited period of time. Note (6) allows visual inspection of case boss welds (in accordance with PW ASB 5676) to identify previously weld repaired cases, if records are not available.

A portion of paragraph (d)(3) was inadvertently omitted in the **Federal Register** (51 FR 24718). However, since the intent of the paragraph was clear as published, the complete wording is being adopted without further notice. In addition, the ASB referenced in this final rule has been revised since issuance of the notice of proposed rulemaking (NPRM), however, the changes do not reflect additional requirements beyond those proposed in the NPRM.

Since this condition is likely to exist or develop on other engines of the same type design, this AD supersedes AD 86–04–01, Amendment 39–5236 (51 FR 5311), and requires initial and repetitive inspections of the combustion chamber outer case for cracks adjacent to the rear flange bolt holes, as well as around the periphery of the PS4 and drain boss welds, on certain PW JT8D engines in accordance with PW ASB 5676, Revision 1, dated September 24, 1986.

Interested persons have been afforded the opportunity to participate in the making of this amendment, and due consideration has been given to all relevant data and comments received. Several comments were received concerning the proposed rule.

**Discussion of Comments**

One commenter questioned the reliability of the on-wing white light and extended mirror inspection method, and recommended limiting the rear flange reinspection interval to 200 cycles.

The FAA considers the on-wing white light and extended mirror inspection method to be a viable inspection technique that has been successfully used by the industry for over a year. The reinspection intervals resulted from an analytical model based on service experience, shop visit rates, missed inspections, and crack propagation data. The analysis indicates that crack propagation rates for combustion case flange bolt hole initiated cracks are relatively low and can be detected in time to maintain a sufficient margin of safety.

One commenter requested reduction of the JT8D–9 inspection threshold to address a combustion case failure that ruptured at 11,417 cycles.

The FAA has determined that the evidence concerning that combustion case failure is somewhat inconsistent with the service history and engineering analysis of the other failed combustion cases. This was a first run case that had never been removed from the airplane. Cause of the crack initiation has not been established. However, the FAA will continue to review the data associated with this isolated event and, if necessary, will adjust the compliance schedule by amending this AD.

Six commenters requested an extension to the comment period until delivery of the inspection equipment. One of those commenters also requested deletion of the rear flange reinspection requirements until the rear flange eddy current inspection is proven to be viable.

The inspection equipment has been delivered to the industry, with adequate time for comment, and has proven to be effective. The rear flange reinspection requirements remain as published.

Three commenters questioned the justification for inspection of the PS4 boss.

Justification for the PS4 boss inspection requirement is addressed in the "SUPPLEMENTARY INFORMATION" paragraph above. It is significant to note that a PS4 boss failure occurred in December 1986.

Two commenters stated that, since a requirement never existed for identification of repaired cases, many operators did not keep records on previous boss weld repairs. They suggested that the proposed rule may require some operators to inspect to the more stringent compliance times of paragraph (c). One of the commenters proposed the establishment of a category for cases with previously weld repaired bosses, subsequently inspected in the shop and found crack free.

The FAA disagrees due to variability of shop welding practices as compared to original manufacture. Available evidence does not support that repaired cases are equivalent to non-repaired cases. Therefore, on that basis, a separate category was established. Guidelines for identification of weld repaired cases with no records are addressed in *Note* (6) of this AD.

One commenter requested an extended compliance period for case bosses inspected in the shop in light of the extended compliance period provided for rear flanges inspected in the shop.

The rear flange has an extended compliance period for those cases inspected in the shop in accordance with the engine manual because the inspection is of a higher quality than the on-wing extended mirror and light method. Hence, the rear flange compliance schedule for the shop inspection is of a longer inspection interval than the on-wing inspection. The case boss on-wing ultrasonic and shop inspections performed in accordance with the engine manual are considered equivalent and carry the same compliance schedule. *Note* (1) in this AD addresses case boss inspection equivalency.

Two commenters indicated that *Note* (2) of the NPRM referenced a nonexistent rear flange eddy current requirement in the engine manual.

The FAA agrees and has deleted the rear flange eddy current manual reference.

One commenter stated that the inspection limits for cases which have operated in different rated engines, as defined in the proposed *Note* (4) should be restricted to the initial inspection only. Therefore, the repeat inspection

should be based on its operation in the current engine. The commenter further stated that some operators are using higher rated cases on derated engines, and recommends that the compliance times should apply for the engine on which the case is actually installed.

Paragraph (e), formerly proposed *Note* (4), requires a case which has been operated in more than one model engine to be inspected to the criteria for the highest rated model engine in which it has ever been operated. This requirement was established because a significant reduction in total case life occurs during its initial operation on the higher rated model engine. The case life reduction is related to the stresses and increased temperatures imposed on the case by the higher rated model engine. The reduction in case life cannot be restored and is difficult to quantify by engineering analysis. Subsequent operation on a lower rated engine model does not take into account the distress that occurred during the previous operation on the higher rated model engine. Those operators who have higher rated engines that are presently installed and operated as lower rated engines and were never operated as a higher rated engine, may request an exemption from the higher rated engine model category through their cognizant FAA principal maintenance inspector, if proper documentation is presented.

One commenter stated that the latest definition of a "shop visit" in the "World Airline Technical Operations Glossary" does not include a gearbox or fuel nozzle removal. The commenter suggested that PW did not include these removals in their risk analysis, and requested deletion of the gearbox and fuel nozzle requirement from *Note* (4). Two other commenters stated that the gearbox and fuel nozzle removals were too restrictive.

The FAA disagrees that gearbox and fuel nozzle removals were not included in the PW risk analysis. Both were included in the engineering analysis. PW ASB 5676 includes the gearbox, but does not specifically reference fuel nozzle removal in the definition of a shop visit. However, the separation of a major engine flange is referenced. Fuel nozzles cannot be removed without separating a major engine flange.

Several commenters stated that the NPRM conflicted with the PW ASB regarding equivalency of the rear flange and case boss inspection methods.

The *Notes* provide clarification of the various inspection "equivalent means" in the AD.

One commenter stated that previous case shop inspections should be given extra credit based on the fact that shop inspections per the engine manual are of higher quality than the PW ASB procedures. The commenter suggested that the initial inspection should be established at an inspection interval that coincides with the longer reinspection interval.

The initial case inspection intervals were established to account for missed inspections. There is evidence of a case that was returned to service with a crack that was not detected during the shop inspections. The shorter initial inspection intervals are designed to identify and remove from service that population of cases with existing cracks.

One commenter stated that the inspection requirement at each shop visit, regardless of previous inspections, was too restrictive in that an inspection may have been accomplished in a relatively short time before the current shop visit.

The FAA agrees and, based on engineering analysis of fracture mechanics data, has provided relief for the above situation in *Note* (5) of this AD.

One commenter objected to the proposed rule in light of the operator's present combustion case maintenance program.

As stated above, the requirements of the NPRM were based on an engineering analysis to determine the service life of the case. The data used during the analysis included service history provided by the industry which indicates that current maintenance practices are not adequate to prevent case rupture. Operators whose maintenance programs are consistent with the inspection requirements of this AD should experience minimal impact.

One commenter questioned the reliability of the existing and new inspection equipment to detect cracks.

Crack detection capability has been satisfactorily demonstrated to the FAA and was included in the analysis that developed the inspection requirements of this AD. The AD contains a reporting requirement to determine if further action is required.

One commenter indicated that additional guidelines should be incorporated into the AD regarding owners with no engine records.

*Note* (3) of this AD provides guidelines for total cycle determination for operators with no engine history.

## Conclusion

The FAA has determined that this regulation involves approximately 6,367 engines at an approximate total cost of 2.2 million dollars. It has also been determined that few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected since the rule affects only operators using aircraft in which PW JT8D engines are installed, none of which are believed to be small entities. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption: "FOR FURTHER INFORMATION CONTACT".

## List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

## Adoption of the Amendment

## PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

**Authority:** 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

## § 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD) which supersedes AD 86-04-01, Amendment 39-5236 (51 FR 5311).

**Pratt & Whitney:** Applies to Pratt & Whitney (PW) JT8D-1, -1A, -1B, -7, -7A, -7B, -9, -9A, -11, -15, -15A, -17, -17A, -17R, and -17AR turbofan engines.

Compliance is required as indicated, unless already accomplished.

To prevent combustion chamber outer case rupture, inspect combustion chamber outer case assembly Part Numbers (P/N) 490547, 542155, 616315, 728823, 730613, 730614, 767187, and 767279, in accordance with PW Alert Service Bulletin (ASB) 5676, Revision 1, dated September 24, 1986, as follows:

(a) Inspect combustion chamber outer case PS4 boss, drain bosses, and rear flange for cracks at each engine shop visit.

(b) Inspect combustion chamber outer case PS4 boss and drain bosses, which have not been weld repaired, for cracks in accordance with the following schedule:

(1) PW JT8D-1, -1A, -1B, -7, -7A, and -7B engine cases with 24,000 total cycles in service (CIS) or more on the effective date of this AD; inspect within the next 2,500 CIS, or within 6,000 CIS since last inspection (SLI).

whichever occurs later. Thereafter, reinspect at intervals not to exceed 6,000 CIS SLI.

(2) PW JT8D–1, –1A, –1B, –7, –7A, and –7B engine cases with less than 24,000 total CIS on the effective date of this AD; inspect before the accumulation of 26,500 total CIS, or within 8,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 6,000 CIS SLI.

(3) PW JT8D–9, –9A, and –11 engine cases with 16,000 total CIS or more on the effective date of this AD; inspect within the next 2,500 CIS, or within 6,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 6,000 CIS SLI.

(4) PW JT8D–9, –9A, and –11 engine cases with less than 16,000 total CIS on the effective date of this AD; inspect before the accumulation of 18,500 total CIS, or within 6,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 6,000 CIS SLI.

(5) PW JT8D–15 and –15A engine cases with 12,000 total CIS or more on the effective date of this AD; inspect within the next 1,000 CIS, or within 4,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 4,000 CIS SLI.

(6) PW JT8D–15 and –15A engine cases with less than 12,000 total CIS on the effective date of this AD; inspect before the accumulation of 13,000 total CIS, or within 4,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 4,000 CIS SLI.

(7) PW JT8D–17, –17A, –17R, and –17AR engine cases with 9,800 total CIS or more on the effective date of this AD; inspect within the next 1,800 CIS, or within 4,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 4,000 CIS SLI.

(8) PW JT8D–17, –17A, –17R, and 17AR engine cases with less than 9,800 total CIS on the effective date of this AD; inspect before the accumulation of 11,200 total CIS, or within 4,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 4,000 CIS SLI.

(c) Inspect combustion chamber outer case PS4 boss and drain bosses, which have been weld repaired, for cracks in accordance with the following schedule:

(1) PW JT8D–1, –1A, –1B, –7, –7A, –7B, –9, –9A, and –11 engine cases regardless of total CIS; inspect within the next 1,500 CIS or within 3,500 CIS since weld repair or SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 3,500 CIS SLI.

(2) PW JT8D–15, –15A, –17A, –17R, and 17AR engine cases regardless of total CIS; inspect within the next 1,000 CIS or within 2,500 CIS since weld repair or SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 2,500 CIS SLI.

(d) Inspect combustion chamber outer case rear flange for cracks in accordance with the following schedule:

(1) PW JT8D–1, –1A, –1B, –7, –7A, and –7B engine cases with 30,000 total CIS or more on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, within the next 200 CIS, or within 3,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 3,000 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection in accordance with Appendix C requirements may be accomplished at intervals not to exceed 12,000 CIS SLI.

(2) PW JT8D–1, –1A, –1B, –7, –7A and –7B engine cases with less than 30,000 total CIS on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, before the accumulation of 30,200 total CIS, or within 3,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 3,000 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection in accordance with Appendix C requirements may be accomplished at intervals not to exceed 12,000 CIS SLI.

(3) PW JT8D–9, –9A, and –11 engine cases with 25,000 total CIS or more on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, within the next 200 CIS, or within the next 2,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 2,000 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection in accordance with Appendix C requirements may be accomplished at intervals not to exceed 12,000 CIS SLI.

(4) PW JT8D–9, –9A and –11 engine cases with less than 25,000 total CIS on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, before the accumulation of 25,200 total CIS, or within 2,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 2,000 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection in accordance with Appendix C requirements may be accomplished at intervals not to exceed 12,000 CIS SLI.

(5) PW JT8D–15 and –15A engine cases with 20,000 total CIS or more on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, within the next 200 CIS, or within 1,500 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 1,500 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection in accordance with Appendix C requirements may be accomplished at intervals not to exceed 8,000 CIS SLI.

(6) PW JT8D–15 and –15A engine cases with less than 20,000 total CIS on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, before the accumulation of 20,200 total CIS, or within 1,500 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 1,500 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection in accordance with Appendix C requirements may be accomplished at intervals not to exceed 8,000 CIS SLI.

(7) PW JT8D–17, –17A, –17R, and –17AR engine cases with 20,000 total CIS or more on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, within the next 200 CIS, or within 1,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 1,000 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection per Appendix C requirements may be accomplished at intervals not to exceed 8,000 CIS SLI.

(8) PW JT8D–17, –17A, –17R, and –17AR engine cases with less than 20,000 total CIS on the effective date of this AD; inspect in accordance with Appendix A of PW ASB 5676, before the accumulation of 20,200 total CIS, or within 1,000 CIS SLI, whichever occurs later. Thereafter, reinspect at intervals not to exceed 1,000 CIS SLI. As an alternate means of compliance, the case may be inspected in accordance with Appendix C of PW ASB 5676, and reinspection in accordance with Appendix C requirements may be accomplished at intervals not to exceed 8,000 CIS SLI.

(e) Inspect cases which have been operated in more than one model engine in accordance with the criteria for the highest rated model engine in which it was operated.

(f) Remove cracked cases from service prior to further flight.

(g) Report the following information in writing, if a case is found to be cracked, within 30 days of the inspection, to the Manager, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; Telex Number 948301 FAANE BURL. Reporting approved by the Office of Management and Budget (OMB) under OMB Number 2120–0056:

(1) Engine serial number (S/N)
(2) Inspection date
(3) Case P/N and S/N
(4) Case total time and cycles (if estimate, so note)
(5) Case time and cycles since last inspection
(6) Method of inspection used
(7) Crack location and size

Note: (1) Inspection at shop visit of the case PS4 and drain boss welds by fluorescent penetration or eddy current, in accordance with PW JT8D Engine Manual, P/N 481672, is considered an equivalent means of inspection to Appendix B of PW ASB 5676.

(2) Fluorescent penetrant inspection at shop visit of the rear flange in accordance with the PW JT8D Engine Manual, P/N 481672, is considered an equivalent means of inspection to Appendix C of PW ASB 5676.

(3) Cases for which the total cycles in service cannot be determined from engine records or manufacturer's production records must be assigned a total cycle count equal to the highest cycle engine of that model in the owners'/operators' fleet.

(4) Shop visit is defined as the input of an engine to a repair shop where the subsequent engine maintenance entails any of the following:

(a) Separation of a major engine flange (lettered or numbered) other than flanges mating with major sections of the nacelle or

reverser. Separation of flanges purely for purposes of shipment, without subsequent internal maintenance, is not a "shop visit".

(b) Removal of a disk, hub, or spool.

(c) Removal of the main or angle gearbox.

(d) Removal of the fuel nozzle.

(5) Engines inducted into the shop for other causes within 1,000 cycles of a previous case inspection, do not require reinspection, and may continue to complete the appropriate reinspection interval.

(6) If records are not available, a visual inspection of the case boss welds in accordance with PW ASB 5676, should be used to identify previously weld repaired cases.

Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD may be accomplished.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager Engine Certification Office, New England Region, may adjust the compliance times specified in this AD.

PW ASB 5676, Revision 1, dated September 24, 1986, identified and described in this document, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Pratt & Whitney, Publication Department, P.O. Box 611, Middletown, Connecticut 06457. This document also may be examined at the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; Rules Docket Number 86-ANE-4, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

This amendment becomes effective on June 29, 1987.

This amendment supersedes Amendment 39-5236 (51 FR 5311), AD 86-04-01.

Issued in Burlington, Massachusetts, on April 24, 1987.

Clyde DeHart, Jr.,

*Acting Director, New England Region.*

BILLING CODE 4910-13-M

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### 14 CFR Part 1261

### Processing of Monetary Claims (General)

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Final rule.

**SUMMARY:** NASA amends 14 CFR Part 1261 by revising Subpart 1261.4, "Collection of Civil Claims of the United States Arising Out of the Activities of the National Aeronautics and Space Administration," and by adding Subpart 1261.5, "Administrative Offset," and Subpart 1261.6, "Salary Offset." The regulations reflect changes pursuant to the Debt Collection Act of 1982 (Pub. L. 97-365, enacted October 25, 1982), as implemented by the Federal Claims Collection Standards issued jointly by the General Accounting Office and the Department of Justice (4 CFR Parts 101 through 105), and by the Office of Personnel Management (5 CFR Part 550, Subpart K, §§ 550.1101 through 550.1107, as finalized on May 6, 1986, 51 FR 16669).

**EFFECTIVE DATE:** May 26, 1987.

**ADDRESS:** Office of General Counsel, Code G, NASA Headquarters, Washington, DC 20546.

**FOR FURTHER INFORMATION CONTACT:** Sara Najjar, 202-453-2432.

**SUPPLEMENTARY INFORMATION:** These regulations have been updated to comply with the joint regulation of the General Accounting Office (GAO) and the Department of Justice (DJ), and the regulation of the Office of Personnel Management (OPM). NASA received no comments on its proposed regulations, which were published in 50 FR 13228, April 3, 1985. With modifications reflecting the changes in the OPM regulations, the final NASA regulations are set forth in this final rule.

These regulations do not constitute a major rule for the purpose of Executive Order 12291 (46 FR 13193, February 19, 1981).

These regulations will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (Pub. L. 96-354, September 19, 1980; 5 U.S.C. 601 *et seq.*).

### List of Subjects in 14 CFR Part 1261

Administrative practice and procedures, Claims, Debt collections, Administrative offset, Government employees, Pay administration, Salary offset, Wages.

## PART 1261—PROCESSING OF MONETARY CLAIMS (GENERAL)

For reasons set out in the Preamble, 14 CFR Part 1261 is amended as follows:

1. The authority for 14 CFR Part 1261, Subparts 1261.4, 1261.5, and 1261.6 reads as follows:

**Authority:** 42 U.S.C. 2473(c); 31 U.S.C. 3711 *et seq.*; 5 U.S.C. 5514; 4 CFR Parts 101-105; 5 CFR Part 550 Subpart K, §§ 550.1101-550.1107.

2. Subpart 1261.4 is revised, and subparts 1261.5 and 1261.6 are added to read as follows:

### Subpart 1261.4—Collection of Civil Claims of the United States Arising Out of the Activities of the National Aeronautics and Space Administration (NASA)

Sec.

1261.400 Scope of subpart.
1261.401 Definitions.
1261.402 Delegation of authority.
1261.403 Consultation with appropriate officials; negotiation.
1261.404 Services of the Inspector General.
1261.405 Subdivision of claims not authorized; other administrative proceedings.
1261.406 Aggressive collection action; documentation.
1261.407 Demand for payment; limitation periods.
1261.408 Use of consumer reporting agency.
1261.409 Contracting for collection services.
1261.410 Suspension or revocation of license or eligibility; liquidation of collateral.
1261.411 Collection in installments.
1261.412 Interest, penalties, and administrative costs.
1261.413 Analysis of costs; automation; prevention of overpayments, delinquencies, or defaults.
1261.414 Compromise of claims.
1261.415 Execution of releases.
1261.416 Suspending or terminating collection action.
1261.417 Referral to Department of Justice (DJ) or General Accounting Office (GAO).

### Subpart 1261.5—Administrative Offset of Claims.

1261.500 Scope of subpart.
1261.501 Definition.
1261.502 Notification procedures.
1261.503 Agency records inspection; hearing or review.
1261.504 Interagency requests.
1261.505 Multiple debts.
1261.506 Limitation periods.
1261.507 Civil Service Retirement and Disability Fund.
1261.508 Offset against a judgment.

### Subpart 1261.6—Collection by Offset from Indebted Government Employees.

1261.600 Purpose of subpart.
1261.601 Scope of subpart.
1261.602 Definitions.
1261.603 Procedures for salary offset.
1261.604 Nonwaiver of rights by involuntary payoff.
1261.605 Refunds.

Sec.

1261.406 Salary offset request by a creditor agency other than NASA (the current paying agency).
1261.407 Obtaining the services of a hearing official.

**Subpart 1261.4—Collection of Civil Claims of the United States Arising Out of the Activities of the National Aeronautics and Space Administration (NASA)**

**§ 1261.400 Scope of subpart.**

(a) These regulations do the following:

(1) Prescribe standards for the administrative collection, compromise, suspension or termination of collection, and referral to the General Accounting Office (GAO), and/or to the Department of Justice (DJ) for litigation, of civil claims as defined by 31 U.S.C. 3701(b), arising out of the activities of NASA;

(2) Designate the responsible NASA officials authorized to effect actions hereunder; and

(3) Require compliance with the GAO/DJ joint regulations at 4 CFR Parts 101 through 105 and the Office of Personnel Management (OPM) regulations at 5 CFR Part 550, Subpart K.

(b) Failure to comply with any provision of the GAO/DJ or OPM regulations shall not be available as a defense to any debtor (4 CFR 101.8).

(c) These regulations do not include any claim based in whole or in part on violation of the anti-trust laws; any claim as to which there is an indication of fraud, the presentation of a false claim, or misrepresentation on the part of the debtor or any party having an interest in the claim; tax claims; or Federal interagency claims (4 CFR 101.3).

**§ 1261.401 Definitions.**

(a) *Claim and debt.* The terms denote a civil claim arising from the activities of NASA for an amount of money, or return or value of property (see 4 CFR 101.5), owing to the United States from any person, organization, or entity, except another Federal agency. The words "claim" and "debt" have been used interchangeably and are considered synonymous.

(b) *Delinquent debt.* The debt is "delinquent" if it has not been paid by the date specified in the initial written notification (e.g., § 1261.407) or applicable contractual agreement, unless other acceptable (to NASA) payment arrangements have been made by that date, or if, at any time thereafter, the debtor fails to satisfy an obligation under the payment agreement.

(c) *Referral for litigation.* Referral through the NASA installation's legal counsel to the Department of Justice (Main Justice or the United States Attorney, as appropriate) for legal proceedings.

**§ 1261.402 Delegation of authority.**

The following NASA officials are delegated authority, as qualified by § 1261.403, to take such action as is authorized by these regulations to collect, compromise, suspend/terminate collection, and upon consultation with and through legal counsel, to refer the claim (as applicable) to the GAO or Department of Justice:

(a) For field installations, with regard to Subpart 1261.4 and Subpart 1261.5: The Director of the Installation or a designee who reports directly to the Installation Director. A copy of such designation, if any, shall be sent to the Director, Financial Management Division, NASA Headquarters.

(b) For Headquarters, with regard to Subpart 1261.4 and Subpart 1261.5: The Associate Administrator for Management or a designee who reports directly to the Associate Administrator for Management. A copy of such designation, if any, shall be sent to the Director, Financial Management Division, NASA Headquarters.

(c) With respect to the analysis required by § 1261.413: The NASA Comptroller or designee.

(d) NASA wide, with regard to Subpart 1261.6: The NASA Comptroller or designee.

(e) NASA wide, for complying with pertinent provisions under these regulations for agency hearing or review (see § 1261.406(b), § 1261.503, and § 1261.603(c)): The NASA General Counsel or designee.

**§ 1261.403 Consultation with appropriate officials; negotiation.**

(a) The authority pursuant to § 1261.402 to determine to forego collection of interest, to accept payment of a claim in installments, or, as to claims which do not exceed $20,000, exclusive of interest and related charges, to compromise a claim or to refrain from doing so, or to refrain from, suspend or terminate collection action, shall be exercised only after consultation with legal counsel for the particular installation and the following NASA officials or designees, who may also be requested to negotiate the appropriate agreements or arrangements with the debtor:

(1) With respect to claims against contractors or grantees arising in connection with contracts or grants—the contracting officer and the financial management officer of the installation concerned.

(2) With respect to claims against commercial carriers for loss of or damage to NASA freight shipment—the cognizant transportation officers or the official who determined the amount of the claim, as appropriate, and the financial management officers of the installation concerned.

(3) With respect to claims against employees of NASA incident to their employment—the personnel officer and the financial management officer of the installation concerned.

(b) The appropriate counsel's office shall review and concur in the following:

(1) All communications to and agreements with debtors relating to claims collection.

(2) All determinations to compromise a claim, or to suspend or terminate collection action.

(3) All referrals of claims, other than referrals to the Department of Justice pursuant to § 1261.404(b)(1).

(4) All documents releasing debtors from liability to the United States.

(5) All other actions relating to the collection of a claim which in the opinion of the official designated in or pursuant to § 1261.402 may affect the rights of the United States.

**§ 1261.404 Services of the Inspector General.**

(a) At the request of an official designated in or pursuant to § 1261.402, the Office of the Inspector General will, where practicable, conduct such investigations as may assist in the collection, compromise, or referral of claims of the United States, including investigations to determine the location and financial resources of the debtors.

(b) Any claim which, in the opinion of an official designated in or pursuant to § 1261.402 or § 1261.403, may indicate fraud, presentation of a false claim, or misrepresentation, on the part of the debtor or any other party having an interest in the claim, shall be referred by the designated official to the Inspector General (IG), NASA Headquarters, or to the nearest office of the NASA IG. After an investigation as may be appropriate, the IG shall:

(1) Notice the official, from whom the claim was received, of the findings and refer the claim to the Department of Justice in accordance with the provisions of 4 CFR 101.3; or

(2) If it were found that there is no such indication of fraud, the presentation of a false claim, or misrepresentation, return the claim to the official from whom it was received.

**§ 1261.406 Subdivision of claims not authorized; other administrative proceedings.**

(a) *Subdivision of claims.* Claims may not be subdivided to avoid the $20,000 ceiling, exclusive of interest, penalties, and administrative costs, for purposes of compromise (§ 1261.414) or suspension or termination of collection (§ 1261.416). The debtor's liability arising from a particular transaction or contract shall be considered a single claim [4 CFR 101.6].

(b) Required administrative proceedings. Nothing contained in these regulations is intended to require NASA to omit, foreclose, or duplicate administrative proceedings required by contract or other applicable laws and implementing regulations [4 CFR 101.7].

**§ 1261.407 Aggressive collection action; documentation.**

(a) NASA shall take aggressive action, on a timely basis with effective followup, to collect all claims of the United States for money or property arising out of NASA activities, and to cooperate with the other Federal agencies in debt collection activities.

(b) All administrative collection action shall be documented and the bases for compromise, or for termination or suspension of collection action, should be set out in detail. Such documentation, including the Claims Collection Litigation Report under § 1261.417(e), should be retained in the appropriate claims file.

**§ 1261.407 Demand for payment; limitation periods.**

(a) Appropriate written demands shall be made promptly upon a debtor of the United States in terms which inform the debtor of the consequences of failure to cooperate. A total of three progressively stronger written demands at not more than 30-day intervals will normally be made unless a response to the first or second demand indicates that a further demand would be futile and the debtor's response does not require rebuttal. In determining the timing of demand letters, NASA will give due regard to the need to act promptly so that, as a general rule, if necessary to refer the debt to the Department of Justice for litigation, such referral can be made within one year of the agency's final determination of the fact and the amount of the debt. When necessary to protect the Government's interests (for example, to prevent the statute of limitations, 28 U.S.C. 2415, from expiring), written demand may be preceded by other appropriate actions, including immediate referral for litigation.

(b) The initial demand letter should inform the debtor of:

(1) The basis for the indebtedness and whatever rights the debtor may have to seek review within the agency;

(2) The applicable standards for assessing interest, penalties, and administrative costs (§ 1261.412); and

(3) The date by which payment is to be made, which normally should be not more than 30 days from the date that the initial demand letter was mailed or hand delivered. The responsible official should exercise care to ensure that demand letters are mailed or hand delivered on the same day that they are actually dated. Apart from these requirements, there is no prescribed format for demand letters. However, as appropriate to the circumstances, the responsible official may consider including, either in the initial demand letter or in subsequent letters, such items the NASA's willingness to discuss alternative methods of payment, or intentions with respect to referral of the debt to the Department of Justice for litigation.

(c) NASA should respond promptly to communications from the debtor, within 30 days whenever feasible, and should advise debtors who dispute the debt to furnish available evidence to support their contentions.

(d) If either prior to the initiation of, any time during, or after completion of the demand cycle, a determination to pursue offset is made, then the procedures specified in Subparts 1261.5 and 1261.6, as applicable, should be followed. The availability of funds for offset and NASA's determination to pursue it release the agency from the necessity of further compliance with paragraphs (a), (b), and (c) of this section. If the agency has not already sent the first demand letter, the agency's written notification of its intent to offset must give the debtor the opportunity to make voluntary payment, a requirement which will be satisfied by compliance with the notice requirements of § 1261.502 or § 1261.603(a), as applicable.

(e) NASA should undertake personal interviews with its debtors whenever this is feasible, having regard for the amounts involved and the proximity of agency representatives to such debtors; and may attempt to effect compromise of the claim in accordance with § 1261.414.

(f) When a debtor is employed by the Federal government or is a member of the military establishment or the Coast Guard, and collection by offset cannot be accomplished in accordance with Subpart 1261.6, the employing agency will be contacted for the purpose of arranging with the debtor for payment of the indebtedness by allotment or otherwise in accordance with section 206 of Executive Order 11222, May 8, 1965, 30 FR 6469, which provides that: "An employee is expected to meet all just financial obligations, especially those—such as Federal, State, or local taxes—which are imposed by law" [4 CFR 102.81].

**§ 1261.408 Use of consumer reporting agency.**

(a) The term "consumer reporting agency" has the meaning provided in the Federal Claims Collection Act of 1966, as amended (31 U.S.C. 3701(a)(3)):

(1) A consumer reporting agency as that term is defined in section 603(f) of the Fair Credit Reporting Act (15 U.S.C. 1681a(f)); or

(2) A person that, for money or on a cooperative basis, regularly—

(i) Gets information on consumers to give the information to a consumer reporting agency; or

(ii) Serves as a marketing agent under an arrangement allowing a third party to get the information from a consumer reporting agency.

(b) NASA Headquarters Financial Management Division, shall be the focal contact between NASA and consumer reporting agencies. The following procedures shall apply when such agencies are employed by NASA:

(1) After the appropriate notice pursuant to 5 U.S.C. 552a(e)(4) has been published, NASA may disclose, in accordance with 5 U.S.C. 552a(b)(12), information about a debtor to a consumer reporting agency. Such information may include:

(i) That a claim has been determined to be valid and is overdue (including violation by debtor of a repayment plan or other claim settlement agreement);

(ii) The name, address, taxpayer identification number, and any other information necessary to establish the identity of the individual responsible for the claim;

(iii) Amount, status, and history of the claim;

(iv) Program or pertinent activity under which the claim arose.

(2) Before disclosing the information specified in paragraph (b)(1) of this section, NASA shall comply with 31 U.S.C. 3711(f) by:

(i) Taking reasonable action to locate the individual if a current address is not available;

(ii) If a current address is available, noticing the individual by certified mail, return receipt requested, that: The designated NASA official has reviewed the claim and determined that it is valid

and overdue; within not less than 60 days after sending this notice, NASA intends to disclose to a consumer reporting agency the specific information to be disclosed under paragraph (b)(1) of this section; the individual may request a complete explanation of the claim, dispute the information in the records of NASA about the claim, and file for an administrative review or repeal of the claim or for reconsideration of the initial decision on the claim.

(3) If an administrative review or reconsideration is requested, the responsible official or designee shall refer the request to the appropriate NASA legal counsel for an impartial review and determination by counsel or designee based on the entire written record. If the reviewer cannot resolve the question of indebtedness based upon the available documentary evidence, verified written statements by the debtor or the responsible official may be requested on any pertinent matter not addressed by the available record.

(c) If the information is to be submitted to a consumer reporting agency, the responsible official shall obtain a verified statement from such agency which gives satisfactory assurances that the particular agency is complying with all laws of the United States related to providing consumer credit information; and thereafter ensure that the consumer reporting agency is promptly informed of any substantial change in the condition or amount of the claim, or, on request of such agency, promptly verify or correct information about the claim.

**§ 1261.409 Contracting for collection services.**

(a) When NASA determines that there is a need to contract for collection services, the following conditions must attach:

(1) The authority to resolve disputes, compromise claims, suspend or terminate collection action, and refer the matter for litigation must be retained by NASA.

(2) The contractor shall be subject to the Privacy Act of 1974, as amended, to the extent specified in 5 U.S.C. 552a(m), and to applicable Federal and State laws and regulations pertaining to debt collection practices—for example, the Fair Debt Collection Practices Act (15 U.S.C. 1692), and 26 U.S.C. 6103(p)(4) and applicable regulations of the Internal Revenue Service;

(3) The contractor must be required to account strictly for all amounts collected; and

(4) The contractor must agree to provide any data contained in its files relating to collection actions and related reports, current address of debtor, and reasonably current credit information upon returning an account to NASA for subsequent referral to the Department of Justice for litigation.

(b) Funding of collection service contracts:

(1) NASA may fund a collection service contract on a fixed-fee basis—that is, payment of a fixed fee determined without regard to the amount actually collected under the contract. However, such contract may be entered into only if and to the extent provided in the appropriation act or other legislation, except that this requirement does not apply to the use of a revolving fund authorized by statute. Accordingly, payment of the fixed-fee must be charged to available agency appropriations. See 4 CFR 102.6(b) (1) and (3).

(2) NASA may also fund a collection service contract on a contingent-fee basis—that is, by including a provision in the contract permitting the contractor to deduct its fee from amounts collected under the contract. The fee should be based on a percentage of the amount collected, consistent with prevailing commercial practice. See 4 CFR 102.6(b)(2).

(3) Except as authorized under paragraph (b)(2) of this section, or unless otherwise specifically provided by law, NASA must deposit all amounts recovered under collection service contracts (or by NASA employees on behalf of the agency) in the Treasury Department as miscellaneous receipts pursuant to 31 U.S.C. 3302. See 4 CFR 102.6(b)(4).

**§ 1261.410 Suspension or revocation of license or eligibility; liquidation of collateral.**

(a) In seeking the collection of statutory penalties, forfeitures, or debts provided for as an enforcement aid or for compelling compliance, NASA will give serious consideration to the suspension or revocation of licenses or other privileges for any inexcusable, prolonged, or repeated failure of a debtor to pay such a claim. In the case of a contractor under 48 CFR Chapter 18, NASA will comply with the debarment, suspension, and ineligibility requirements of the NASA Federal Acquisition Regulation Supplement (NASA/FAR Supplement) at 48 CFR 1609.4. Likewise, in making, guaranteeing, insuring, acquiring, or participating in loans, NASA will give serious consideration to suspending or disqualifying any lender, contractor, broker, borrower, or other debtor from doing further business with it or engaging in programs sponsored by it if such a debtor fails to pay its debts to the Government within a reasonable time. The failure of any surety to honor its obligations in accordance with 31 U.S.C. 9305 must be reported to the Treasury Department at once. Notification that a surety's certificate of authority to do business with the Federal Government has been revoked or forfeited by the Treasury Department will be forwarded by that Department to all interested agencies.

(b) If NASA is holding security or collateral which may be liquidated and the proceeds applied on debts due it through the exercise of a power of sale in the security instrument or a nonjudicial foreclosure, it should do so by such procedures if the debtor fails to pay the debt within a reasonable time after demand, unless the cost of disposing of the collateral will be disproportionate to its value or special circumstances require judicial foreclosure. NASA will provide the debtor with reasonable notice of the sale, an accounting of any surplus proceeds, and any other procedures required by applicable contract or law. Collection from other sources, including liquidation of security or collateral, is not a prerequisite to requiring payment by a surety or insurance concern unless such action is expressly required by statute or contract.

**§ 1261.411 Collection in installments.**

(a) Whenever feasible, and except as otherwise provided by law, debts owed to the United States, together with interest penalties, and administrative costs as required by § 1261.412, should be collected in full in one lump sum. This is true whether the debt is being collected by administrative offset or by another method, including voluntary payment. However, if the debtor is financially unable to pay the indebtedness in one lump sum, payment may be accepted in regular installments. Debtors who represent that they are unable to pay the debt in one lump sum must submit financial statements. If NASA agrees to accept payment in regular installments, it will obtain a legally enforceable written agreement from the debtor which specifies all of the terms of the arrangement and which contains a provision accelerating the debt in the event the debtor defaults. The size and frequency of installment payments should bear a reasonable relation to the size of the debt and the debtor's ability to pay. If possible, the installment payments should be sufficient in size and frequency to liquidate the Government's claim in not

more than 3 years. Installment payments of less than $50 per month should be accepted only if justifiable on the grounds of financial hardship or for some other reasonable cause. If the claim is unsecured, an executed confess-judgment note, comparable to the Department of Justice Form USA–79a, should be obtained from a debtor when the total amount of the deferred installments will exceed $750. Such notes may be sought when an unsecured obligation of a lesser amount is involved. When attempting to obtain confess-judgment notes, the debtor should be provided with written explanation of the consequences of signing the note, and documentation should be maintained sufficient to demonstrate that the debtor has signed the note knowingly and voluntarily. Security for deferred payments other than a confess-judgment note may be accepted in appropriate cases. NASA, at its option, may accept installment payments notwithstanding the refusal of a debtor to execute a confess-judgment note or to give other security.

(b) If the debtor owes more than one debt and designates how a voluntary installment payment is to be applied as among those debts, that designation must be followed. If the debtor does not designate the application of the payment, agencies should apply payments to the various debts in accordance with the best interests of the United States, as determined by the facts and circumstances of the particular case, paying special attention to applicable statutes of limitations.

**§ 1261.412 Interest, penalties, and administrative costs.**

(a) Pursuant to 31 U.S.C. 3717, NASA shall assess interest, penalties, and administrative costs on debts owed to the United States. Before assessing these charges, NASA must mail or hand deliver a written notice to the debtor explaining the requirements concerning the charges (see § 1261.407(b)).

(b) Interest shall accrue from the date on which notice of the debt and the interest requirements is first mailed or hand delivered to the debtor (on or after October 25, 1982), using the most current address that is available to the agency. If an "advance billing" procedure is used—that is, a bill is mailed before the debt is actually owed—it can include the required interest notification in the advance billing, but interest may not start to accrue before the debt is actually owed. Designated officials should exercise care to ensure that the notices required by this section are dated and mailed or hand delivered on the same day.

(c) The rate of interest assessed shall be the rate of the current value of funds to the United States Treasury (i.e., the Treasury tax and loan account rate), as prescribed and published by the Secretary of the Treasury in the Federal Register and the Treasury Fiscal Requirements Manual Bulletins annually or quarterly, in accordance with 31 U.S.C. 3717. NASA may assess a higher rate of interest if it reasonably determines that a higher rate is necessary to protect the interests of the United States. The rate of interest, as initially assessed, shall remain fixed for the duration of the indebtedness, except that where a debtor has defaulted on a repayment agreement and seeks to enter into a new agreement, NASA may set a new interest rate which reflects the current value of funds to the Treasury Department at the time the new agreement is executed. Interest should not be assessed on interest, penalties, or administrative costs required by this section. However, if the debtor defaults on a previous repayment agreement, charges which accrued but were not collected under the defaulted agreement shall be added to the principal to be paid under a new repayment agreement.

(d) NASA shall assess against a debtor charges to cover administrative costs incurred as a result of a delinquent debt—that is, the additional costs incurred in processing and handling the debt because it became delinquent as defined in § 1261.401(b). Calculations of administrative costs should be based upon actual costs incurred or upon cost analyses establishing an average of actual additional costs incurred by the agency in processing and handling claims against other debtors in similar stages of delinquency. Administrative costs may include costs incurred in obtaining a credit report or in using a private debt collector, to the extent they are attributable to delinquency.

(e) NASA shall assess a penalty charge, not to exceed 6 percent a year, on any portion of a debt that is delinquent as defined in § 1261.401(b) for more than 90 days. This charge need not be calculated until the 91st day of delinquency, but shall accrue from the date that the debt became delinquent.

(f) When a debt is paid in partial or installment payments, amounts received by the agency shall be applied first to outstanding penalty and administrative cost charges, second to accrued interest, and third to outstanding principal.

(g) NASA must waive the collection of interest on the debt or any portion of the debt which is paid within 30 days after the date on which interest began to accrue. NASA may extend this 30-day period, on a case-by-case basis, if it reasonably determines that such action is appropriate. Also, NASA may waive, in whole or in part, the collection of interest, penalties, and/or administrative costs (assessed under this section) under the criteria specified in § 1261.414 relating to the compromise of claims (without regard to the amount of the debt), or if NASA determines that collection of these charges would be against equity and good conscience or not in the best interests of the United States. See 4 CFR 101.13(g). Such optional waivers should be handled on a case-by-case basis, in consultation with officials designated under § 1261.403. Examples of situations in which NASA may consider waiving interest and other related charges are:

(1) Pending consideration of a request for reconsideration or administrative review;

(2) Acceptance of an installment plan or other compromise agreement, where there is no indication of lack of good faith on the part of the debtor in not repaying the debt, and the debtor has provided substantiating information of inability to pay or other unavoidable hardship which reasonably prevented the debt from being repaid.

(h) Where a mandatory waiver or review statute applies, interest and related charges may not be assessed for those periods during which collection action must be suspended under § 1261.416(c)(3).

(i) *Exemptions.* (1) The provisions of 31 U.S.C. 3717 do not apply:

(i) To debts owed by any State or local government;

(ii) To debts arising under contracts which were executed prior to, and were in effect on (i.e., were not completed as of) October 25, 1982;

(iii) To debts where an applicable statute, regulation required by statute, loan agreement, or contract either prohibits such charges or explicitly fixes the charges that apply to the debts involved; or

(iv) Debts arising under the Social Security Act, the Internal Revenue Code of 1954, or the tariff laws of the United States.

(2) NASA may, however, assess interest and related charges on debts which are not subject to 31 U.S.C. 3717 to the extent authorized under the common law or other applicable statutory authority.

**§ 1261.413 Analysis of costs; automation; prevention of overpayments, delinquencies, or defaults.**

The Office of the NASA Comptroller will:

BEST COPY AVAILABLE

(a) Issue internal procedures to provide for periodic comparison of costs incurred and amounts collected. Data on costs and corresponding recovery rates for debts of different types and in various dollar ranges should be used to compare the cost effectiveness of alternative collection techniques, establish guidelines with respect to points at which costs of further collection efforts are likely to exceed recoveries, and assist in evaluating offers in compromise.

(b) Consider the need, feasibility, and cost effectiveness of automated debt collection operation.

(c) Establish internal controls to identify causes, if any, of overpayments, delinquencies, and defaults, and establish procedures for corrective actions as needs dictate.

**§ 1261.414 Compromise of claims.**

(a) Designated NASA officials (see § 1261.402 and § 1261.403) may compromise claims for money or property arising out of the activities of the agency where the claim, exclusive of interest, penalties, and administrative costs, does not exceed $20,000, prior to the referral of such claims to the General Accounting Office, or to the Department of Justice for litigation. The Comptroller General may exercise such compromise authority with respect to claims referred to the General Accounting Office (GAO) prior to their further referral for litigation. Only the Comptroller General may effect the compromise of a claim that arises out of an exception made by the GAO in the account of an accountable officer, including a claim against the payee, prior to its referral by the GAO for litigation.

(b) When the claim, exclusive of interest, penalties, and administrative costs, exceeds $20,000, the authority to accept the compromise rests solely with the Department of Justice. NASA should evaluate the offer, using the factors set forth in paragraphs (c) through (f) of this section, and may recommend compromise for reasons under one, or more than one, of those paragraphs. If NASA then wishes to accept the compromise, it must refer the matter to the Department of Justice, using the Claims Collection Litigation Report. See § 1261.417(e) or 4 CFR 105.2(b). Claims for which the gross amount is over $200,000 shall be referred to the Commercial Litigation Branch, Civil Division, Department of Justice, Washington, DC 20530. Claims for which the gross original amount is $200,000 or less shall be referred to the United States Attorney in whose judicial district the debtor can be found. The referral should specify the reasons for the agency's recommendation. If NASA has a debtor's firm written offer of compromise which is substantial in amount and the agency is uncertain as to whether the offer should be accepted, it may refer the offer, the supporting data, and particulars concerning the claim to the General Accounting Office or to the Department of Justice. The General Accounting Office or the Department of Justice may act upon such an offer or return it to the agency with instructions or advice. If NASA wishes to reject the compromise, GAO or Department of Justice approval is not required.

(c) A claim may be compromised pursuant to this section if NASA cannot collect the full amount because of the debtor's inability to pay the full amount within a reasonable time, or the refusal of the debtor to pay the claim in full and the Government's inability to enforce collection in full within a reasonable time by enforced collection proceedings. In determining the debtor's inability or refusal to pay, the following factors, among others, may be considered:

(1) Age and health of the debtor;

(2) Present and potential income;

(3) Inheritance prospects;

(4) The possibility that assets have been concealed or improperly transferred by the debtor;

(5) The availability of assets or income which may be realized by enforced collection proceedings; and

(6) The applicable exemptions available to the debtor under State and Federal law in determining the Government's ability to enforce collection. Uncertainty as to the price which collateral or other property will bring at forced sale may properly be considered in determining the Government's ability to enforce collection. The compromise should be for an amount which bears a reasonable relation to the amount which can be recovered by enforced collection procedures, having regard for the exemptions available to the debtor and the time which collection will take.

(d) A claim may be compromised if there is a real doubt concerning the Government's ability to prove its case in court for the full amount claimed, either because of the legal issues involved or a bona fide dispute as to the facts. The amount accepted in compromise in such cases should fairly reflect the probability of prevailing on the legal question involved, the probabilities with respect to full or partial recovery of a judgment, paying due regard to the availability of witnesses and other evidentiary support for the Government claim, and related pragmatic considerations. In determining the litigative risks involved, proportionate weight should be given to the probable amount of court costs and attorney fees pursuant to the Equal Access to Justice Act which may be assessed against the Government if it is unsuccessful in litigation. See 28 U.S.C. 2412.

(e) A claim may be compromised if the cost of collecting the claim does not justify the enforced collection of the full amount. The amount accepted in compromise in such cases may reflect an appropriate discount for the administrative and litigative costs of collection, paying heed to the time which it will take to effect collection. Costs of collecting may be a substantial factor in the settlement of small claims, but normally will not carry great weight in the settlement of large claims. In determining whether the cost of collecting justifies enforced collection of the full amount, it is legitimate to consider the positive effect that enforced collection of some claims may have on the collection of other claims. Since debtors are more likely to pay when first requested to do so if an agency has a policy of vigorous collection of all claims, the fact that the cost of collection of any one claim may exceed the amount of the claim does not necessarily mean that the claim should be compromised. The practical benefits of vigorous collection of a small claim may include a demonstration to other debtors that resistance to payment is not likely to succeed.

(f) *Enforcement policy.* Statutory penalties, forfeitures, or debts established as an aid to enforcement and to compel compliance may be compromised pursuant to this part if the agency's enforcement policy in terms of deterrence and securing compliance, both present and future, will be adequately served by acceptance of the sum to be agreed upon. Mere accidental or technical violations may be dealt with less severely than willful and substantial violations.

(g) Compromises payable in installments are to be discouraged. However, if payment of a compromise by installments is necessary, a legally enforceable agreement for the reinstatement of the prior indebtedness less sums paid thereon and acceleration of the balance due upon default in the payment of any installment should be obtained, together with security in the manner set forth in § 1261.411, in every case in which this is possible.

(h) If the agency's files do not contain reasonably up-to-date credit information as a basis for assessing a compromise proposal, such information may be

BEST COPY AVAILABLE

obtained from the individual debtor by obtaining a statement executed under penalty of perjury showing the debtor's assets and liabilities, income, and expenses. Forms such as Department of Justice Form OBD–500 or OBD–500B may be used for this purpose. Similar data may be obtained from corporate debtors using a form such as Department of Justice Form OBD–500C or by resort to balance sheets and such additional data as seems required. Samples of the Department of Justice forms are available from the Office of the NASA General Counsel. Neither a percentage of a debtor's profits nor stock in a debtor corporation will be accepted in compromise of a claim. In negotiating a compromise with a business concern, consideration should be given to requiring a waiver of the tax-loss-carry-back rights of the debtor.

(i) *Joint and several liability.* When two or more debtors are jointly and severally liable, collection action will not be withheld against one such debtor until the other or others pay their proportionate shares. NASA will not attempt to allocate the burden of paying such claims as between the debtors but will proceed to liquidate the indebtedness as quickly as possible. Care should be taken that a compromise agreement with one such debtor does not release the agency's claim against the remaining debtors. The amount of a compromise with one such debtor shall not be considered a precedent or as morally binding in determining the amount which will be required from other debtors jointly and severally liable on the claim.

**§ 1261.415 Execution of releases.**

Upon receipt of full payment of a claim, or the amount in compromise of a claim as determined pursuant to § 1261.414, the official designated in § 1261.402 will prepare and execute, on behalf of the United States, an appropriate release, which shall include the provision that it shall be void if procured by fraud, misrepresentation, the presentation of a false claim, or mutual mistake of fact.

**§ 1261.416 Suspending or terminating collection action.**

(a) The standards set forth in this section apply to the suspension or termination of collection action pursuant to 31 U.S.C. 3711(a)(3) on claims which do not exceed $20,000, exclusive of interest, penalties, and administrative costs, after deducting the amount of partial payments or collections, if any. NASA may suspend or terminate collection action under this part with respect to claims for money or property arising out of activities of the agency, prior to the referral of such claims to the General Accounting Office or to the Department of Justice for litigation. The Comptroller General (or designee) may exercise such authority with respect to claims referred to the General Accounting Office prior to their further referral for litigation.

(b) If, after deducting the amount of partial payments or collections, if any, a claim exceeds $20,000, exclusive of interest, penalties, and administrative costs, the authority to suspend or terminate rests solely with the Department of Justice. If the designated official believes suspension or termination may be appropriate, the matter should be evaluated using the factors set forth in paragraphs (c) and (d) of this section. If the agency concludes that suspension or termination is appropriate, it must refer the matter, with its reasons for the recommendation, to the Department of Justice, using the Claims Collection Litigation Report. See § 1261.417(e) or 4 CFR 105.2(b). If NASA decides not to suspend or terminate collection action on the claim, Department of Justice approval is not required; or if it determines that its claim is plainly erroneous or clearly without legal merit, it may terminate collection action regardless of the amount involved, without the need for Department of Justice concurrence.

(c) *Suspension of collection activity—*(1) *Inability to locate debtor.* Collection action may be suspended temporarily on a claim when the debtor cannot be located after diligent effort and there is reason to believe that future collection action may be sufficiently productive to justify periodic review and action on the claim, with due consideration for the size and amount which may be realized thereon. The following sources may be of assistance in locating missing debtors: Telephone directories; city directories; postmasters; drivers' license records; automobile title and registration records; state and local government agencies; the Internal Revenue Service (see 4 CFR 102.18); other Federal agencies; employers, relatives, friends; credit agency skip locate reports, and credit bureaus. Suspension as to a particular debtor should not defer the early liquidation of security for the debt. Every reasonable effort should be made to locate missing debtors sufficiently in advance of the bar of the applicable statute of limitations, such as 28 U.S.C. 2415, to permit the timely filing of suit if such action is warranted. If the missing debtor has signed a confess-judgment note and is in default, referral of the note for the entry of judgment should not be delayed because of the debtor's missing status.

(2) *Financial condition of debtor.* Collection action may also be suspended temporarily on a claim when the debtor owns no substantial equity in realty or personal property and is unable to make payments on the Government's claim or effect a compromise at the time, but the debtor's future prospects justify retention of the claim for periodic review and action, and:

(i) The applicable statute of limitations has been tolled or started running anew; or

(ii) Future collection can be effected by offset, notwithstanding the statute of limitations, with due regard to the 10-year limitation prescribed by 31 U.S.C. 3716(c)(1); or

(iii) The debtor agrees to pay interest on the amount of the debt on which collection action will be temporarily suspended, and such temporary suspension is likely to enhance the debtor's ability to fully pay the principle amount of the debt with interest at a later date.

(3) Request for waiver or administrative review. If the statute under which waiver or administrative review is sought is "mandatory," that is, if it prohibits the agency from collecting the debt prior to the agency's consideration of the request for waiver or review (see *Califano* v. *Yamasaki,* 422 U.S. 682 (1979)), then collection action must be suspended until either: The agency has considered the request for waiver/review; or the applicable time limit for making the waiver/review request, as prescribed in a written notice, has expired and the debtor, upon notice, has not made such a request. If the applicable waiver/review statute is "permissive," that is, if it does not require all requests for waiver/review to be considered, and if it does not prohibit collection action pending consideration of a waiver/request (for example, 5 U.S.C. 5584), collection action may be suspended pending agency action on a waiver/review request based upon appropriate consideration, on a case-by-case basis, as to whether:

(i) There is a reasonable possibility that waiver will be granted or that the debt (in whole or in part) will be found not owing from the debtor;

(ii) The Government's interests would be protected, if suspension were granted, by reasonable assurance that the debt could be recovered if the debtor does not prevail; and

(iii) Collection of the debt will cause undue hardship.

(4) If the applicable statutes and regulations would not authorize refund by the agency to the debtor of amounts collected prior to agency consideration of the debtor's waiver/review request (in the event the agency acts favorably on it), collection action should ordinarily be suspended, without regard to the factors specified for permissive waivers, unless it appears clear, based on the request and the surrounding circumstances, that the request is frivolous and was made primarily to delay collection. See 4 CFR 104.2.

(d) *Termination of collection activity.* Collection activity may be terminated and NASA may close its file on the claim based on the following:

(1) Inability to collect any substantial amount. Collection action may be terminated on a claim when it becomes clear that the Government cannot collect or enforce collection of any significant sum from the debtor, having due regard for the judicial remedies available to the Government, the debtor's future financial prospects, and the exemptions available to the debtor under State and Federal law. In determining the debtor's inability to pay, the following factors, among others, may be considered: Age and health of the debtor; present and potential income; inheritance prospects; the possibility that assets have been concealed or improperly transferred by the debtor; the availability of assets or income which may be realized by enforced collection proceedings.

(2) *Inability to locate debtor.* Collection action may be terminated on a claim when the debtor cannot be located, and either:

(i) There is no security remaining to be liquidated; or

(ii) The applicable statute of limitations has run and the prospects of collecting by offset, notwithstanding the bar of the statute of limitations, are too remote to justify retention of the claim.

(3) *Cost will exceed recovery.* Collection action may be terminated on a claim when it is likely that the cost of further collection action will exceed the amount recoverable thereby.

(4) *Claim legally without merit.* Collection action should be terminated immediately on a claim whenever it is determined that the claim is legally without merit.

(5) *Claim cannot be substantiated by evidence.* Collection action should be terminated when it is determined that the evidence necessary to prove the claim cannot be produced or the necessary witnesses are unavailable and efforts to reduce voluntary payment are unavailing.

(e) *Transfer of claim.* When NASA has doubt as to whether collection action should be suspended or terminated on a claim, it may refer the claim to the General Accounting Office for advice. When a significant enforcement policy is involved in reducing a statutory penalty or forfeiture to judgment, or recovery of a judgment is a prerequisite to the imposition of administrative sanctions, such as the suspension or revocation of a license or the privilege of participating in a Government sponsored program, NASA may refer such a claim for litigation even though termination of collection activity might otherwise be given consideration under paragraphs (d)(1) and (2) of this section. Claims on which NASA holds a judgment by assignment or otherwise will be referred to the Department of Justice for further action if renewal of the judgment lien or enforced collection proceedings are justified under the criteria discussed in this section.

### § 1261.417 Referral to Department of Justice (DJ) or General Accounting Office (GAO).

(a) *Prompt referral.* Except as provided in paragraphs (b) and (c) of this section, claims on which aggressive collection action has been taken in accordance with § 1261.406 and which cannot be compromised, or on which collection action cannot be suspended or terminated, in accordance with § 1261.414 and § 1261.416, shall be promptly referred to the Department of Justice for litigation.

(1) Claims for which the gross original amount is over $200,000 shall be referred to the Commercial Litigation Branch, Civil Division, Department of Justice, Washington, DC 20530.

(2) Claims for which the gross original amount is $200,000 or less shall be referred to the United States Attorney in whose judicial district the debtor can be found. Referrals should be made as early as possible, consistent with aggressive agency collection action and the observance of the regulations contained in this subpart, and in any event, well within the period for bringing a timely suit against the debtor. Ordinarily, referrals should be made within 1 year of the agency's final determination of the fact and the amount of the debt.

(3) *Minimum amount.* NASA is not to refer claims of less than $600, exclusive of interest, penalties, and administrative costs, for litigation unless:

(i) Referral is important to a significant enforcement policy; or

(ii) The debtor not only has the clear ability to pay the claim but the Government can effectively enforce payment, having due regard for the exemptions available to the debtor under State and Federal law and the judicial remedies available to the Government.

(b) Claims arising from audit exceptions taken by the GAO to payments made by agencies must be referred to the GAO for review and approval prior to referral to the Department of Justice for litigation, unless NASA has been granted an exception by the GAO. Referrals shall comply with instructions, including monetary limitations, contained in the GAO Policy and Procedures Manual for Guidance to Federal Agencies and paragraphs (e) and (f) of this section.

(c) When the merits of the claim, the amount owed on the claim, or the propriety of acceptance of a proposed compromise, suspension, or termination are in doubt, the designated official should refer the matter to the General Accounting Office for resolution and instructions prior to proceeding with collection action and/or referral to the Department of Justice for litigation.

(d) Once a claim has been referred to GAO or to the Department of Justice pursuant to this section, NASA shall refrain from having any contact with the debtor about the pending claim and shall direct the debtor to GAO or to the DJ, as appropriate, when questions concerning the claim are raised by the debtor. GAO or the DJ, as appropriate, shall be immediately notified by NASA of any payments which are received from the debtor subsequent to referral of a claim under this section.

(e) *Claims Collection Litigation Report (CCLR).* Unless an exception has been granted by the Department of Justice in consultation with the General Accounting Office, the Claims Collection Litigation Report (CCLR), which was officially implemented by NASA, effective March 1, 1983, shall be used with all referrals of administratively uncollectible claims. As required by the CCLR, the following information must be included:

(1) *Report of prior collection actions.* A checklist or brief summary of the actions previously taken to collect or compromise the claim. If any of the administrative collection actions have been omitted, the reason for their omission must be provided. GAO, the United States Attorney, or the Civil Division of the Department of Justice may return claims at their option when there is insufficient justification for the omission of one or more of the

administrative collection actions enumerated in this subpart (see 4 CFR Part 102).

(2) *Current address of debtor.* The current address of the debtor, or the name and address of the agent for a corporation upon whom service may be made. Reasonable and appropriate steps will be taken to locate missing parties in all cases. Referrals to the Department of Justice for the commencement of foreclosure of other proceedings, in which the current address of any party is unknown, will be accompanied by a listing of the prior known addresses of such party and a statement of the steps taken to locate that party.

(3) *Credit data.* Reasonably current credit data which indicates that there is a reasonable prospect of effecting enforced collection from the debtor, having due regard for the exemptions available to the debtor under State and Federal law and the judicial remedies available to the Government. Such credit data may take the form of:

(i) A commercial credit report;

(ii) An agency investigative report showing the debtor's assets, liabilities, income, and expenses;

(iii) The individual debtor's own financial statement executed under penalty of perjury reflecting the debtor's assets, liabilities, income, and expenses; or

(iv) An audited balance sheet of a corporate debtor.

(4) Reasons for credit data omissions. The credit data may be omitted if:

(i) A surety bond is available in an amount sufficient to satisfy the claim in full;

(ii) The forced sale value of the security available for application to the Government's claim is sufficient to satisfy the claim in full;

(iii) NASA wishes to liquidate loan collateral through judicial foreclosure but does not desire a deficiency judgment;

(iv) The debtor is in bankruptcy or receivership;

(v) The debtor's liability to the Government is fully covered by insurance, in which case NASA will furnish such information as it can develop concerning the identity and address of the insurer and the type and amount of insurance coverage; or

(vi) The status of the debtor is such that credit data is not normally available or cannot reasonably be obtained, for example, a unit of State or local government.

(f) *Preservation of evidence.* Care will be taken to preserve all files, records, and exhibits on claims referred or to be referred to the Department of Justice for litigation. Under no circumstances should original documents be sent to the Department of Justice or the United States Attorney without specific prior approval to do so. Copies of relevant documents should be sent whenever necessary.

## Subpart 1261.5—Administrative Offset of Claims.

### § 1261.500 Scope of subpart.

(a) This subpart applies to collection of claims by administrative offset under section 5 of the Federal Claims Collection Act of 1966 as amended by the Debt Collection Act of 1982 (31 U.S.C. 3716), other statutory authority, or the common law; it does not include "Salary Offset," which is governed by Subpart 1261.6, infra. Consistent with 4 CFR 102.3, collection by administrative offset will be undertaken by NASA on all liquidated or certain in amount claims in every instance in which such collection is determined to be feasible and not otherwise prohibited.

(b) Whether collection by administrative offset is feasible is a determination to be made by NASA on a case-by-case basis, in the exercise of sound discretion. NASA will consider not only whether administrative offset can be accomplished, both practically and legally, but also whether offset is best suited to further and protect all of the Government's interests. In appropriate circumstances, NASA may give due consideration to the debtor's financial condition; or whether offset would tend to substantially interfere with or defeat the purposes of the program authorizing the payments against which offset is contemplated. For example, under a grant program in which payments are made in advance of the grantee's performance, offset will normally be inappropriate.

(c) NASA is not authorized by 31 U.S.C. 3716 to use administrative offset with respect to:

(1) Debts owed by any State or local Government;

(2) Debts arising under or payments made under the Social Security Act, the Internal Revenue Code of 1954, or the tariff laws of the United States; or

(3) Any case in which collection of the type of debt involved by administrative offset is explicitly provided for or prohibited by another statute. However, unless otherwise provided by contract or law, debts or payments which are not subject to administrative offset under 31 U.S.C. 3716 may be collected by administrative offset under the common law or other applicable statutory authority.

### § 1261.501 Definition.

"Administrative offset"—the term, as defined in 31 U.S.C. 3701(a)(1), means "withholding money payable by the United States Government to, or held by the Government for, a person to satisfy a debt the person owes the Government."

### § 1261.502 Notification procedures.

(a) Before collecting any claims through administrative offset, a 30-day written notice must be sent to the debtor by certified mail, return receipt requested. The notice must include:

(1) The nature and amount of the debt;

(2) NASA's intention to collect by administrative offset; and

(3) An explanation of the debtor's rights under 31 U.S.C. 3716(a), or other relied upon statutory authority, which must include a statement that the debtor has the opportunity, within the 30-day notice period, to:

(i) Inspect and copy records of NASA with respect to the debt;

(ii) Request a review by NASA of its decision related to the claim; and

(iii) Enter into a written agreement with the designated official (see § 1261.402) to repay the amount of the claim. However, sound judgment should be exercised in determining whether to accept a repayment agreement in lieu of offset. The determination should balance the Government's interest in collecting the debt against fairness to the debtor. If the debt is delinquent and the debtor has not disputed its existence or amount, NASA should accept a repayment agreement in lieu of offset only if the debtor is able to establish that offset would result in undue financial hardship or would be against equity and good conscience.

(b) NASA may effect administrative offset against a payment to be made to a debtor prior to the completion of the procedures required by paragraph (a) of this section if:

(1) Failure to take the offset would substantially prejudice the Government's ability to collect the debt; and

(2) The time before the payment is to be made does not reasonably permit the completion of those procedures. Such prior offset must be promptly followed by the completion of those procedures. Amounts recovered by offset but later found not to be owed to the Government shall be promptly refunded.

(3) In cases where the procedural requirements of paragraph (a) of this section had previously been provided to the debtor in connection with the same debt under some other statutory or regulatory authority, such as pursuant to

a notice of audit disallowance or salary offset under § 1261.603, the agency is not required to duplicate those requirements before taking administrative offset.

**§ 1261.503 Agency records inspection; hearing or review.**

(a) NASA shall provide the debtor with a reasonable opportunity for an "oral hearing" when:

(1) An applicable statute authorizes or requires the agency to consider waiver of the indebtedness involved, the debtor requests waiver of the indebtedness, and the waiver determination turns on an issue of credibility or veracity; or

(2) The debtor requests reconsideration of the debt and the agency determines that the question of the indebtedness cannot be resolved by review of the documentary evidence, for example, when the validity of the debt turns on an issue of credibility or veracity. Unless otherwise required by law, an oral hearing under this section is not required to be a formal evidentiary-type hearing, although significant matters discussed at the hearing should be carefully documented. See 4 CFR 102.3(c)(1). Such hearing may be an informal discussion/interview with the debtor, face-to-face meeting between debtor and cognizant NASA personnel, or written formal submission by the debtor and response by the NASA cognizant personnel with an opportunity for oral presentation. The hearing will be conducted before or in the presence of an official designated by the NASA General Counsel or designee on a case-by-case basis. The decision of the reviewing/hearing official should be communicated in writing (no particular form is required) to the affected parties, and will constitute the final administrative decision of the agency.

(b) Paragraph (a) of this section does not require an oral hearing with respect to debt collection systems in which determinations of indebtedness or waiver rarely involve issues of credibility or veracity and NASA has determined that review of the written record is ordinarily an adequate means to correct prior mistakes. In administering such a system, the agency is not required to sift through all of the requests received in order to accord oral hearings in those few cases which may involve issues of credibility or veracity. See 4 CFR 102.3(c)(2).

(c) In those cases where an oral hearing is not required or granted, NASA will nevertheless accord the debtor a "paper hearing"—that is, the agency will make its determination on the request for waiver or reconsideration based upon a review of the available written record. See 4 CFR 102.3(c)(3). In such case, the responsible official or designee shall refer the request to the appropriate NASA legal counsel for review and determination by counsel or designee.

(d) A request to inspect and/or copy the debtor's own debt records or related files, and/or for a hearing or review accompanied by a statement of the basis or grounds for such hearing or review, must be submitted within 30 calendar days of the receipt of the written notice under § 1261.502(a). A reasonable time to inspect and copy records will be provided during official working hours, but not to exceed 5 business days, unless a verified statement showing good cause requires a longer period. Any suspension of collection or other charges during the period of the inspection, or hearing or review, shall comply with § 1261.412 and § 1261.416. Requests for or consideration of compromising the debt must comply with § 1261.414.

**§ 1261.504 Interagency requests.**

(a) Requests to NASA by other Federal agencies for administrative offset should be in writing and forwarded to the Office of the NASA Comptroller, NASA Headquarters, Washington, DC 20546.

(b) Requests by NASA to other Federal agencies holding funds payable to the debtor should be in writing and forwarded, certified return receipt, as specified by that agency in its regulations; however, if such rule is not readily available or identifiable, the request should be submitted to that agency's office of legal counsel with a request that it be processed in accordance with their internal procedures.

(c) Requests to and from NASA should be processed within 30 calendar days of receipt. If such processing is impractical or not feasible, notice to extend the time period for another 30 calendar days should be forwarded 10 calendar days prior to the expiration of the first 30-day period.

(d) Requests from or to NASA must be accompanied by a certification that the debtor owes the debt (including the amount) and that the provisions of (or comparable to) Subpart 1261.5 or Subpart 1261.6, as applicable, have been fully complied with. NASA will cooperate with other agencies in effecting collection.

**§ 1261.505 Multiple debts.**

When collecting multiple debts by administrative offset, NASA will apply the recovered amounts to those debts in accordance with the best interests of the United States, as determined by the facts and circumstances of the particular case, paying special attention to applicable statutes of limitations.

**§ 1261.506 Limitation periods.**

NASA may not initiate administrative offset to collect a debt under 31 U.S.C. 3716 more than 10 years after the Government's right to collect the debt first accrued, unless facts material to the Government's right to collect the debt were not known and could not reasonably have been known by the official or officials of the Government who were charged with the responsibility to discover and collect such debts. Determination of when the debt first accrued is to be made in accordance with existing law regarding the accrual of debts, such as under 28 U.S.C. 2415. See 4 CFR 102.3(b)(3).

**§ 1261.507 Civil Service Retirement and Disability Fund.**

(a) Unless otherwise prohibited by law, NASA may request that moneys which are due and payable to a debtor from the Civil Service Retirement and Disability Fund be administratively offset in reasonable amounts in order to collect in one full payment or a minimal number of payments debts owed to the United States by the debtor. Such requests shall be made to the appropriate officials of the Office of Personnel Management (OPM) in accordance with the OPM regulations (see 5 CFR 831.1801, *et seq.*).

(b) When making a request for administrative offset under paragraph (a) of this section, NASA shall include a written certification that:

(1) The debtor owes the United States a debt, including the amount of the debt;

(2) NASA has complied with the applicable statutes, regulations, and procedures of the Office of Personnel Management; and

(3) NASA has complied with the requirements of this Subpart 1261.5 which implements 4 CFR 102.3, including any required hearing or review.

(c) Once NASA has decided to request administrative offset under this section, the request should be made as soon as practical after completion of the applicable procedures in order that the Office of Personnel Management may identify and "flag" the debtor's account in anticipation of the time when the debtor requests or becomes eligible to receive payments from the Fund. This will satisfy any requirement that offset be initiated prior to expiration of the applicable statute of limitations. At such time as the debtor makes a claim for payments from the Fund, if at least a year has elapsed since the offset request

was originally made, the debtor should be permitted to offer a satisfactory repayment plan in lieu of offset upon establishing that changed financial circumstances would render the offset unjust.

(d) If NASA collects part or all of the debt by other means before deductions are made or completed pursuant to paragraph (a) of this section, the designated official should act promptly to modify or terminate the agency's request to OPM for offset.

(e) OPM is not required or authorized by 4 CFR 102.4 to review the merits of NASA's determination with respect to:

(1) The amount and validity of the debt;

(2) Waiver under an applicable statute; or

(3) Provide or not provide an oral hearing.

**§ 1261.508 Offset against a judgment.**

Collection by offset against a judgment obtained by a debtor against the United States shall be accomplished in accordance with 31 U.S.C. 3728.

## Subpart 1261.6—Collection by Offset From Indebted Government Employees

**§ 1261.600 Purpose of subpart.**

This subpart implements 5 U.S.C. 5514 in accordance with the OPM regulation and establishes the procedural requirements for recovering pre-judgment debts from the current pay account of an employee through what is commonly called salary offset, including a situation where NASA (the current paying agency) is not the employee's creditor agency. Salary offset to satisfy a judgment or a court determined debt is governed by section 124 of Pub. L. 97-276 (October 2, 1982), 5 U.S.C. 5514 *note*.

**§ 1261.601 Scope of subpart.**

(a) Coverage. This subpart applies to agencies and employees as defined in § 1261.602.

(b) Applicability. This subpart and 5 U.S.C. 5514 apply in recovering certain prejudgment debts by administrative offset except where the employee consents to the recovery, from the current pay account of an employee. Because it is an administrative offset, debt collection procedures for salary offset which are not specified in 5 U.S.C. 5514 and this subpart should be consistent with Subpart 1261.5.

(1) Excluded debts or claims. The procedures contained in this subpart do not apply to debts or claims arising under the Internal Revenue Code of 1954 as amended (26 U.S.C. 1 *et seq.*), the Social Security Act (42 U.S.C. 301 *et seq.*), or the tariff laws of the United States; or to any case where collection of a debt by salary offset is explicitly provided for or prohibited by another statute (e.g., travel advances in 5 U.S.C. 5705, employee training expenses in 5 U.S.C. 4108, and debts determined by a court as provided in 5 U.S.C. 5514 *note*).

(2) Waiver requests and claims to the General Accounting Office. This subpart does not preclude an employee from requesting waiver of a salary overpayment under 5 U.S.C. 5584, 10 U.S.C. 2774, or 32 U.S.C. 716, or in any way questioning the amount or validity of a debt by submitting a subsequent claim to the General Accounting Office in accordance with procedures prescribed by the General Accounting Office. Similarly, in the case of other types of debts, it does not preclude an employee from requesting waiver, if waiver is available under any statutory provision pertaining to the particular debt being collected.

**§ 1261.602 Definitions.**

For purposes of this subpart:

(a) "Agency" means:

(1) An Executive agency as defined in section 105 of title 5, United States Code, including U.S. Postal Service and the U.S. Postal Rate Commission;

(2) A military department as defined in section 102 of Title 5, United States Code;

(3) An agency or court in the judicial branch, including a court as defined in section 610 of Title 28, United States Code, the District Court for the Northern Mariana Islands, and the Judicial Panel on Multidistrict Litigation;

(4) An agency of the legislative branch, including the U.S. Senate and the U.S. House of Representatives; and

(5) Other independent establishments that are entities of the Federal Government.

(b) "Creditor agency" means the agency to which the debt is owed.

(c) "Debt" means an amount owed to the United States from sources which include loans insured or guaranteed by the United States and all other amounts due the United States from fees, leases, rents, royalties, services, sales of real or personal property, overpayments, penalties, damages, interest, fines and forfeitures (except those arising under the Uniform Code of Military Justice), and all other similar sources.

(d) "Disposable pay" means that part of current basic pay, special pay, incentive pay, retired pay, retainer pay, or in the case of an employee not entitled to basic pay, other authorized pay remaining after the deduction of any amount required by law to be withheld. NASA must exclude deductions listed in OPM's garnishment regulations at 5 CFR 581.105 (b) through (f) to determine disposable pay subject to salary offset.

(e) "Employee" means a current employee of an agency, including a current member of the Armed Forces or a Reserve of the Armed Forces (Reserves).

(f) "Paying agency" means the agency employing the individual and authorizing the payment of his or her current pay.

(g) "Salary offset" means an administrative offset to collect a debt under 5 U.S.C. 5514 by deduction(s) at one or more officially established pay intervals from the current pay account of an employee without his or her consent.

(h) "Waiver" means the cancellation, remission, forgiveness, or nonrecovery of a debt allegedly owed by an employee to an agency as permitted or required by 5 U.S.C. 5584(b), or any other law.

**§ 1261.603 Procedures for salary offset.**

If NASA is both the paying and creditor agency, the following requirements must be met before a deduction is made from the current pay account of an employee.

(a) *Written notice.* The employee must be sent a minimum of 30 days written notice, which specifies:

(1) The origin, nature and amount of the indebtedness, and the official to contact within the agency (ordinarily, the designated financial management official for the particular installation);

(2) The intention of the agency to initiate collection of the debt through salary offset by deductions from the employee's current disposable pay, stating the amount, frequency, proposed beginning date, and duration of intended deductions (the amount to be de 'ucted for any period, without the consent of the employee, may not exceed 15 percent of disposable pay);

(3) An explanation of any interest, penalties, or administrative costs included in the amount, and that such assessment must be made unless excused in accordance with 24 CFR 1261.612;

(4) The right for an opportunity (which does not toll the running of the 30-day period) to inspect and copy NASA records relating to the debt or to request and receive (if reasonable) a copy of such records, provided that such opportunity must be exercised on or before the 15th day following receipt of the notice and can be conducted only during official working hours for a reasonable period of time not to exceed 5 working days;

(5) If not previously provided, the opportunity (under terms agreeable to NASA) to establish a schedule for the voluntary repayment of the debt or to enter into a written agreement to establish a schedule for repayment of the debt in lieu of offset. The agreement must be in writing, signed by both the employee and the authorized agency official (see 14 CFR 1261.402) and documented in NASA's files (see 14 CFR 1261.407(d));

(6) An opportunity for a hearing, as provided in paragraph (c) of this section, on the agency's determination concerning the existence and amount of the debt, and the terms of the repayment schedule (in the case of an employee whose repayment schedule is established other than by written agreement);

(7) The hearing request should be addressed to the Office of the NASA General Counsel or to the Office of Chief Counsel of the NASA installation involved, as appropriate; counsel's name and address will be as stated in the notice.

(8) Any other rights and remedies available to the employee under statutes or regulations governing the program for which the collection is being made; and

(9) Unless there are applicable contractual or statutory provisions to the contrary, that amounts paid on or deducted for the debt which are later waived or found not owed to the United States will be promptly refunded to the employee.

(b) *Exception to entitlement to written notice.* NASA is not required to comply with paragraph (a) of this section for any adjustment to pay arising out of an employee's election of coverage or a change in coverage under a Federal benefits program requiring periodic deductions from pay, if the amount to be recovered was accumulated over four pay periods or less.

(c) *Petition filing; hearing; decision and review.* The notice described in paragraph (a) of this section should include the following provisions, which may be copied and attached to the notice.

(1) The employee may petition for a hearing, but such petition must be in writing and received by NASA on or before the 15th day following receipt of the notice, and include a statement of the reasons for such hearing. No particular form is required, and a timely, legible letter request (with the stated reasons) will suffice; however, the employee must sign the petition and include with it, with reasonable specificity, all the supporting facts and evidence, including a list of the witnesses, if any.

(2) The petition should be addressed to the agency counsel designated in the notice, but the hearing will be conducted by an official not under the supervision or control of the NASA Administrator or by appointment of an administrative law judge. Notice of the name and address of the hearing official will be sent to the employee within 10 days of receipt of petition. A hearing official will be designated on a case-by-case basis under reimbursable arrangements or through direct payment as events may warrant.

(3) The timely filing of the petition will stay the commencement of collection; and the final decision on the hearing will be issued at the earliest practicable date, but not later than 60 days after the filing of the petition requesting the hearing unless the employee requests and the hearing official grants a delay in the proceedings.

(4) Any knowingly false or frivolous statements, representations, or evidence may subject the employee to:

(i) Disciplinary procedures appropriate under Chapter 75 of Title 5, United States Code, 5 CFR Part 752, or any other applicable statutes or regulations;

(ii) Penalties under the False Claims Act, sections 3729 through 3731 of Title 31, United States Code, or any other applicable statutory authority; or

(iii) Criminal penalties under sections 286, 287, 1001, and 1002 of Title 18, United States Code, or any other applicable statutory authority.

(5) The form and content of the hearing will be determined by the hearing official depending on the nature and complexity of the transaction giving rise to the debt. The hearing is not an adversarial adjudication, and need not take the form of an evidentiary hearing. However, depending on the particular facts and circumstances, the hearing may be analogous to a fact-finding proceeding with oral presentations; or an informal meeting with or interview of the employee; or formal written submissions, with an opportunity for oral presentation, and decision based on the available written record. Ordinarily, hearings may consist of informal conferences before the hearing official in which the employee and agency officials will be given full opportunity to present evidence, witnesses, and argument. The employee may represent himself or herself or be represented by an individual of his or her choice. The hearing official must maintain a summary record of the hearing provided under this subpart. For additional guidance, see 14 CFR 1261.503.

(6) The decision will be in writing and state:

(i) The facts purported to evidence the nature and origin of the alleged debt;

(ii) The respective positions of the agency and of the employee;

(iii) The hearing official's analysis (which address the employee's/agency's grounds, the amount and validity of the alleged debt, and, where applicable, the repayment schedule); and

(iv) The hearing official's findings and conclusions.

(7) The hearing official will notify the employee, the NASA Comptroller or designee, and the designated agency counsel of the decision.

(8) The decision of the hearing official shall constitute the Final Administrative Decision of the agency.

(d) Petition after time expiration. No petition for a hearing is to be granted if made after the 15-day period prescribed in paragraph (c)(1) of this section, unless the employee can show to the satisfaction of the agency official indicated on the notice that the delay was caused by circumstances beyond his or her control (for example, proven incapacity, illness, or hospitalization), or that the agency did not give notice of the time limit and the employee was otherwise unaware of such limit.

(e) *Limitation on amount and duration of deductions.* Ordinarily, debts must be collected in one lump-sum payment. However, if the employee is financially unable to pay in one lump sum or if the amount of the debt exceeds 15 percent of disposable pay for an officially established pay interval, collection must be made in installments. The size of installment deductions must bear a reasonable relationship to the size of the debt and the employee's ability to pay (see 14 CFR 1261.411), but the amount deducted for any period must not exceed 15 percent of the disposable pay from which the deduction is made (unless the employee has agreed in writing to the deduction of a greater amount). Deduction must commence with the next full pay interval (ordinarily, the next biweekly pay period). Such installment deductions must be made over a period not greater than the anticipated period of active duty or employment, as the case may be, except as provided in paragraph (f) of this section.

(f) *Determining ability to pay.* An offset may produce an extreme financial hardship for an employee if it prevents the employee from meeting costs necessarily incurred for essential subsistence expenses for food, reasonable housing, clothing, transportation, and medical care. In determining whether an offset would prevent the employee from meeting the

essential subsistence expenses, the employee may be required to show income from all sources (including spouse and dependents, if applicable), list all known assets, explain exceptional expenses, and produce any other relevant factors.

(g) *Liquidation from final check; other recovery.* If the employee retires or resigns from Federal service, or if his or her employment or period of active duty ends before collection of the debt is completed, the balance may be deducted from the final salary payment and any remaining balance from the lump-sum leave, if applicable. If the debt is not fully paid by offset from any final payment due the former employee as of the date of separation, offset may be made from later payments of any kind due the former employee from the United States (as provided in 14 CFR Part 1261 Subpart 1261.5, including offset from the Civil Service Retirement and Disability Fund under 14 CFR 1261.507).

(h) *Interest, penalties, and administrative costs.* Assessment of interest, penalties, and administrative costs, on debts being collected under this subpart, shall be in accordance with 14 CFR 1261.412 which implements 4 CFR 102.13.

**§ 1261.604 Nonwaiver of rights by involuntary setoff.**

The employee's involuntary payment of all or any portion of the debt, being collected under this subpart, must not be construed as a waiver of any rights which the employee may have under an existing written contract applicable to the specific debt or under any other pertinent statutory authority for the collection of claims of the United States or the agency.

**§ 1261.605 Refunds.**

(a) NASA will promptly refund to the employee amounts paid or deducted under this subpart when:

(1) A debt is waived or otherwise found not owing the United States (unless expressly prohibited by statute or regulation); or

(2) The employee's paying agency is directed by an administrative or judicial order to refund amounts deducted from his or her current pay.

(b) Refunds are not to bear any interest unless the law applicable to that particular debt specifically requires or permits a stated interest amount on refunds.

**§ 1261.606 Salary offset request by a creditor agency other than NASA (the current paying agency).**

(a) *Format of the request.* Upon completion of the procedures established by the creditor agency under 5 U.S.C. 5514, the creditor agency must:

(1) Certify, in writing, that the employee owes the debt, the amount and basis of the debt, the date on which payment(s) is/are due, the date the Government's right to collect the debt first accrued, and that the creditor agency's regulations implementing 5 U.S.C. 5514 have been approved by OPM;

(2) If the collection must be made in installments, the creditor agency must also advise NASA of the number of installments to be collected, the amount of each installment, and the commencing date of the first installment, if a date other than the next officially established pay period is required; and

(3) Unless the employee has consented to the salary offset in writing or signed a statement acknowledging receipt of the required procedures and the writing or statement is attached to the debt claim request, the creditor agency must also indicate the action(s) taken under 5 U.S.C. 5514(a)(2) and give the date(s) the action(s) was/were taken.

(b) *Limitation period.* The creditor agency may not initiate offset to collect a debt more than 10 years after the Government's right to collect the debt first accrued, except as provided in 14 CFR 1261.506, which implements 4 CFR 102.3(b)(3).

(c) *Employees who are separating or have separated*— (1) *Employees who are in the process of separating.* If the employee is in the process of separating, the creditor agency must submit its debt claim to the employee's paying agency for collection as provided in 5 CFR 550.1104(1) of the OPM regulations (14 CFR 1261.603(f)) for "liquidation from final check." NASA must then certify the total amount of its collection and notify the creditor agency and the employee as provided in paragraph (c)(3) of this section. If NASA is aware that the employee is entitled to payments from the Civil Service Retirement and Disability Fund, or other similar payments, it should notify the creditor agency and forward the copy of the debt claim and certification to the agency responsible for making such payments as notice that a debt is outstanding. However, the creditor agency, not NASA, must submit a properly certified claim to the agency responsible for making such payments before collection can be made.

(2) *Employees who have already separated.* If the employee is already separated and all payments due from NASA have been paid, NASA must return the claim to the creditor agency for any further collection, indicating the employee's date of separation and the current employment and mailing address(es), if known.

(3) Employee who transfers from NASA to another Federal agency.

(i) *Certification of amount collected.* If, after the creditor agency has submitted the debt claim to NASA, the employee transfers to another Federal agency before the debt is collected in full, NASA must then certify the total amount of the collection made on the debt. A copy of the certification should be furnished the employee, and another copy furnished to the creditor agency along with notice of the employee's transfer.

(ii) *Official personnel folder insertion; new paying agency.* Information on the debt claim must be inserted in the employee's official personnel folder along with a copy of the certification of the amount which has been collected. Upon receiving the official personnel folder, the new paying agency must resume the collection from the employee's current pay account and notify the employee and the creditor agency of the resumption. It will not be necessary for the creditor agency to repeat the due process procedures described by 5 U.S.C. 5514 of this subpart in order to resume the collection. However, it will be the responsibility of the creditor agency to review the debt upon receiving NASA's notice of the employee's transfer to make sure the collection is resumed by the new paying agency.

(d) *Processing the debt claim upon receipt*— (1) *Incomplete claim.* If NASA receives incomplete debt claim information, it must return the request with a notice that procedures under 5 U.S.C. 5514 and this subpart must be provided and complete debt claim information received before action will be taken to collect from the employee's current pay account.

(2) *Complete claim.* If NASA receives a properly documented debt claim, deductions should be scheduled to begin prospectively at the next officially established pay interval. A copy of the debt claim request must be given to the debtor, along with notice of the date deductions will commence if different from that stated on the debt claim request.

(3) NASA is not required or authorized to review the merits of the creditor agency's determination with respect to the amount or validity of the debt as stated in the debt claim request.

**§ 1261.607 Obtaining the services of a hearing official.**

(a) When the debtor does not work for the creditor agency and the creditor agency cannot provide a prompt and appropriate hearing before an administrative law judge or before a hearing official furnished pursuant to another lawful arrangement, the creditor agency may contact an agent of the paying agency designated in Appendix A of 5 CFR Part 581 to arrange for a hearing official, and the paying agency must then cooperate as provided by 4 CFR 102.1 and provide a hearing official.

(b) When the debtor works for the creditor agency, the creditor agency may contact any agent (of another agency) designated in Appendix A of 5 CFR Part 581 to arrange for a hearing official. Agencies must then cooperate as required by 4 CFR 102.1 and provide a hearing official.

May 14, 1987.

BILLING CODE 7510-01-M

## COMMODITY FUTURES TRADING COMMISSION

**17 CFR Part 11**

**Publication of Appendix Setting Forth Informal Procedure Relating to the Recommendation of Enforcement Proceedings**

**AGENCY:** Commodity Futures Trading Commission.

**ACTION:** Notice of informal procedure.

**SUMMARY:** The Commodity Futures Trading Commission ("Commission") hereby adopts Appendix A to Part 11 of the Commission's Regulations, setting forth an informal procedure regarding the submission of voluntary written statements by persons who may be named in proposed enforcement proceedings. The procedure is intended to inform the public that the Division of Enforcement ("Division") will review information submitted by potential respondents and forward it to the Commission upon request before the Commission votes to commence an enforcement action. The purpose of this procedure is to make information available to assist in the Division's determination to recommend the action and, ultimately, in the Commission's determination whether and in what manner it is in the public interest to commence an enforcement proceeding.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Ray Sandona, Esq., Chief Counsel, Division of Enforcement, Commodity Futures Trading Commission, 2033 K St. NW., Washington, DC 20581 (202) 254-7424.

**SUPPLEMENTARY INFORMATION:** The Commission has adopted Appendix A to Part 11 of its Regulations, the rules relating to investigations. Adopted at the recommendation of its Division of Enforcement ("Division"), Appendix A provides an informal procedure for persons who may be named in proposed enforcement proceedings to submit written statements on matters relevant to the recommendation of the proposed proceeding. The Commission adopts Appendix A upon the completion of a one-year operation of an interim informal procedure adopted April 15, 1986. *See* 51 FR 13548 (April 21, 1986).

The Commission contemplates that the procedure set forth in Appendix A will be the sole vehicle for communications regarding proposed enforcement proceedings between the Commission and persons who may be named in such proceedings. The procedure is intended to inform the public that the Division will review information submitted by potential respondents and forward it to the Commission upon request before the Commission votes to commence an enforcement action. In addition, this release highlights aspects of the procedure that may affect an individual's decision to submit such a statement.

The Division, in its discretion, may orally inform persons who may be named in a proposed enforcement proceeding of the nature of the proposed allegations pertaining to them. The decision whether to inform such persons of a proposed enforcement proceeding is entirely within the discretion of the Division. There is no obligation that the Division inform anyone of the proposed proceeding. In many cases, premature disclosure to the persons suspected of a violation could inhibit effective Commission action. Moreover, notwithstanding any representation of the staff, the Commission may commence an action against any persons before a written submission is made. Applicable provisions of the Procedure, *e.g.*, page limits, should also be followed by persons involved in a Division investigation who wish to submit a statement on their own initiative.

Appendix A provides that a succinct written statement of no more than 20 pages may be submitted to the Director, Division of Enforcement, with copies to the staff conducting the investigation. All submissions should refer clearly to the specific investigation to which they relate. Any submission is voluntary and while it may include a statement of the events, factual circumstances or other matters relevant to the commencement of a proposed enforcement action, the Commission is more interested in a submission that focuses upon legal and policy argument.[1] Any statement of fact must be sworn to by a person with personal knowledge of such fact and may not simply be made by counsel upon information and belief. In this regard, it should be noted that submission of a written statement may result in the use of the statement, including factual admissions, in an administrative or judicial proceeding by the Commission, as well as use by another governmental agency or even by a private party who may obtain the statement under the Freedom of Information Act or pursuant to subpoena.[2]

The purpose of this procedure is to make information available to assist in the Division's determination to recommend the action and, ultimately, in the Commission's determination whether and in what manner it is in the public interest to commence an enforcement proceeding. The procedure permits a written statement only and neither creates a right nor an obligation to make such a statement. In adopting Appendix A, the Commission is not soliciting any presentation from any member of the public. Moreover, Appendix A does not in any way affect the Commission's right to act prior to receipt of a statement or prior to notification pursuant to the procedure. A written statement with supporting

[1] The Commission does not envision use of a submission to resolve factual representations between the staff and a potential respondent. As noted by the Securities and Exchange Commission in connection with its Wells procedure, *see* Sec. Act Release No. 5310 (September 27, 1972), disagreements as to factual matters are best left to be resolved through litigation because the Commission is not well positioned to adjudicate factual disputes in the absence of a fully developed factual record. Accordingly, the Commission anticipates that submissions under this procedure will in general be confined to matters of law or policy directly bearing on the question of whether an enforcement action should be authorized with respect to the person or entity on whose behalf the submission is made.

[2] The requirement that any statement of fact submitted on behalf of a proposed respondent be made under oath by persons with personal knowledge is one substantive difference from the SEC's Wells procedure. In addition, unless otherwise provided for by the Director of the Division, all submissions must be no longer than 20 pages and must be provided within 14 days of notice.

documentation, in conformance with Appendix A, submitted to the Director of the Division of Enforcement prior to the commencement of an enforcement proceeding will, upon request, be forwarded to the Commission along with the Division's recommendation and any response thereto.[3] However, as noted above, no rights or obligations are created by Appendix A, and the Commission has no obligation to consider a written statement or any part thereof.

The Freedom of Information Act, 5 U.S.C. 552, and the Commission's rules thereunder, 17 CFR Part 145, may require disclosure of any statement or part thereof. Also, the Commission may, in its discretion, release any statement or part thereof received unless release is prohibited by the Commodity Exchange Act or other statute or regulation concerning the privacy of information. *See* Commission Rules 11.3, 145.5(g) and 145.7, 17 CFR 11.3, 145.5(g) and 145.7.

**List of Subjects in 17 CFR Part 11**

Administrative practice and procedure, Commodity futures, Investigations.

For the reasons set out in the preamble, Title 17, Part 11 of the Code of Federal Regulations, is amended as set forth below.

**PART 11—RULES RELATING TO INVESTIGATIONS**

1. The authority citation for Part 11 continues to read as follows:

**Authority:** 7 U.S.C. 4a(j), 9, 12, 12a(5).

2. Appendix A to Part 11 is added to read as follows:

**Appendix A—Informal Procedure Relating to the Recommendation of Enforcement Proceedings**

The Division of Enforcement ("Division"), in its discretion, may inform persons who may be named in a proposed enforcement proceeding of the nature of the allegations pertaining to them. The Division, in its discretion, may advise such persons that they may submit a written statement prior to the consideration by the Commission of any staff recommendation for the commencement of such proceeding. Unless otherwise provided for by the Director of the Division, such written statements shall be submitted within 14 days after persons are informed by the Division of Enforcement of the nature of the proposed allegations pertaining to them and shall be no more than 20 pages, double spaced on 8½ by 11 inch paper, setting forth their views of factual, legal or policy matters relevant to the commencement of an enforcement proceeding. Any statement of fact included in the submission must be sworn to by a person with personal knowledge of such fact. Statements shall be forwarded to the Director, Division of Enforcement, Commodity Futures Trading Commission, 2033 K St. NW., Washington, DC 20581, with copies to the staff conducting the investigation, shall clearly identify the specific investigation, and, if desired, may request that the statement be forwarded to the Commission. Similarly, persons who become involved in an investigation, and submit a written statement on their initiative, should follow the relevant procedures described herein. In the event the Division recommends the commencement of an enforcement proceeding to the Commission, any written statement will be forwarded to the Commission if so requested. The Commission may, in its discretion, consider all, any portion or none of the submission when it considers the staff recommendation to commence an enforcement proceeding.

Issued in Washington, DC on May 19, 1987, by the Commission.

Jean A. Webb,

*Secretary of the Commission.*

[FR Doc. 87-11840 Filed 5-22-87; 8:45 am]

BILLING CODE 6351-01-M

[3] This procedure of Commission consideration of written submissions from proposed respondents in enforcement proceedings is analogous to that followed in Commission Rule 10.108, 17 CFR 10.108, which provides that if a respondent is informed by the Division of Enforcement that the Division will not recommend that the Commission accept an offer of settlement, such offer shall not be presented to the Commission unless the respondent so requests.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Food and Drug Administration**

**21 CFR Part 510**

**New Animal Drugs; Change of Sponsor Address**

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect and change of sponsor address for Zenith Laboratories, Inc.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** David L. Gordon, Center for Veterinary Medicine (HVF-238), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6243.

**SUPPLEMENTARY INFORMATION:** Zenith Laboratories, Inc., sponsor of two approved new animal drug applications, advised FDA of a change of address from 140 LeGrand Ave., Northvale, NJ 07647, to 50 Williams Dr., Ramsey, NJ 07446. The agency is amending 21 CFR 510.600 to reflect the change.

**List of Subjects in 21 CFR Part 510**

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 510 is amended as follows:

**PART 510—NEW ANIMAL DRUGS**

1. The authority citation for 21 CFR Part 510 continues to read as follows:

**Authority:** Secs. 512, 701(a), 52 Stat. 1055, 82 Stat. 343-351 (21 U.S.C. 360b, 371(a)); 21 CFR 5.10 and 5.83.

**§ 510.600 [Amended]**

2. Section 510.600 *Names, addresses, and drug labeler codes of sponsors of approved applications* is amended in paragraph (c)(1) in the entry for "Zenith Laboratories, Inc.," and in paragraph (c)(2) in the entry for "000172" by amending the sponsor address to read "50 Williams Dr., Ramsey, NJ 07446."

Dated: May 18, 1987.

Richard A. Carnevale,

*Acting Associate Director for Scientific Evaluation, Center for Veterinary Medicine.*

BILLING CODE 4160-01-M

---

**21 CFR Part 522**

**Implantation or Injectable Dosage Form New Animal Drugs Not Subject to Certification; Oxytetracycline Injection**

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Pfizer, Inc., providing for safe and effective use in cattle of a 200-milligram-per-milliliter oxytetracycline injection for treatment of infectious bovine keratoconjunctivitis (pinkeye) caused by *Moraxella bovis*.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Charles E. Haines, Center for Veterinary Medicine (HFV–133), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3410.

**SUPPLEMENTARY INFORMATION:** Pfizer, Inc., 235 East 42d St., New York, NY 10017, filed a supplement to NADA 113–232 providing for an additional use in beef cattle and nonlactating dairy cattle of a 200-milligram-per-milliliter oxytetracycline base injection for treating infectious bovine keratoconjunctivitis (pinkeye) caused by *Moraxella bovis*. The supplemental NADA is approved and 21 CFR 522.1660 (c)(1)(i) and (c)(1)(ii) are amended accordingly. The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. This action was considered under FDA's final rule implementing the National Environmental Policy Act (21 CFR Part 25).

**List of Subjects in 21 CFR Part 522**

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 522 is amended as follows:

**PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION**

1. The authority citation for 21 CFR Part 522 continues to read as follows:

**Authority:** Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

**§ 522.1660 [Amended]**

2. Section 522.1660 *Oxytetracycline injection* is amended in paragraph (c)(1)(i) by removing the period at the end, replacing it with a semicolon, and adding after it the phrase "9 milligrams per pound of body weight as a single dosage for treatment of infectious bovine keratoconjunctivitis." and in paragraph (c)(1)(ii) by removing the "and" after *"pomona,"* and by inserting a comma after *"Streptococcus* spp.", and adding after it the phrase "and infectious bovine keratoconjunctivitis (pinkeye) caused by *Moraxella bovis*."

Dated: May 14, 1987.

Gerald B. Guest,

*Director, Center for Veterinary Medicine.*

## DEPARTMENT OF THE INTERIOR

### Office of Surface Mining Reclamation and Enforcement

### 30 CFR Part 916

### Approval of Permanent Program Amendments From the State of Kansas Under the Surface Mining Control and Reclamation Act of 1977

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Final rule.

**SUMMARY:** OSMRE is announcing the approval of program amendments submitted by Kansas as modifications to the State's permanent regulatory program (hereinafter referred to as the Kansas program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments were submitted on April 23, 1986, with additional materials subsequently submitted on November 7, 1986. The amendments pertain to: Definitions, application for a mining permit, public hearings, permit review, coal exploration, bonding procedures, performance standards, underground mining, small operator assistance program, lands unsuitable for surface mining and inspection and enforcement.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mr. William J. Kovacic, Director, Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106; Telephone: (816) 374–5527.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Kansas program was conditionally approved by the Secretary of the Interior on January 21, 1981, and published in the Federal Register on the same date (46 FR 5892). Information pertinent to the general background, revisions, modifications and amendments to the proposed permanent program, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Kansas program can be found in the January 21, 1981 Federal Register. Subsequent actions concerning the conditions of approval and program amendments may be found at 30 CFR 916.11 and 916.15, respectively.

**II. Submission of Program Amendments**

In accordance with the provisions of 30 CFR 732.17 (d) through (f), on December 17, 1985, the Director notified Kansas of the changes necessary to ensure that the approved regulatory program was in accordance with SMCRA and no less effective than its implementing regulations as revised since January 21, 1981.

To comply with this letter, the Kansas Mined Land Conservation and Reclamation Board submitted program amendments to OSMRE on April 23, 1986. The proposed amendments are to the Kansas Permanent Administrative Regulations and include amendments to Articles 1, 2, 3, 4, 6, 7, 8, 9, 10, 11, 12 and 15.

The Director announced receipt of these proposed amendments in the June 19, 1986 Federal Register (51 FR 22300) and, in the same notice, opened the public comment period and provided an opportunity for a public hearing on their substantive adequacy. No public comments were received by August 4, 1986, the close of the comment period, and since no one requested an opportunity to testify, the public hearing, scheduled for July 29, 1986, was not held.

Following a thorough review of the Kansas amendments, OSMRE notified the State on October 1, 1986, of its concerns regarding some of the amendments. OSMRE's concerns arose from the decisions of the U.S. District Court for the District of Columbia on challenged Federal regulations, *In re: Permanent Surface Mining Regulation Litigation II* (Civil Action 79–1144, D.D.C. 1984 and 1985).

By letter dated November 7, 1986, Kansas informed OSMRE of the actions it had taken to remedy the deficiencies OSMRE found in its review of the

proposed amendments. Kansas submitted policy statements, modifications to the proposed amendments and other clarifying materials designed to address all OSMRE concerns. OSMRE announced receipt of these materials in the December 15, 1986 **Federal Register** (51 FR 44927) and, in the same notice, reopened the public comment period until December 30, 1986.

**III. Director's Findings**

The Director finds, in accordance with SMCRA and 30 CFR 732.15 and 732.17, that the program amendments submitted by Kansas on April 23 and November 7, 1986, meet the requirements of SMCRA and 30 CFR Chapter VII, except as discussed below. Findings on each section of the rules are discussed below. Only those provisions of particular interest are discussed in the specific findings which follow, and lack of discussion of a specific provision does not indicate or imply any deficiency in the provision. The provisions not specifically discussed are found to be no less stringent than SMCRA and no less effective than the Federal rules.

*1. Kansas Administrative Regulations (K.A.R.) 47–1–4*

The amendment to K.A.R. 47–1–4 *Sessions* provide that rescheduling of sessions of the Mined Land Conservation and Reclamation Board must be done pursuant to the notice requirements of K.A.R. 47–1–10. There is no counterpart to this requirement in SMCRA or the Federal regulations. The Director finds that inclusion of amendments to K.A.R. 47–1–4 does not render the Kansas program less effective than that required by SMCRA and the Federal regulations and is therefore approving the provisions.

*2. K.A.R. 47–2–7, 47–2–17, 47–2–44, 47–2–53, 47–2–53a, and 47–2–75*

Sections K.A.R. 47–2–7, 47–2–17 and 47–2–44 have been removed from the Kansas regulations. The definitions for "applicant", "disturbed area", and "performance bond", respectively, have been moved to K.A.R. 47–2–75. The definitions of "applicant", "disturbed area", and "performance bond" contained in K.A.R. 47–2–75(b) are the same as those contained in the Federal regulations at 30 CFR 701.5.

Section K.A.R. 47–2–53 has been amended to add "or its authorized representative" to the definition of "regulatory authority". The amended definition is identical to the Federal definition found at 30 CFR 700.5.

Kansas has added a new section, K.A.R. 47–2–53a, to define the term "regulatory program". The definition proposed by Kansas is identical to the Federal definition found at 30 CFR 700.5.

The amendments to section 47–2–75(a) incorporate by reference the definitions contained in 30 CFR 700.5 as they existed on October 1, 1985, except: "regulatory authority", "surface coal mining operations", and "surface coal mining and reclamation operations". Definitions for these terms can be found at K.A.R. 47–2–53a, Kansas Statutes Annotated (K.S.A.) 49–403(s), and 49–403(r). These definitions are identical to those previously approved in the original Kansas regulatory program approval and have not been amended.

Section 47–2–75(b) contains the definitions found in the Federal regulations at 30 CFR 701.5 as they existed on October 1, 1985, except "affected area", "imminent danger to the health and safety of the public", "operator", "permit", and "significant, imminent environmental harm to land, air, or water resources" which are defined in K.S.A. 49–403. These definitons are identical to those previously approved in the original Kansas regulatory program approval and have not been amended. Several definitions have been deleted because they do not pertain to mining in Kansas. They are "agricultural activities or farming", "alluvial valley floors", "arid and semiarid area", "essential hydrologic functions", "flood irrigation", "materially damage the quality and quantity of water", "rangeland", "special bituminous coal mines", "subirrigation", "undeveloped rangeland" and "upland areas".

Section 47–2–75(c) incorporates by reference the definitions of 30 CFR 705.5 except for "employee" and "State regulatory authority" which are defined at K.A.R. 47–2–21 and 47–2–53, respectively.

With the exceptions listed below the definitions found at K.A.R. 47–2–7, 47–2–17, 47–2–44, 47–2–53, 47–2–53a and 47–2–75, incorporate the Federal definitions by reference and other definitions are already part of the approved State program; therefore, the Director finds them no less effective than the Federal regulations.

The Federal "road" definition at 30 CFR 701.5 was suspended (50 FR 7274, February 21, 1985) as were the roads regulations at 30 CFR 816.150/817.150 and 816.151/817.151 because OSMRE had not allowed proper notice and comment on the suggested changes. The Kansas program amendments incorporate by reference the suspended Federal regulations at 30 CFR 701.5 as they existed on October 1, 1985, and 30 CFR 816.150, 817.150, 816.151 and 817.151 as they existed on July 1, 1985. Thus, the Kansas amendments do not contain a definition or performance standards for roads. At such time as OSMRE adopts new regulations, Kansas will be required to adopt a definition of "road".

Some of OSMRE's definitions at 30 CFR 701.5 have been suspended due to court rulings (51 FR 41952). Kansas has incorporated the suspended rules in K.A.R. 47–2–75(b). "Previously mined area" was suspended insofar as it applies to any area upon which operations were previously conducted which were required to comply with the Act's approximate original contour and highwall elimination requirements (51 FR 41952, November 20, 1986). Under this suspension, the remining of any area which was previously subject to a complete highwall elimination requirement will continue to be subject to such a requirement. Kansas has incorporated the suspended language in its proposed definitions. Therefore, the Director finds the incorporated definition of "previously mined area" to be less effective than the Federal regulations, and is disapproving the definition of "previously mined area". Kansas will be required to amend its definition of "previously mined area" to comply with the court's ruling.

On January 3, 1985, OSMRE suspended its definition of "adverse physical impact" (50 FR 257). Kansas' rules incorporate this suspension. On November 18, 1985, OSMRE published final rules concerning the definition of "adverse physical impact" (51 FR 41734). OSMRE has removed the definition of "adverse physical impact" from the Federal provisions. Kansas has merely suspended its definition. The Director finds that this Kansas rule is less effective than the Federal provisions. Therefore, the Director is requiring Kansas to remove its definition of "adverse physical impact".

The Director finds that the amendments to K.A.R. 47-Article 2 *meaning of terms*, with the exception of "previously mined area" and "adverse physical impact" mentioned above, are no less effective than the Federal provisions. The Director is requiring Kansas to remove the definition of "adverse physical impact" from its program and amend the definition of "previously mined area."

*3. K.A.R. 47–3–2, 47–3–3, 47–3–3a, 47–3–4, 47–3–21, 47–3–40, 47–3–42*

These sections establish the requirements for applications for mining permits. Section 47–3–2 incorporates by reference the following Federal regulations, 30 CFR 777.11, 777.13, 777.14

and 777.15. Section 47–3–3 has been deleted. The requirements it contained pertaining to permit maps have been moved to 47–3–42. Section 47–3–3a sets forth the color code to be used to indicate critical features of the permit area on maps, plans and cross-sections certified by a qualified licensed engineer and required in the mining permit application. Sections 47–3–4, 47–3–21 and 47–3–40 have been deleted and the requirements contained in them have been moved to 47–3–42.

Section 47–3–42 incorporates the following Federal regulations as they existed on July 1, 1985, 30 CFR 778.13, 778.14, 778.15, 778.16, 778.17(a), 778.18, 778.21, 778.22, 779.4, 779.11, 779.12, 779.18, 779.19, 779.20, 779.21, 779.22, 779.24, 779.25, 780.11, 780.12, 780.13, 780.14, 780.15, 780.16, 780.18, 780.21, 780.22, 780.23, 780.25, 780.27, 780.29, 780.31, 780.33, 780.35, 780.37, 785.13, 785.17, 785.18, 785.20, 785.21, 785.22, 773.13, 773.15, 773.19, 701.11 and 773.12. With the exception of § 780.21(f), they are identical to the Federal regulations and, therefore, no less effective than the Federal program. OSMRE suspended 30 CFR 780.21(f) insofar as the section limits the regulatory authority from requiring a permit applicant to address life-of-the-mine hydrologic consequences determination (51 FR 41952, November 20, 1986). This means that the regulatory authority must determine the appropriate scope of a probable hydrologic consequences (PHC) determination on a case-by-case basis. That is, whether and to what degree a permit applicant should include hydrologic information for operations conducted outside the permit area during the entire life of the operation. The Kansas regulations limit the regulatory authority's authority to require life-of-the-mine PHC determination.

Therefore, the Director is disapproving K.A.R. 47–3–42(a)(26) and requiring a progam amendment. The Director finds that all other regulations contained in this chapter of the Kansas regulations are no less effective than the Federal regulations, are not inconsistent with SMCRA and the Director is approving these regulations.

*4. K.A.R. 47–4–14 and 47–4–15*

*K.A.R.* 47 Article 4 sets forth the regulations governing public hearings. Section 47–4–14 incorporates by reference rules for the State corporation commission, burden of proof in administrative hearings. The incorporated regulations are those that existed on May 1, 1985 including K.A.R. 82–1–204, 82–1–207, 82–1–212, 82–1–214, 82–1–215, 82–1–216, 82–1–217, 82–1–218, 82–1–219, 82–1–221, 82–1–222, 82–1–223, 82–1–224, 82–1–225, 82–1–226, 82–1–227, 82–1–228, 82–1–229, 82–1–230, 82–1–232, 82–1–234a, 82–1–235, 82–1–237(a) and 82–1–238.

Section 47–4–15 incorporates by reference the Federal rules and regulations of the Department of the Interior's Office of Hearings and Appeals as they existed on October 1, 1984. The regulations concern the discovery process. This section incorporates the following Federal regulations 43 CFR 4.1130, 4.1131, 4.1132, 4.1133, 4.1134, 4.1135, 4.1136, 4.1137, 4.1138, 4.1139, 4.1140 and 4.1141.

K.A.R. 47–4–15(b) places the burden of proof at administrative hearings of the board on the party seeking to reverse the decision of the board. These regulations are amended versions that have been previously approved in the Kansas program. They have been found to be no less stringent than SMCRA and no less effective than the Federal regulations. Therefore, the Director is approving the amendments.

*5. K.A.R. 47–6–3, 47–6–4, 47–6–5 and 47–6–6*

K.A.R. Article 6 sets forth the permit regulations. Section 47–6–3 incorporates by reference the permit renewal Federal regulation at 30 CFR 774.15 as it existed on July 1, 1985. Kansas' counterpart regulations to 30 CFR 774.11 and 774.13 have not been amended and may be found at K.A.R. 47–6–1 and 47–6–2 respectively. Section 47–6–4 sets forth regulations governing permit transfers, assignments and sales including requiring the person succeeding to a permit by transfer, sale or assignment to file an application for a new permit with the Board no later than 30 days after the succession is approved. This section also incorporates by reference 30 CFR 774.17.

Section 47–6–5 has been deleted and the contents of this section have been incorporated at 47–3–42(a)(44).

Section 47–6–6 incorporates by reference the Federal rule at 773.17 concerning permit conditions as it existed on July 1, 1985.

These regulations are identical to the Federal regulations; therefore, the Director finds them to be no less effective than the Federal provisions.

*6. K.A.R. 47–7–2*

This section incorporates by reference the Federal regulations concerning coal exploration as they existed on July 1, 1985. They include 30 CFR 772.11, 772.12, 772.13, 772.14 and 772.15.

Subsequent to Kansas' submittal of these program amendments OSMRE suspended parts of 30 CFR 772.11 and 772.12 in response to the district court's decision (51 FR 41952, November 20, 1986). Specifically, OSMRE has suspended § 772.11(a) insofar as it limits the responsibility to submit a notice of intent to explore to those persons who will substantially disturb the natural land surface. OSMRE also suspended §§ 772.11(b)(3) and 772.12(b)(3), insofar as they allow a coal exploration notice or application to be submitted which does not include a narrative describing the exploration area. Therefore, OSMRE finds that Kansas regulations K.A.R. 47–7–2 (a) and (b) are less effective than the Federal regulations insofar as they incorporate the suspended language discussed above, is disapproving them, and requiring a program amendment. This means that all persons conducting coal exploration in Kansas will be required to submit a notice of intent to explore whether or not they will substantially disturb the natural land surface and will be required to submit a narrative describing the exploration area.

Because these regulations are identical to the Federal regulations with the exceptions discussed above, the Director finds them no less effective than the Federal provisions.

*7. K.A.R. 47–8–2, 47–8–9, 47–8–9a, 47–8–10*

Kansas has amended Article 8 on bonding procedures by deleting 47–8–2, 47–8–9a and 47–8–10. The provisions formerly contained in these sections have been moved to 47–8–9 (j, k, o and m).

Section 47–8–9 incorporates the following Federal bonding regulations as they existed on July 1, 1985, 30 CFR 800.4, 800.5, 800.11, 800.12, 800.13, 800.14, 800.15, 800.16, 800.17, 800.20, 800.21, 800.23, 800.30, 800.40, 800.50 and 800.60.

OSMRE has suspended portions of its bonding regulations in compliance with decisions by the district court (50 FR 7274, February 21, 1985). The supended sections, §§ 800.11(b) and 800.13(a)(2), dealt with incremental and phase bonding, respectively. Kansas has incorported the supension. Therefore, K.A.R. 47–8–9(c) and (e) are not inconsistent with the Act and no less effective than the Federal regulations.

The regulations discussed above are identical to the Federal regulations and the Director, therefore, finds them no less effective than the Federal regulations.

*8. K.A.R. 47–9–1, 47–9–3 and 47–9–4*

Section 47–9–1 incorporates by reference the Federal surface and underground coal mining performance

standards, coal exploration performance standards, and performance standards for special categories of mining as they existed on July 1, 1985. They include 30 CFR 810.2, and all of Parts 815, 816, 817, 823, 828, and 827 as they existed on October 1, 1985.

The Kansas regulations at K.A.R. 47–9–1(c) and (d) incorporate several sections that were remanded by the district court and have since been suspended by OSMRE. Thus, OSMRE may not approve them as part of the Kansas program unless they provide for more stringent land use or environmental controls. The specific sections affected are discussed below.

K.A.R. 47–9–1(c) incorporates OSMRE's surface mining performance standards and 47–9–1(c) incorporates underground performance standards of the Federal regulations at 30 CFR Parts 816 and 817, respectively as they existed on July 1, 1985. The following remanded sections of the Federal regulations apply to both surface and underground performance standards. The State's regulation counterparts can be found in K.A.R. 47–9–1(c) and (d).

Section K.A.R. 47–9–1(d) incorporates OSMRE's underground mining performance standards including § 817.41(b)(2). OSMRE suspended this section on February 21, 1986 (50 FR 7274). Kansas has incorporated the rule as suspended which does not require underground mine operators to restore hydrologic recharge capacity (50 FR 7274, February 21, 1985). Thus, OSMRE is approving the Kansas regulation.

OSMRE has suspended 30 CFR 816.46(b)(2) and 817.46(b)(2) insofar as they require use of a siltation structure in every instance (51 FR 41952, November 20, 1986). K.A.R. 47–9–1 incorporates these suspended regulations but since Kansas may require the more stringent standards of the use of siltation structure in every instance, OSMRE is approving the Kansas regulation.

OSMRE has suspended §§ 816.49(a)(3), 816.49(a)(5)(i), 817.49(a)(3) and 817.49(a)(5)(i) insofar as they apply to small sedimentation ponds (51 FR 41952). Small sedimentation ponds are those ponds in which no embankment is more than 20 feet in height, measured from the upstream toe of the embankment to the crest of the emergency spillway and with a storage volume of less than 20 acre feet. Federal sections 30 CFR 816.49(a)(3) and 817.49(a)(3) impose a minimum static safety factor of 1.5 and seismic safety factor of 1.2 for all impoundments. Federal §§ 816.49(a)(5)(i) and 817.49(a)(5)(i) establish stability requirements for foundation abutments and require sufficient foundation investigation and laboratory testing to determine design requirements for foundation stability. However, Kansas may require small sedimentation ponds to meet the more stringent static safety factors of 1.5 and the seismic safety factor of 1.2, and the stability requirements for foundation abutments and require sufficient foundation investigation and laboratory testing for design stability. Therefore, OSMRE is approving these regulations.

OSMRE has suspended §§ 816.49(a)(9), 816.84(b)(2), 817.49(a)(8) and 817.84(b)(2) insofar as they require separate principal and emergency spillways where one spillway may safely pass the design storm event (51 FR 41952). However, Kansas may require two separate spillways. Therefore, the Director finds that the Kansas regulations are no less effective than the Federal provisions and is approving these regulations.

OSMRE has suspended §§ 816.49(a)(9) and 817.49(a)(8) insofar as they permit the retention of highwalls in permanent impoundments (51 FR 41952). This means that underwater highwalls may not be retained in permanent impoundments. The requirement to eliminate highwalls underwater does not mean that the approximately premining contour must be achieved within the impoundment; only the appropriate contour is required within the impoundment as long as highwalls are eliminated.

OSMRE is disapproving the Kansas regulation to the extent it is inconsistent with the suspended regulations. Therefore, Kansas will be required to amend its program to eliminate underwater highwalls in permanent impoundments.

OSMRE has suspended §§ 816.81(a) and 817.81(a) insofar as end dumping or side dumping of coal waste is allowed (51 FR 41952). OSMRE is disapproving the Kansas regulation because allowing end or side dumping is inconsistent with the Federal provisions. Therefore, Kansas will be required to amend its program to prohibit end or side dumping of coal waste.

OSMRE has also suspended §§ 816.81(c)(2) and 817.81(c)(2) insofar as they permit coal waste refuse piles to be constructed or modified with less compaction than necessary to attain 90 percent of the maximum dry density determined in accordance with the standard Proctor method (51 FR 41950). Therefore, OSMRE is disapproving the Kansas regulation and will require Kansas to amend its program to use the previous standard (1979 rules) until OSMRE adopts a further rule change.

OSMRE has suspended §§ 816.83 and 817.83 insofar as they allow coal waste refuse piles to be constructed in lifts larger than two feet in thickness (51 FR 41952). OSMRE is disapproving the Kansas regulation and is requiring Kansas to amend its program to employ a maximum two foot lift standard in its reviewing coal refuse pile designs until a new Federal rule is promulgated.

The district court ruled that OSMRE had promulgated §§ 816.89(d) and 817.89(d) (hazardous waste) without notice and comment. However, Kansas has followed its rulemaking procedures allowing for adequate public notice and comment. Therefore, the Director finds this section to be in accordance with SMCRA.

OSMRE suspended §§ 816.106(b) and 817.106(b) as part of a settlement agreement (51 FR 257, January 3, 1986). Therefore, all surface coal mining and reclamation operations including remaining operations in Kansas must use all reasonably available spoil to backfill highwalls. On November 18, 1986, OSMRE published new rules at 30 CFR 816.106 and 817.106 (51 FR 41734). The new Federal regulations remove paragraph (b) that had previously been suspended. Kansas' amendments had suspended this section; however, Kansas must remove from K.A.R. 47–9–1 (c) and (d) the counterparts to §§ 816.106(b) and 817.106(b) to be no less effective than the Federal provisions. Therefore, the Director is disapproving the Kansas regulations and requiring Kansas to remove them.

OSMRE has suspended §§ 816.116(b)(3)(ii) and 817.116(b)(3)(ii) insofar as they authorize the inclusion of trees and shrubs which have been in place less than the full period of responsibility in determining the success of stocking (51 FR 41952). This means that trees and shrubs in place for less than the full applicable period of liability may not be counted in determining revegetation or reclamation success or for authorizing release of bond.

OSMRE has also suspended §§ 816.116(c)(4) and 817.116(c)(4) insofar as they allow the repair of rills and gullies to occur without restarting the period of responsibility for the areas of repair (51 FR 41952).

These two issues are related insofar as the court ruled that the record did not show that the repair of rills and gullies is a normal conservation practice or the replanting of trees is a normal husbandry practice. Kansas' administrative and rulemaking records may show that the repair of rills and gullies and replanting of trees are

normal conservation and husbandry practices in the State. Kansas may, at a later date, submit these proposed rules along with the appropriate records for the Director's review. However, until such a demonstration is made, the Director is disapproving these Kansas regulations to the extent they would allow restocking of trees or shrubs or repair of rills and gullies without restarting the responsibility period. Kansas may not include any trees or shrubs that have been in place less than the full responsibility period for determining the success of stocking nor may the State allow the repair of rills and gullies without restarting the responsibility period.

OSMRE has suspended §§ 816.116(c)(2) and 817.116(c)(2) insofar as these sections permits the determination of revegetation success to be measured over less than the growing seasons of the last two years of the responsibility period in areas with 26 inches or more of rainfall per year (51 FR 41952). Therefore, the Director is disapproving the Kansas regulations incorporating these sections and requiring Kansas to amend its program to determine revegetation success by measuring over no less than the growing seasons of the last two years of the responsibility period.

OSMRE suspended §§ 785.16, 816.133(d), and 817.133(d) insofar as they permit the granting of variances from AOC for surface coal mining operations in non-steep slope areas (51 FR 41952). Kansas has not incorporated by reference 30 CFR 785.16 which allowed for variances from the requirement to return mined lands to approximate original contour (AOC), making this portion of its program no less effective than the Federal provisions. However, when Kansas incorporated 30 CFR Parts 816 and 817 into its rules, it incorporated §§ 816.133(d) and 817.133(d) which set the criteria for a variance from AOC. The Director believes that Kansas inadvertently incorporated §§ 816.133(d) and 817.133(d). However, the Director is disapproving the Kansas regulations that incorporate §§ 816.133(d) and 817.133(d) and requiring Kansas to remove them.

The Kansas program amendments incorporate by reference the Federal regulations at §§ 816.150, 816.151, 817.150, 817.151, as they existed on July 1, 1985. OSMRE suspended these sections on February 21, 1985 (50 FR 7274). Thus, the Kansas amendments do not contain performance standards for roads. At such time as OSMRE adopts new regulations, Kansas will be required to adopt performance standards for roads.

OSMRE has suspended 30 CFR 823.11(a) found at K.A.R. 47–9–1(f) insofar as it allowed facilities used in surface coal mining to be exempt from the prime farmland performance standards (50 FR 7274). The suspension, which was incorporated by Kansas, means that prime farmland occupied by all coal preparation plants, support facilities and roads that are associated with surface mines must meet the applicable prime farmland performance standards. Therefore, the Director finds that the Kansas rule is no less effective than the Federal provisions.

OSMRE suspended 30 CFR 823.11(b) because it was found to have an impermissibly broad variance from the post-mining use of prime farmland (50 FR 7274). Kansas has incorporated this suspension. The suspension of this rule means that the regulatory authority cannot approve the retention of impoundments as satisfying the operator's obligation to restore prime farmland to premining equivalent levels of yield. Therefore, the Director finds that the Kansas rule is no less effective than the Federal provisions.

Kansas has deleted section 47–9–3 which contained performance standards for alternative designs. The Kansas program has gained greater flexibility with the incorporation of the Federal performance standards, making this section redundant; therefore, the Director is approving the amendment.

Kansas has added a new section incorporating interim permit performance standards. Section 47–9–4 includes the following Federal regulations as they existed on July 1, 1985, 30 CFR 710.5 710.11(a), 715.12, 715.13, 715.14, 715.15, 715.16, 715.17, 715.18, 715.20, 715.200 and 716.7. Section 47–9–4(c) contained the phrase "other applicable substantive rule and regulations". OSMRE informed the State that the phrase was too vague and needed clarification before it could be approved. Kansas elected to delete this phrase in its final rule. Until the amendment can be revised, the State will interpret the regulation as requiring compliance with either the interim or permanent regulations.

Because these rules are identical to the Federal regulations with the exceptions discussed above, the Director finds them to be in accordance with SMCRA and no less effective than the Federal regulations.

*9. K.A.R. 47–10–1*

Article 10 of Chapter 47 of Kansas' administrative rules concern underground mining. K.A.R. 47–10–1 incorporates by reference OSMRE's underground mining permit application regulations as they existed on July 1, 1985. They include the following: 30 CFR 783.11, 783.12, 783.18, 783.19, 783.20, 783.21, 783.22, 783.24, 783.25, 784.11, 784.12, 784.13, 784.14, 784.15, 784.16, 784.17, 784.18, 784.19, 784.20, 784.21, 784.22, 784.23, 784.24, 784.25, 784.26, 784.29 and 784.300.

OSMRE has suspended 30 CFR 784.14, (e) for which the Kansas equivalent is K.A.R. 47–10–1(a)(2) (51 FR 41952). This rule is the underground permitting requirement counterpart to § 780.21(f)/ K.A.R. 47–3–42(a)(26). A discussion of its suspension can be found in the section discussing 47–3–42 above.

Because these regulations are identical to the Federal regulations, the Director finds them to be no less effective than the Federal provisions.

*10. K.A.R. 47–11–8*

Kansas chapter 47 article 11 sets forth the regulations for the small operator assistance program (SOAP). Section 47–11–8 incorporates by reference the Federal regulations pertaining to SOAP as they existed on July 1, 1985. They include 30 CFR 795.3, 795.6, 795.7, 795.8, 795.9, 795.10, 795.11 and 795.12.

Because these rules are identical to the Federal regulations, the Director finds them to be no less effective than the Federal provisions.

*11. K.A.R. 47–12–4*

This section of the Kansas program incorporates by reference the Federal regulations concerning lands unsuitable for mining as they existed on July 1, 1985. They include 30 CFR 761.5, 761.11, 761.12, 762.5, 762.11, 762.13, 762.14, 764.13, 764.15, 764.17, 764.19, 764.21, 764.23 and 764.25.

OSMRE has promulgated new final rules and suspended sections of the Federal rules incorporated by Kansas into K.A.R. 47–12–4. These rules and their impact on the Kansas program are discussed below.

OSMRE promulgated a new definition of "cemetery" at 30 CFR 761.5, on February 10, 1987 (52 FR 4244). A "cemetery" is defined as any place where human bodies are interred and includes private family burial grounds. The Kansas regulation incorporates the Federal definition of "cemetery" as it existed on July 1, 1985, which excludes private family burial grounds. Therefore, OSMRE is disapproving K.A.R. 47–12–4 to the extent it excludes private family burial grounds from the definition of "cemetery" and requiring Kansas to amend its program.

OSMRE suspended its 1983 definition of "valid existing rights" (VER) at 30 CFR 761.5 in response to a district court order (51 FR 41952). The suspension has the effect of leaving in place the VER test as it existed prior to the promulgation of the 1983 definition.

That VER test was the 1979 test, including the "needed for and adjacent" test, as modified by the August 4, 1980 suspension notice which implemented the district court's February 1980 opinion in *In Re: Permanent (I)* (the 1980 test). That suspension notice stated that pending further rulemaking, OSMRE would interpret the regulation as including the court's suggestion that a good faith effort to obtain all permits would establish VER. The Kansas regulation incorporates the Federal definition as it existed on July 1, 1985. Therefore, OSMRE is disapproving Kansas' definition of VER at K.A.R. 47–12–4 and requiring Kansas to amend its program.

OSMRE promulgated revised rules at 30 CFR 761.11(c) and 761.12(f)(1) on February 10, 1987 (52 FR 4244) which extended the protections offered by section 522(e)(3) to both privately owned and publicly owned places listed on the National Register of Historic Places. The incorporation by Kansas of 30 CFR 761.11(c) and 761.12(f)(1) as they existed on July 1, 1985, are disapproved to the extent that these rules limit the protections of section 522(e)(3) of SMCRA to publicly owned properties listed on the National Register. Kansas will be required to amend its program accordingly.

OSMRE suspended § 761.11(h); however, OSMRE will continue to implement the section 522(e)(1) prohibition on mining within areas protected by Congress. Kansas has incorporated by reference this suspended section of the Federal regulations. The Director finds this to be less effective than the Federal provisions. The Director is disapproving K.A.R. 47–12–4(b)'s counterpart to 30 CFR 761.11(h). Kansas must amend its program to be no less effective than the Federal regulations.

OSMRE suspended portions of the definitions of "fragile lands" and "historic lands" contained in 30 CFR 762.5 on January 9, 1985 (50 FR 257). The phrase "beyond an operator's ability to repair or restore" is suspended. This means that instead of requiring a showing of irreparable or permanent damage to the lands to allow for designation of an area as unsuitable for mining, a showing of significant damage will be sufficient. Kansas incorporated these rules as they existed on July 1, 1985. Therefore, the Director finds the Kansas definitions of "fragile lands" and "historic lands" to be no less effective than the Federal provisions.

OSMRE suspended § 764.15(a)(3) which provides for petition suspensions by State regulatory authorities; and § 764.15(a)(8) which provides for the resumption of processing of petitions where suspension has occurred and a permit application has since been filed (51 FR 41952). These suspensions mean that the regulatory authority may not suspend the processing of petitions to designate lands unsuitable. Therefore, the Director is disapproving K.A.R. 47–12–4(i) insofar as it incorporates the suspended language and is requiring Kansas to amend its program.

With the exceptions discussed above, the Kansas rules at KAR 47–12–4 are identical to the Federal regulations; therefore, the Director finds them to be no less effective than the Federal provisions.

*12. K.A.R. 47–15–1a*

This section incorporates by reference the Federal regulations concerning inspection and enforcement as they existed on July 1, 1985. Kansas had submitted these regulations to OSMRE for approval as a program amendment on April 4, 1985. OSMRE approved this amendment on November 15, 1985, and it became part of the approved Kansas program as codified at 30 CFR 916.15(e). No changes have been made in this rule since it received final approval from OSMRE on November 15, 1985; therefore, the Director finds it to be no less effective than the Federal provisions. See November 15, 1985 Federal Register notice (50 FR 47218).

## IV. Public Comments

As discussed above, the Director solicited public comment and provided opportunity for a public hearing on the proposed amendments. No comments were received, and since no one requested an opportunity to testify at a public hearing, no hearing was held.

Pursuant to section 503(b) of SMCRA, 30 CFR 732.17(h)(10)(i), 884.14(a)(2) and 884.15, comments were also solicited from various Federal agencies with an actual or potential interest in the Kansas program. The Environmental Protection Agency concurred in the amendments. A summary of other comments received and the Director's responses to them appears below.

The U.S. Fish and Wildlife Service praised Kansas' efforts to revise its regulations; however, it had some reservations concerning Kansas' implementation of its program regarding fish and wildlife resources. These comments are outside the scope of this rulemaking as they apply to the implementation of the rules and not the adequacy of the rules themselves. The Director has taken note of these concerns and will monitor compliance with all requirements of the Kansas program as part of his ongoing oversight of this program.

## V. Director's Decision

Based on the above findings, the Director is approving the proposed amendments submitted by Kansas on April 23, 1986, with additional materials submitted on November 7, 1986, with the exception of those provisions determined to be inconsistent with SMCRA, the Federal regulations or court decisions concerning those regulations.

The Federal rules at 30 CFR Part 916 codifying decisions concerning the Kansas program are amended to implement this decision. The final rule is being made effective immediately to expedite the State program amendment process and to encourage States to bring their programs into conformity with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

Kansas has incorporated by reference OSMRE's revised rules. Through subsequent litigation some of the Federal regulations have been suspended in whole or in part. The following list of disapproved regulations will contain both the Kansas and Federal regulatory citation.

The Director is disapproving the following provisions of the proposed amendments:

(1) As discussed in finding 2, the definition of "previously mined area" in K.A.R. 47–2–75(b) which incorporates 30 CFR 701.5.

(2) As discussed in finding 3, section K.A.R. 47–3–42(a)(28) (30 CFR 780.21(f)) concerning life-of-mine hydrologic consequences determination.

(3) As discussed in finding 6, K.A.R. 47–7–2(a) and (b) as they affect coal exploration notices of intent and applications (30 CFR 772.11(a), 772.11(b)(3), and 772.12(b)(3)).

(4) As discussed in finding 8, sections 47–9–1(c), (d) and (f) insofar as they incorporate by reference suspended sections of the following Federal regulations: 30 CFR 816.49(a)(9), 817.49(a)(9), 816.81(a), 817.81(a), 816.81(c)(2), 817.81(c)(2), 816.83, 817.83, 816.106(b), 817.106(b), 816.116(b)(3)(ii), 817.116(b)(3)(ii), 816.116(c)(4), 817.116(c)(4), 816.116(c)(2), 817.116(c)(2), 816.133(d), and 817.133(d).

(5) As discussed in finding 9, section 47–10–1(a)(2) (30 CFR 784.14(e)).

(6) As discussed in finding 11, section 47–12–4(a), (b), (c) and (i) insofar as they incorporate by reference the suspended sections of the following Federal regulations: 30 CFR 761.5, definitions of "cemetery" and "valid existing rights", § 761.11(h), § 784.15(a)(3), § 784.15(a)(8), 30 CFR 761.11(c) and 761.12(f)(1).

*Effect of Director's Decision*

Section 503 of SMCRA establishes that a State may not exercise jurisdiction under SMCRA unless the State program is approved by the Secretary. Similarly, the Secretary's regulations at 30 CFR 732.17(a) require that any alteration of an approved State program must be submitted to OSMRE as a program amendment. Thus, any changes to the program are not enforceable by the State until approved by the Director. The Federal regulations at 30 CFR 732.17(g) prohibit any unilateral changes to approved State programs. In his oversight of the Kansas program, the Director will recognize only the statutes, regulations and other materials approved by him, together with any consistent implementing policies, directives and other materials, and will require the enforcement by Kansas of only such provisions.

**VI. Additional Determinations**

*1. Compliance with the National Environmental Policy Act*

The Secretary has determined that pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

*2. Executive Order 12291 and the Regulatory Flexibility Act*

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action, OSMRE is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

*3. Paperwork Reduction Act:*

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

**List of Subjects in 30 CFR Part 916**

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: May 19, 1987.

**James W. Workman,**

*Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.*

**PART 916—KANSAS**

30 CFR Part 916 is amended as follows:

1. The authority citation for 30 CFR Part 916 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

2. 30 CFR 916.15 is amended by adding new paragraph (f) as follows:

**§ 916.15 Approval of regulatory program amendments.**

* * * * *

(f) The following amendments submitted to OSMRE on April 23, 1986, with additional materials subsequently submitted on November 7, 1986, are approved effective May 26, 1987:

Revisions to the Kansas Administrative Regulations in Chapter 47, Article 1—General 47–1–4, Article 2—Meaning of Terms 47–2–7, 47–2–17, 47–2–44, 47–2–53, 47–2–53a, 47–2–75, Article 3–Application for Mining Permit 47–3–2, 47–3–3, 47–3–3a, 47–3–4, 47–3–21, 47–3–40, 47–3–42, Article 4—Public Hearings 47–4–14, 47–4–15, Article 6—Permit Review 47–6–3, 47–6–4, 47–6–5, 47–6–6, Article 7—Coal Exploration 47–7–2, Article 8—Bonding Procedures 47–8–2, 47–8–9, 47–8–9a, 47–8–10, Article 9—Performance Standards 47–9–1, 47–9–3, 47–9–4, Article 10—Underground Mining 47–10–1, Article 11—Small Operators Assistance Program 47–11–8, Article 12–Lands Unsuitable for Surface Mining 47–12–4, Article 15—Inspection and Enforcement 47–15–1a.

3. 30 CFR Part 916 is amended to add § 916.12 to read as follows:

**§ 916.12 State program provisions and amendments disapproved.**

(a) The following provisions of the surface coal mining regulations promulgated pursuant to K.S.A. 49–401 *et seq.*, as submitted on April 23, 1986, with additional materials subsequently submitted on November 7, 1986, are hereby disapproved:

(1) K.A.R. 47–2–75(b) "previously mined area", insofar as it applies to any area upon which operations were previously conducted which were required to comply with SMCRA's approximate original contour and highwall elimination requirements.

(2) K.A.R. 47–3–42(a)(26), which incorporates by reference 30 CFR 780.21(f), insofar as this section limits the regulatory authority from requiring a permit applicant to address life-of-mine hydrologic consequences determination.

(3) K.A.R. 47–7–2(a) which incorporates by reference 30 CFR 772.11(a) insofar as it limits the responsibility to submit a notice of intent to explore to those operations that will substantially disturb the natural land surface and 30 CFR 772.11(b)(3) insofar as it allows a coal exploration notice or application for less than 250 tons to be submitted without including a narrative describing the exploration area. K.A.R. 47–7–2(b) which incorporates by reference 30 CFR 772.12(b)(3) insofar as it allows a coal exploration notice or application for more than 250 tons to be submitted without a narrative describing the exploration area.

(4) K.A.R. 47–9–1(c) and (d) insofar as they incorporate by reference the suspended sections of the following Federal regulations: 30 CFR 816.49(a)(9) and 817.49(a)(9) insofar as they permit the retention of highwalls in impoundments; 30 CFR 816.81(a) and 817.81(a) insofar as end dumping or side dumping of coal waste is allowed; 30 CFR 816.81(c)(2) and 817.81(c)(2) insofar as they permit coal waste refuse piles to be constructed or modified with less compaction than necessary to attain 90 percent of the maximum dry density determined in accordance with the standard Proctor method; 30 CFR 816.83 and 817.83 insofar as they allow coal waste refuse piles to be constructed in lifts larger than two feet in thickness; 30 CFR 816.106(b) and 817.106(b); 30 CFR 816.116(b)(3)(ii) and 817.116(b)(3)(ii) insofar as they authorize the inclusion of trees and shrubs which have been in place less than the full period of responsibility in determining the success of stocking; 30 CFR 816.116(c)(4) and 817.116(c)(4) insofar as they allow the repair of rills and gullies to occur without restarting the period of responsibility for the areas of repair; 30 CFR 816.116(c)(2) and 817.116(c)(2) insofar as they permit the determination of revegetation success to be measured over less than the growing seasons of the last two years of the responsibility period in areas with 26 inches or more of rainfull per year, and 30 CFR 816.133(d) and 817.133(d).

(5) K.A.R. 47–10–1(a)(2) which incorporates by reference 30 CFR 784.14(e), insofar as this section limits the regulatory authority from requiring a permit applicant to address life-of-mine hydrologic consequences determination.

(6) K.A.R. 47–12–4(a), insofar as it incorporates by reference the suspended portions of the definition contained in 30 CFR 761.5, "valid existing rights".

(7) K.A.R. 47–12–4(a) which incorporates by reference the Federal definition of "cemetery" (30 CFR 761.5) as it existed on July 1, 1985, insofar as it excludes private family burial grounds.

(8) K.A.R. 47–12–4 (b) and (c) which incorporate by reference 30 CFR 761.11(c) and 761.12(f) as they existed on July 1, 1985, insofar as they limit the protections of section 522(e)(3) of the Act to publicly owned places on the National Register of Historic Places.

(9) K.A.R. 47–12–4(b) which incorporates by reference 30 CFR 761.11(h).

(10) K.A.R. 47–12–4(i) which incorporates by reference 30 CFR 764.15(a)(3) which allows the regulatory authority to suspend the processing of unsuitability petitions and 30 CFR 764.15(a)(8) which provides for the resumption of petition processing when a permit application is filed.

4. 30 CFR 916.16 added to read as follows:

**§ 916.16 Required program amendments.**

(a) Pursuant to 30 CFR 732.17, Kansas is required to submit for OSMRE's approval the following amendments by the dates specified.

(1) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–2–75 to remove the definition of "adverse physical impact" and amend the definition of "previously mined area" to be no less effective that 30 CFR 701.5.

(2) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–3–42(a)(6) to allow the regulatory authority to require a permit applicant to address life-of-the-mine hydrologic impacts in the probable hydrologic consequences determination to be no less effective than 30 CFR 780.21(f).

(3) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–7–2(a) and (b) to require all persons conducting coal exploration to submit a notice of intent to explore to be no less effective than 30 CFR 772.11(a), and to require applications for a coal exploration permit or notices of intent to explore to have naratives describing the exploration area to be no less effective than 30 CFR 772.11(b)(3) and 772.12(b).

(4) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–9–1 (c) and (d) to require the elimination of underwater highwalls, to be no less effective than 30 CFR 816.49(a)(9) and 817.49(a)(9).

(5) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–9–1 (c) and (d) to prohibit end or side dumping to be no less effective than 30 CFR 816.81(a) and 817.81(a).

(6) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–9–1 (c) and (d) to require a 90 percent compaction standard to be no less effective than 30 CFR 816.81(c)(2) and 817.81(c)(2).

(7) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–9–1 (c) and (d) to require a maximum of 2-foot lifts to be no less effective than 30 CFR 816.83 and 817.83.

(8) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–9–1 (c) and (d) to remove the suspended counterpart to 30 CFR 816.106(b) and 817.106(b) to be no less effective than the Federal regulations.

(9) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–9–1 (c) and (d) to measure revegetation success to be no less effective than 30 CFR 816.116(c)(2) and 817.116(c)(2).

(10) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–9–1 (c) and (d) to remove the incorporation by reference of 30 CFR 816.133(d) and 817.133(d).

(11) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–10–1(a)(2) to allow the regulatory authority to require a permit applicant to address life-of-the-mine hydrologic impacts in the probable hydrologic consequences determination to be no less effective than 30 CFR 784.14(e).

(12) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–12–4(a) to include definitions of "cemetery" and "valid existing rights" no less effective than those found at 30 CFR 761.5.

(13) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–12–4 (b) and (c) to extend the protections of section 522(e)(3) of SMCRA to all properties listed on the National Register of Historic Places to be no less effective than 30 CFR 761.11(c) and 761.12(f)(1).

(14) By May 26, 1988, Kansas shall amend its program at K.A.R. 47–12–4(i) so that the regulatory authority may not suspend the processing of petitions to declare lands unsuitable for mining to be no less effective than 30 CFR 764.15(a)(3) and 764.15(a)(8).

## 30 CFR Part 938

## Permanent State Regulatory Program of Pennsylvania; Modification of Deadline

**AGENCY:** Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

**ACTION:** Final rule.

**SUMMARY:** This document amends 30 CFR Part 938 by modifying the deadline for Pennsylvania to amend its permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Pennsylvania requested an extension of time necessary to revise its State program regulations to be no less effective than the Federal regulations and consistent with SMCRA. After providing opportunity for public comment, the Director has decided to extend the deadline for the State to adopt four amendments as required under 30 CFR 938.16(c), (d), (e) and (f) until August 24, 1987. The amendments would revise the State program regulations pertaining to prime farmland.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Robert Biggi, Director, Harrisburg Field Office, Office of Surface Mining Reclamation and Enforcement, 101 South 2nd Street, Suite L–4, Harrisburg, Pennsylvania 17101, Telephone: (717) 782–4036.

**SUPPLEMENTARY INFORMATION:**

### I. Background on the Pennsylvania State Program

On February 29, 1980, the Secretary of the Interior received a proposed regulatory program from the State of Pennsylvania. On October 22, 1980, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary disapproved the Pennsylvania program. The State resubmitted its program on January 25, 1982, and subsequently the Secretary approved the program subject to the correction of minor deficiencies. Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Pennsylvania program can be found in the July 30, 1982 Federal Register notice (47 FR 33050).

**II. Background on the Required Amendments**

The four required amendments were necessary to remedy minor deficiencies identified in an earlier Pennsylvania amendment approved by OSMRE. The Secretary's findings and decision on the amendment were published in the Federal Register on May 19, 1986 (51 FR 18314). The required amendments listed in the approval notice at 30 CFR 938.16(c), (d), (e) and (f) required that by January 31, 1987, Pennsylvania complete the following:

(c) Amend its program regulations to be consistent with the Federal regulations at 30 CFR Part 823 as remanded by the U.S. District Court for the District of Columbia on October 1, 1984, by deleting the language at 8.32(b)(4) which provides an exemption to the prime farmland requirements if "the area of the prime farmland is minimal in size (less than 5 acres) and has been or will be in use for an extended period of time (more than 10 years)."

(d) Amend its program regulations at 88.32(e) and 88.491(k)(4) or otherwise amend its program to be no less effective than 30 CFR 785.17(c)(1)(ii) in requiring approval by the U.S. Department of Agriculture Soil Conservation Service of alternative soil profile descriptions for prime farmland soils included in the permit application.

(e) Amend its program regulations at 88.61 or otherwise amend its program to be consistent with section 510(d) of SMCRA to: (a) Establish criteria for evaluating the applicant's operation and reclamation plan to determine whether the productivity standard for mined prime farmland set forth under Chapter 88 can be achieved following mining; (b) require the applicant to submit a plan to establish his technological capability to comply with the requirements for restoring prime farmland productivity; and (c) require the applicant to submit information on productivity prior to mining.

(f) Amend its regulations at 88.129(f)(1) and (2) and the corresponding provision under Chapter 88, Subchapters C, D, and F (88.217, 88.330 and 88.491) or otherwise amend its program to be consistent with section 510(d) of SMCRA by requiring that the restoration of prime farmland soil productivity shall be determined on the basis of measurement of crop yields.

On December 22, 1986, Pennsylvania requested additional time to develop and adopt the required amendments at 30 CFR 938.16(c), (d), (e) and (f). Pennsylvania requested a minimum extension of 90 days to satisfy the required amendments (Administrative Record No. PA–690).

On March 5, 1987, OSMRE invited public comment on the State's request for additional time to amend its program (52 FR 6828). No comments were submitted to OSMRE during the comment period.

**III. Director's Decision**

The Director has decided to grant Pennsylvania's request and extend the deadline for the State to satisfy the requirements set forth under 30 CFR 938.16(c), (d), (e) and (f) until August 24, 1988.

This extension will enable Pennsylvania to coordinate the adoption of amendments to satisfy these requirements with other regulatory reform efforts currently being undertaken by the State.

**IV. Additional Determinations**

*1. Compliance with the National Environmental Policy Act*

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

*2. Executive Order No. 12291 and the Regulatory Flexibility Act*

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

*3. Paperwork Reduction Act*

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

**List of Subjects in 30 CFR Part 938**

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: May 19, 1987.

James W. Workman,

*Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.*

**PART 938—PENNSYLVANIA**

1. The authority citation for Part 938 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

**§ 938.16 [Amended]**

2. Sections 938.16(c), (d), (e) and (f) are amended by substituting August 24, 1987 for January 31, 1987, each time that date appears in those paragraphs.

BILLING CODE 4310-05-M

## DEPARTMENT OF EDUCATION

**34 CFR Parts 605, 606, 705, and 728**

**Removal of Miscellaneous Regulations**

**AGENCY:** Department of Education.

**ACTION:** Final regulations.

**SUMMARY:** The Secretary amends Title 34 of the Code of Federal Regulations (CFR) by removing certain obsolete parts. These CFR parts are no longer needed for the reasons stated in this document. The Secretary takes this action as part of the deregulation review to eliminate unnecessary regulations.

**EFFECTIVE DATE:** These regulations take effect May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** A. Neal Shedd, 400 Maryland Avenue, SW. (Room 2131, FOB–6), Washington, DC 20202. Telephone: (202) 732–2887.

**SUPPLEMENTARY INFORMATION:** Under Executive Order 12291, effective February 17, 1981, the Department of Education (ED) is reviewing and, where possible, eliminating unnecessary regulations.

**Part 605—Continuing Education Outreach—State Administered Program and Part 606—Continuing Education Outreach—Special Projects Program**

Parts 605 and 606 are removed because they have been superseded by new legislation. The Higher Education Amendments of 1986, Pub. L. 99–498, enacted October 17, 1986, amended the legislation authorizing the Continuing Education Outreach Program to establish a new program. The Continuing Education Outreach Program was eliminated.

**Part 705—Government in the Sunshine Act Regulations**

These regulations apply only to the National Council on Educational Research (NCER). The regulations are obsolete because the NCER has been replaced by the National Advisory Council on Educational Research and Improvement. See section 1401, Pub. L. 99-498, enacted October 17, 1986.

**Part 726—Capacity-Building for Statistical Activities in State Agencies**

This program is not required by statute. As a result of a change in Department policy, the Secretary no longer funds projects under this program. These regulations are therefore unnecessary.

Grants previously awarded by the Secretary under 34 CFR Parts 605, 606, and 726 remain subject to the regulations in effect at the time the grants were made.

**Waiver of Proposed Rulemaking**

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)) and the Administrative Procedure Act (5 U.S.C. 551 *et seq.*), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. However, the removal of these obsolete regulations is purely technical and does not establish new substantive policy. Therefore, the Secretary has determined under 5 U.S.C. 553(b)(B) that proposed rulemaking on these regulations is unnecessary and contrary to the public interest.

**List of Subjects**

*34 CFR Part 605*

Colleges and Universities, Education, Grant programs—education.

*34 CFR Part 606*

Education, Educational facilities, Government contracts, Grant programs—education.

*34 CFR Part 705*

Education Department, Sunshine Act.

*34 CFR Part 726*

Computer technology, Education, Grant programs—education, Intergovernmental relations, Statistics.

Dated: May 8, 1987.

(Catalog of Federal Domestic Assistance Numbers do not apply.)

William J. Bennett,

*Secretary of Education.*

The Secretary amends Title 34 of the Code of Federal Regulations as follows:

**PART 605—CONTINUING EDUCATION OUTREACH—STATE ADMINISTERED PROGRAM [REMOVED]**

1. Part 605 is removed.

**PART 606—CONTINUING EDUCATION OUTREACH—SPECIAL PROJECTS PROGRAM [REMOVED]**

2. Part 606 is removed.

**PART 705—GOVERNMENT IN THE SUNSHINE ACT REGULATIONS [REMOVED]**

3. Part 705 is removed.

**PART 726—CAPACITY-BUILDING FOR STATISTICAL ACTIVITIES IN STATE AGENCIES [REMOVED]**

4. Part 726 is removed.

[FR Doc. 87-11882 Filed 5-22-87; 8:45 am]

BILLING CODE 4000-01-M

---

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 60**

[FRL-3206-4]

**National Emission Standards for Hazardous Air Pollutants and Standards of Performance for New Stationary Sources Delegation of Authority to the State of New York**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule; Delegation of authority.

**SUMMARY:** This notice announces the delegation of authority by the Environmental Protection Agency to the State of New York to implement and enforce additional source categories of the Standards of Performance for New Stationary Sources (NSPS) and National Emission Standards of Hazardous Air Pollutants (NESHAPS) along with revisions and amendments to the NSPS and the NESHAPS. The delegation was requested by the New York State Department of Environmental Conservation (NYSDEC). NSPS and NESHAPS are air pollution control requirements set under the Clean Air Act. This action informs all affected sources of the need to submit to the State, in addition to the EPA, all the information required pursuant to the delegated subparts. NSPS are applicable to certain categories of new air pollution sources. NESHAPS are applicable to certain categories of both new and existing sources.

**EFFECTIVE DATE:** The action is effective on May 26, 1987. This action became applicable on December 17, 1986.

**FOR FURTHER INFORMATION CONTACT:** Francis W. Giaccone, Chief Air Compliance Branch, Air & Waste Management Division, EPA Region II Office, 26 Federal Plaza, New York, New York 10278, (212) 264-0627.

**SUPPLEMENTARY INFORMATION:** Sections 111(c) and 112(d) of the Clean Air Act directs the Administrator of the Environmental Protection Agency (EPA) to delegate EPA's authority to implement and enforce Standards of Performance for New Stationary Sources (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) to any state which has submitted adequate procedures. Nevertheless, the Administrator still retains concurrent authority to enforce the standards following delegation of authority to a state.

On July 14, 1983 EPA and the New York State Department of Environmental Conservation (DEC) entered into a delegation agreement whereby, among other things, EPA would offer, every six months, delegation of those new categories of NSPS and NESHAPS standards that were promulgated by EPA during that six month peirod and that EPA found DEC had the authority to implement and enforce. Additionally by this July 14, 1983 delegation agreement, EPA was to inform DEC of any changes or revisions to previously delegated NSPS or NESHAPS categories. Subsequently, DEC would accept delegation of these changes and revisions if DEC did not decline such delegation.

On July 14, 1986 EPA offered for delegation to the State of New York seven new NSPS categories. On December 17, 1986, DEC accepted delegation of these new Subparts. The following provides a listing of new NSPS and NESHAPs delegated to the DEC.

**NSPS Delegation**

AAa Steel plants: Electric Arc Furnaces and AODs
LL Metallic Mineral Processing Plants
FFF Flexible Vinyl & Urethane Coast & Print
JJJ Petroleum Dry Cleaners
LLL $SO_2$ Emissions from Onshore Natural Gas Plants
OOO Nonmetallic Mineral Processing Plants

BEST COPY AVAILABLE

**PPP Wool Fiberglass Manufacturing Plants**

**NESHAPS Delegation**

**No additional Categories**

**EPA's Findings**

EPA's determination that the delegation be approved is based on the Agency's review of New York's statutory authority contained in 6 NYCRR, Chapter III of the New York Code. Based on that review, EPA concluded that this statutory authority is adequate to enforce the delegated NSPS/NESHAPS standards through NYSDEC's permit system. EPA has reviewed 6 NYCRR, Chapter III, Parts 200 and 201 and has concluded that these regulations will enable EPA to fully delegate NSPS/NESHAPS implementation and enforcement authority to NYSDEC for those NSPS and NESHAPS identified in this notice and that such delegation is, therefore, appropriate. EPA notified the Commissioner of these findings in a letter dated July 14, 1986.

The delegation is based upon the same conditions as those stated in the agreement of July 14, 1983 between EPA and DEC. Copies of all correspondence and EPA's delegation letter are available for public inspection in the Office of Air Compliance Branch at the Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

**Consequences of EPA's Action**

Effective December 17, 1986 all correspondence, reports, notifications required by the delegated NSPS and NESHAPS should be submitted to the New York State Department of Environmental Conservation, Division of Air Resources, 50 Wolf Road, Albany, NY 12223-0001.

The Office of Management and Budget has exempted this action from the requirements of section 3 of Executive Order 12291.

This Notice is issued under the authority of section 111 of the Clean Air Act, as amended (42 U.S.C. section 7411).

Dated: May 6, 1987.

Christopher J. Daggett,

*Regional Administrator.*

## PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Title 40, Chapter I, Subchapter C, Part 60, Code of Federal Regulations is amended as follows:

### Subpart A—General Provisions

1. The authority citation for Part 60 continues to read as follows:

**Authority:** 42 U.S.C. 7401–7642.

2. Section 60.4 paragraph (b)(FF)(1) is revised to read as follows:

**§ 60.4 Address.**

# Proposed Rules

Federal Register
Vol. 52, No. 100
Tuesday, May 26, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Food and Nutrition Service

### 7 CFR Parts 272 and 278

[Amdt. No. 291]

### Food Stamp Program, Sales Tax Provision Clarifications; Sequencing of Food Stamp Transactions and Compliance Enforcement

**AGENCY:** Food and Nutrition Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This rule contains proposed regulations for the Food Stamp (FS) Program to implement a method to allocate food stamps in store transactions where an individual pays with both food stamps and cash and some of the eligible food items purchased are taxed. Implementing these changes will allow stores to simply and efficiently conduct food stamp transactions under the sales tax provision. This rule would also clarify the mothod that will be used to enforce compliance with the sales tax provision.

**DATE:** Comments on this proposed rulemaking must be received on or before July 27, 1987 to be assured of consideration.

**ADDRESS:** Comments should be submitted in writing to M. Patricia Warner, Chief, Administration and Design Branch Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia, 22302. All written comments will be open to public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday), at 3101 Park Center Drive, Alexandria, Virginia, Room 716.

**FOR FURTHER INFORMATION CONTACT:** Questions regarding this proposed rulemaking should be directed to Mr. O'Connor at the above address or by telephone at (703) 756–3385.

**SUPPLEMENTARY INFORMATION:**

**Classification**

*Executive Order 12291*

The Department has reviewed this proposed rule under Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has classified it as "not major." The rule will not have an annual effect on the economy of $100 million or more, nor is it likely to result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions. The rule would not result in significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Although this rule will affect the business community, this effect is not expected to be significant. The sequencing provision will affect approximately 100,000 approved retail stores, but the change in operating procedures it requires is minor. Potential penalties will affect only those stores that fail to comply with the sales tax exemption requirements.

*Executive Order 12372*

The Food Stamp Program is listed in the *Catalog of Federal Domestic Assistance* under No. 10.551. For the reasons set forth in the Final rule related Notice(s) to 7 CFR Part 3015, Subpart V (Cite 48 FR 29115, June 24, 1983 or 48 FR 54317, December 1, 1983, as appropriate and any subsequent notices that may apply), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

*Regulatory Flexibility Act*

The proposed rule has also been reviewed with regard to the requirements of Pub. L. 96–354 and S. Anna Kondratas, Acting Administrator of the Food and Nutrition Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The rule proposes to simplify the procedures stores use in the acceptance of food stamps and to clarify the manner in which complaince with the sales tax provision will be enforced.

*Paperwork Reduction Act*

There are no reporting or recordkeeping provisions included in this proposed rule.

**Background**

Section 4(a) of the Food Stamp Act, as amended by section 1505 of Pub. L. 99–198, prohibits participation in the Food Stamp Program by States in which State or local sales taxes are collected on food stamp purchases. On April 1, 1986 the Department issued final rules (at 51 FR 11009) which implemented the sales tax provision. Since that time, as States and retailers began their planning for implementation, it was discovered that certain technical aspects of retailer acceptance of food stamps were affected by the sales tax provision. Neither the statute nor the April 1 regulations contained specific guidance on how these problems should be addressed. The Department decided that proposed regulations were needed to elicit comments from State agencies, retailers, and the general public on resolving these technical problems.

The April 1, 1986 publication reiterated the statute when it stated that the failure of a State or local government to change its sales tax law would result in the State no longer participating in the Food Stamp Program. Those rules did not establish how this penalty would be imposed. This proposal would establish how compliance with the sales tax provision will be enforced.

*Sequencing of Food Stamp Transactions (§ 272.1(b)(2))*

In planning for the implementation of the sales tax provision two problems came to our attention with regard to how the prohibition against charging sales taxes on food stamp purchases should be applied at the check-out counter. The first problem is with the sequencing of purchases. Sequencing refers to the order in which food stamps are applied to eligible items in a food order containing both taxable and non-taxable items when the recipient presents both food stamps and cash to pay for the order. The following example illustrates the problem:

A recipient arrives at the check-out with a $50 order consisting entirely of eligible food. However, $10 of the food is taxable under State (soda, gum, candy,

etc.). The remainder is not taxed. The recipient gives the cashier $10 in food stamps and $40 in cash to pay for the order. If the $10 in food stamps is considered payment for the $10 worth of taxable food, no tax would be charged. However, if the $10 in food stamps is considered payment for a portion of the non-taxable food, the recipient will be charged tax for the items paid for with cash.

Our regulations do not clearly address this situation. The rules issued April 1, 1986 state that: "Although a food stamp recipient may use a combination of cash and food stamps in making a food purchase, only the dollar amount represented by the food coupons needs to be exempt from taxation" (§ 272.1(b)). The preamble discussion of this provision states, in part that ". . . a recipient paying for $25 worth of groceries with $10 in coupons and $15 in cash, must have sales taxes exempted on $10 worth of the purchase" (51 FR 11010).

The second problem that came to our attention is double-sorting. Double-sorting is the need for checkers in stores without sophisticated electronic checkout machines to physically sort the groceries into two piles *a second time.* Currently, one physical sort separates eligible from non-eligible items; the second sorting procedure would separate the eligible pile into two further sub-piles: Taxable items and non-taxable items. This procedure is confusing and could increase considerably the time needed for each food stamp transaction.

The sequencing and double-sorting problems occur only in partial-tax States; i.e., in those States which tax some food items but not others and only in transactions where food stamp recipients have insufficient stamps to cover all their eligible food purchases. Neither problem occurs in States where *no* eligible food is taxed or where *all* eligible food is taxed. Sequencing is an implementation-related problem only; i.e., once a sequencing method is chosen and implemented no further problem exists. Double-sorting is an ongoing problem, intrinsic to the sales tax provision in partial-tax States in stores lacking top-line electronic checkout machines.

There are 28 partial-tax jurisdicitons according to our most recent information. There are: California, Connecticut, District of Columbia, Florida, Indiana, Iowa, Kentucky, Louisiana, Maryland, Michigan, Minnesota, New Jersey, New York, North Dakota, Ohio, Pennsylvania, Rhode Island, Texas, Vermont, Washington, West Virginia, Maine, Massachusetts, New Hampshire, Colorado, Alaska, Arizona, and Wisconsin. Of these, Alaska, Colorado and Arizona, do not have Statewide taxes but some of their municipalities do have taxes, and some of these municipalities tax some food items but not others. Of the 28 partial-tax jurisdictions, four implemented the sales tax provision October 1, 1986. These were Maryland, Kentucky, Indiana, and Alaska. Wisconsin, because of a State law passed some years ago, is already in compliance with the sales tax provision.

The double-sorting problem can be accommodated by stores with electronic checkout machines capable of both storing taxable and non-taxable totals and manipulating these. The machines' software programs thus perform the double-sort function electronically. However, many small stores and some mid-size stores in the 28 partial-tax States, because they lack these expensive machines and must do the double-sort manually, could eventually face one of these choices: Dropping voluntarily from the Food Stamp Program, purchasing the equipment needed to accommodate the double-sorting problem, being forced off the program due to compliance violations, or losing food stamp business to rival stores.

A store that attempts to manually perform the double-sort will nearly double the time needed for food stamp recipients to buy their groceries, irritating both food stamp customers and non-food stamp customers and giving them a strong incentive to shop elsewhere. In addition, the volume of customers they can handle per hour will decrease, further increasing their costs and pinching their profits. A small store that wants to buy the necessary machine (which costs thousands of dollars) may not be able to afford it. The above problems could force a store off the program. A store that chooses not to perform the double-sort would automatically be in violation of the sales tax provisions. Likewise, a store that buys the equipment may have to raise all food prices to cover the cost of this capital investment, a result which could negate the Congressional purpose of relieving food stamp recipients of the burden of paying State and local taxes on purchases made with food stamps.

The Department proposes to give State agencies a choice of two ways to address the sequencing and double-sorting problems. The first method results in both problems being eliminated. The Department recommends that this method be followed. The second choice given to State agencies is a method to solely address the sequencing problem. State agencies that did not choose to adopt method one would be required to follow method two.

One of the two methods being proposed in this rule for resolving the sequencing problem is to eliminate the problem entirely by mandating by law that no sales tax be charged on any eligible items in any transaction in which an individual uses any amount of food stamps. Since no tax is charged, there is nothing to sequence. This method also simultaneously solves the double-sorting problem-because taxable and non-taxable distinctions become irrelevant to the sales tax provision.

While this comprehensive solution might seem to be one which could cost a State a significant sum of money in 'lost' sales tax receipts, on careful examination the amount of lost State tax dollars is likely to be quite small. The amount of tax collected on a transaction in a partial-tax State is relatively small. Typically, the partial-tax States tax only such items as soda pop and/or candy and a few miscellaneous items such as seeds, ice, etc. These items generally constitute only a small percentage of a household's total food purchases. According to data from a Department of Agriculture Economic Report (1979) on the monthly food consumption of food stamp recipients, the dollar percentage represented by soft drinks was 1.7 percent and candy 1.3 percent. Because taxable items constitute such a small proportion of food stamp households' monthly purchases, the vast majority of participating households will be using food stamps to cover the entire cost of the items and not paying tax anyway. Thus, it is likely that under this option a State's only revenue loss will be from households receiving low benefit levels. This is because the "loss" will occur only when taxable items are purchased with a combination of cash and food stamps.The State of Maryland, which implemented the sales tax provision on October 1, 1986 chose this innovative solution by having its revenue department issue the appropriate directive to all stores in the State.

In implementing the comprehensive method there should not be any limiting provisions, such as tying the exclusion to the proportion of food stamps versus cash proferred in the transaction. FNS believes an administrative solution such as this must be straightforward and uncomplicated to make it workable. Otherwise it becomes burdensome for retailers, and equitable and efficient

compliance monitoring by the State or FNS are impossible.

The other method being proposed in this rule for resolving the sequencing problem is the option by which food stamps are allocated *first* to *taxable* items. States that do not choose the first method would be required to follow this second method.

In analyzing how a food stamp transaction might be sequenced, the Department identified three potential methods that could be followed: (1) Allocate stamps first to taxable eligible items, (2) allocate stamps first to non-taxable eligible items, and (3) allocate stamps proportionally to the taxable and non-taxable eligible items. Using the following example these methods will be described in detail: A food stamp recipient wishes to purchase $50 worth of eligible foods and has $5 in food stamps and $45 in cash; of the $50, $44 worth of the items is non-taxable and $6 is taxable. The applicable sales tax is 5 percent.

The first method for allocating food stamps is to apply them first to the taxable portion of the transaction. Using this method in the example above, the dollar value ($5) of the food stamps is *first* applied against the cost of the taxable food items ($6). The recipient would pay 5 cents in sales tax on the one dollar's worth of taxable items not purchased with food stamps.

We believe this method comports most closely with the intent of Congress in protecting recipient food stamp benefits, and is administratively simple for retailers to implement. Wisconsin, the only "partial-tax" State to have implemented the sales tax provision prior to October 1, 1986, uses this sequencing option. Alaska and Kentucky implemented the sales tax provision on October 1, 1986 using this option. Any State law which implements this provision must be specific, e.g., it cannot use permissive language, such as by saying that retailers would be *permitted* to apply food stamps first against taxable items. Such a directive would not meet the requirements of the proposed rule, i.e., individual *retailers* are not to be allowed discretion, a mandated uniform procedure must be applied. (Although the above discussion identified only "retailers" by name, the sales tax provision applies equally to approved wholesalers, such as those who sell taxed food in bulk to institutions like drug and alcohol treatment facilities which purchase them with food stamps, acting as authorized representatives for the institution's individual residents.)

The second method for allocating food stamps is to apply them first to the nontaxable items in the transaction. Using this method in the example above, the dollar value ($5) of the food stamps is applied *first* against the $44 worth of *nontaxable* food items. The result is that the food stamp recipient pays sales tax on 100 percent of the items bought with food stamps and would pay 30 cents in sales tax. We believe this method would undermine the purpose of Congress by effectively reducing the food purchasing power of food stamps as can be seen in the example. This allocation method would indirectly tax those benefits.

A third method for allocating food stamps is to apply them to taxable items according to the proportion of the total payment the food stamps comprise. Using this method the cashier must first determine what *proportion* of the total purchase is represented by the food stamps. Sales tax is then *excused* on that *proportion* of the total purchase. In the example, the recipient has $5 in food stamps. The cashier therefore determines the *proportion to excuse* as 10 percent ($5/$50=1/10). Sales tax is therefore charged against 90 percent of the taxable total (which is $6). The recipient thus pays 27 cents tax.

The major problem with this method is its complexity. A small and medium size store would need a separate pocket calculator to do the proportion and allocation computations, which would be time-consuming and significantly increase each transaction time. Moreover, some of the companies that make the most sophisticated electronic point of sale equipment have told us of "dry runs" and simulations they have performed to see if they could handle the allocation scheme. The conclusion so far is that even the most sophisticated machines do not have the necessary technical capability. In addition, this method would impose a higher tax on recipients.

Since the first method is, administratively, the simplest, the second method violates the intent of the statutory provision, and the third method is far to complex, the Department is proposing the first method. Therefore, the proposed regulations offer States a choice of the comprehensive option or the sequence option under which food stamps are allocated first to taxable items.

*Double Allocation*

A further complication to the allocation issue has been raised. It arises where States have different sales tax rates on different eligible food items. For example, candy might be taxed at 5 percent, while fruit juice is taxed at 3 percent. We know that the States of Illinois, New York and Vermont have multiple tax rates on eligible foods, and there may be others with such multiple rates, especially where localities levy sales taxes in addition to those imposed by the States.

The Department has examined this problem and decided that States and localities must decide for themselves how best to resolve it. Their resolution would have to be within the framework of the two options for solving sequencing problems established in this rule. In providing guidance to affected States and localities, the Department would like to point out that the administrative complexity raised by the existence of multiple sales tax rates argues in favor of adopting our recommended solution: the dropping of all sales tax on transactions where food stamps are used.

*Compliance With the Sales Tax Provision (§§ 272.1(b)(3); 278.1(l)(1)(iv) and (2); 278.6(e)(7))*

The Food Security Act of 1985 clearly states what is supposed to occur should a State or locality fail to change its sales tax laws to prohibit the collection of sales taxes on food stamp purchases. In such a circumstance, the States is to no longer participate in the Food Stamp Program. As noted earlier, the April 1, 1986 regulations restated the legislation. Since their issuance, however, some questions have arisen as to how the Department would invoke the penalty.

The Department proposes to enforce compliance with two general actions. First the administrative funding provided to the affected State as well as the distribution of food stamps in the affected State would be stopped. Second, the authorization to accept and redeem food stamps would be withdrawn from all retail and wholesale food concerns located in the affected State. Essentially, the Department would not consider the participation of these stores in the Program as effectuating the purposes of the program since they would be required under State or local law to collect sales taxes on food stamp purchases. Effectuating the purpose of the program is one of the criteria that a store must meet under Section 9(a) of the Food Stamp Act in order to be authorized to participate in the program (7 U.S.C. 2018(a)). This action would be taken to ensure that people from outside the affected State would not bear the sales tax burden in the affected State. This would also prevent food stamp purchases from being taxed and thereby augmenting the tax collections of the affected State. Preventing food stamp benefits form serving as an indirect Federal subsidy to State and local governments is one of the reasons why Congress enacted the sales tax

provision (see Senate Report 99–145, p. 252).

A related compliance issue has also arisen. The issue is what action needs to be taken if an authorized store is found to be collecting sales taxes on food stamp purchases even though the State or locality where the store is located has changed its sales tax law to prohibit such a practice. The Department proposes to consider such action by an authorized firm to be a potential violation of the rules governing its participation in the program. Such a violation when detected would result in the store being issued a warning letter and notification sent to the appropriate State revenue office.

**Implementation**

The Department is proposing to make the comprehensive exemption/sequencing provision effective 30 days after publication of the final rule in the Federal Register for all States and localities which have already implemented the sales tax prohibition. All others would implement on or before October 1, 1987. The store warning/penalty provisions will be effective October 1, 1987.

**List of Subjects**

*7 CFR Part 272*

Alaska, Civil rights, Food stamps, Grant programs-social programs, Reporting and recordkeeping requirements.

*7 CFR Part 278*

Administrative practice and procedure, Banks, Banking, Claims, Food Stamps, Groceries-retail, Groceries, general line—wholesaler, Penalties.

Accordingly, Parts 272 and 278 are proposed to be amended as follows:

1. The authority citation for Parts 272 and 278 continues to read:

**Authority:** 7 U.S.C. 2011–2029.

## PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

2. In § 272.1:

(a) The text of paragraph (b) is redesignated (b)(1).

(b) New paragraphs (b)(2) and (b)(3) are added.

The revision and additions read as follows:

**§ 272.1 General terms and conditions.**

* * * * *

(b) No Sales Taxes on Food Stamp Purchases. (1) * * *

(2) In applying the sales tax provision, a State or local area which taxes some, but not all, eligible food items shall mandate that all eligible items purchased in transactions in which food stamps are used are exempt from sales tax regardless of the amount of the food stamps, or mandate that food stamps be allocated first to taxable eligible items.

(3) States shall ensure that no State or local law permitting the imposition of tax on food paid for with food stamps is in effect at any time after September 30, 1987. If a State fails to comply with this requirement, FNS may terminate the issuance of food stamps in that State and disallow administrative funds otherwise payable pursuant to Part 277. Disallowance actions shall be undertaken pursuant to the procedures set forth in § 276.4.

* * * * *

## PART 278—PARTICIPATION OF RETAIL FOOD STORES, WHOLESALE FOOD CONCERNS AND INSURED FINANCIAL INSTITUTIONS

3. In § 278.1, paragraph (l) is revised to read as follows:

**§ 278.1 Approval of retail food stores and wholesale food concerns.**

* * * * *

(l) *Withdrawing authorization.* (1) FNS shall withdraw the authorization of any firm authorized to participate in the program for any of the following reasons.

(i) The firm's continued participation in the program will not further the purposes of the program;

(ii) The firm fails to meet the specifications of paragraphs (b), (c), (d), or (e) of this section;

(iii) The firm has been found to be circumventing a period of disqualification or a civil money penalty through a purported transfer of ownership; or

(iv) The firm is required under State or local law to charge sales tax on food stamp purchases at any time after September 30, 1987.

(2) The FNS officer in charge shall issue a notice to the firm by certified mail or personal service to inform the firm of the determination and of the review procedure. FNS shall remove the firm from the program if the firm does not request review within the period specified in § 279.5.

* * * * *

4. In § 278.2, the first sentence of paragraph (b) is revised. The revision reads as follows:

**§ 278.2 Participation of retail food stores.**

* * * * *

(b) *Equal treatment for coupon customers.* Coupons shall be accepted for eligible foods at the same terms and conditions applicable to cash purchases of the same foods at the same store except that sales tax shall not be charged on eligible foods purchased with food stamps. * * *

* * * * *

5. In § 278.6, paragraph (e)(7) is revised as follows:

**§ 278.6 Disqualification of retail food stores and wholesale food concerns, and imposition of civil money penalties in lieu of disqualifications.**

* * * * *

(e) *Penalties.* * * *

(7) Send the firm a warning letter if violators are too limited to warrant a disqualification or a firm has been found to be charging sales tax on purchases made with food stamps where State or local law forbids such a practice. Any sales tax warning sent to a store must be reported to the appropriate State revenue office.

* * * * *

Dated: May 18, 1987.

**S. Anna Kondratas,**

*Acting Administrator, Food and Nutrition Service.*

[FR Doc. 87–11873 Filed 5–22–87; 8:45 am]

BILLING CODE 3410-30-M

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### 14 CFR Parts 21 and 23

**[Docket No. 087CE, Notice No. 23–ACE–33]**

### Special Conditions; Ballistic Recovery System, Inc., Modified Cessna 150/A150 Series Airplanes and 152/A152 Model Airplanes to Incorporate the GARD–150 System

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of Proposed Special Conditions.

**SUMMARY:** This notice proposes special conditions for the supplementary type certification of the Ballistic Recovery Systems, Inc. General Aviation Recovery Device (GARD) in Cessna 150/A150 Series and 152/A152 Model Airplanes. This system is referred to as the GARD–150. This modification will have novel or unusual design features associated with a parachute recovery system for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards. This notice contains the safety standards which the Administrator finds necessary to establish a level of safety equivalent to the original certification basis for these airplanes.

**DATE:** Comments must be received on or before June 25, 1987.

**ADDRESS:** Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, ACE-7, Attention: Rules Docket Clerk, Docket No. 037CE, Room No. 1558, 601 East 12th Street, Kansas City, Missouri 64106. All comments must be marked: Docket No. 037CE. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

**FOR FURTHER INFORMATION CONTACT:** Ronald K. Rathgeber, Aerospace Engineer, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Central Region, Federal Aviation Administration, Room 1656, 601 East 12th Street, Federal Office Building, Kansas City, Missouri 64106; telephone (816) 374-5688.

**SUPPLEMENTARY INFORMATION:**

**Comments Invited**

Interested persons are invited to participate in the making of these special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified in this notice will be considered by the Administrator before taking action on these proposals. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available in the Rules Docket for examination by interested parties both before and after the closing date for submission of comments.

**Type Certification Basis**

The type certification basis (TC 3A19) for the Cessna Aircraft Company 150/A150 Series Airplanes and 152/A152 Model Airplanes is Part 3 of the Civil Air Regulations dated May 15, 1956, through Amendment 3-4; § 23.1559, effective March 1, 1978 for S/N 15282032 and on of the model 152 and S/N 681, A1520809 and on of the model A152; Part 36, dated December 1, 1969, plus Amendments 36-1 through 36-5 for the model 152 only; and any special conditions which result from this proposal.

**Background**

On January 12, 1987, Ballistic Recovery Systems, Inc. (BRS), 9242 Hudson Boulevard, Lake Elmo, Minnesota 55042, filed an application for a supplemental type certificate (STC) to install the GARD-150 parachute recovery system on Cessna 150/A150 Series and 152/A152 Model Airplanes. The applicant proposes to certificate a parachute recovery system which is intended to recover an airplane in emergency situations; such as mid-air collision, loss of engine power, loss of airplane control, severe structural failure, pilot disorientation, or pilot incapacitation. The GARD-150 system, which is only to be used as a last resort, is intended to prevent serious injuries to the airplane occupants by parachuting the airplane to the ground.

The GARD-150 system consists of a parachute with a canopy approximately 50 feet in diameter, which is packed in a canister mounted in the left aft portion of the baggage compartment. A solid propellant rocket motor, located at the left side of the canister and attached to the canopy sleeve, is used to deploy the canopy. A door is postioned above the canister to seal the canister, parachute canopy, and rocket motor from the elements and provide free exit when the canopy is deployed. The GARD-150 is deployed by a mechanical pull handle mounted on the pilot side of the airplane trim wheel pedestal.

The rocket motor initiator is a mechanical device, and the GARD-150 system requires no electrical power. The system is dormant in the normal configuration since the rocket motor is unarmed. At least two separate and independent pilot actions are required to deploy the system.

A four-cable bridle attaches the canopy bridle to the airplane primary structure at wing and main landing gear bulkheads. The cable lengths are designed to provide the best airplane touchdown attitude. The cables are routed externally on each side of the fuselage from the door to the attach points. The cables are covered with small frangible fairings.

The applicant intends to provide a supplement to the FAA-approved Airplane Flight Manual as part of the STC for those airplanes which have such a manual. The supplement will describe the system, define the operating envelope with appropriate warnings, and define required system maintenance and inspection information. A separate FAA approved GARD-150 Operating Manual will be provided for those airplanes which do not have an FAA-approved Airplane Flight Manual.

The GARD-150 system includes a placard located near the pull handle in clear view of the pilot to identify the system and operating envelope, state deployment actions, and provide appropriate warnings. A warning placard is located on the canister near the rocket motor.

**Discussion**

The installation of GARD-150 parachute recovery system in Cessna 150/A150 Series and 152/A152 Model Airplanes was not envisioned when the certification basis for these airplanes was established. In addition, the Administrator has determined that the current Part 23 does not contain adequate or appropriate safety standards for the GARD-150 system; therefore, this system is considered a novel and unusual design feature.

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101(b)(2) do not contain adequate or appropriate safety standards because of the novel and unusual design features of the airplanes. Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice, as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become part of the type certification basis, as provided by § 21.101(b)(2).

Special conditions are proposed for special flight test demonstrations. These requirements would assure that the GARD-150 system will perform its intended function without exceeding the strength capabilities of the system. These requirements would also require that demonstrations be made to show that the parachute will deploy in various specified flight conditions.

Special conditions are proposed for the occupant restraint provisions. These requirements would assure that airplanes modified with the GARD-150 system would be equipped with a restraint system designed to protect the occupants from injury during parachute deployment and ground impact.

Special conditions are proposed for the GARD-150 parachute performance. The requirements would assure that: (1) The parachute complies with applicable section of TSO-C23c (SAE AS8015A) at the critical airplane weights, (2) the parachute deployment loads do not exceed the structural strength of the airplane, (3) the system will provide a ground impact which does not result in serious injury of the passengers, and (4) the system will operate in adverse weather conditions.

Special conditions are proposed for the functions and operations of the GARD-150 system. These requirements would assure that: (1) There is no fire hazard associated with the system, (2)

the system has adequate reliability, (3) the sequence of arming and activating the system will prevent inadvertent deployment, (4) the system can be activated from either the pilot's or copilot's seat by various sized people, (5) the system will be labeled to show its identification functions and operating limitations, and (6) the parachute can be jettisoned after impact in adverse weather conditions.

Special conditions are proposed for protection of the GARD–150 system. These requirements would assure that the system is protected from deterioration due to weathering, corrosion, abrasion, and other causes; and that provisions are made to the parachute canister to provide adequate ventilation and drainage.

Special conditions are proposed for system inspection provisions. These requirements would assure that adequate means are available to permit close examination of the GARD–150 system components and that instructions for continued airworthiness are provided.

Special conditions are proposed for the operating limitations of the GARD–150 system. These requirements would assure that the system operating limitations are within the approved flight envelope of the airplane and that operating limitations require that the parachute is inspected and repacked each 120 days.

The FAA has considered the features proposed by Ballistic Recovery Systems, Inc. for the GARD–150 installation in the Cessna 150/A150 Series and 152/A152 Model Airplanes and has concluded that, notwithstanding the existing requirements applicable to these airplanes, which did not envision the use of each system, special conditions should be promulgated for such systems to provide the necessary level of safety. Accordingly, special conditions are proposed.

**List of Subjects in 14 CFR Parts 21 and 23**

Aviation safety, Aircraft, Air transportation, Safety, and Tires.

The authority citation for these Special Conditions is as follows:

Authority: Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958; as amended (49 U.S.C. 1354(a), 1421, and 1423); 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 21.16 and 21.101; and 14 CFR 11.28 and 11.29(a).

**The Proposed Special Conditions**

Accordingly, the Federal Aviation Administration proposes the following special conditions as a part of the type certification basis for Cessna 150/A150 Series and 152/A152 Model Airplanes modified to incorporate the Ballistic Recovery Systems, Inc. GARD–150 parachute recovery system.

*1. Flight Test Demonstration*

(a) The GARD–150 system must be demonstrated in flight to satisfactorily perform its intended function, without exceeding the system deployment limit load factors, for the critical flight conditions.

(b) Satisfactory deployment of the GARD–150 parachute must be demonstrated, at the most critical airplane weight and balance, for the following flight conditions:

(i) Power off stall with slow entry,

(ii) Spin with deployment at one turn,

(iii) Normal cruise at 100 knots and 1G normal load,

(iv) Maneuvering speed with 2G normal load, and

(v) Never exceed speed with 1G normal load.

*2. Occupant Restraint*

Each seat in an airplane modified with the GARD–150 system must be equipped with a restraint system, consisting of a seat belt and shoulder harness, which will protect the occupants from head and upper torso injuries during parachute deployment and ground impact at the critical load conditions.

*3. Parachute Performance*

(a) The GARD–150 parachute must comply with the applicable requirements of TSO–C23c, or an approved equivalent, for the critical airplane weights.

(b) The GARD–150 system limit load factor for deployment must not exceed 80 percent of the airplane ultimate load factor.

(c) It must be shown that, although the airplane structure may be damaged, the airplane impact during touchdown will result in an occupant environment in which serious injury to the occupants is improbable.

(d) It must be shown that, with the GARD–150 parachute deployed, the airplane can impact the ground in various adverse weather conditions, including winds up to 15 knots, without endangering the airplane occupants.

*4. System Functions and Operations*

(a) It must be shown that there is no fire hazard associated with activation of the GARD–150 system.

(b) The GARD–150 system must be shown to function reliably and to adequately perform its intended function.

(c) It must be shown that arming and activating the GARD–150 system can only be accomplished in a sequence which makes inadvertent deployment extremely improbable.

(d) It must be demonstrated that the GARD–150 system can be activated without difficulty by various sized people, from a 10th percentile female to a 90th percentile male, while sitting in the pilot or copilot seat.

(e) The GARD–150 system must be labeled to show its identification, function and operating limitations.

(f) It must be shown that, after impact, the parachute can be jettison under various adverse weather conditions, including high winds.

*5. System Protection*

(a) All components of the GARD–150 system must provide protection against deterioration due to weathering, corrosion, abrasion, and other causes.

(b) Adequate provisions must be made for ventilation and drainage of the parachute canister and associated structure to ensure the sound condition of the system.

*6. System Inspection Provisions*

(a) Instructions for continued airworthiness must be prepared for the GARD–150 system which meet the requirements of § 23.1529 of this chapter.

(b) Adequate means must be provided to permit the close examination of the parachute and other system components to ensure proper functioning, alignment, lubrication, and adjustment during any required inspection of the GARD–150 system.

*7. Operating Limitations*

(a) Operating limitations must be prescribed to ensure proper operation of the GARD–150 system within the approved flight envelope of the airplane.

(b) Operating limitations must be prescribed to require that the GARD–150 parachute be inspected and repacked each 120 days. This parachute must be considered an auxiliary parachute in the context of § 105.43(a)(2) of this chapter.

Issued in Kansas City, Missouri, on May 3, 1987.

**Jerold M. Chavkin,**

*Acting Director, Central Region.*

BILLING CODE 4910–13–M

14 CFR Parts 21 and 25

[Docket No. NM-23; Notice No. SC-87-3-NM]

Special Conditions: McDonnell Douglas DC-9-80 and MD-80 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.
ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for the McDonnell Douglas DC-9-80 and MD-80 series airplanes. These series airplanes will have novel or unusual design features associated with the installation of new electronic systems for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards for protection from the indirect effects of lightning. This notice contains the safety standards which the Administrator finds necessary, because of these added design features, to ensure that the functions of these systems, which are critical and essential, are addressed.

DATE: Comments must be received on or before July 10, 1987.

ADDRESS: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Office of the Regional Counsel, Attn: Rules Docket (ANM-7), Docket No. NM-23 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168; or delivered in duplicate to the Office of the Regional Counsel at the above address. Comments must be marked: Docket No. NM-23. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: Gene Vandermolen, Transport Standards Staff, ANM-110, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168, telephone (206) 431-2114.

SUPPLEMENTARY INFORMATION:

## Comments Invited

Interested persons are invited to participate in the making of the proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on this proposal. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available in the Rules Docket for examination by interested persons, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Persons wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. NM-23." The postcard will be date/time stamped, and returned to the commenter.

## Background

On March 10, 1986, the Douglas Aircraft Company, 3855 Lakewood Boulevard, Long Beach, California 90846, made an application to the Federal Aviation Administration (FAA), for an amended type certificate for the MD-88 airplane.

The MD-88 is a 172 passenger (maximum), fuel efficient, low noise (Stage 3) MD-80 series derivative with JT8D-217C or JT8D-219 engines. The MD-88 would be the freighter version incorporating the main cabin cargo door and cargo flooring of previously certificated freighters. The MD-88 weights will be the same as those approved for the MD-82, i.e., 150,500 pounds maximum ramp weight (MRW), 149,500 pounds maximum takeoff weight (MTOW), 130,000 pounds maximum landing weight (MLW) and 122,000 pounds maximum zero fuel weight (MZFW).

The overall exterior configuration and the basic airplane structure will be the same as the MD-80 series currently being delivered. New electronic systems which will be incorporated in the MD-88 include, for example, a flat panel display for showing engine parameters and another flat panel for displaying failure annunciations. These systems are also expected to become available as options for other MD-80 series airplanes. They will also be available for retrofit on in-service airplanes.

Because the current regulations address only structural and fuel tank/fuel vapor ignition lightning protection (direct effects), but do not address lightning indirect effects, protection for electronic control or display systems, special conditions are necessary to provide an equivalent level of safety when compared to traditional designs. These special conditions specify the level of protection required based on the criticality of the function performed by the system. For this reason, these special conditions will be applicable to all of the DC-9-80 and MD-80 series airplanes which incorporate these (or other future) electronic systems, whose functions have been determined to be critical or essential.

## Type Certification Basis

The type certification basis for the McDonnell Douglas MD-80 series airplanes is Part 25 of the FAR effective February 1, 1965, as amended by Amendments 25-1 through 25-40, with certain exceptions which are identified in the Model DC-9 series Airplane Type Certificate No. A6WE. These exceptions are not pertinent to the subject of lightning protection for electronic devices.

## Conclusion

This action affects only certain unusual or novel design features on McDonnell Douglas DC-9-80 and MD-80 series of airplanes. It is not a rule of general applicability and affects only the manufacturer who applied to the FAA for approval of these features on the airplane.

## List of Subjects in 14 CFR Parts 21 and 25

Air transportation, Aircraft, Aviation safety.

## The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes, in addition to §§ 25.581 and 25.954 for the structure and fuel system, the following special conditions for the McDonnell Douglas DC-9-80 and MD-80 series airplanes incorporating these types of electronic systems.

1. The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2), 42 U.S.C. 1857f-10, 4321 et seq.; E.O. 11514; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

2. Each system, whose failure to function properly would prevent the continued safe flight and landing of the airplane, must be designed and installed to ensure that its operation and operational capabilities are not affected when the airplane is exposed to lightning.

3. Systems, whose failure to function properly would reduce the capability of the airplane or the ability of the flightcrew to cope with adverse operating conditions, must be designed and installed to ensure that they can perform their intended functions after the airplane is exposed to lightning.

Issued in Seattle, Washington, on May 13, 1987.

Frederick M. Isaac,

*Acting Director, Northwest Mountain Region.*

**14 CFR Part 71**

**[Airspace Docket No. 87-ASW-16]**

## Proposed Removal of Transition Area; Manila, AR

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to remove the transition area at Manila, AR. The intended effect of the proposed action is to release controlled airspace no longer required for aircraft executing standard instrument approach procedures (SIAP's) to the Manila Municipal Airport, Manila, AR. This action is necessary due to the shutdown of the nondirectional radio beacon (NDB) serving the airport and the subsequent cancellation of SIAP's to the Manila Municipal Airport. This proposed action will also change the airport status from instrument flight rules (IFR) to visual flight rules (VFR).

**DATE:** Comments must be received on or before July 13, 1987.

**ADDRESSES:** Send comments on the proposal in triplicate to: Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

An informal docket may also be examined during normal business hours at the Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

**FOR FURTHER INFORMATION CONTACT:** David J. Souder, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530; telephone: (817) 624-5535.

**SUPPLEMENTARY INFORMATION:**

### Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-ASW-16." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

### Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193-0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

### The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to remove the transition area at Manila, AR. This action is necessary since the NDB has been shutdown due to its age and the inability to obtain necessary repair parts. With the shutdown of the NDB, the existing SIAP has been canceled, thereby canceling the need for a 700-foot transition area. Coincident with this proposed action the airport status will change from IFR to VFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

### The Proposed Amendment

**PART 71—[AMENDED]**

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 Continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.181 [Amended]**

2. Section 71.181 is amended as follows:

Manila, AR [Removed]

Issued in Fort Worth, TX, on May 12, 1987.

Larry L. Craig,

*Assistant Manager, Air Traffic Division, Southwest Region.*

**14 CFR Part 71**

**[Airspace Docket No. 87-AGL-7]**

## Proposed Control Zone Designation Revocation; Various Locations

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to revoke the control zones designated for Ironwood, Michigan; Menominee, Michigan; and Manitowoc, Wisconsin. This action also cancels Airspace Docket No. 85-AGL-13.

The intended effect of this action is to return the designated airspace to a non-controlled status.

**DATE:** Comments must be received on or before June 29, 1987.

**ADDRESS:** Send comments on the proposal in triplicate to: Federal Aviation Administration, Regional Counsel, AGL-7, Attn: Rules Docket No. 87-AGL-7, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

An informal docket may also be examined during normal business hours at the Air Traffic Division, Airspace Branch, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois.

**FOR FURTHER INFORMATION CONTACT:** Edward R. Heaps, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

**SUPPLEMENTARY INFORMATION:** To justify and retain a designated control zone requires, in part, that hourly and special weather observations be taken at the primary airport in the control zone during the times and dates that the control zone is designated. Recent surveys for Ironwood, Michigan, disclosed that the weather observation requirement was not being met by the responsible party. The percentage of hourly reports received out of the total number required for Ironwood was as follows: January 8-14, 1987—82%; January 27-30, 1987—83%. Special weather observations would be in addition to these reports, but it is unknown what that total number would have been. Airlines that currently serve Menominee, Michigan, and Manitowoc, Wisconsin, have indicated no interest in providing weather observations for anyone other than their own aircraft. Efforts to obtain a commitment from other interested parties have been unsuccessful. As a result, it was concluded that the weather reporting at the locations identified was unacceptable for retention of the designated airspace status, that the control zone designations should be revoked, and that aeronautical charts should be amended to reflect the revocations.

**Comments Invited**

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87-AGL-7." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket, FAA, Great Lakes Region, Office of Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

**Availability of NPRM's**

Any person may obtain of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2, which describes the application procedure.

**The Proposal**

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revoke the control zone designations for the following locations: Ironwood, Michigan, Menominee, Michigan, and Manitowoc, Wisconsin.

Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C dated January 2, 1987.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**List of Subjects in 14 CFR Part 71**

Aviation Safety, Control zones.

**The Proposed Amendment**

**PART 71—[AMENDED]**

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; E.O. 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

**§ 71.171 [Amended]**

2. Section 71.171 is amended as follows:

Ironwood, MI [Revoked]

Menominee, MI [Revoked]

Manitowoc, WI [Revoked]

Issued in Des Plaines, Illinois, on May 13, 1987.

Teddy W. Burcham,

*Manager, Air Traffic Division.*

## COMMODITY FUTURES TRADING COMMISSION

**17 CFR Parts 3, 4 and 140**

**Relief From Regulation as a Commodity Trading Advisor for Certain Persons; Relief From Compliance With Subpart B of Part 4 for Certain Commodity Pool Operators; Disclosure Documents and Annual Reports**

**AGENCY:** Commodity Futures Trading Commission .

**ACTION:** Proposed rules.

**SUMMARY:** The Commodity Futures Trading Commission (the "Commission") is proposing to exclude certain otherwise regulated persons, such as State-regulated insurance

companies, from the definition of the term "commodity trading advisor" ("CTA") and to exempt certain other persons, such as registered investment advisers ("IAs"), from registration as a CTA. To implement these peoposals, certain other amendments would be made to the Commission's regulations. The Commission also is proposing relief from specific compliance with the disclosure, reporting and recordkeeping requirements of Part 4 for registered commodity pool operators ("CPO") who operate pools which, among other things, trade generally and routinely in securities instruments and who intend to commit no more than 10 percent of the fair market value of their pools' assets as intital margin or as option premiums for commodity interest trading. Finally, the Commission is proposing certain technical amendments to the Disclosure Document required of registered CPOs and CTAs and the Annual Report required of registered CPOs.

**DATE:** Comments must be submitted on or before July 10, 1987.

**ADDRESS:** Comments should be sent to: Commodity Futures Trading Commission, 2033 K St. NW., Washington, DC 20581. Attention: Secretariat.

**FOR FURTHER INFORMATION CONTACT:** With respect to §§ 3.16, 4.6, 4.12, 4.14 and 140.93, Barbara R. Stern, Assistant Chief Counsel, and with respect to §§ 4.21, 4.22 and 4.31, Patricia N. Gillman, Senior Special Counel, Division of Trading and Markets, 2033 K Street NW., Washington, DC 20581. Telephone (202) 254–8955.

**SUPPLEMENTARY INFORMATION:**

## I. Relief From CTA Regulation

### *A. Introduction*

The term "commodity trading advisor" is defined in section 2(a)(1)(A) of the Commodity Exchange Act, as amended (the "Act"), 7 U.S.C. 2 (1982), to mean:

> [A]ny person who, for compensation or profit, engages in the business of advising others, either directly or through publications, writings or electronic media, as to the value of or the advisability of trading in any contract of sale of a commodity for future delivery made or to be made on or subject to the rules of a contract market, any commodity option authorized under section 4c, or any leverage transaction authorized under section 19, or who, for compensation or profit, and as part of a regular business, issues or promulgates analyses or reports concerning any of the foregoing: but such term does not include (i) any bank or trust company or any person acting as an employee thereof, (ii) any news reporter, news columnist, or news editor of the print or electronic media, or any lawyer, accountant, or teacher, (iii) any floor broker or futures commission merchant, (iv) the publisher or producer of any print or electronic data of general and regular dissemination, including its employees, (v) the fiduciary of any defined benefit plan which is subject to the provisions of the Employee Retirement Income Security Act of 1974, (vi) any contract market, and (vii) such other persons not within the intent of this definition as the Commission may specify by rule, regulation, or order: *Provided*, That the furnishing of such services by the foregoing persons is solely incidental to the conduct of their business or profession * * *.

Section 4m(1) of the Act, 7 U.S.C. 6m(1) (1982), generally makes it unlawful for any person to engage in business as a CTA without being registered as such. Part 4 of the Commission's regulations, 17 CFR Part 4 (1986), governs the operations and activities of CTAs.[1]

In connection with the adoption of the Futures Trading Act of 1986, Pub. L. 99–641, 100 Stat. 3558 *et seq.* (1987), the House of Representatives Committee on Agriculture (the "Committee") considered a proposal to exclude certain persons from the CTA definition.[2] As the Committee report states:

> Representatives of the life insurance industry have proposed that the definition of "commodity trading advisor" in the Act be amended to exclude any investment adviser registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940 whose advice concerning commodity interests is solely in connection with the management of institutional securities portfolio(s). The life insurance industry urged that such an exclusion is necessary to avoid duplicative and inappropriate regulation, and to put institutional investment advisers such as insurance companies on a par with banks and trust companies, which are already excluded from the definition of commodity trading advisor if their commodity advisory activities are solely incidental to the conduct of their business as banks and trust companies. Other witnesses supported the insurance companies' proposal. H.R. Rep. No. 624, 99th Cong., 2d Sess. 46–47 (1986).

The Committee Report then noted the Commission's objections to the breadth of the proposal. It further noted the Commission's questioning of the need for a statutory amendment to the CTA definition in light of existing authority in section 2(a)(1)(A) of the Act,[3] and the Commission's prior responsiveness and stated preparedness to the requests of insurance companies regarding some of the problemns that would have been addressed by the proposed amendment.

In light of the foregoing, the Committee declined to adopt the proposed amendment. Instead, the Committee urged the Commission to issue regulations in this regard. As the Committee Report states:

> The Committee believes that any insurance company subject to regulation by State insurance departments (including any wholly owned subsidiary or employee thereof), provided its commodity advisory activities are solely incidental to the conduct of the business of the insurance company as such, generally is not within the intent of the definition of the term "commodity trading (advisor)." The Committee similarly believes that any person who is excluded from the definition of the term "commodity pool operator" by Commission Rule 4.5 should be excluded from the commodity trading advisor definition, provided its commodity advisory activities are solely incidental to its operation of those trading vehicles for which Rule 4.5 provides relief. Relatedly, where the advisor advises an entity that is excluded form registration as a commodity pool under Rule 4.5 or is a Rule 4.5 qualifying entity and such advisor is subject to appropriate regulation under the Investment Advisers Act, that advisor should ordinarily be exempted from commodity trading advisor registration if its commodity advice is solely incidental to its business of providing securities advice to such entity and the advisor is not otherwise holding itself out as a commodity trading advisor. Therefore, the Committee urges the Commission to exercise its authority to adopt regulations in regard to these matters.
>
> Should the Commission determine that registration as a commodity trading advisor is required, the Committee expects that the Commission will use the existing authority to consider other appropriate relief. In this regard, the Committee is aware that the Commission has exercised its authority to limit, by exemption, those employees of otherwise regulated entities who must register as an associated person of a commodity trading advisor. The Committee further understands that the Commission has coordinated its activities with the Securities and Exchange Commission to eliminate duplicative requirements, for example, by deeming in appropriate cases compliance

---

[1] Part 4 also governs the operations and activities of commodity pool operators ("CPOs"). For the purpose of this Federal Register release, reference to a particular Part 4 regulation may be found at 17 CFR Part 4 (1986).

[2] As interested persons will recall, in connection with the adoption of the Futures Trading Act of 1982, the Senate Committee on Agriculture, Nutrition and Forestry similarly considered a proposal to provide relief from CPO regulation for certain otherwise regulated persons. *See* S. Rep. No. 384, 97th Cong., 2d Sess. 79–80 (1982). Pursuant to the language in the Report of that Committee, the Commission adopted Rule 4.5, which makes an exclusion from the definition of the term "commodity pool operator" available to the "eligible persons" specified in the rule with respect to their operation of certain "qualifying entities." To claim that relief, generally a Notice of Eligibility, containing specified representation on how the qualifying entity will be operated, must be filed with the Commission. *See* 50 FR 15868 (April 22, 1985).

[3] As stated above, section 2(a)(1)(A) provides the Commission with authority to exclude or exempt from the CTA definition "such (other) persons not within the intent of this definition as the Commission may specify by rule, regulation, or order."

with SEC disclosure, recordkeeping, and reporting requirements as sufficient compliance with the Commission's corresponding commodity pool operator requirements. The Committee intends that the Commission will continue to provide this and such other relief as may be appropriate to applicants for registration as a commodity trading advisor or in any other registration category.

On the other hand, the Committee does not expect the Commission to grant exempted commodity trading advisors any relief from the antifraud provisions of section 4*o* of the Act.

The Committee understands that rulemaking addressing these concerns may take some time for the Commission to develop and promulgate. Individual requests for exclusions or exemptions, consistent with the above guidelines, however, should be processed by the Commission as expeditiously as practicable. The Commission's experience with individual cases should facilitate the formulation of more general rulemaking. *Id.* at 47–48.

In response to the Committee Report language, then, by this **Federal Register** release the Commission is proposing § 4.6, § 4.14(a)(8) and certain related amendments to its regulations.

*B. Proposed § 4.6: Exclusion for Certain Otherwise Regulated Persons from the Definition of the Term "Commodity Trading Advisor"*

Paragraph (a) of the proposed rule specifies the persons who would be eligible for exclusion from the CTA definition and the activities for which such relief would be available. The Commission has strictly followed the Committee Report language in specifying these persons and activities. Thus, the proposal would provide relief for: (1) A State-regulated insurance company, or any wholly-owned subsidiary or employee thereof, and (2) a person who is excluded from the definition of the term "commodity pool operator" by § 4.5 under certain circumstances.[4] In particular, the commodity interest advisory activities of these persons would be subject to a "solely incidental" test—*i.e.*, in the case of an insurance company (or wholly-owned subsidiary or employee thereof) those activities must be "solely incidental to the conduct of the insurance business of the insurance company as such" and in the case of a person excluded from the CPO definition by § 4.5 those activities must be "solely incidental to its operation of those trading vehicles for which § 4.5 provides relief." [5] Paragraph (b) of the rule would require each person claiming an exclusion from the CTA definition to submit to special calls to demonstrate its compliance with the terms of paragraph (a).[6] This proposal is intended to permit the Commission to monitor whether persons claiming the exclusion are properly entitled to do so. Paragraph (c) would provide that an exclusion under the rule would cease to be effective "upon any change which would render the person claiming the exclusion ineligible under paragraph (a)."

Interested persons will note that proposed § 4.6 follows the format of § 4.5 with one significant exception. The CTA exclusionary rule, unlike the CPO exclusionary rule, would not require that a notice be filed with the Commission to claim the exclusion.[7] Thus, the exclusion provided by § 4.6 would be available without any action on the part of a person claiming that relief—subject, of course, to the person meeting the requirements of paragraph (a). The Commission has not proposed a notice requirement because (1) with respect to insurance companies, pursuant to the Committee Report the proposal follows the exclusionary language in section 2(a)(1)(A) for such persons as banks (who do not have to file any notice), and (2) with respect to those persons who are excluded under § 4.5 from the CPO definition, the Commission will, in fact, be receiving an identifying notice under the rule. The Commission nonetheless seeks comment on whether a notice should be required to be filed to claim relief under § 4.6 and, if so, what information the notice should contain.[8]

As noted above, the one criterion to which persons claiming relief under § 4.6 would be subject is that their commodity interest advisory activities must be "solely incidental" to their insurance business or § 4.5 activities. In this regard, pending the proposal of § 4.6 and pursuant to the Committee Report language, Commission staff has received and responded to several requests for interpretation on the meaning of the "solely incidental" criterion in the context of the activities of State-regulated insurance companies and their wholly-owned subsidiaries.[9] Specifically, staff found that this condition of the exclusion would be met where commodity interest trading advice would be provided—

> to persons to whom [the insurance company] (or a subsidiary insurance company) has issued a[n] * * * insurance contract and, thus, with whom [the insurance company] (or a subsidiary insurance company) has established a relationship through the issuance of that contract.[10]

---

[4] Section 4.5(a) specifies the persons eligible for that relief as follows:

(1) An investment company registered as such under the Investment Company Act of 1940;

(2) An insurance company subject to regulation by any State;

(3) A bank, trust company or any other such financial depository institution subject to regulation by any State or the United States; and

(4) A trustee or named fiduciary of a pension plan that is subject to Title I of the Employee Retirement Income Security Act of 1974; *Provided, however,* That for purposes of this § 4.5 the following pension plans shall not be construed to be pools:

(i) A noncontributory plan, whether defined benefit or defined contribution, covered under Title I of the Employee Retirement Income Security Act of 1974;

(ii) A contributory defined benefit plan covered under Title IV of the Employee Retirement Income Security Act of 1974; *Provided, however,* That with respect to any such plan to which an employee may voluntarily contribute, no portion of an employee's contribution is committed as margin or premiums for futures or options contracts; and

(iii) A plan defined as a governmental plan in section 3(32) of Title I of the Employee Retirement Income Security Act of 1974.

[5] Section 4.5(b) lists the following trade vehicles as qualifying entities:

(1) With respect to any person specified in paragraph (a)(1) of this section, and investment company registered as such under the Investment Company Act of 1940;

(2) With respect to any person specified in paragraph (a)(2) of this section, a separate account established and maintained or offered by an insurance company pursuant to the laws of any State or territory of the United States, under which income gains and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against any account, without regard to other income, gains, or losses of the insurance company;

(3) With respect to any person specified in paragraph (a)(3) of this section, the assets of any trust, custodial account or other separate unit of investment for which it is acting as a fiduciary and for which it is vested with investment authority; and

(4) With respect to any person specified in paragraph (a)(4) of this section, and subject to the proviso thereof, a pension plan that is subject to Title I of the Employee Retirement Income Security Act of 1974 * * *.

Moreover, where necessary, before it provides such advice to any such qualifying entity, the person must file a notice of eligibility. (As stated in n. 4, *supra*, certain trading vehicles are deemed under § 4.5 to be "non-pools" and, thus, no notice is required to be filed with respect to their operation.)

[6] The Commission is proposing in § 140.93(a)(6) to delegate to the Director of the Division of Trading and Markets, or the Director's designee, the authority to make such special calls. The Division of Trading and Markets is responsible for, among other things, administering and interpreting the Part 4 regulations.

[7] *See* paragraphs (c) through (f) of §4.5.

[8] *Cf.* proposed § 4.14(a)(8), which would require the persons eligible under that section to file a notice of exemption to claim relief from registration as a CTA. As explained below, such a notice would be needed to identify those persons—who otherwise would not be known to the Commission.

[9] *See, e.g.*, Division of Trading and Markets Interpretative Letter No. 86-34, Comm. Fut. L. Rep. [CCH] ¶23,252 (Oct. 1, 1986).

[10] *Id.* at p. 32,798.

Conversely, staff found that this condition would not be met where—

certain State-regulated insurance companies (or a wholly-owned subsidiary thereof) have established and serve as the registered investment adviser to a mutual fund complex into which persons who are not policyholders of the insurance company and who have no other relationship with the company may invest.[11]

As for the other persons proposed to be excluded from the CTA definition by § 4.6, the Commission believes that the requirement that the excluded person's advisory activities be "solely incidental" to certain other activities could only be met where such a person served as the operator of the § 4.5 trading vehicle *and* provided securities investment advice to it and commodity interest advice consistent with strategies permitted under § 4.5.[12]

Absent comment which suggests how to further articulate this standard in proposed § 4.6(a), the Commission expects to interpret the condition flexibly following prior interpretations and to further delineate the words "solely incidental" based on specific fact situations.

*C. Proposed § 4.14(a)(8): Exemption for Certain Persons from Registration as a CTA*

Section 4.14(a) currently contains seven various provisions pursuant to which a person who comes within the statutory definition of the term "commodity trading advisor" may nonetheless claim exemption from registration as a CTA. In response to the Committee Report, the Commission is proposing to add certain other CTA registration exemptions in § 4.14(a)(8).[13]

Like § 4.6, this proposed rule similarly would closely follow the language of the Committee Report in specifying the persons who would be eligible for relief thereunder—*e.g.*, persons who are registered as an IA under the Investment Advisers Act of 1940 (the "IAA"), 15 U.S.C. 80b *et seq.* (1982). In addition, the Commission also is proposing to make § 4.14(a)(8) available to persons who are excluded from the definition of the term "investment adviser" by sections 202(a)(2) and 202(a)(11) of the IAA [14]—essentially certain banks of the nature described in those sections. Without such a proposal, those banks—because of the very fact that they statutorily are excluded from the IA definition—would be ineligible for the relief that persons who must register as an IA could claim.[15]

Further similar to proposed § 4.6, the criteria for relief under proposed § 4.14(a)(8) would closely follow the Committee Report language. Specifically, the criteria that a person who sought to claim exemption from CTA registration under § 4.14(a)(8) would have to meet is proposed to be as follows:

(i) The person's commodity trading advice:

(A) Is directed solely to, and for the sole use of, entities which are excluded from the definition of the term "pool" under § 4.5 or are qualifying entities under § 4.5 for which a notice of eligibility has been filed;

(B) Is solely incidental to its business of providing securities advice to each such entity; and

(C) Employs only such strategies as are consistent with eligibility status under § 4.5.

(ii) The person is not otherwise holding itself out as a commodity trading advisor * * *.

Pending the proposal of § 4.14(a)(8) and pursuant to the Committee Report, staff also has had occasion to interpret the exemption criteria of the Report.[16] As staff stated:

As for the * * * condition * * * that (no registered IA) will otherwise hold itself out as a CTA with respect to those activities for which a "no-action" position from CTA registration has been issued herein * * * we believe that further discussion is necessary and appropriate to ensure compliance with that condition. In this regard, you asserted that (a registered IA) "should, however, be allowed to describe to existing and potential clients the limited commodities advice it may provide in accordance with the terms of this letter and how it believes that such advice may be used to benefit its clients"—which, you noted, would parallel the disclosures the Commission has said would be appropriate for the purpose of the "marketing" representation under Rule 4.5. *See* 50 FR 15868 at 15879, [April 23, 1985]. We further note that in discussing this representation the Commission stated that it intends the term "marketing" to include oral, written and electronic promotional materials and that an entity would be "marketing participations" in a manner inconsistent with the required representation if (a trading vehicle) was actively promoted as "a hybrid—*e.g.*, a securities *and* a commodities—trading vehicle or as an investment vehicle in which commodity futures and options trading was particularly significant and critical to the growth of its assets, as opposed to being incidental to protecting those assets against a decline in value." *Id.*

Thus, the marketing materials to be used should state, with respect to transactions in commodity interests, only that strategies consistent with eligibility status under Rule 4.5 may be used. These strategies may, of course, be described in the marketing materials. Further in this regard, we believe that [the IA]: (1) Should market its ability to manage an actual or prospective client's securities portfolio, not a commodity interest trading vehicle; and (2) should not represent that it has any unique expertise or ability in providing commodity interest trading advice.[17]

Here, too, absent comment that would indicate otherwise, the Commission intends to interpret this criteria of § 4.14(a)(8) in accord with the foregoing staff position. As staff explained, however, and by this Federal Register notice we repeat, the foregoing position is not intended to be an all inclusive discussion but, rather, an attempt to identify activities which we believe would be consistent—or inconsistent—with the Committee Report. As the Commission gains more experience in this area, we expect to identify such other activities.

Unlike proposed § 4.6, however, proposed § 4.14(a)(8) would require a notice of exemption to be filed with the Commission to claim the relief available

---

[11] Division of Trading and Markets Interpretative Letter No. 86-18, Comm. Fut. L. Rep. (CCH) ¶ 23,201 (July 23, 1986) at p. 32,531, n. 6. As discussed below, however, the Commission is proposing in § 4.14(a)(8) to exempt from registration as a CTA persons who are registered as an investment adviser and who provide commodity interest trading advice to § 4.5 trading vehicles. *See also* Interpretative Letter No. 86-24, n. 9, *supra*, at p. 32,950.

[12] To date, the Commission has not received any requests for interpretation on this issue.

[13] The Commission similarly is proposing to amend § 3.10(a)(3) of its regulations to provide exemption from registration for the associated persons of these exempt CTAs.

[14] 15 U.S.C. 80b-2(a)(2) and 2(a)(11) (1982).

[15] *See* Division of Trading and Markets Interpretative Letter No. 86-31, Comm. Fut. L. Rep. (CCH) ¶23,416 (Dec. 11, 1986), wherein staff stated that, based upon the facts at issue, it would not recommend that the Commission take any enforcement action for failure to register as a CTA against a bank that provided "outside" advisory services to a §4.5 registered investment company. *Cf.* proposed § 4.6, which would provide an exclusion from the CTA definition for the bank if the bank was an eligible person under § 4.5(a)(3) and the trading vehicle was a qualifying entity under § 4.5(b)(3).

[16] Interpretative Letter No. 86-24, n. 9, *supra*. In that letter staff also stated that, based upon the facts at issue, it would not recommend that the Commission take any enforcement action for failure to register as a CTA against certain registered IAs—*i.e.*, the insurance company and certain of its wholly-owned subsidiaries.

[17] *ID.* at pp. 32,800-01.

Upon request the Division subsequently clarified its position as follows: [W]e wish to emphasize that for a registered investment adviser to be exempt from CTA registration under the House Committee Report language it must, among other things, provide commodity interest trading advice to a trading vehicle specified in Rule 4.5 in a manner solely incidental to its business of providing securities advice to the trading vehicle—regardless of whether that vehicle is a "non-pool" under Rule 4.5(a)(4)(i), (ii) or (iii) or a "qualifying entity" under Rule 4.5(b). Division of Trading and Markets letter dated Nov. 12, 1986.

under the rule (§ 4.14(a)(8)(iii)).[18] Such a requirement would be necessary because the securities investment advisory professionals who could claim relief under the rule would not otherwise be known to the Commission. Thus, the purpose of this notice requirement, which is patterned after that contained in § 4.5, would be to enable the Commission to know the identities of those persons claiming relief under § 4.14(a)(8) and to monitor their compliance with the criteria of the rule.[19] Further similar to § 4.5, a supplemental notice would be required to be filed in the event of changed circumstances—*i.e.*, registration as a CTA (§ 4.14(a)(8)(iv)).

Finally, the Commission wishes to emphasize that, in accord with the Committee Report language, each person who could claim exemption from CTA registration under proposed § 4.14(a)(8) would continue to be subject to the antifraud provisions of section 4*o* of the Act, 7 U.S.C. 6*o* (1982).

*D. "No-Action" Position*

The Commission recognizes that in light of the foregoing proposals there may be uncertainty with respect to the application of the term "commodity trading advisor" on the part of certain interested persons or the availability of an exempt from registration as a CTA on the part of certain other interested persons. To alleviate that uncertainty, the Commission has determined that it will not take enforcement action solely for failure to register as a CTA against any person who meets the criteria of proposed § 4.6 or § 4.14(a)(6), as that criteria has been stated in those proposals and interpreted in this Federal Register release.[20] This position is, of course, subject to the condition that any person who claims such "no-action" relief must comply in full with whatever regulations the Commission in fact adopts to implement the exclusion of certain persons from the CTA definition and the exemption of certain other persons from CTA registration.[21]

The Commission further recognizes that a person who qualifies for relief under the foregoing "no-action" position, and subsequently under § 4.6 or § 4.14(a)(8), as such rules may be adopted, may at a later date decide to engage in activities which require registration as a CTA and, accordingly, for which it in fact registers as such.[22] As a registered CTA that person will be required, among other things, under § 4.31 to distribute a Disclosure Document to prospective managed account clients. Section 4.31(a)(3) requires the Document to include the past performance record of the commodity interest accounts traded by the CTA (and each of its principals) for the three years preceding the date of the Document. In this regard, the Commission specifically seeks comment on whether the information required under § 4.31(a)(3) should include the past performance record of the commodity interest accounts that have been traded by that person (or any of its principals) during the three years preceding the date of the Document but for which that person has been excluded from the CTA definition or exempt from CTA registration in connection with such trading.

**II. Proposed § 4.12(b): Relief from Subpart B of Part 4 for Certain Registered CPOs.**

*A. Introduction*

When the Commission proposed § 4.5 it also sought comment on whether it should adopt a rule which would provide relief from CPO regulation for certain persons who could not claim relief under § 4.5—*e.g.*, persons who were not eligible persons under the rule or who did not operate qualifying entities. As the Commission stated:

> [T]he Commission has strictly followed the Senate Report in specifying the persons and qualifying entities who would be eligible for exemption under proposed § 4.5 * * *.
>
> The Commission wishes to make clear that it does not believe that the mere liability of a person or entity to its participants under * * * other Federal or State regulation would be sufficient to make the proposed exemption appropriate. Rather, such person or entity must be subject to ongoing regulation of its activities with respect to its participants in a manner generally equivalent to the regulation of a CPO's activities as provided for under the Part 4 regulations.
>
> In this connection, the Commission is aware that in the course of administering Part 4, its staff has issued certain exemptions [under § 4.12] from the disclosure requirements of § 4.21 and the reporting requirements of § 4.22 to persons and entities who would not be eligible for exemption under proposed § 4.5. These exemptions were conditioned upon effectiveness of such persons' registration as a CPO and were based upon, among other things, representations that: (1) The entity was organized and would be operated for a purpose other than commodity interest trading; (2) the entity was restricted by its enabling documents to committing a small percentage of its net assets—*e.g.*, 10%—as initial margin and option premium deposits; (3) the entity had not been, and would not be, marketed as a commodity pool; (4) the entity would disclose the purpose of and limitations on its commodity interest trading to its participants; and (5) the entity was required by its enabling documents to furnish certified financial statements to its participants on an annual basis. Upon such representations, the staff has exempted these persons from the specific requirements of §§ 4.21 and 4.22 and and has accepted in lieu thereof the disclosure and reporting documents that they intended to provide to their participants under the regulations which address the primary purpose of the entity's operation. The staff required such persons, however, to remain subject to the recordkeeping requirements of § 4.23.
>
> The Commission is considering adopting a rule that would codify both the relief accorded under these exemptions and the representations upon which such relief was based. The Commission requests comments on this proposal * * *. 49 FR 4778 at 4784–4785 (February 8, 1984).

In light of generally favorable comments, the Commission today is proposing to adopt such a rule.[23]

Currently, § 4.12 provides the commission with general authority to exempt "any person or any class or classes of persons" from Part 4.[24] The

---

[18] The Commission previously has provided in this Federal Register release its reasons for not proposing such a notice requirement in § 4.6.

[19] Section 4.14(a) currently contains various provisions which exempt certain commodity professionals from registration as a CTA. It should be noted that by their very terms those provisions refer to persons who have been identified to the Commission—either through registration (as other than a CTA) (§§ 4.14(a)(3), (4), (6) and (7)) or through the filing of a notice of exemption from CPO registration (§ 4.14(a)(5)).

[20] Similarly, the Commission will not take enforcement action for failure to register as an associated person of a CTA against any person who meets the requirements of § 3.12(a)(3) as proposed to be revised.

[21] This "no-action" position is consistent with the language in the Committee Report that "[R]ulemaking addressing these concerns may take some time for the Commisson to develop and promulgate. Individual requests * * * should be processed by the Commission as soon as possible."

[22] *See* proposed § 4.14(a)(8)(iv), which would require a person who has filed a notice of exemption from CTA registration to supplement the notice in the event the person subsequently registered as a CTA.

[23] This action also is in furtherance of the Committee Report, which, as stated above, acknowledges the actions that have been taken in this area and expresses the intention "that the Commission will continue to provide this and such other relief."

[24] Specifically, § 4.12 currently provides: The Commission may exempt any person or any class or classes of persons from any provision of this Part 4 if it finds that the exemption is not contrary to the public interest and the purposes of the provision from which the exemption is sought. The Commission may grant the exemption subject to such terms and conditions as it may find appropriate.

By § 140.93(a)(1) the Commission has delegated its authority under § 4.12 to the Director of the Division of Trading and Markets, or the Director's designee.

Commission is proposing that this general authority would be retained in § 4.12(a) and that specific authority concerning Subpart B would be contained in § 4.12(b).[25]

At the outset, the Commission wishes to emphasize that in proposing § 4.12(b) it is not intending to set forth the sole basis for granting relief from Subpart B of Part 4, that is from the disclosure, reporting and recordkeeping requirements of §§ 4.21, 4.22 and 4..23, respectively. Rather, the Commission is intending to codify in a rule those situations for which it has routinely granted relief and with which it has become most familiar and, thus, for which it is best equipped to propose a specific rule. All other requests for exemption from Subpart B—and from any other provision of Part 4—would continue to be eligible for consideration under § 4.12(a) on a case-by-case basis.[26]

*B. The Proposed Rule*

Proposed § 4.12(b) also would follow the format of § 4.5. Thus, paragraph (1) of the proposal sets forth the persons who would be eligible for relief—*i.e.*, any person who is registered as a CPO or who has applied for such registration—and the criteria pursuant to which their commodity pools would be required to be operated. Briefly stated, any such pool for which a registered CPO seeks to claim relief under § 4.12(b) would be required: (1) To be offered and sold in compliance with the Securities Act of 1933, 15 U.S.C. 77a *et seq.* (Supp. III 1985), or an exemption from that Act; (2) to be generally and routinely engaged in securities transactions; (3) to restrict to 10 percent of the fair market value of its assets the amount it could commit to initiate its commodity interest transactions; and (4) to trade commodity interests in a manner solely incidental to its securities trading activities—*i.e.*, that commodity interest trading would not be an integral part of the pool's trading strategy and that the pool's trading strategy could, in fact, be accomplished without the use of commodity interests.[27] Moreover, the CPO would be required to advise its existing and prospective participants of the restrictions on the pool's commodity interest trading prior to the date the pool commences trading commodity interests.

Paragraph (2) of proposed § 4.12(b) sets forth the relief that would be available under the rule.[28] First, in the case of § 4.21(a), that the Commission accept in lieu and in satisfaction of the Disclosure Document specified by that section an offering memorandum as described in the proposal (§ 4.12(b)(2)(i)). Specifically, such an offering memorandum would not be required to include the past performance records of the pool's CPO and CTA nor the Risk Disclosure and Cautionary Statements.[29] The Memorandum would, however, be required to be prepared in compliance with the Securities Act of 1933 and to include the other information required by § 4.21(a). In this regard, the term "responds" as used in the proposal is intended to clarify that the specific negative disclosures which otherwise would be required by § 4.21(a) would not need to be made.[30] Second, in the case of § 4.22(a) through (e), that the Commission accept in lieu and in satisfaction of the Account Statement and Annual Report required by those sections the financial reports specified in the proposal (§ 4.12(b)(2)(ii) and (iii), respectively). With respect to the Account Statement, these financial reports would be a statement which indicates the net asset value of the pool as of the end of the reporting period and the change in net asset value from the end of the previous reporting period—which must be prepared and distributed at least quarterly. The term "net asset value" would refer to the total operations of the pool and the term "indicates" would mean that this information could be presented in either narrative or tabular format. With respect to the Annual Report, these financial reports would include, at a minimum, a Statement of Financial Condition as of the close of the pool's fiscal year and a Statement of Income (Loss) for that year. These statements would be required to be prepared according to generally accepted accounting principles and to be certified by an independent public accountant. Moreover, these substitute financial reports would continue to be subject to all of the other requirements of the rules to which they pertain.[31] Third, and last, in the case of § 4.23(a)(10) and (a)(11), to exempt the CPO from the requirements of those sections to respectively make and keep Statements of Financial Condition and of Income (Loss) for the pool (§ 4.12(b)(iv)).[32] The Commission is proposing this relief because these Statements would otherwise provide specific supporting data for the Account Statement—from which, as discussed above, an exemption has been proposed The Commission believes that the data necessary to verify the financial reports which would substitute for the Account Statement generally should be available from the other books and records the CPO is required to keep.[33]

The next two provisions of the proposal are technical in nature. They would specify the manner in which a request for relief under § 4.12(b) would be required to be made (§ 4.12(b)(3)) and would impose certain continuing obligations on each CPO to whom an exemption had been issued under the rule (§ 4.12(b)(4)). The final provision would make clear the extent of an exemption issued under §4.12(b)—*i.e.*, that it would be effective only with respect to the pool for which relief had been requested and, further, that it would not affect the applicability of any other provisions of Part 4, the Act or the Commission's regulations with respect to that pool and any other pool the pool operator operates or intends to operate.

---

[25] It is the Commission's intent that staff continue to act upon all requests for exemption from Part 4. Since § 140.93(a)(1) refers to § 4.12, the former regulation includes *all* provisions of the latter. Thus, it has not been necessary for the Commission to propose to revise § 140.93(a)(1) to effectuate this intent.

[26] Similarly, the Commission previously has stated in connection with its adoption of revisions to the Part 4 rules that: The Commission recognizes that in the past its staff has issued interpretations of the Part 4 rules. Consistent with that practice, the Commission invites interested persons to seek such staff interpretations of § 4.10(d) (, which defines the term "pool",) and of all the other Part 4 rules. 46 FR 26004 at 26006 (May 8, 1981).

[27] *Cf.* § 4.5(c)(2)(i), which requires a qualifying entity to trade commodity interests for hedging purposes within §1.3(z)(1) or, with respect to certain long strategies, for incidental purposes where the underlying commodity value of its long contracts at all times will not exceed the sum of certain specified items.

[28] It should be noted that a CPO may request any or all of the relief available under the rule.

[29] This information would otherwise be required by § 4.21 (a)(4), (a)(5), (a)(17) and (a)(18), respectively.

[30] *See* § 4.21 (a)(3), (a)(6), (a)(8), (a)(10), (a)(13), and (a)(15). For example, under the proposal an offering memorandum would respond to the requirements of § 4.21(a)(13) if it disclosed information on certain litigation concerning certain persons associated with the pool. Unlike the Disclosure Document specified by § 4.21(a), then, the memorandum would not also be subject to the requirement that "if there has been no such action against any of the foregoing persons the pool operator must make a statement to that effect with respect to each such person."

[31] For example, they would continue to be subject to the oath or affirmation requirement of § 4.22(h).

[32] Unlike the other documents subject to the proposal, the books and records required under these sections are not required to be filed with the Commission. Thus, the Commission does not "accept" them.

[33] *See, e.g.*, § 4.23(a)(6) and (a)(8), which respectively require the CPO to make and keep a general ledger and "all other records" generated for the pool.

## III. Proposed Technical Amendments to §§ 4.21, 4.22 and 4.31

### *A. Section 4.21(a)(17): The Risk Disclosure Statement*

Section 4.21 requires each registered CPO to distribute and to file with the Commission a Disclosure Document containing specified information. (Rule 4.31 places a similar requirement on certain registered CTAs.[34])

Section 4.21(a)(17)(i) currently requires the Risk Disclosure Statement to appear by itself on the first page of the Disclosure Document. The Commission recognizes, however, that certain CPOs also must comply with requirements imposed by such other regulatory authorities as the National Futures Association ("NFA") [35] and the Securities and Exchange Commission ("SEC") [36]. Accordingly, § 4.21(a)(17)(i) is proposed to be amended to clarify existing Commission policy that the Statement must appear by itself on the page immediately following any disclosures which otherwise are mandated by the Commission or NFA to appear on the cover of the Document, or immediately following any disclosures explicitly required in the forepart of a securities prospectus pursuant to applicable securities laws. This proposal is supported by the history of the Part 4 regulations, which encouraged accommodation between Commission and SEC regulations in this area. In adopting Part 4 in 1979, the Commission noted that "[i]n those cases where a CPO chooses to provide (an SEC) prospectus to prospective pool participants, the Commission will permit that prospectus to be supplemented to comply with the specific requirements of § 4.21." 44 FR 1918, 1922 (January 8, 1979).

Consistent with this language, in reviewing CPO Disxlosure Documents since the adoption of Part 4, Commission staff has not objected to placing the Risk Disclosure Statement behind cover page material required by other regulators. Recently, however, staff has received a number of inquiries seeking a formal statement of the Commission's position. Accordingly, the Commission is proposing an amendment to end any confusion in this area.

### *B. Section 4.22(c): The Annual Report*

Section 4.22(c) requires each registered CPO to distribute and file an Annual Report for each pool that it operates within 90 calendar days after the end of the pool's fiscal year. The Commission is proposing to amend this regulation to clarify when the Annual Report must be filed if a pool permanently ceases operations before the end of the pool's fiscal year.

One of the purposes of the Annual Report requirement is to enable pool participants to receive financial information in a timely manner. However, under ther current rule, this purpose is defeated in cases where the pool stops trading before the end of its fiscal year. Accordingly, the proposal would require that the Report be distributed and filed within 90 calendar days after the end of the pool's fiscal year or the permanent cessation of trading, whichever is earlier, but in no event later than 90 days after funds are returned to pool participants. Permanent cessation of trading would be determined by reference to objective indication such as, but not limited to, the date notice is sent to pool participants advising that the pool has ceased trading or the date the CPO states in writing to the Commission, National Futures Association ("NFA") or other party that the pool has ceased operation. In any event, the Annual Report would be required to be filed with the Commission and distributed to pool participants no later than 90 days after funds are returned to the participants. As a result of this proposal, a participant would never have to wait more than 90 days from the end of the pool's operation to receive his final Annual Report.

### *C. Sections 4.21(g), 4.22(c) and 4.31(f): Numbers of Copies of Documents to be filed*

Sections 4.21(g) and 4.31(f) would be amended to reduce to two from three the number of copies of the Disclosure Document that a CPO or a CTA must file with the Commission. Likewise, § 4.22(c) would be amended to require that only two copies of the Annual Report be filed with the Commission. In these cases, staff has found that it was using the third copy so infrequently as to no longer justify the three copy requirement. Because this regulation change would not be required to be published for comment,[37] the Commission will not take any enforcement action against any person filing only two copies of a Disclosure Document or pool Annual Report prior to the adoption of these proposals.

## IV. Related Matters

### *A. Regulatory Flexibility Act*

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601 *et seq.* (1982), requires that agencies, in proposing rules, consider the impact of those rules on small business. The Commission has already established certain definitions of "small entities" to be used by the Commission in evaluating the impact of its rules on such small entities in accordance with the RFA.[38]

These definitions do not address the persons set forth in proposed §§ 4.6 and 4.14(a)(8) because, by the very nature of these proposals, the operations and activities of such persons generally are regulated by Federal and State authorities other than the Commission.[39] Assuming, arguendo, that such persons and entities would be "small entities" for purposes of the RFA, the Commission does not believe that proposed §§ 4.6 and 4.14(a)(8) would have a significant economic impact on them because it merely would require in the case of the former rule certain information upon special call and in the case of the latter rule the filing of a notice with the Commission, the documentation for either of which should be pre-existing. Moreover, the proposals would relieve these persons from the requirement to register as a CTA and from the disclosure and recordkeeping requirements applicable to registered CTAs.[40]

As for these proposals which address registered CPOs,[41] the Commission has determined that registered CPOs are not small entities for the purpose of the RFA.[42] Thus, no economic analysis of these proposal as they relate to registered CPOs is required.[43]

---

[34] Specifically, those registered CTAs who seek to direct or to guide client accounts are subject to § 4.31.

[35] *See e.g.*, NFA Guideline for the Disclosure by CPOs and CTAs of "Up Front" Fees and Organizational and Offering Expenses, NFA Manual ¶10,097.

[36] *See e.g.*, regulation S-K, items 501, 502 and 503, 17 CFR 229.501–229.503 (1986).

[37] *See* 5 U.S.C. 553(d) (1982).

[38] 47 FR 18618–18621 (April 30, 1982).

[39] For example, § 4.6 would apply to, among other persons, "an insurance company subject to regulation by any State" and § 4.14(a)(8) would apply to investment advisers who are registered with, and subject to the supervision of, the SEC.

[40] Proposed § 3.10(a)(3) would exempt from registration as an AP of a CTA an AP of a person exempt under § 4.14(a)(8). An AP must be an individual. *See* section 4k of the Act, 7 U.S.C. 6k (1982). Because the RFA does not apply to "individuals," no economic analysis of proposed § 3.10(a)(3) is required.

[41] *See* proposed § 4.12(b) and the proposed revisions to §§ 4.21(a)(17)(i), 4.21(g) and 4.22(c).

[42] 47 FR 18619–18620.

[43] It should be noted, however, that these proposals do not impose any new requirements on

Continued

As for the proposal which addresses registered CTAs,[44] the Commission has stated that it is more appropriate to consider on a case-by-case basis which CTAs should be deemed small under the RFA.[45] However, since the proposal would reduce an existing burden on those registered CTAs to which it would apply, the Commission believes the proposal would not have a significant economic impact on any of those CTAs—regardless of whether any such CTA would be a small entity for the purpose of the RFA.

Thus, pursuant to section 3(a) of the RFA, 5 U.S.C. 605(b), the Chairman, on behalf of the Commission, certifies that these proposed rules will not have a significant economic impact on a substantial number of small entities. The Commission nonetheless invites comments from any CTA or CPO which believes that these rules would have a significant impact on its operations.

*B. Paperwork Reduction Act*

The Commission has submitted to the Director of the Office of Management and Budget ("OMB"), pursuant to the provisions of the Paperwork Reduction Act, 44 U.S.C. Chapter 35, an explanation and details of the information collection and recordkeeping requirements which would be necessary to implement these proposals.[46] Since all the information collection proposals contained herein consist of proposed amendments to Parts 3 and 4, which have already been assigned an OMB control number, the Commission understands that these proposals will be assigned the same OMB control number.[47]

Interested members of the public may obtain a complete copy of the information collection proposals relating to the proposed rules contained herein by contacting Joseph Salazar at (202) 254–9735. Persons wishing to comment are asked to send a copy of their comments to Mr. Salazar at the Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, and to the OMB Desk Officer for the agency, Robert Neal, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

**List of Subjects**

*17 CFR Part 3*

Registration, Associated persons, Commodity futures.

*17 CFR Part 4*

Commodity pool operators, Commodity trading advisors, Commodity futures.

*17 CFR Part 140*

Authority delegation (Government agencies), Commodity futures.

In consideration of the foregoing, and pursuant to the authority contained in the Commodity Exchange Act and, in particular, sections 2(a)(1)(A), 4k, 4*l*, 4m, 4n, 4*o*, and 8a, 7 U.S.C. 2, 6k, 6*l*, 6m, 6n, 6*o*, and 12a and in 5 U.S.C. 552 and 552b (1982), the Commission hereby proposes to amend Chapter I of Title 17 of the Code of Federal Regulations as follows:

## PART 3—REGISTRATION

1. The authority citation for Part 3 continues to read as follows:

**Authority:** 7 U.S.C. 2 and 4, 6, 6b, 6c, 6d, 6e, 6f, 6g, 6h, 6*i*, 6k, 6m, 6n, 6*o*, 6p, 8, 9, 9a and 13b, 12, 12a, 18, 19, 21 and 23; 5 U.S.C. 552 and 552b.

2. Section 3.16(a)(3) is proposed to be revised to read as follows:

**§ 3.16 Registration of associated persons of commodity trading advisors and commodity pool operators.**

(a)* * *

(3) Is exempt from registration as a commodity trading advisor pursuant to the provisions of § 4.14(a)(1), § 4.14(a)(2) or § 4.14(a)(8) of this chapter or is associated with a person who is so exempt from registration: *Provided,* That the provisions of this paragraph (a)(3) shall not apply to the solicitation of a client's or prospective client's discretionary account, or the supervision of any person or persons so engaged, by, for, or on behalf of a commodity trading advisor,

(i) Which is not exempt from registration pursuant to the provisions of §4.14(a)(1), §4.14(a)(2) or § 4.14(a)(8) of this chapter or

(ii) Which is registered as a commodity trading advisor notwithstanding the availability of that exemption;

## PART 4—COMMODITY POOL OPERATORS AND COMMODITY TRADING ADVISORS

3. The authority citation for Part 4 continues to read as follows:

**Authority:** 7 U.S.C. 2, 6b, 6c, 6*l*, 6m, 6n, 6o, 12a, and 23; 5 U.S.C. 552 and 552b.

4. Section 4.6 is proposed to be added to read as follows:

**§ 4.6 Exclusion for certain otherwise regulated persons from the definition of the term "commodity trading advisor".**

(a) Subject to compliance with the provisions of this section, the following persons, and any principal or employee thereof, shall be excluded from the definition of the term "commodity trading advisor":

(1) An insurance company subject to regulation by any State, or any wholly-owned subsidiary or employee thereof: *Provided, however,* That its commodity interest advisory activities are solely incidental to the conduct of the insurance business of the insurance company as such; and

(2) A person who is excluded from the definition of the term "commodity pool operator" by § 4.5; *Provided, however,* That:

(i) Its commodity interest advisory activities are solely incidental to its operation of those trading vehicles for which § 4.5 provides relief; and

(ii) Where necessary, prior to providing any commodity interest trading advice to any such trading vehicle the person files a notice of eligibility as specified in § 4.5 to claim the relief available under that section.

(b) Any person who has claimed an exclusion under this § 4.6 must submit to such special calls as the Commission may make to require the person to demonstrate compliance with the provisions of paragraph (a) of this section.

(c) An exclusion claimed under this § 4.6 shall cease to be effective upon any change which would render the person claiming the exclusion ineligible under paragraph (a) of this section.

5. Section 4.12 is proposed to be amended by redesignating the current paragraph as paragraph (a) and by adding paragraph (b) to read as follows:

**§ 4.12 Exemption from provisions of Part 4.**

(a) *In general.* (1) The Commission may exempt any person or any class or classes of persons from any provision of this Part if it finds that the exemption is not contrary to the public interest and the purposes of the provision from which the exemption is sought.

---

registered CPOs. In fact, certain of the proposals would relieve existing requirements. *See, e.g.*, §§ 4.12(b) and 4.21(g).

[44] *See* The proposed revision to § 4.31(f).

[45] 47 FR 18620.

[46] As is explained above, these proposals significantly would reduce the paperwork requirements with which the CPOs and CTAs subject thereto otherwise would be required to compy. For example, in the case of proposed § 4.14(a)(8), relief from CTA registration—and thus from the disclosure and recordkeeping requirements of §§ 4.31 and 4.32, respectively—would be available upon the filing of a notice with the Commission.

[47] The OMB control numbers are 3038-0021 and 3038-0005, respectively.

(2) The Commission may grant the exemption subject to such terms and conditions as it may find appropriate.

(b) *Exemption from Subpart B for certain commodity pool operators.* (1) Any person who is registered as a commodity pool operator, or has applied for such registration, may request from the Commission any or all of the relief available under paragraph (b)(2) of this section if:

(i) The pool for which it makes such request:

(A) Will be offered and sold pursuant to the Securities Act of 1933 or pursuant to an exemption from said Act;

(B) Will generally and routinely engaged in the buying and selling of securities and securities derived instruments;

(C) Will not enter into commodity futures and commodity options contracts for which the aggregate initial margin and premiums exceed 10 percent of the fair market value of the pool's assets, after taking into account unrealized profits and unrealized losses on any such contracts it has entered into; *Provided, however,* That in the case of an option that is in-the-money at the time of purchase, the in-the-money amount as defined in § 190.01(x) may be excluded in computing such 10 percent; and

(D) Will trade such commodity interests in a manner solely incidental to its securities trading activities.

(ii) Each existing participant and prospective participant in the pool for which it makes such request is informed in writing of the restrictions set forth in § 4.12(b)(1)(i)(C) and (D) prior to the date the pool commences trading commodity interests. The pool operator may furnish this information by way of the pool's Disclosure Document, a separate notice or other similar means.

(2) The commodity pool operator of a pool which meets the criteria of paragraph (b)(1) of this section may request the following relief:

(i) In the case of § 4.21(a), that the Commission accept in lieu and in satisfaction of the Disclosure Document specified by that section an offering memorandum for the pool which does not contain the information required by § 4.21(a)(4), (a)(5), (a)(17) and (a)(18); *Provided, however,* That the offering memorandum:

(A) Is prepared pursuant to the requirements of the Securities Act of 1933 or the exemption from said Act pursuant to which the pool is being offered and sold; and

(B) Responds to the information requirements of § 4.21(a)(1) through (a)(3) and (a)(6) through (a)(16).

(ii) In the case of § 4.22(a) and (b), that the Commission accept in lieu and in satisfaction of the Account Statement and prescribed frequency respectively specified by those sections a statement which indicates the net asset value of the pool as of the end of the reporting period and the change in net asset value from the end of the previous reporting period, to be prepared and distributed no less frequently than quarterly; *Provided, however,* That each such statement complies with the other requirements of § 4.22(a) and (b), including the references in those sections to § 4.22(g) and (h).

(iii) In the case of § 4.22(c) through (e), that the Commission accept in lieu and in satisfaction of the financial information and statements in the Annual Report specified by those sections an annual report for the pool which contains, at a minimum, a Statement of Financial condition as of the close of the pool's fiscal year and a Statement of Income (Loss) for that year; *Provided, however,* That:

(A) Each such annual report complies with the other requirements of § 4.22(c), including the reference in that section to §4.22(h) and the requirement in §4.22(c)(5) that the annual report must contain appropriate footnote disclosure and further material information; and

(B) The financial statements in such annual report must be presented and computed in accordance with generally accepted accounting principles consistently applied and must be certified by an independent public accountant.

(iv) In the case of § 4.23(a)(10) and (a)(11), to exempt the pool operator from the requirements of those sections with respect to the pool.

(3) A request for the relief available under this § 4.12(b) must be made to the Commission at the address specified in § 4.2. Such request must:

(i) Specify the names of the registered commodity pool operator, or applicant for such registration, making the request and the pool for which the request is being made;

(ii) Contain representations that the pool will be operated in compliance with § 4.12(b)(1)(i) and the pool operator will comply with the requirements of § 4.12(b)(1)(ii);

(iii) Specify the relief sought under § 4.12(b)(2); and

(iv) Be signed by the pool operator, as follows: If the pool operator is a sole proprietorship, the request must be signed by the sole proprietor; if a partnership, by a general partner; and if a corporation, by the chief executive officer or chief financial officer.

(4)(i) If relief is granted with respect to § 4.12(b)(2)(i), the commodity pool operator must attach a copy of the order granting such relief to each offering memorandum, or amendment thereto, that it is required to file with the Commission pursuant to § 4.21(g).

(ii) If relief is granted with respect to § 4.12(b)(2)(iii), the pool operator must attach a copy of the order granting such relief to each annual report that it is required to file with the Commission pursuant to § 4.22(c).

(5)(i) Any relief granted hereunder shall be effective only with respect to the pool for which it has been requested.

(ii) Such relief shall not affect the obligations of the commodity pool operator to comply with all other applicable provisions of this Part 4, the Act and the Commission's rules and regulations issued thereunder with respect to the pool and any other pool operator operates or intends to operate.

6. Section 4.14 is proposed to be amended by adding paragraph (a)(8) to read as follows:

**§ 4.14 Exemption from registration as a commodity trading adviser.**

(a) * * *

(8) It is registered as an investment adviser under the Investment Advisers Act of 1940 or is excluded from the definition of the term "investment adviser" pursuant to the provisions of sections 202(a)(2) and 202(a)(11) of that Act; *Provided, however,* That:

(i) The person's commodity interest trading advice:

(A) Is directed solely to, and for the sole use of, entities which are excluded from the definition of the term "pool" under § 4.5 or are qualifying entities under § 4.5 for which a notice of eligibility has been filed;

(B) Is solely incidental to its business of providing securities advice to each such entity; and

(C) Employs only such strategies as are consistent with eligibility status under § 4.5.

(ii) The person is not otherwise holding itself out as a commodity trading adviser; and

(iii) Prior to the date upon which such person intends to engage in business as a commodity trading adviser, the person files a notice of exemption with the Commission.

(A) The notice must state the name of such person.

(B) The notice must represent that the person qualified for exemption under this § 4.14(a)(8) and that it will comply with the criteria of this section.

(C) The notice shall be effective upon filing.

(iv) In the event a person who has filed a notice of exemption under this § 4.14(a)(8) subsequently becomes registered as a commodity trading adviser, the person must file a supplemental notice of that fact.

(v) Any notice required to be filed hereunder must be:

(A) In writing;

(B) Signed by a duly authorized representative;

(C) Filed with the Commission at the address specified in § 4.2; and

(D) Filed with the National Futures Association at its headquarters office (ATTN: Director of Compliance, Compliance Department).

* * * * *

7. Section 4.21 is proposed to be amended by revising paragraphs (a)(17)(i), (g)(1) and (g)(2) to read as follows:

**§ 4.21 Disclosure to prospective pool participants.**

(a) * * *

(17)(i) The following Risk Disclosure Statement, to be prominently disclosed on, and as the only language on, the page immediately following any disclosures required to appear on the cover page as provided by the Commission or any registered futures association, or immediately following the disclosures explicitly required in the forepart of a securities prospectus pursuant to any regulations promulgated under applicable securities laws.

* * * * *

(g)(1) The commodity pool operator must file with the Commission two copies of the Disclosure Document for each pool that it operates or that it intends to operate not less than 21 calendar days prior to the date the pool operator first intends to deliver the Document to a prospective participant in the pool.

The commodity pool operator must file with the Commission two copies of all subsequent amendments to the Disclosure Document for each pool that it operates or that it intends to operate within 21 calendar days of the date upon which the pool operator first knows or has reason to know of the defect requiring the amendment.

* * * * *

8. Section 4.22 is proposed to be amended by revising the first sentence of paragraph (c) to read as follows:

**§ 4.22 Reporting to pool participants.**

(c) Each commodity pool operator registered or required to be registered under the Act must distribute an Annual Report to each participant in each pool that it operates, and must file two copies of the Report with the Commission, within 90 calendar days after the end of the pool's fiscal year or the permanent cessation of trading, whichever is earlier, but in no event longer than 90 days after funds are returned to pool participants; *Provided, however,* that if during any calendar year the commodity pool operator did not operate a commodity pool, the pool operator must so notify the Commission within 30 calendar days after the end of such calendar year. * * *

9. Section 4.31 is proposed to be amended by revising paragraphs (f)(1) and (f)(2) to read as follows:

**§ 4.31 Disclosure to prospective clients.**

* * * * *

(f)(1) The commodity trading adviser must file with the Commission two copies of the Disclosure Document for each trading program that it offers or that it intends to offer not less than 21 calendar days prior to the date the trading adviser first intends to give the Document to a prospective client in the trading program.

(2) The commodity trading advisor must file with the Commission two copies of all subsequent amendments to the Disclosure Document for each trading program that it offers or that it intends to offer within 21 calendar days of the date upon which the trading adviser first knows or has reason to know of the defect requiring the amendment.

## PART 140—ORGANIZATION, FUNCTIONS AND PROCEDURES OF THE COMMISSION

10. The authority citation for Part 140 continues to read as follows:

**Authority:** 7 U.S.C. 2, 4, 4a(c), 4a(j), 6, 6c, 6d, 6e, 6f, 6g, 6k, 6l, 6m, 6n, 6p, 7, 7a, 8, 8a, 12, 12a, 18 and 23; 5 U.S.C. 552 and 552b.

11. Section 140.93(a) is proposed to be amended by adding paragraph (a)(6) to read as follows:

**§ 140.93 Delegation of authority to the Director of the Division of Trading and Markets.**

(a) * * *

(6) all functions to the Commission in § 4.6(b) of this chapter.

* * * * *

Issued in Washington, DC, on May 19, 1987 by the Commission.

**Jean A. Webb,**

*Secretary of the Commission.*

## DEPARTMENT OF THE TREASURY

### Bureau of Alcohol, Tobacco and Firearms

### 27 CFR Part 9

**[Notice No. 632]**

### Sierra Foothills Viticultural Area; California

**AGENCY:** Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Bureau of Alcohol, Tobacco and Firearms proposes to establish in the foothills of eight counties in northeast-central California, an American viticultural area to be known by the appellation "Sierra Foothills." The proposal is the result of a petition filed by the Sierra Foothills Winery Association of Somerset, California.

The use of the name of an approved viticultural area as an appellation of origin in the labeling and advertising of wine allows the proprietor of a winery to designate the area as the locale in which grapes used in the production of a wine are grown and enables the consumer to identify and to differentiate between that wine and other wines offered at retail.

**DATE:** Written comments must be received by July 27, 1987.

**ADDRESS:** Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, REF: Notice No. 632, P.O. Box 385, Washington, DC 20044-0385.

Copies of this proposal, the petition, the appropriate maps, and the written comments are available for public inspection during normal business hours at: ATF Reading Room, Ariel Rios Federal Building, Room 4408, 1200 Pennsylvania Avenue, NW., Washington, DC 20226.

**FOR FURTHER INFORMATION CONTACT:** Michael J. Breen, Coordinator, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, Ariel Rios Federal Building, Room 6237, Washington, DC 20226, Telephone: (202) 566-7626.

**SUPPLEMENTARY INFORMATION:**

### Background

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54624) revising regulations in Title 27, Code of Federal Regulations, Part 4. These regulations allow the establishment of definite American

viticultural areas. The regulations also allow the name of an approved viticultural area to be used as an appellation of origin in the labeling and advertising of wine. On October 2, 1979, ATF published Treasury Decision ATF-60 (44 FR 56692) which added to Title 27 a new Part 9 providing for the listing of approved American viticultural areas.

Section 4.25a(e)(1) of Title 27, Code of Federal Regulations, Part 4, defines an American viticultural area as a delimited grape growing region distinguishable by geographical features. Section 4.25a(e)(2), outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition shall include—

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical features (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundary of the proposed viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and,

(e) A copy (or copies) of the appropriate U.S.G.S. map(s) with the proposed boundary prominently marked.

**Petition**

By letter dated July 8, 1985, the Sierra Foothills Winery Association of Somerset, California, filed a petition for the establishment of a "Sierra Foothills" viticultural area in portions of the counties of Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne and Mariposa.

The petition covers the foothills "belt" of the Sierra Nevadas. The petitioned area is located approximately 40 miles to the east and northeast of Sacramento and Stockton and extends in a northwest to southeast orientation approximately 160 miles from Nevada County to Mariposa County. Much of the petitioned area is bisected by State Highway 49, the "Golden Chain Highway."

The area, as proposed in this notice, includes the petitioned area as well as the northernmost extension of the foothills region of the Sierra Nevadas in Yuba County which is directly north of Nevada County. In 1986, ATF established the North Yuba viticultural area in the Sierra foothills in Yuba County. The southern leg of the boundary of this viticultural area abuts the Nevada County line. ATF notes that the North Yuba viticultural area shares many of the characteristics of the petitioned area. Accordingly, ATF has drafted a boundary description which includes the North Yuba viticultural area.

Within the proposed area there are approximately 150 vineyards totaling 3,000 acres planted in wine grapes, 35 premises registered for the production of wine and the approved American viticultural areas of "North Yuba", "El Dorado", "California Shenandoah Valley" and "Fiddletown."

**Name**

In the mid-1770's a Spanish exploration party, looking westward from its position in the Great California Valley, gave the descriptive "una gran sierra nevada" to the great snowy inland mountain range which today we know as the Sierra Nevadas. With the discovery of gold in 1848 and the sudden and chaotic migration of up to 50,000 prospectors in succeeding years, the western foothills of the Sierra Nevadas gained national attention as the California Gold Country.

The gold rush attracted miners in search of the *veta madre*, the "mother lode." Historically, the foothills region became known as the Mother Lode or Mother Lode Country. Mining gave the foothills their identity as "Gold Country" and strongly influenced the course of long-term development. Agriculture, livestock ranching and timber production emerged in response to the miners' needs for food and shelter.

The petition notes that "although the historical term 'Mother Lode' is sometimes used synonymously with the Sierra Foothills, the latter * * * more accurately defines the area." The petition documents the use of the name "Sierra Foothills" in wine texts and magazine articles. Leon Adams, in *Wines of America* (1973), refers to plantings of vineyards in the "historic Mother Lode gold-mining country of the Sierra foothills." Sunset Magazine's *Guide to California's Wine Country* states that the "vineyards and wineries in the Mother Lode country have established an identity of their own under the general district name of Sierra Foothills."

The petition documents use of the appellation "Sierra Foothills" by State and quasi-governmental bodies. The California Department of Food and Agriculture identifies the grouping of the seven counties of Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne, and Mariposa as Grape District 10. Yuba County and other Sierra foothill counties to the north of the proposed area are in Grape District 9 and Madera County immediately south of Grape District 10 is part of Grape District 13.

Since 1978, the University of California Cooperative Extension Service and the farm advisors of Nevada, Placer, El Dorado, Amador and Calaveras counties have organized an annual "Sierra Nevada Foothill" Wine Grape Day.

Of the nine viticultural regions established by the 1985 California State Fair, the six counties of Nevada, Placer, El Dorado, Amador, Calaveras, and Tuolumne are grouped in a "Sierra Foothills" region.

**History**

The California Gold Rush of 1849 spawned viticulture in the western foothills of the Sierra Nevadas. Some of the prospectors possessed knowledge about grape tending and winemaking and turned to a more settled way of life, planting orchards and vineyards, as placer mining diminished.

In 1855, the State legislature passed a law which exempted from taxation all newly planted grape vines for four years. The number of grape vines in El Dorado County jumped from 24,000 in 1856 to 77,500 1858; in Tuolumne County from 9,000 to 50,000 between 1857 and 1858. The first foothills winery was established in 1856 near Plymouth in Shenandoah Valley, California. This winery is the fourth oldest in the State of California. In 1861, the *San Francisco Bulletin* featured a front page story titled "Vineyards in the Foothills."

The foothill counties ranked among California's major wine producers during the 1870's and 1880's. In *Wines of America*, Leon Adams states that "by 1890, more than 100 wineries were operating at such locations as Nevada City, Colfax, Lincoln, Penryn, Auburn, Placerville, Coloma, Shingle Springs, Ione, Volcano, Jackson, San Andreas, Sonora, Columbia, and Jamestown."

In the 1890's, viticulture had become established as a major industry. El Dorado County alone had approximately 8,000 of the 10,000 acres in vineyards at the peak of grape growing in the foothills counties. However, the decline of gold mining at the turn of the century, followed by a loss in population, phylloxera vine disease, and National Prohibition, contributed to the eventual abandonment of all but a few vineyards.

BEST COPY AVAILABLE

The 1960's marked a resurgence of viticulture in this region. In the early 1970's, there were just two wineries in the area. Today, there are 35 premises and 150 vineyards totalling approximately 3,000 acres.

**Geography**

The gently sloping foothills are segmented laterally by deep river canyons and steep ridges. The principal rivers that drain the petitioned area are the Yuba, the Bear, the American, the Cosumnes, the Mokelumne, the Calaveras, the Stanilaus, the Tuolumne and the Merced. These rivers flow southwesterly into the Great Valley of California which is comprised of the Sacramento and San Joaquin valleys. The land drained by these streams is distinguished from neighboring areas by name, history, soil, geology, climate, rainfall and temperature.

The boundary of the proposed viticultural area encompasses approximately 4,200 square miles or 2.6 million acres. The width of the area ranges from approximately 5 to 35 miles and the length is approximately 170 miles from Yuba County to Mariposa County.

The petitioner states that "viticulture above (the 4,000-foot elevation) is difficult or impossible due to climatic extremes and mountainous terrain." With the exceptions of vineyards in Jackson Valley and Auburn Ravine which are 500 feet above sea level, vineyards are planted principally on land between 1,000 and 3,000 feet in elevation.

The petition states that "most of the historic and current premium wine grape growing is above (the 1,000-foot elevation and) * * * many geographical characteristics distinguish the area above 1,000 feet from the valley regions below."

**Distinguishing Characteristics**

According to the petition, the characteristics, in addition to name, history and geography, which distinguish the foothills region from neighboring areas are:

(1) The region is part of the Sierra Nevada geomorphic province, with different geology and soils than the Great Valley province; and,

(2) Climatically, the region has warm summer days and cool nights, with lower temperatures and higher rainfall than the Central Valley and higher temperatures and lower rainfall than the mountainous uplands of the Sierra Nevadas.

**Topography and Elevation**

The topography of the proposed viticultural area ranges from gently rolling hills to gorges and progressively steeper slopes and ridges along canyons and drainageways. Lying between the uplands and peaks of the Sierra Nevadas to the east and the lowlands of the Great Valley of California to the west, the proposed viticultural area defines a region well suited for viticulture. Topography and elevation ensure adequate ventilation for viticulture. The irregular relief of the western foothills provides excellent air drainage. The area escapes both the early frosts and snow of the mountainous uplands of the Sierra Nevadas and the heat, humidity and fog common to the lowlands in the Great Valley, especially the marshy "Delta" area at the confluence of the Sacramento and San Joaquin rivers.

**Geology**

The area is an example of a gently rolling lower and middle foothill mountain landscape that has been formed during a long period of geologic time. It is geologically well defined by the high country of the Sierra Nevadas to the east and by the marshes and plains of the Great Valley to the west. Compared with the mountainous uplands of the Sierra Nevadas, the foothills are not as deeply gouged by river canyons and drainageways. The bedrock of the Sierra Nevadas is dominated by steeply dipping, faulted, and folded metamorphic rock that has been intruded by several types of igneous rock. Overlying the bedrock in many places are mantles of river gravel and volcanic debris.

**Soil Characteristics**

The three major physiographic units in the eight counties are the lowlands of the Great Central Valley, the mountainous uplands of the Sierra Nevadas, and the foothills which lie between the valley and the mountains. There are soil associations common to the valley lands, to the foothills region, and to the mountainous uplands. A review of the general soil maps prepared by the Soil Conversation Service of the U.S. Department of Agriculture for the counties of Butte south to Madera (excluding Calaveras County) shows the common character of the soil associations found in the lower and middle foothills of Yuba County south to Mariposa County. The foothills soils are basically shallow to moderately deep, medium textured, well-drained, gently sloping to moderately steep, rocky soils and gravelly to gritty sandy loams, formed in material weathered from basic igneous rocks and metasedimentary rocks overlying granitic rock but also in some places overlying volcanic rock and metamorphic rock.

Data from the soil survey of Yuoa County supports the inclusion of the foothills of Yuba County within the boundary for the proposed viticultural area.

**Climatological Characteristics**

The lower to middle foothills of Yuba, Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne, and Mariposa counties experience a *warm summer subtropical (Mediterranean)* climate consisting of warm to hot, dry summers from May to October and mild to cold, wet winters from November to April.

Geographical location, elevation, and weather patterns interact to distinguish the foothills "belt" from neighboring areas. Warm sunny fog-free days moderated by Delta breezes and cool nighttime breezes from the High Sierras facilitate viticulture.

General weather patterns result in dry summers and relatively warm winters. The western foothills of the Sierra Nevadas catch the winter storms which move easterly from the Pacific Ocean across California. Most of the precipitation falls in winter with less than three percent occurring in the summer, principally as thunderstorms in the uplands. The amount of precipitation generally increases with an increase in elevation.

Increased elevation leads to greater temperature extremes with large fluctuations between daytime highs and nighttime lows. Summer nights are generally cool above the 2,500 foot elevation. In general, temperature decreases with an increase in altitude, but in low, sheltered areas such as Jackson Valley and Auburn Ravine cold air tends to accumulate.

Most of the precipitation comes in the six months of winter with seasonal totals ranging as follows:

Precipitation (measured as inches of rainfall)—

| County | Foothills | Uplands |
|---|---|---|
| Yuba | 20 | More than 80. |
| Nevada | 26 | Less than 60. |
| Placer | 18 | About 60. |
| El Dorado | 23 | About 60. |
| Amador | 20 | More than 40. |
| Calaveras | 21 | About 45. |
| Tuolumne | 19 | More than 45. |
| Mariposa | Less than 15 | About 50. |

The average of the above figures is 20 inches. The foothills of Nevada County have the highest average rainfall of 26

inches and Mariposa County the lowest at less than 15 inches.

Average annual temperatures for each county are as follows:

| County | Foothills | Uplands |
|---|---|---|
| Yuba | 69 °F | 59 °F. |
| Nevada | 69 °F | 58 °F. |
| Placer | 66 °F | 55 °F. |
| El Dorado | 69 °F | 65 °F. |
| Amador | 65 °F | 58 °F. |
| Calaveras | 60 °F | 54 °F. |
| Tuolumne | 62 °F | 57 °F. |
| Mariposa | 55 °F | Below 45 °F. |

With the exception of Mariposa County, the averages range from 60° to 65° in the "foothills" region.

During the summer growing season, temperatures of 100 °F occur nearly every year and the sun shines more than 90 percent of the day. Average maximum readings for July are in the 90's and range from about 92 °F at higher elevations to 98 °F at lower elevations with occasional highs ranging from 110 °F to 115 °F.

The growing season ranges for each county are as follows:

| | |
|---|---|
| Yuba | 185 to 273 days. |
| Nevada | 140 to 295 days. |
| Placer | 180 to 280 days. |
| El Dorado | 180 to 275 days. |
| Amador | 200 to 300 days. |
| Calaveras | 154 to 244 days. |
| Tuolumne | 170 to 255 days. |
| Mariposa | 100 to 250 days. |

The relatively long growing season of Amador County compared to the other seven counties is attributed to the location of Amador County directly east of Sacramento. Amador County's climate is tempered by the influence of warm moist breezes from the marshy "delta" area at the confluence of the Sacramento and San Joaquin rivers.

The growing season in Mariposa County ranges from 100 to 250 days due to the sharp changes in elevation from the lowlands of the San Joaquin valley to the high Sierran uplands in Sierra National Forest and Yosemite National Park. Compared to the other seven counties, the southernmost extension of the foothills "belt" narrows sharply in Mariposa County.

The location of the proposed "Sierra Foothills" viticultural area in the low to middle foothills "belt" approaching the mountainous upland terrain of the Sierra Nevadas allows a distinction in climatological characteristics from areas to the east and west in that the area escapes both the heat and fog common to the lowland plains and marshes of the Great Valley and the early frosts and snow at higher elevations of the High Sierras.

The climate of the area is characterized by cool summer night temperatures, often dropping to 30 degrees below daytime highs.

Foothill winds are an additional cooling factor in summer. These cooling winds are distinguished from those of the valley to the west. In the valley, prevailing southwesterly winds are due to the north-south orientation and heating of the Great Valley, which deflects the westerly winds coming through the Carquinez Straits northward. At the higher elevations, however, the winds conform more closely with the free-flowing westerly winds over northern California.

### Proposed Boundary

The boundary of the proposed Sierra Foothills viticultural area may be found on four United States Geological Survey maps scale 1:250,000. The boundary is described in proposed § 9.120.

### Executive Order 12291

It has been determined that this proposed regulation is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

### Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603 and 604) are not applicable to this proposal because the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities. The proposal will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities. The proposal is not expected to have significant secondary or incidental effects on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this notice of proposed rulemaking, if promulgated as a final rule, will not have a significant economic impact on a substantial number of small entities.

### Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96-511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this final rule because no requirement to collect information is imposed.

### Public Participation

ATF requests comments from all interested parties. Comments received before the closing date will be carefully considered. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future ATF action.

The petition contains adequate documentation of viticulture and winemaking but has limited data supporting the inclusion of the southernmost county, Mariposa County. ATF requests the submission of any additional data which would support the inclusion of Mariposa County in the proposed area.

ATF will not recognize any comment as confidential. Comments may be disclosed to the public. Any material which a commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comment. The name of the person submitting a comment is not exempt from disclosure.

The Director reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

### Drafting Information

The principal author of this document is Michael J. Breen, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

### List of Subjects in 27 CFR Part 9

Administrative practices and procedures, Consumer protection, Viticultural areas, and Wine.

### Authority

Title 27, Code of Federal Regulations, Part 9, American Viticultural Areas is amended as follows:

## PART 9—AMERICAN VITICULTURAL AREAS

*Par. 1.* The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

*Par. 2.* The table of contents in Subpart C is amended to add the title of § 9.120 to read as follows:

Subpart C—Approved American Viticultural Areas

* * * * *

Sec.
9.120 Sierra Foothills.

*Par. 3.* Subpart C is amended by adding § 9.120 to read as follows:

Subpart C—Approved American Viticultural Areas

* * * * *

§ 9.120 Sierra Foothills.

(a) *Name.* The name of the viticultural area described in this section is "Sierra Foothills."

(b) *Approved maps.* The appropriate maps for determining the boundary of Sierra Foothills viticultural area are four U.S.G.S. topographical maps of the 1:250,000 scale:

(1) "Chico" (NJ 10–3), edition of 1958, revised 1970.

(2) "Sacramento" (NJ 10–6), edition of 1957 revised 1970.

(3) "San Jose" (NJ 10–9), edition of 1962, revised 1969.

(4) "Mariposa" (NJ 11–7), edition of 1957, revised 1970.

(c) *Boundary.* The Sierra Foothills viticultural area is located in portions of the counties of Yuba, Nevada, Placer, El Dorado, Amador, Calaveras, Tuolumne and Mariposa, in the State of California. The boundary is as follows:

(1) Beginning on the "Chico" map at the point of intersection of the north border of T(ownship) 18 N(orth), R(ange) 6 E(ast), with S. Honcut Creek, the boundary proceeds approximately 3.5 miles, in a generally south and southwesterly direction, along the eastern bank of S. Honcut Creek to the point where S. Honcut Creek meets the western border of T. 18 N., R. 6 E.;

(2) Then south, approximately 15 miles, along the western borders of T. 18 N., T. 17 N., and T. 16 N. in R. 6 E., to the point where the western border of T. 16 N., R. 6 E. meets the northernmost perimeter of Beale Air Force Base in the southwestern corner of T. 16 N., R. 6 E.;

(3) Then east, south and west along the perimeter of Beale Air Force Base to the point where the perimeter of Beale Air Force Base intersects the western border of R. 7 E. in T. 14 N.;

(4) Then south, approximately 24 miles, along the western borders of T. 14 N., T. 13 N., T. 12 N., and T. 11 N. in R. 7 E., to the southwestern corner of T. 11 N., R. 7 E. (see "Sacramento" map);

(5) Then east, approximately six miles, along the south border of T. 11 N., R. 7 E., to the southeastern corner of T. 11 N., R. 7 E.;

(6) Then in a south southeasterly direction, in a straight line, approximately three miles, to the northeasternmost corner of Sacramento County in T. 10 N., R. 8 E.;

(7) Then continuing in a south southeasterly direction, in a straight line, along the Sacramento County—El Dorado County line, approximately 15 miles, to the point where the county line meets the Cosumnes River in the southwestern corner of T. 8 N., R. 9 E.;

(8) Then south, in a straight line, approximately 14.1 miles, along the Sacramento County—Amador County line, to the point where the county line meets Dry Creek in the northwestern corner of T. 5 N., R. 9 E.;

(9) Then in a south southeasterly direction, in a straight line, approximately 5.4 miles, along the San Joaquin County—Amador County line, to the point where the Mokelumne River forms the Amador County—Calaveras County line in T. 4 N., R. 9 E.;

(10) Then continuing in a south southeasterly direction, in a straight line, approximately 10.4 miles, along the San Joaquin County—Calaveras County line, to the point where the power line meets the western border of T. 3 N., R. 10 E.;

(11) Then in a southeasterly direction, in a straight line, approximately 22.4 miles, along the Calaveras County—Stanislaus County line to the point where the county line meets the Stanislaus River in T. 1 S., R. 12 E. (see "San Jose" map);

(12) Then in a southeasterly direction, in a straight line, approximately 20 miles, along the Tuolumne County—Stanislaus County line to the point where the county lines of Tuolumne, Mariposa, Stanislaus and Merced counties meet in the southeast corner of T. 3 S., R. 14 E.;

(13) Then continuing along the Mariposa County—Merced County line in a generally southeasterly direction, approximately 37 miles, to the point where the county lines of Mariposa, Merced and Madera counties meet in the northwestern corner of T. 9 S, R. 16 E.;

(14) Then northeasterly in a straight line, approximately 23 miles, along the Mariposa County-Merced County line to the point, approximately one mile west of Miami Mountain, where the Mariposa County-Merced County line meets the western border of the boundary of the Sierra National Forest in T. 6 S., R. 20 E. (see "Mariposa" map);

(15) Then in a generally northerly and westerly direction, along the western borders of the Sierra and Stanislaus National Forests in Mariposa County (see "San Jose" map);

(16) Then in a generally northerly and westerly direction, along the western border of the Stanislaus National Forest in Tuolumne County (see "Sacramento" map);

(17) Then in a generally northerly and westerly direction, along the western border of the Stanislaus National Forest in Calaveras and Amador counties;

(18) Then in a generally northerly and westerly direction, along the western border of the El Dorado National Forest in Amador, El Dorado and Placer counties (see "Chico" map);

(19) Then in a generally northerly and westerly direction, along the western border of the Tahoe National Forest in Placer, Nevada and Yuba counties to the point south of Ruef Hill where the western border of the Tahoe National Forest intersects the northeast corner of T. 18 N., R. 6 E.;

(20) Then west, approximately five miles, along the north border of T. 18 N., R. 6 E., to the point of beginning.

Signed: May 14, 1987.

W.T. Drake,
*Acting Director.*

BILLING CODE 4810–31–M

---

27 CFR Part 9

[Notice No. 631]

Middle Rio Grande Valley Viticultural Area: New Mexico

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Bureau of Alcohol, Tobacco and Firearms (ATF), is considering the establishment of a viticultural area in Sandoval, Bernalillo, Valencia, and Socorro Counties, New Mexico, to be known as Middle Rio Grande Valley. The proposed viticultural area is located in central New Mexico (near Albuquerque) along the Rio Grande River and surrounding irrigated land. The petition was submitted by a wine society located in Albuquerque. ATF believes that the establishment of viticultural areas and the subsequent use of viticultural area names as appellations of origin in wine labeling and advertising allows wineries to further specify the origin of wines they offer for sale to the public. The establishment of viticultural areas will help consumers identify the wines they may purchase.

DATE: Written comments must be received by July 10, 1987.

**ADDRESS:** Send written comments to: Chief, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC, 20044-0385 (Notice No. 631).

Copies of the petition, the proposed regulations, the appropriate maps, and written comments will be available for public inspection during normal business hours at: ATF Reading Room, Office of Public Affairs and Disclosure, Room 4406, Ariel Rios Federal Building, 1200 Pennsylvania Avenue NW., Washington, DC.

**FOR FURTHER INFORMATION CONTACT:** Edward A. Reisman, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, Ariel Rios Federal Building, 1200 Pennsylvania Avenue NW., Washington, DC 20226, (202) 566-7626).

**SUPPLEMENTARY INFORMATION:**

**Background**

On August 23, 1978, ATF published Treasury Decision ATF-53 (43 FR 37672, 54624) revising regulations in 27 CFR Part 4. These regulations allow the establishment of definite viticultural areas.

On October 2, 1979, ATF published Treasury Decision ATF-60 (44 FR 56692) which added a new Part 9 to 27 CFR, providing for the listing of approved American viticultural areas, the names of which may be used as appellations of origin.

Section 4.25a(e)(1), Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguished by geographical features, the boundaries of which have been delineated in Subpart C of Part 9.

Section 4.25a(e)(2) outlines the procedure for proposing an American viticultural area. Any interested person may petition ATF to establish a grape-growing region as a viticultural area. The petition should include—

(a) Evidence that the name of the proposed viticultural area is locally and/or nationally known as referring to the area specified in the petition;

(b) Historical or current evidence that the boundaries of the viticultural area are as specified in the petition;

(c) Evidence relating to the geographical characteristics (climate, soil, elevation, physical features, etc.) which distinguish the viticultural features of the proposed area from surrounding areas;

(d) A description of the specific boundaries of the viticultural area, based on features which can be found on United States Geological Survey (U.S.G.S.) maps of the largest applicable scale; and

(e) A copy of the appropriate U.S.G.S. maps with the boundaries prominently marked.

**Petition**

ATF has received a petition proposing a viticultural area encompassing a narrow valley (no wider than 19 miles) along the Rio Grande River from just north of Albuquerque, New Mexico southward for approximately 106 miles to San Antonio, New Mexico. The proposed viticultural area is to be known as Middle Rio Grande Valley. The petition was submitted by the Middle Rio Grande Chapter of the New Mexico Vine & Wine Society located in Albuquerque. The proposed area consists of an irrigated valley of approximately 435 square miles. There are 6 bonded wineries in the proposed viticultural area with others planned for the near future.

**Local Viticultural History**

According to Leon D. Adams in *The Wines of America* (Houghton Mifflin Co., Boston, 1973), winemaking from grapes of the Mission variety began in the Middle Rio Grande Valley of New Mexico with the establishment of Franciscan missions in the Seventeenth Century. According to Phyllis Reiche in *The Days of Wine and Vintners* (Univ. Oklahoma Press, 1979), grapes were first planted near Socorro (Socorro County) around 1630 by Fray Garcia de Zuniga. W.H. Davis wrote a book in 1857, titled *El Gringo*, that described a favorable claret that came from Bernalillo (Sandoval County). A U.S. Department of Agriculture census of viticulture in the U.S. in 1880 listed New Mexico as fifth in the nation in wine production, with 3,150 acres of vineyards producing 908,500 gallons of wine. Governor William G. Ritch wrote of the grape growing belt along the Rio Grande in *The History, Resources and Attractions of New Mexico* (1885).

According to other information gathered by the petitioner, winemaking continued in the Middle Rio Grande Valley until Prohibition in 1920 when most vineyards were replaced by other crops. After repeal of Prohibition in 1933, viticulture was revived on a smaller scale.

According to the petitioner, the six bonded wineries within the proposed boundaries of the Middle Rio Grande Valley viticultural area have a total capacity in excess of 216,500 gallons of wine per year. At least two more wineries are in the planning or construction phases. There are twenty growers with more than one acre of wine grapes in the proposed area with a total acreage of approximately 458 acres.

Grape varieties grown in the Middle Rio Grande Valley, in descending order of acreage, include Vidal Blanc, Chancellor, Seyval Blanc, Villard Blanc, Chelois, Leon Millot, Pinot Chardonnay, De Chaunac, Baco Noir, Steuben and others.

**Evidence of Name.**

According to the petitioner, the name Middle Rio Grande Valley has been in use for many years to identify this area of New Mexico. In a Report of the Chief Engineer on the Chronological Development of the Rio Grande Basin, the name Middle Valley and Middle Rio Grande Valley were used to describe the settlement and agricultural attributes of the area. The report stated that the Middle Rio Grande Valley is probably one of the oldest irrigated areas in the United States. According to this report, the name Middle Rio Grande Valley applied to the area from Santa Fe, New Mexico southward to Socorro, New Mexico. Attached to the above described report was a map titled Rio Grande Valley which specifically identified an area of land between Albuquerque and Socorro as the Middle Rio Grande Conservancy District.

According to the publication *Water Resources of New Mexico, Settlement, Development and Water Use, Rio Grande Basin* by E.F. Sorensen, and L. Dee (Santa Fe, 1967), the Rio Grande River basin is divided into three sections known as the upper, middle and lower valleys. The book states that the Middle Rio Grande Valley extends from Otowi Bridge at the head of White Rock Canyon (northeast Sandoval County) to Elephant Butte Reservoir (Sierra County).

Historical or current evidence that the proposed boundaries of the viticultural area are correct.

The U.S.G.S. quadrangle maps indicate the proposed boundary for the Middle Rio Grande Valley appellation which begins at a point near Algodones Dam in Sandoval County and proceeds south along the east side of the Rio Grande River to New Mexico 380 west to the town of San Antonio, west on N.M. 85 and then north on the west side of the Rio Grande River and east to the point of origin. The exact maps and boundaries are described in the regulation portion of this document.

Evidence Relating to the Geographic Features such as Climate, Soil, Elevation, Physical Features, etc., which set the proposed Middle Rio Grande Valley viticultural area apart from the surrounding areas.

*(a) Climate*

The proposed Middle Rio Grande Valley viticultural area is located between latitudes of 34 degrees and 36 degrees North in central New Mexico. The climate is classified as arid continental type and it is characterized by low rainfall, warm summers, and mild winters. Most precipitation occurs during summer months as brief thunder showers. Snow occurs occasionally in the winter but accumulations are small. Winds are light to moderate and usually stronger during Spring months. The average number of days without killing frost ranges between 180 to 200 days in this belt. Minimum and maximum daily temperatures fluctuate 30 to 35 degrees.

The following two tables show climate comparisons between the Middle Rio Grande Valley and the surrounding areas:

TABLE 1.—CLIMATE CONDITIONS WITHIN THE PROPOSED MIDDLE RIO GRANDE VALLEY

| Site | Elevation | Area | Temperature (F.) | | Average (in.) | | Degree days | |
|---|---|---|---|---|---|---|---|---|
| | | | Maximum | Mean | Minimum | Rain | Heat | Cool |
| Bernalillo | 5,045 | N | 71.8 | 54.6 | 37.3 | 8.20 | 4,709 | 994 |
| Albuquerque | 5,311 | N | 70.3 | 56.6 | 42.1 | 8.12 | 4,292 | 1,016 |
| Socorro | 4,585 | S | 73.2 | 57.8 | 40.5 | 8.63 | 3,815 | 1,325 |
| Bosque | 4,520 | S | 75.7 | 57.7 | 39.3 | 8.20 | 3,931 | 1,269 |

TABLE 2.—CLIMATIC CONDITIONS AT FOUR SITES OUTSIDE THE PROPOSED MIDDLE RIO GRANDE VALLEY VITICULTURAL AREA

| Site | Elevation | Area | Temperature (F.) | | Average (in.) | | Degree days | |
|---|---|---|---|---|---|---|---|---|
| | | | Maximum | Mean | Minimum | Rain | Heat | Cool |
| Jemez Dam | 6,250 | N | 60.7 | 52.0 | 37.3 | 16.37 | 5,330 | 538 |
| Magdalena | 6,549 | W | 71.7 | 52.4 | 33.6 | 10.41 | 5,112 | 650 |
| Truth or Con. | 4,820 | E | 73.6 | 58.9 | 45.7 | 8.39 | 3,382 | 1,888 |
| Cabello | 4,190 | S | 76.4 | 60.4 | 44.2 | 8.23 | 3,195 | 1,890 |

Source: Monthly Normals of Temperature, Precipitation, and Heating and Cooling Degree Days 1941–1970, U.S. Department of Commerce, NOAA, Environmental Data Service, Publication No. 81 (Rev), August 1973, Asheville, N.C.

*(b) Soils*

The proposed Middle Rio Grande Valley viticultural area is located in a Basin province of the Warm Desertic Region of New Mexico. The Rio Grande River is the principal drainage for the Middle Rio Grande River Valley. Soils within the proposed viticultural area are on the nearly level floodplain adjacent to the river and are deep, highly stratified and typically non-gravelly. The Typic Torrifluvent association is developed in alluvium of mixed origin. Most of the soil within this association is medium, moderately fine or fine textured, and a high percentage of it is well suited to irrigation for a wide variety of crops. Subsurface layers are similar but may range in texture from sand to clay. Representative soil series are of Gila, Glendale or Vinton series.

By contrast, soils adjacent to the viticultural area that occur on the strongly sloping uplands north of the Rio Grande plain have soils of the Typic Torriorthents which have gravelly, sandy surface layers and coarse textured subsurface layers. Soil series in this area are Bluepoint and Caliza. Higher soils are rough broken lands of Nickel and Canutio series and include a layer of gravel with subsurface caliche and clay layers. Steep side slopes cut with streambeds often show exposed areas of bedrock in the eroded hilly areas.

*(c) Distinct Valley Area*

The proposed viticultural area follows the Rio Grande River and surrounding irrigated land for the length of 105 miles. Elevations within the proposed area range from approximately 4,800 feet to 5,200 feet above sea level. The surrounding mountain areas located to the north, east, west and southwest have much higher elevations. There soils, water availability and climates differ from the proposed Middle Rio Grande Valley area.

In a Report of the Chief Engineer describing the chronological development of the Rio Grande Basin and the Middle Rio Grande Conservancy District, the proposed viticultural area as well as the area north to Santa Fe, New Mexico was identified as the Middle Valley and the Middle Rio Grande Valley. The U.S. Department of Commerce (National Oceanic and Atmospheric Administration) published a State Climatic Divisions Map. The map identifies a general area which takes in the proposed boundaries of the viticultural area. The area is called the Central Valley. The general area to the north of the proposed Rio Grande Valley viticultural area is identified on the map as the Northern Mountains (Jemez Mountains, San Pedro Mountains and Sangre Cristo Mountains). The general area to the east is called the Central Highlands (Manzano Mountains and Sandia Mountains) and the area to the southwest is called the Southwestern Mountains (Gallinas Mountains, Datil Mountains, San Mateo Mountains and Continental Divide).

According to the petitioner, proceedings of the annual New Mexico Grape Growers and Wine Makers Conferences have data presented by regions and the Middle Rio Grande Valley region has only data from growers in this proposed viticultural area. Based on the petitioner's evidence provided in this notice, it is his opinion, that the proposed Middle Rio Grande Valley viticultural area defines a region with unique climate and growing conditions different from the surrounding areas.

**Regulatory Flexibility Act**

The provisions of the Regulatory Flexibility Act relating to an initial and final regulatory flexibility analysis (5 U.S.C. 603, 604) are not applicable to this notice of proposed rulemaking because the proposal is not expected (1) to have significant economic impact, secondary, or incidental effects on a substantial number of small entities; or (2) to impose, or otherwise cause a significant increase in the reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that the notice of proposed rulemaking, if promulgated as a final rule, will not have a significant

economic impact nor place compliance burdens on a substantial number of small entities.

**Executive Order 12291**

It has been determined that this proposed rulemaking is not classified as a "major rule" within the meaning of Executive Order 12291, 46 FR 13193 (1981), because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographical regions; and it will not have significant adverse affects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

**Paperwork Reduction Act**

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this notice because no requirement to collect information is proposed.

**Public Participation—Written Comments**

ATF requests comments from all interested persons concerning this proposed viticultural area. The document proposes possible boundaries for the area named "Middle Rio Grande Valley" viticultural area. However, comments concerning other possible boundaries or names for this viticultural area will be given full consideration.

Comments received before the closing date will be carefully considered. Comments received after the closing date and too late for consideration will be treated as possible suggestions for future ATF action.

ATF will not recognize any material in comments as confidential. Comments may be disclosed to the public. Any material which the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comments. The name of the person submitting a comment is not exempt from disclosure.

Any interested person who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his or her request, in writing, to the Director within the 45-day comment period. The Director, however, reserves the right to determine, in light of all circumstances, whether a public hearing will be held.

**List of Subjects in 27 CFR Part 9**

Administrative practice and procedure, Viticultural areas, Consumer protection, Wine.

**Drafting Information**

The principal author of this document is Edward A. Reisman, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

**Authority and Issuance**

**PART 9—[AMENDED]**

27 CFR Part 9—American Viticultural areas is amended as follows:

**Paragraph 1.** The authority citation for Part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

**Par. 2.** The table of contents in 27 CFR Part 9, Subpart C, is amended to add the title of § 9.119 to read as follows:

**Subpart C—Approved American Viticultural Areas**

* * * * *

Sec.
9.119 Middle Rio Grande Valley

**Par. 3.** Subpart C is amended by adding § 9.119 to read as follows:

**Subpart C—Approved American Viticultural Areas**

**§ 9.119 Middle Rio Grande Valley.**

(a) *Name.* The name of the viticultural area described in this section is "Middle Rio Grande Valley."

(b) *Approved maps.* The appropriate maps for determining the boundaries of the "Middle Rio Grande Valley" viticultural area are 24 U.S.G.S. Quadrangle (7.5 Minute Series) maps and 1 (15 Minute Series) U.S.G.S. map. They are titled:

(1) Abeytas, N. Mex. (1952), revised 1979.
(2) Alameda, N. Mex. (1960), revised 1967 and 1972.
(3) Albuquerque East, N. Mex. (1960), revised 1967 and 1972.
(4) Albuquerque West, N. Mex. (1960), revised 1967 and 1972.
(5) Belen, N. Mex. (1952), revised 1971.
(6) Bernalillo, N. Mex. (1954), revised 1972.
(7) Dalies, N. Mex. (1952), revised 1971.
(8) Isleta, N. Mex. (1952), revised 1967 and 1974.
(9) La Joya, N. Mex. (1952), revised 1971.
(10) Lemitar, N. Mex. (1952), revised 1971.
(11) Loma De Las Canas, N. Mex. (1959), revised 1979.
(12) Loma Machete, N. Mex. (1954), revised 1972.
(13) Los Griegos, N. Mex. (1960), revised 1967 and 1972.
(14) Los Lunas, N. Mex. (1952), revised 1971 and 1974.
(15) Mesa Del Yeso, N. Mex. (1959).
(16) Placitas, N. Mex. (1954).
(17) San Acacia, N. Mex. (1952), revised 1971.
(18) San Antonio, N. Mex. (1946)—15 minute series.
(19) San Felipe Pueblo, N. Mex. (1954), revised 1978.
(20) Santa Ana Pueblo, N. Mex. (1954), revised 1978.
(21) Socorro, N. Mex. (1959), revised 1971.
(22) Tome, N. Mex. (1952), revised 1979.
(23) Turn, N. Mex. (1952), revised 1979.
(24) Veguita, N. Mex. (1952), revised 1979.
(25) Wind Mesa, N. Mex. (1952), revised 1967.

(c) *Boundaries.* The boundaries of the proposed Middle Rio Grande Valley viticultural area are as follows:

The beginning point is at the transmission line tower in the middle of Section 34, T14N, R4N, of the Santa Ana Pueblo, N. Mex. U.S.G.S. map.

(1) The boundary runs east on the power transmission line for 2.5 miles until it converges with New Mexico State Route 25/Interstate 85 (now known as Interstate 25) at Sec. 1, T13N, R4E on the San Felipe Pueblo, N. Mex. U.S.G.S. map;

(2) It follows I–25 southwest for 1.2 miles until it arrives at an unimproved dirt road approx. .2 mile east of Algodones Cemetery, at Sec. 11, T13N, R4E on the Placitas, N. Mex. U.S.G.S map;

(3) The boundary follows the unimproved dirt road southeast for 5.5 miles until it meets another unimproved dirt road at Tecolote, NM, south of Sec. 27 and 28, T13N, R5E;

(4) It travels southwest on the unimproved dirt road .7 mile until it meets NM–44 approx. 100 feet northwest of BM 6,075 in Placitas, NM, at T13N, R5E;

(5) It then goes southeast on NM–44 for approx. 250 feet until it intersects the 6,100 foot elevation contour line approx. 250 feet southeast of BM 6,075, at T13N, R5E;

(6) It then travels west for 3.5 miles on the 6,100 feet elevation contour line until it reaches a light-duty road on the Huertas Grant/Cibola National Forest Boundary at Sec. 6, T12N, R5E;

(7) The boundary runs north to northwest on the light-duty road for approx. .9 mile until it meets NM–44 next to BM 5,875 in Sec. 31, T13N, R5E;

(8) It travels west 5.2 miles on NM–44 until it arrives at I–25 (southbound interchange) near the Bernalillo

Cemetery at T13N, R4E on the Bernalillo, N. Mex. U.S.G.S. map;

(9) It proceeds south on I–25 for approx. 6.6 miles until it intersects with NM–556 at the east bound interchange at Sec. 1, T11N, R3E on the Alameda, N. Mex. U.S.G.S. map;

(10) The boundary goes east approx. 5 miles on NM–556 until it intersects the 106°30' longitude meridian, T11N, R4E;

(11) Then it goes south on the 106°30' longitude meridian for approx. 4.5 miles until it arrives at Montgomery Blvd. at Sec. 34, T10/11N, R4E;

(12) The boundary travels west on Montgomery Blvd. for approx. 6.1 miles until it meets the south exit ramp of I–25 in Sec. 34, T11N, R3E;

(13) Then it travels south on I–25 for approx. 13.3 miles (through Albuquerque, N.M). until it intersects with NM–47 at Sec. 6, T8N, R3E on the Isleta, N. Mex. U.S.G.S. map;

(14) It heads south on NM–47 for approx. 3.2 miles until it converges with the 4,900 foot elevation contour line at Isleta Pueblo, NM, in Sec. 24, T8N, R2E;

(15) The boundary follows the 4,900 foot elevation contour line south for approx. 25 miles until it arrives at a point north of Madron, NM, at the Atchison, Topeka and Santa Fe Railroad (AT&SF RR) tracks, approx. 250 feet east of elevation mark 4,889 feet on the Turn, N. Mex. U.S.G.S. map;

(16) It then travels north on the AT&SF RR tracks for approx. 350 feet until it intersects NM–47 approx. 350 feet north of elevation mark 4,880 feet;

(17) The boundary goes southwest on NM–47 (through Turn, N.M.) for approx. 2.4 miles until it reaches the 106°45' longitude meridian between the Turn, N. Mex. & Vequita, N. Mex. U.S.G.S. maps;

(18) Then it travels south on the 106°45' longitude meridian for approx. 4.7 miles until it meets the 34°30' latitude parallel on the Vequita, N. Mex. U.S.G.S. map;

(19) It then proceeds west on the 34°30' latitude parallel for approx. 1 mile until it arrives at NM–47 approx. .75 mile south of San Juan Church;

(20) Then it moves south on NM–47 for approx. 13.2 miles until it reaches an improved light-duty road at La Joya, NM, approx. 500 feet west of La Joya Cemetery on the La Joya, N. Mex. U.S.G.S. map;

(21) It then travels south on the improved light-duty road for approx. 450 feet until it intersects another improved light-duty road;

(22) Then it goes 500 feet west on the improved light-duty road until it reaches a north-south unimproved road at a point approx. .9 mile east, of the AT&SF RR tracks;

(23) The boundary heads south on the unimproved road for approx. 7.9 miles until it reaches the 34°45' latitude parallel on the La Joya, N. Mex. U.S.G.S. map;

(24) It travels west on the 34°15' latitude parallel for approx .9 mile until it intersects the 106°52'30" longitude meridian on the Mesa Del Yeso, N. Mex. U.S.G.S. map;

(25) It then goes south on the 106° 52' 30" longitude meridian for approx. 3.3 miles until it intersects the south section line of Sec. 19, T1S, R1E;

(26) It then runs east for approx. 1.25 miles until it reaches the east section line (marked altitude 5,068 feet) of Sec. 20, T1S, R1E;

(27) It travels south on the section line for approx. 7.1 miles, until it meets the Grant Boundary at altitude mark 4,734 feet at Sec. 32/33, T2S, R1E on the Loma De Las Canas, N. Mex. U.S.G.S. map;

(28) It proceeds east on the Grant Boundary for .25 mile until it arrives at the section line (Grant Boundary at Sec. 32/33, T2S, R1E;

(29) The boundary moves south on the Grant Boundary for approx. 5.2 miles until it meets the (Grant Boundary) section line near altitude spot 4,702 feet at Sec. 28/29, T3S, R1E;

(30) The boundary goes west on the section line (Grant Boundary) for approx. .25 mile until it arrives at the section line at Sec. 28/29, T3S, R1E;

(31) Then it moves south on the section line for approx. 5.7 miles until it meets an unimproved dirt road at Bosquecito, N.M. on the west section line of Sec. 8, T4S, R1E on the San Antonio, N. Mex. (15 minute series) U.S.G.S. map;

(32) It heads south on the unimproved dirt road for approx. 2 miles until it changes to a light-duty road at Padilla Ranch in Sec. 21, T4S, R1E;

(33) It follows the light-duty road for 2.25 miles until it intersects US–380/85, in Sec. 33, T4S, R1E;

(34) Then it follows US–380/85, first west then it loops north for approx. 8 miles until it meets the 34°00' latitude parallel;

(35) The boundary moves west on the 34°00' latitude parallel of the Socorro, N. Mex. U.S.G.S. map for approx. .75 mile until it meets the 4,800 foot elevation contour line in Sec. 35;

(36) It meanders north on the 4,800 foot elevation contour line for approx. 9 miles until it meets the 34°07' 30" latitude parallel;

(37) It travels east for approx. .2 mile on the 34°07'30" latitude parallel until it meets I–25 (US–60/85);

(38) It goes north on I–25 (US–60/85) for approx. 27.8 miles until it meets the Belen Highline Canal levee approx 1.6 mile south of San Antonio Church on the Veguita, N. Mex. U.S.G.S. map;

(39) Then the boundary follows the Belen Highline Canal north for approx. 9.4 miles until it intersects I–25, approx. .5 mile west of Bacaville, NM, on the Belen, N. Mex. U.S.G.S. map;

(40) Then it travels north on I–25 for approx. 16 miles until it meets the 34°52' 30" latitude parallel on the Isleta, N. Mex. U.S.G.S. map;

(41) The boundary goes west on the 34°52'30" latitude parallel for approx. 1 mile until it arrives at the 106°45' longitude meridian;

(42) Then it moves north on the 106°45' longitude meridian for approx. 16.5 miles until it reaches the 35°07'30" longitude meridian on the Albuquerque West, N. Mex. U.S.G.S. map;

(43) At this point it heads east for approx. 1.2 mile along the 35°07'30" latitude parallel until it reaches the power transmission line towers at Sec. 3/4, T10N, R2E of the Los Griegos, N. Mex. U.S.G.S. map; and finally

(44) From there it travels north and northeast along the power transmission line towers (and for 1 mile along a connecting unimproved road) for a total of approx. 24.4 miles to the point of beginning at Sec. 34, T14N, R4E, of the Santa Ana Pueblo, N. Mex. U.S.G.S. map.

Approved: May 12, 1987.

W.T. Drake,

*Acting Director.*

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[A-4-FRL-3286-8; NC-021]

### Approval and Promulgation of Implementation Plans; North Carolina; Stack Height Rules

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** In this action, EPA is proposing to approve revisions to the North Carolina State Implementation Plan (SIP) submitted to EPA on February 25, 1986, and August 1, 1986. North Carolina has revised its SIP to include Good Engineering Practice Stack Height regulations. These regulations are equivalent to EPA requirements promulgated at Part 51 of Chapter I, Title 40 of the Code of Federal Regulations.

**EFFECTIVE DATE:** To be considered, comments must be submitted on or before June 25, 1987.

**ADDRESSES:** Written comments should be addressed to Beverly A. Thomas of EPA Region IV's Air Programs Branch (see EPA Region IV address below.) Copies of the material submitted by North Carolina may be examined during normal business hours at the following locations:

Air Programs Branch, Region IV, Environmental Protection Agency, 345 Courtland Street, NE., Atlanta, Georgia 30365

North Carolina Department of Natural Resources and Community Development, 512 North Salisbury Street, Raleigh, North Carolina 27611

**FOR FURTHER INFORMATION CONTACT:** Beverly A. Hudson, EPA, Region IV, Air Programs Branch at above listed address, telephone 404/347-2864 or FTS 257-2864.

**SUPPLEMENTARY INFORMATION:** In the Federal Register of July 8, 1985 (50 FR 27892), EPA published final regulations to implement Section 123 of the Clean Air Act (CAA), which regulates the manner in which dispersion of pollutants from a source may be considered in setting emission limitations. These regulations limit the amount of stack height or dispersion credit (dispersion techniques) a source can claim in the process of establishing its emission limitation. Dispersion techniques include the use of stack heights greater than 65 meters and use of other techniques to increase the dispersion of emissions rather than continuously reducing emissions from a source.

Pursuant to section 406(d)(2) of the Clean Air Act Amendments of 1977, all states were required to (1) review and revise, as necessary, their State implementation plans (SIPs) to include provisions that limit stack height credit and dispersion techniques in accordance with the revised regulations and (2) review all existing emission limitations to determine whether any of these limitations have been affected by stack height credits above GEP or any other dispersion techniques. For any limitations so affected, states were to prepare revised limitations consistent with their revised SIPs. All SIP revisions and revised emission limits were to be submitted to EPA within 9 months of promulgation, as required by section 406 of Pub. L. 95-95.

The North Carolina Department of Natural Resources and Community Development has submitted their State Implementation Plan revisions for Good Engineering Practice (GEP) Stack Height. A public hearing was held on these revisions on November 15, 1985. North Carolina has not yet adopted the definition of "emission limitation" found at 40 CFR 51.100(z) (formerly 40 CFR 51.1(z)), and until officially adopted, the State will use EPA's definition as part of their stack height regulation. The present proposal is made on the assumption that the State will adopt the definition of emission limitation. The State has made a commitment to adopt and use the definition of emission limitation in letters dated July 9, 1986, and August 1, 1986. At the time EPA takes final rulemaking on this action, the commitment letter will be incorporated by reference into the SIP.

EPA has proposed to approve previous versions of North Carolina's stack height rule on March 29, 1983 (48 FR 3052) and October 17, 1984 (49 FR 40607). Today, EPA is also proposing to approve new revisions to the stack height rule which were submitted on February 25, 1986 and August 1, 1986. The final action will include all three proposal notices and public comments.

In other respects, the State deemed its existing stack height language to be in accordance with EPA's regulation. North Carolina's regulations define a number of specific terms including "excessive concentration," "dispersion techniques," "nearby" and other important concepts. The regulation applies to both new and existing sources, thereby satisfying requirements for state new source review regulations 40 CFR 51.164. The State will submit their final revised emission limits for those sources affected under the new stack height regulations at a later date.

## Proposed Action

EPA has reviewed the submittal and found it to be equivalent to EPA's stack height requirements. Therefore, EPA today proposes to approve North Carolina's stack height regulations based on the assumption that the State will adopt the definition of "emission limitation."

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

**[A-4-FRL-3206-5; TN-032]**

## Approval and Promulgation of Implementation Plans; Tennessee; Stack Height Rules

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** In this action, EPA is proposing, through parallel processing, to approve revisions to the Tennessee State Implementation Plan (SIP) submitted to EPA on August 18, 1986. Tennessee has revised its SIP to include Good Engineering Practice Stack Height regulations. These regulations are equivalent to EPA requirements promulgated at Part 51 of Chapter I, Title 40 of the Code of Federal Regulations.

**EFFECTIVE DATE:** To be considered, comments must be submitted on or before June 25, 1987.

**ADDRESSES:** Written comments should be addressed to Beverly A. Thomas of EPA Region IV's Air Programs Branch (see EPA Region IV address below.) Copies of the material submitted by Tennessee may be examined during normal business hours at the following locations:

Air Programs Branch, Region IV, Environmental Protection Agency, 345 Courtland Street, NE., Atlanta, Georgia 30365.

Tennessee Department of Health and Environmental Control, Customs House, 701 Broadway, Nashville, Tennessee 37219-5403.

**FOR FURTHER INFORMATION CONTACT:** Beverly A. Thomas, EPA, Region IV, Air Programs Branch at above listed address, telephone 404/347-3286 or FTS 257-3286.

**SUPPLEMENTARY INFORMATION:** On August 18, 1986, the Tennessee Department of Health and Environmental Control (DHEC) informally submitted their State Implementation Plan revisions for Good Engineering Practice Stack Height. A public hearing was held on these revisions on March 10, 1986. The revisions are not yet in effect in the

State because of Tennessee's administrative procedures. These procedures include an internal review process which can be quite lengthy. The present proposal is made on the assumption that the revisions will not change significantly before they become State-effective and are formally submitted.

In the Federal Register of July 8, 1985 (50 FR 27892), EPA published final regulations to implement section 123 of the Clean Air Act (CAA), which regulates the manner in which dispersion of pollutants from a source may be considered in setting emission limitations. These regulations limit the amount of stack height or dispersion credit (dispersion techniques) a source can claim in the process of establishing its emission limitation. Dispersion techniques include the use of stack heights greater than 65 meters and use of other techniques to increase the dispersion of emissions rather than continuously reducing emissions from a source.

Pursuant to section 406(d)(2) of the Clean Air Act Amendments of 1977, all states were required to (1) review and revise, as necessary, their state implementation plans (SIPs) to include provisions that limit stack height credit and dispersion techniques in accordance with the revised regulations and (2) review all existing emission limitations to determine whether any of these limitations have been affected by stack height credits above GEP or any other dispersion techniques. For any limitations so affected, states were to prepare revised limitations consistent with their revised SIPs. All SIP revisions and revised emission limits were to be submitted to EPA within 9 months of promulgation, as required by section 406 of Pub. L. 95-95.

The State has revised its existing stack height language in accordance with EPA's regulation. The regulation applies to both new and existing sources, thereby satisfying requirements for state new source review regulations at 40 CFR 51.164 as well as to CFR 51.118. Tennessee's regulations defined a number of specific terms including "excessive concentration," "dispersion techniques," "nearby" and other important concepts. The State will submit their final revised emission limits for those sources affected under the new stack height regulations at a later date.

### Proposed Action

EPA has reviewed the submittal and found it to be equivalent to EPA's stack height requirements. Therefore, EPA today proposes to approve Tennessee's stack height regulations under the parallel processing procedures.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

[A-4-FRL-3196-7; NC-007, 016]

## Approval and Promulgation of Implementation Plans; North Carolina; Proposed Partial Approval of Particulate Regulation for Electric Utility Boilers

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve portions of, and disapprove other portions of regulation 15 NCAC 2D.0536 (Particulate Emissions from Electric Utility Boilers) which North Carolina submitted to EPA as a State Implementation Plan (SIP) revision on January 24, 1983, and February 21, 1983, as it was subsequently revised in a submittal to EPA on December 17, 1986. The regulation and its revisions prescribe relaxed particulate emission limits for twelve electric utility power plants in the State belonging to Duke Power Company (Duke) and Carolina Power and Light Company (CP&L). The portions of the regulations proposed for approval set new short-term emissions limits for eight of the twelve plants retaining, although recodifying, the emission limit for a thirteenth plant. Also proposed for approval are stack testing requirements, opacity monitoring requirements, and requirements for submittal of malfunction abatement plans. EPA is proposing to disapprove other portions of the regulation, which set annual opacity limits for those nine plants. For the remaining four plants, all belonging to CP&L, the State has not submitted the required air quality analyses which demonstrate protection of the NAAQS and PSD increments. EPA has taken action in a separate Federal Register notice to propose disapproval of both the short-term limits and annual limits for those four plants.

The plants for which approval of the emission limits in the new regulation is being proposed are the Duke Allen, Belews Creek, Buck, Cliffside, Dan River, Marshall and Riverbend Plants, and the CP&L Cape Fear and Roxboro Plants. The approvals for the CP&L Roxboro Plant and the Duke Allen and Dan River Plants are contingent upon the State submitting additional PSD increment analyses showing no increment violations.

DATE: To be considered, comments must be received on or before June 25, 1987.

ADDRESSES: Written comments should be addressed to Roger Pfaff of the EPA Region IV Air Programs Branch. (See Region IV address below.) Copies of the State's submittal are available for review during normal business hours at the following locations:

Air Quality Section, Division of Environmental Management, North Carolina Department of Natural Resources and Community Development, Archdale Building, 512 North Salisbury Street, Raleigh, North Carolina 27611.

Air Programs Branch, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30365.

Comments which were received on EPA's original proposal of these regulations will also be addressed in EPA's final action on this proposal.

FOR FURTHER INFORMATION CONTACT: Roger O. Wolf of the EPA Region IV Air Programs Branch, at the above address and telephone (404) 347-2864 or FTS 257-2864.

SUPPLEMENTARY INFORMATION: On January 24, 1983, and February 21, 1983, North Carolina submitted a new regulation (15 NCAC 2D.0536—Particulate Emissions from Electric Utility Boilers) to EPA for approval as part of the federally-approved State Implementation Plan (SIP). The purpose of this new regulation was to prescribe new particulate emission limits for each of the Duke and CP&L electric utility boilers in the State. These boilers were previously regulated under 15 NCAC 2D.0509—Control of Particulates from Fuel Burning Sources. The new regulation (2D.0536) relaxed the allowable particulate emission limits that applied to boilers at twelve power plants by a minimum of 0.01 pounds per million BTU (lb/mmBTU) of heat input and a maximum of 0.23 lb/mmBTU. For one Duke plant (Riverbend) the new limit was the same as the old. Seven of these plants (22 boilers units) are operated by Duke and six of the plants (16 boiler units) are operated by CP&L.

On December 24, 1985 (49 FR 49122), EPA proposed to approve the short-term mass emission limits contained in new regulation 2D.0536. At that time, EPA also proposed to take no action on the annual particulate emission limits contained in 2D.0536 because they did not protect the short-term NAAQS and PSD increments. In that notice, EPA stated that final approval of the new mass emission limits would not be granted until the State submitted documentation to show that the relaxation would cause no exceedance of the allowable PSD increments for particulate matter. This PSD demonstration is required by EPA regulations at 40 CFR 51.166(a)(2). Several comments were received on that proposal.

On September 20, 1984, North Carolina sent EPA a document titled "Case for Non-consumption of PSD Increment by the Adoption of 15 NCAC 2D.0536." The purpose of this paper was to show that the power companies had not increased their actual emissions and that, therefore, no PSD increment consumption analysis was necessary. EPA reviewed this submittal, and found it to be inadequate to satisfy the requirements of 40 CFR 51.166. By letter of February 19, 1985, EPA requested that a PSD increment consumption analysis be provided to validate the SIP revision. This February 19, 1985, letter also outlined how to determine the degree of increment consumption caused by the emission limit relaxation. Since that time, EPA has conducted numerous meetings with the State, Duke, and CP&L, and has issued further guidance on how to perform an increment analysis for the SIP revision.

On December 17, 1985, North Carolina submitted a major revision to 2D.0536 to EPA for approval. This submittal contained essentially the same short-term emission limits as the original version of 2D.0536. A few limits were lowered. However, new annual limits and annual opacity limits were prescribed for the boilers at each of the thirteen power plants. One part of the revision, including the annual emission limits, became effective in the State on August 1, 1986. The second part, which replaces the annual emission limits with annual opacity limits, becomes effective on August 1, 1987. Since no PSD increment analysis accompanied this December 17, 1985, submittal, the revised 2D.0536 contained the same deficiency as the original submittal of the rule. In addition to this shortcoming, EPA also determined that the State must provide an up-to-date modelling demonstration which shows that the new mass emission limits (in both the original and the revised version of 2D.0536) will not violate the NAAQS for particulate matter. Since modelling techniques have improved greatly since the time the original NAAQS demonstration was perpared (in approximately 1978), the original analysis is no longer valid. This analysis is required before EPA can approve any SIP revision pursuant to section 110(a)(3)(A) of the Clean Air Act.

On February 14, 1986, EPA notified the State by letter that the Agency must take action on 2D.0536 without further delay. The State was asked to submit both the PSD and NAAQS analyses within 20 days, thus completing the January 24, 1983, February 21, 1983, and December 17, 1985, submittals. If the State did not oblige by meeting that request, or did not withdraw the submittals by March 20, 1986, EPA would proceed to disapprove both versions of the regulation.

The State did not withdraw the submittals or complete the modelling by the March 20, 1986, deadline. The State, however, with the assistance of the affected utilities, proceeded with preparing the required documentation and indicated that an acceptable modelling demonstration would be submitted shortly. In March 1986, and May 1986, the required PSD increment analyses were submitted. Because EPA was aware that the State was completing the required analysis, EPA decided to delay proceeding with the full disapproval.

On October 15, 1986, EPA received the required NAAQS modeling analysis for six Duke Power plants and two CP&L plants. For the Duke Riverbend plant, no analysis was required, since the emission limits do not increase. The State did not submit NAAQS analyses for the other four CP&L plants.

The modeling techniques used in the demonstration supporting this revision are, for the most part based on modeling guidance in place at the time that the analysis was performed, i.e., the EPA "Guideline on Air Quality Models" (1978). Since that time, revisions to modeling guidance have been promulgated by EPA (51 FR 32176, September 9, 1986). Because the modeling analysis was underway prior to publication of the revised guidance, EPA accepts the analysis.

EPA has fully evaluated the new modelling analyses and has concluded that, for seven Duke plants, and two CP&L plants, the new emission limits in revised 2D.0536 are adequate to protect the annual and 24-hour NAAQS and PSD increments, except as noted below. It should be noted that for one CP&L plant (Roxboro) no PSD increment analysis was required in mid-1986, although some increment is consumed by the relaxed limits. This is because EPA guidance set out at 45 FR 52715 exempts SIP revisions from increment analysis if approval of the revision is pending at the time the PDS baseline is triggered. The baseline was triggered in Person County on December 30, 1985, at a time when action on the revision was pending.

Although no increment analysis was submitted by the State for the CP&L Roxboro plant (exempted from analysis in Person County) and the Duke Allen and Dan River Plants (located in counties where the baseline is not triggered), EPA discovered during its review of the modeling that an analysis should have been submitted for the effects of these three plants in neighboring counties where the baseline had already been triggered. In light of the fact that the CP&L Roxboro Plant must now be analyzed for its effects on increment in neighboring counties, an increment analysis will also be done for Person County where the plant is

located but was previously exempted. Since the magnitude of air quality impacts decreases with increasing distance. It is unlikely that any increment would be exceeded in neighboring counties. Therefore, EPA is today proposing to approve the new emission limits, contingent upon the State submitting air analyses showing no violations of increments in the affected counties before EPA takes final approval action on the limits for those three plants.

The table below illustrates the effects of the SIP revision on emissions and air quality. The first column lists the previous emission rate for each boiler, under 15 NCAC 2D.0503. The second column lists the emission rate on the baseline date, if applicable. The third column lists the new emission limit being proposed for approval today. The fourth column lists the maximum percent of 24-hour Class II increment consumption which will be used by the relaxation at each plant and all other increment consumption in the area for those plants where an increment analysis was performed. The fifth column lists the total 24-hour ambient air quality levels in the area of each plant after the relaxation. The annual air quality values are not listed here, because the 24-hour values are generally the closest to the maximum allowable. It should be noted that the actual amount of increment being used in the future is based upon future actual emissions, and not allowable emissions, which must be used in this analysis. If the boilers operate at lower than allowable emission rates, less increment may be used.

EMISSION AND AIR QUALITY SUMMARY

| Boiler | Old limit lb/mmBTU | Baseline emission lb/mmBTU | New limit lb/mmBTU | Total class II increment consumption percent | Total air quality ug/m³ |

[1] N/A—Not yet available.

The Cliffside and Marshall plants also impact the Class I increments at Linville Gorge National Wilderness Area. The twenty-four hour Class I increment consumption for these two plants is 20% and 40%, respectively. These contributions, when added to existing increment consuming sources in the area, do not exceed Class I increments.

For more details concerning ambient analysis and EPA's review of the effect of this SIP revision, the reader may obtain a Technical Support Document from EPA's Region IV office listed

above. Although EPA (in the December 21, 1983, Federal Register) proposed to take no action on the annual emission limits contained in the original 2D.0536.

Since the annual mass emission limits initially contained in 2D.0536 are not, in EPA's opinion, limits for which compliance can accurately be determined, EPA concludes that the yearly mass emission standards are unenforceable. Further, the purported purpose of the annual opacity standards, contained in the revision to 2D.0536, is to indirectly protect the short-term NAAQS (by encouraging good operation and maintenance procedures.) The annual opacity limits are also more directly intended to protect the long-term ambient particulate standard. EPA concludes that the annual opacity standards contained in 2D.0536 do not accomplish either objective. Because the enforcement of those yearly standards by EPA would be manpower intensive and because those standards are unnecessary (due to the fact that federally-enforceable short-term mass and opacity standards already exist for the sources in question), EPA has decided not to propose to approve them. However, the annual mass emission limits will expire on August 1, 1987, and be replaced by the annual opacity limits. Since EPA will not be able to complete its rulemaking action before that time, today's proposal is to disapprove the annual opacity limits.

The regulation requires the utility owners to perform an annual stack test of each unit and report the results to the State within 30 days. Stack test methods are specified by State regulations, and are generally the same as EPA's test methods in 40 CFR Part 60.

The regulation requires an opacity monitoring system which meets the requirements of 40 CFR Part 60, Appendix B, as well as an approved quality assurance program for the opacity monitoring system.

The regulation requires the utility to have on file with the State an approved malfunction abatement plan for each unit subject to the regulation. The utility is also required to submit a monthly on malfunctions and other equipment failures.

### Proposed Action

EPA proposes to approve North Carolina's regulation 15 NCAC 2D.0536 as it will become effective on August 1, 1987, with the exception of the emission limits for CP&L plants Asheville, Lee, Sutton and Weatherspoon, and with the exception of the average annual opacity limits applicable to all plants. EPA proposes to disapprove the annual opacity limits for all seven Duke plants and CP&L plants Roxboro and Cape Fear. The emission and opacity limits for CP&L plants Asheville, Lee, Sutton and Weatherspoon are being acted upon in another notice.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, the Administrator must assess the economic impact of proposed rules on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.) Disapproval of the opacity regulations will not have a significant impact on a substantial number of small entities since it will simply maintain the status quo.

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review.

## FEDERAL COMMUNICATIONS COMMISSION

### 47 CFR Part 90

[Gen. Docket No. 87–112; FCC 87–132]

### Development and Implementation of a Public Safety National Plan and Amendment of Part 90 to Establish Service Rules and Technical Standards for Use of the 821–824/866–869 MHz Bands by the Public Safety Services

**AGENCY:** Federal Communications Commission.

**ACTION:** Proposed rule.

**SUMMARY:** This action proposes policies and rules which will form a plan to accommodate the communication requirements of State and local public safety authorities. In particular, we are proposing service rules and standards for the 821–824/866–869 MHz bands that will provide the principal spectrum resource for public safety. This action is necessary to comply with a directive from the United States Congress to establish a plan which adequately ensures that the needs of these authorities would be taken into account in making allocations of the electromagnetic spectrum.

**DATES:** Comments are due July 6, 1987; reply comments are due July 21, 1987.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Fred Thomas, telephone (202) 653–8112; Joe Levin, telephone (202) 632–3906.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Notice of Proposed Rule Making in General Docket 87–112, FCC 87–132, adopted April 16, 1987, and released May 15, 1987.

The full text of this Commission decision is available for inspection and copying during the normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

### Summary of the Notice of Proposed Rule Making

1. In this rule making, the Commission proposes policies and rules designed to accommodate present and future mobile communication requirements of state and local public safety authorities. This is in response to a Congressional directive to the Commisson, through the *Federal Communications Commission Authorization Act of 1983*, to develop a plan to ensure that the present and future electromagnetic spectrum requirements of State and local public safety authorities are considered in allocation of the spectrum.

2. In particular, the Commission proposes service rules and technical standards for the 821–824/866–869 MHz bands, which will provide the principal spectrum resource for the National Plan for public safety. In these bands, the Commission proposes a 12.5 kHz channeling plan and that a number of channels be set aside nationwide to provide for coordination and intercommunications among public safety agencies. Except for the channeling plan and intercommunication channels, the Commission proposes to use the same regulatory structure currently employed for the 806–821/851–866 MHz public safety channels for these bands. Standards for emission and bandwidth limitations would conform to the

proposed 12.5 kHz channeling plan. The loading standards and processing procedures that apply to existing 800 MHz public safety channels would also apply on these new channels. The Commission also proposes that APCO be designated as the coordinator for these new frequencies.

3. The Commission stated that in developing the National Plan, it expects to rely heavily upon the information that will be provided by the National Public Safety Planning Advisory Committee (NPSPAC). NPSPAC is a technical advisory committee established by the Commission in December 1986, to assist the Commission in developing the National Plan. This Committee has already met three times and submitted its *Initial Report* to the Commission. The Commission has attached the *Initial Report* as Appendix B to the *Notice* and is requesting comments on it and on any other issues regarding the National Plan.

4. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's Rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

5. This proceeding suggests a proposal which may significantly impact on small entities. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, public comment is requested on the initial regulatory flexibility analysis set out in the Commission's complete decision.

6. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose a new or modified information collection requirement on the public. Implementation of any new or modified requirements will be subject to approval by the Office of Management and Budget as prescribed by the Act.

7. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before July 6, 1987, and reply comments on or before July 21, 1987. All relevant and timely comments will be considered by the Commission before final action is taken in the proceeding.

**Ordering Clause**

8. This action is taken pursuant to 47 U.S.C. 154(i), 303(c), 303(f), 303(g), 303(r) and 332.

Federal Communications Commission.

William J. Tricarico,

*Secretary.*

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Food and Nutrition Service

### Commodity Supplemental Food Program; Elderly Poverty Income Guidelines

**AGENCY:** Food and Nutrition Service, USDA.

**ACTION:** Notice.

**SUMMARY:** The Department announces adjusted poverty income guidelines to be used by State agencies in determining the income eligibility of elderly persons applying to participate in the Commodity Supplemental Food Program (CSFP). These poverty income guidelines are to be used in conjunction with the CSFP Regulations, 7 CFR Part 247.

**EFFECTIVE DATE:** July 1, 1987.

**FOR FURTHER INFORMATION CONTACT:** Barbara Hallman, Branch Chief, Policy and Program Development Branch, Supplemental Food Programs Division, FNS, USDA, Park Office Center, Alexandria, Virginia 22302, (703) 756–3730.

**SUPPLEMENTARY INFORMATION:** This final action has been reviewed under Executive Order 12291 and has been determined to be *not major*. The Department does not anticipate that this notice will have an annual effect on the economy of $100 million or more. This action will not result in a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. Nor will this action have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The action has been reviewed in accordance with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 through 612). Pursuant to that review, the Administrator of the Food and Nutrition Service has determined that the action will not have a significant economic impact on a substantial number of small entities. This notice does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

This program is listed in the Catalog of Federal Domestic Assistance Programs under No. 10.565 and is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials (7 CFR Part 3015, Subpart V, 48 FR 29112).

On December 23, 1985 the President signed the Food Security Act of 1985 (Pub. L. 99–198). This legislation amends section 5 of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c *note*) to require that the Department establish procedures allowing agencies administering the CSFP to serve elderly persons if such service can be provided without reducing service levels for women, infants, and children. The law also mandated establishment of eligibility requirements for elderly participation. Prior to enactment of Pub. L. 99–198, elderly participation was restricted by law to three designated pilot projects which served the elderly in accordance with agreements with the Department.

In order to implement the CSFP mandates of Pub. L. 99–198, the Department published interim rules on September 17, 1986 at 51 FR 32895. These regulations defined "elderly persons" as those who are 60 years of age or older. The rule further stipulated that elderly persons certified on or after the date of publication must have "household income at or below 130 percent of the Federal Poverty Income Guidelines published annually by the Department of Health and Human Services." 7 CFR 247.7(a)(3).

These poverty income guidelines (PIG) are revised annually to reflect changes in the Consumer Price Index. The revision for 1987 was published by the Department of Health and Human Services at 52 FR 5340 on February 20, 1987. At this time the Department is publishing the income limit of 130 percent of the PIG by household size to be used for elderly certification in the CSFP for the period July 1, 1987 through June 30, 1988.

The PIG were multiplied by 1.30 and the results rounded up to the next whole dollar. The first table in this notice contains the income limits by household size for the 48 contiguous States, the District of Columbia, and all the territories, including Guam. Because the poverty income guidelines for Alaska and Hawaii are higher than for the 48 contiguous States, separate tables for Alaska and Hawaii have been included for the convenience of the State agencies.

EFFECTIVE JULY 1, 1987—JUNE 30, 1988

| Family size | Annual FNS poverty income guidelines for elderly in CSFP (130 percent of PIG) |
|---|---|
| 48 States, District of Columbia, Puerto Rico, Virgin Islands, and Territories, including Guam: | |
| 1 | 7,150 |
| 2 | 9,620 |
| 3 | 12,090 |
| 4 | 14,560 |
| 5 | 17,030 |
| 6 | 19,500 |
| 7 | 21,970 |
| 8 | 24,440 |
| For each additional family member add: | 2,470 |
| Alaska: | |
| 1 | 8,918 |
| 2 | 12,012 |
| 3 | 15,106 |
| 4 | 18,200 |
| 5 | 21,294 |
| 6 | 24,388 |
| 7 | 27,482 |
| 8 | 30,576 |
| For each additional family member add: | 3,094 |
| Hawaii: | |
| 1 | 8,203 |
| 2 | 11,050 |
| 3 | 13,897 |
| 4 | 16,744 |
| 5 | 19,591 |
| 6 | 22,438 |
| 7 | 25,285 |
| 8 | 28,132 |
| For each additional family member add: | 2,847 |

**Authority:** Sec. 1562, Pub. L. 99–198, 99 Stat. 1590 (7 U.S.C. 612c *note*).

**Dated:** May 19, 1987.

**S. Anna Kondratas,**

*Acting Administrator, Food and Nutrition Service.*

## DEPARTMENT OF COMMERCE

### Foreign-Trade Zones Board

[Docket No. 4-87]

### Proposed Foreign-Trade Zone, Knoxville, TN; Port of Entry Area; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Industrial Development Board of Blount County, Tennessee, a Tennessee public corporation, requesting authority to establish a general-purpose foreign-trade zone at sites in Knox, Blount and Anderson Counties, Tennessee, adjacent to the Knoxville Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 12, 1987. The applicant is authorized to make this proposal under Chapter 41 of the Public Acts of the State of Tennessee 1981.

The proposed foreign-trade zone would cover 14.3 acres on three sites. Site 1 is a 120,000 square foot warehouse within the Bill Mullins Warehouse Park on Prosser Road, Knoxville, Knox County. Valley Storage, Inc., the park operator, will operate the zone. Site 2 comprises 5.1 acres within the Blount County Industrial Park on State Route 321, 1 mile west of Route 129 in Blount County, 5 miles south of McGhee Tyson Airport. The park is owned by the applicant. Site 3 comprises 6.5 acres within the Valley Industrial Park, State Route 62 and Union Valley Road, Oak Ridge, Anderson County. The park is owned by the City of Oak Ridge.

The application contains evidence of the need for zone services in the Knoxville port of entry area. Several firms have indicated an interest in using zone procedures for the storage/distribution of products such as automotive components, industrial tools and machinery, electronic items, and apparel. No requests for manufacturing approval are being sought at this time. Such requests will be made to the Board on a case by case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr., (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Joel R. Mish, District Director, U.S. Customs Service, South Central Region, 423 Canal Street, New Orleans, LA 70130; and Colonel Edward A. Starbird, District Engineer, U.S. Army Engineer District Nashville, P.O. Box 1070, Nashville, TN 37202.

As part of its investigation, the examiners committee will hold a public hearing on June 26, 1987, beginning at 9:00 a.m., in the Small Assembly Room of the City-County Building, 400 Main Street, Knoxville, TN 37902.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by June 19, 1987. Instead of a oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through August 10, 1987.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

Knoxville Chamber of Commerce, Reference Library, 301 Church Avenue, Knoxville, TN 37901

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1529, Washington, DC 20230

Dated: May 18, 1987.

Dennis Puccinelli,

*Acting Executive Secretary.*

BILLING CODE 3510-DS-M

## International Trade Administration

[C-301-001]

### Leather Wearing Apparel From Colombia; Preliminary Results of Countervailing Duty Administrative Review

**AGENCY:** International Trade Administration, Import Administration, Commerce.

**ACTION:** Notice of preliminary results of countervailing duty administrative review.

**SUMMARY:** The Department of Commerce has conducted an administrative review of the agreement suspending the countervailing duty investigation on leather wearing apparel from Colombia. The review covers the period July 1, 1984 through December 31, 1985 and ten programs.

As a result of the review, the Department has preliminarily determined that Confecciones Amazonas Orinoco, the signatory to the suspension agreement that was in effect during the review period, did not account for over 85 percent of Colombian leather wearing apparel exports to the United States because it had gone out of business and did not export. Therefore, because Confecciones Amazonas Orinoco did not export, it did not make use of any programs on exports to the United States during the review period. We entered into a revised suspension agreement with Astrakan Ltda., which did account for over 85 percent of Colombian exports of leather wearing apparel to the United States during the review period. The revised agreement became effective December 8, 1986. The agreement includes any programs that were used by Colombian leather wearing apparel exporters, but were not part of the original agreement, and any programs that we consider countervailable or potentially countervailable. We invite interested parties to comment on these preliminary results.

**EFFECTIVE DATE:** May 22, 1987.

**FOR FURTHER INFORMATION CONTACT:** Susan Silver or Paul McGarr, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

**SUPPLEMENTARY INFORMATION:**

#### Background

On December 8, 1986, the Department of Commerce ("the Department") published in the Federal Register (51 FR 44099) the final results of its last administrative review of the agreement suspending the countervailing duty investigation on leather wearing apparel from Colombia (46 FR 19663, April 2, 1981). In that review, we found that Confecciones Amazonas Orinoco ("CAO"), the original signatory to the agreement had gone out of business and, thus, no longer accounted for 85 percent of Colombian leather wearing apparel exports to the United States. We entered into a revised agreement with Astrakan Ltda., which now accounts for over 85 percent of Colombian leather wearing apparel exports to the United States. In the revised suspension agreement, we included any programs that were used by Colombian leather wearing apparel exporters, but were not part of the original agreement, and any programs that we consider countervailable or potentially countervailable. The agreement includes programs found countervailable in the suspended countervailing duty investigation on certain textile mill products and apparel from Colombia (50 FR 9663, March 12,

1985) ("the textiles suspension of investigation").

Specifically, the agreement requires Astrakan not to apply for or receive any short-term or long-term export financing at preferential rates from the Export Promotion Agency ("PROEXPO"), an agency of the Colombian government. This includes loans received under Resolutions 59 and 19. For any such loans that are outstanding, Astrakan is required to repay them immediately or renegotiate the loans at interest rates at or above the most recent short-term benchmark interest rate determined by the Department. Astrakan is also required to renounce import duty and tax exemptions under the Plan Vallejo, benefits provided to Free Industrial Zones, and export credit insurance. Although Decree 1459 eliminated the Special Systems of Commercial Exchange effective May 8, 1986, Astrakan is required to notify the Department prior to applying for approval for any future countertrade transactions.

In addition, the Colombian Department of Commerce, the Central Bank, PROEXPO, and any other administering authority voluntarily agree to ensure that remuneration of benefits by Astrakan is effectively implemented and monitored.

On September 27, 1985 and April 30, 1986, we received requests in accordance with § 355.10 of the Commerce Regulations for an administrative review of the suspension agreement from a domestic interested party, the Amalgamated Clothing and Textile Workers Union. We published the initiation of review on May 20, 1986 (51 FR 18575). The Department has now conducted that review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

## Scope of Review

Imports covered by the review are shipments of Colombian men's, boys', women's, girls, and infants' leather coats and jackets, and other leather wearing apparel (such as vests, pants and shorts), as well as parts and pieces thereof. Such merchandise is currently classifiable under items 791.7630, 791.7640 and 791.7660 of the Tariff Schedules of the United States Annotated. The review covers the period July 1, 1984 through December 31, 1985, a period prior to the effective date of the revised agreement, and ten programs.

## Analysis of Programs

During the current administrative review, we found that CAO did not export leather wearing apparel to the United States.

PROEXPO certified on March 10, 1986, that CAO had not exported to the United States since October 1, 1984. We found, by reviewing the export licenses granted to leather wearing apparel exporters in the questionnaire response, that CAO had not exported since July 1, 1984. Since CAO did not export, it could not make use of any programs on exports of leather wearing apparel to the United States.

*(1) CERT*

On April 1, 1984, the Columbian government established in Law 48/83 the Tax Rebate Certificate ("CERT"). The CERT is intended to rebate all or part of the indirect taxes paid by exporters. The CERT is freely negotiable on the stock market and can be used for paying a variety of taxes.

The Banco de la Republica, Columbia's central bank, certified to the Department on March 5, 1986 and March 10, 1986 that it had not provided CERT payments to CAO on shipments to the United States and Puerto Rico for the period of review. Although CERT payments were provided to other Colombian exporters, they were not parties to the original agreement that was in effect during the review period. This program is included in the revised agreement. In addition, the Banco de la Republica certified, effective March 1, 1986, that it would begin withholding CERT payments to Astrakan and other Colombian leather wearing apparel exporters on exports of leather wearing apparel to the United States.

*(2) Resolution 59*

Resolution 59, which has was passed by the Monetary Board of Colombia on August 30, 1972, and administered by PROEXPO, provides working capital financing at preferential rates to all firms (except producers of coffee, petroleum and petroleum by-products) that manufacture, store, or sell products destined for export. The loans are for 180 days and interest is paid quarterly, in advance. In February 1986, the maximum annual interest rate was 22 percent. CAO paid off its loans under this program prior to going out of business (a period prior to the period of review). Other Colombian exporters of leather wearing apparel received working capital loans under Resolution 59 during the period of review. In our final results of administrative review (51 FR 44990, December 8, 1986), we found that the most recent short-term benchmark interest rate was 28.99 percent. On this basis, we preliminarily determine the current interest rate differential to be 6.99 percent. Since we found this program countervailable in the textiles suspension of investigation, we have included it in the revised suspension agreement, which requires Astrakan, the signatory to the revised agreement, not to apply for or receive Resolution 59 loans at preferential rates.

*(3) Resolution 19*

Resolution 19, which was adopted by PROEXPO on November 15, 1984, provides short-term financing at preferential rates to exporters who participate in trade fairs. Resolution 19 loans are for periods up to one year with interest paid quarterly, in advance. In February 1986, the maximum annual interest rate was 18 percent. Colombian exporters of leather wearing apparel received short-term financing under Resolution 19 during the period of review.

The short-term benchmark interest rate (28.99 percent) is the same as for Resolution 59 loans. On this basis, were preliminarily determine the current interest rate differential to be 6.99 percent. Since we consider this program to be potentially countervailable, we have included it in the revised agreement, which requires Astrakan not to apply for or receive Resolution 19 loans at preferential rates.

*(4) Special Systems of Commercial Exchange ("Countertrade") under Decrees 370 and 3707*

Decrees 370 of 1984 and 3707 of 1985 encouraged and regulated countertrade transactions involving private-sector firms. Exporters of certain products received tax credit certificates in exchange for the foreign currency earned on exports. These certificates were used to pay income and sales taxes on customs duties and could be freely negotiated on the stock exchange. CAO did not participate in this program during the period of review. Astrakan and another leather wearing apparel exporter participated in countertrade transactions during the period of review.

On May 8, 1986, the Colombian Government's Decree 1459 eliminated the Special Systems of Commercial Exchange under Decrees 370 and 3707. Since we consider such a program to be potentially countervailable, we have included in the revised suspension agreement a requirement that Astrakan notify the Department prior to applying for approval for any future countertrade transactions.

*(5) Other Programs*

We examined the following programs and preliminarily determine that

exporters of leather wearing apparel did not use them during the period of review:

(A) Resolution 22 loans;
(B) Resolution 42 loans;
(C) Decree 2366 loans;
(D) Duty and tax exemptions under the Plan Vallejo;
(E) Benefits to Free Industrial Zones; and
(F) Export Credit Insurance.

**Preliminary Results of Review**

As a result of our review, we preliminarily determine that CAO did not account for 85 percent of Colombian leather wearing apparel exports to the United States during the review period because it had gone out of business and did not export. We also preliminarily determine that Astrakan accounted for over 85 percent of Colombian leather wearing apparel exports to the United States during the review period. On December 8, 1986, in conjunction with our last administrative review, we revised the suspension agreement to substitute Astrakan for CAO.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 30 days after the date of publication or the first workday following. Any request for an administrative protective order must be made not later than 5 days after the date of publication. The Department wil publish the final results of this administrative review, including the results of its analysis of any issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.10 of the Commerce Regulations (19 CFR 355.10).

Dated: May 19, 1987.

Gilbert B. Kaplan,

*Deputy Assistant Secretary, Import Administration.*

## Urea From the German Democratic Republic, Final Determination of Sales at Less Than Fair Value

**AGENCY:** Import Administration, International Trade Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We have determined that urea from the German Democratic Republic (GDR) is being, or is likely to be, sold in the United States (U.S.) at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and we have directed the U.S. Customs Service to continue to suspend the liquidation of all entries of the subject merchandise as described in the "Continuation of Suspension of Liquidation" section of this notice.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; Telephone: (202) 377-1769.

**SUPPLEMENTARY INFORMATION:**

### Final Determination

We have determined that urea from the GDR is being sold in the U.S. at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The weighted-average margin of sales at less than fair value is 44.80 percent.

### Case History

On December 23, 1986, we preliminarily determined that urea is being sold at less than fair value (52 FR 121, January 2, 1987). A case history is included in the notice of preliminary determination. On February 12, 1987, we postponed the final determination until not later than May 18, 1987, at the request of the respondent (52 FR 5322, February 20, 1987). On April 29, 1987, we held a hearing to address the issues arising in this investigation.

### Scope of Investigation

The merchandise covered by this investigation is solid urea as currently provided for in item 480.30 of the *Tariff Schedules of the United States.*

### Fair Value Comparisons

To determine whether sales in the U.S. of the subject merchandise were made at less than fair value, we compared the United States price with the foreign market value. Because Chemie accounted for all exports of this merchandise to the United States, we limited our investigation to that firm. We investigated all sales of urea for the period January 1, 1986, through June 30, 1986.

### United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for sales by Chemie because the merchandise was sold to unrelated purchasers prior to its importation into the U.S.

We calculated the purchase price based on the f.o.b. price to unrelated purchasers. We made deductions for inland freight, port handling and port loading charges.

In accordance with the policy set forth in our final determination in the investigation of *Carbon Steel Wire Rod from Poland* (49 FR 29434, July 20, 1984), we based the port handling deductions upon costs in a non-state-controlled-economy country, the Federal Republic of Germany (FRG), for the reasons stated in the "Foreign Market Value" section.

### Foreign Market Value

Petitioner alleged that the GDR is a state-controlled-economy country and that sales of the subject merchandise in that country do not permit a determination of foreign market value (FMV) under section 773(a) of the Act. Our analysis of issues relating to the GDR's characterization as a state-controlled-economy country and our selection of a surrogate country are discussed in the notice of preliminary determination. As a result, we determined that section 773(c) of the Act applies to this investigation.

We sent questionnaires requesting assistance from producers in all chosen surrogates, the FRG, the most appropriate surrogate, and the Belgium, the Netherlands, France and Italy as alternate surrogates. However, we were unable to obtain costs or prices from producers in any of the surrogate countries.

Therefore, we calculated constructed value based on the factors of production reported by Chemie or, where the response was not sufficient, or not adequately verified, we used information provided by petitioner or otherwise available to the Department. We valued labor in the FRG from public sources. Where either the response did not report factors, or where FRG values were not available from public sources, we used factors and cost data from the petition relative to the production in the GDR.

Certain factors could not be quantified and other factors could not be appropriately valued with prices from the FRG. In these cases, the Department sought the most reliable objective information contained in the record of investigation. Therefore, for certain data the Department relied upon supplemental reports provided by the

petitioner. This included the *Fertilizer Manual* which was published prior to the Department's investigation by the International Fertilizer Development Center of the United Nations' International Development Organization, *Energy Prices and Taxes*, Fourth Quarter 1986.

To value natural gas, we used a tariff set by Gasunie N.V., the Gas Board in the Netherlands. The catagory F of the tariff, the so-called "F" price, is an established gas price which is available to large industrial users in the European Communities (EC). All major fertilizer producers in the EC qualify for the F price because of their high gas usage. The F price is a maximum price established for each quarterly period. Since the F price declined during the period of investigation, we calculated the difference in F price in two succeeding quarters and allocated that difference over the intervening months in order to derive monthly gas prices which we then weight-averaged. We used this monthly weight average F price in order to most closely approximate the price actually paid for gas by market economy countries during the time period when production of the urea subject to our investigation would have occurred. Therefore, we believe that the F price represents the most accurate, verifiable gas price for the Fertilizer sector in the FRG.

The labor rates were obtained in the FRG from public sources. Although some individual items included as factory overhead were verified, others could not be sufficiently quantified or valued. Therefore, for factory overhead the Department developed a ratio of the factory overhead costs to the gas costs from the petition. The Department reviewed the petition, and determined that such costs were representative of average costs for developed countries. However, the individual components of the factory overhead costs were based on a utilization of plant capacity which was less than the utilization of capacity determined to exists in the GDR. Therefore, the Department made appropriate adjustments to account for the higher capacity utilization rate in the GDR.

Because of the unavailability of industry data in the FRG, we used the statutory minimum of 10 percent of the sum of material and production costs for general expenses and the statutory minimum of eight percent for profit.

We made currency conversions in accordance with 19 CFR 353.56(a)(1) using certified exchange rates as furnished by the Federal Reserve Bank of New York.

**Negative Determination of Critical Circumstances**

The petitioner alleges that "critical circumstances" exist within the meaning of section 735(a)(3) of the Act with respect to imports of urea from the GDR. In determining whether critical circumstances exists, we must examine whether:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of investigation at less than fair value; or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than fair value; and

(B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

To determine whether imports have been massive over a relatively short period, we analyzed recent Department of Commerce IM 146 trade statistics on imports of this merchandise for equal periods immediately preceding and following the filing of the petition, from March through December 1986. While there was an increase in imports over previous years during 1986, the average monthly imports in the period immediately following the filing of the petition were lower than those in the period immediately preceding the filing. Based on this analysis combined with a consideration of seasonal trends, we find that imports of the subject merchandise have not been massive over a short period.

Since we do not find that there have been massive imports, we do not need to consider whether there is a history of dumping or whether importers of this product knew or should have known that it was being sold at less than fair value.

Therefore, we determine that critical circumstances do not exist with respect to imports of urea from the GDR.

**Verification**

In accordance with section 776(a) of the Act, we verified the information submitted in the response by using standard verification procedures, including on-site examination of records and selection of original source documentation containing relevant information.

**Comment Section**

*Petitioner's Comments*

*Comment #1:* Petitioner argues that the Department has correctly chosen the FRG as a surrogate country and must proceed to use publicly available data from the FRG in determining foreign market value for purposes of this determination.

*DOC response:* We agree. To the extent possible, the Department used the most reliable and specific information for the FRG, the surrogate country selected, according to our methodology.

*Comment #2:* Petitioner argues that in the absence of verified data from a surrogate producer in a country at a comparable level of economic development, the Department must determine foreign market value by using factors of production valued in the FRG from reliable, publicly published data providing evidence of costs in the FRG rather than rely on average import prices as suggested by respondents. Petitioner contends that the volume of urea exported from the USSR, the GDR and Romania has depressed prices from all sources. Petitioner states that since urea is a fungible commodity, prices from all sources move together

*DOC response:* We agree that it would not be appropriate to base foreign market value on import prices. We reached this conclusion based on a variety of factors suggesting that the pricing of urea internationally was influenced by imports from the countries under investigation.

Urea is a fungible commodity traded throughout the world. As a result, the level of market share of a specific group of importers tends to affect sales elsewhere.

Non-market-economy producers, and in particular those subject to our investigations, have become major participants in world urea trade. There is evidence that these producers' ability to separate pricing/supply decisions from market demand conditions has significantly contributed to the distortion of urea prices worldwide. As a result, we concluded that determining foreign market value on the basis of prices in any market would be inappropriate.

Moreover, even if we had attempted to use U.S. import prices, we would have had difficulty isolating a sufficiently large basket of prices during the period of investigation to provide a reliable basis for comparison. Besides eliminating the three countries under investigation, we also would have had to disregard nearly all of the remaining foreign suppliers on the grounds of minimal exports, that they were subject to foreign antidumping investigations on urea, or that their governments were known to provide export subsidies. In

addition, it would have been impossible to identify sales of solid urea within the basket of urea imports reported in the statistics in order to make the appropriate adjustments.

*Comment #3:* Petitioner argues that the Department should not assume that the 10 percent statutory minimum for the general selling and administrative (GS&A) expenses is appropriate, but should quantify each individual cost item and value each appropriately. For example, petitioner claims that rents, taxes and insurance, since they are incurred by non-state-controlled-economy companies, should be included and valued. Additionally, it contends that the costs of selling expenses incurred by the GDR trading company, such as selling salaries, brochures and catalogues, should be valued using FRG prices. Further, petitioner contends that interest expense should be calculated on the basis of interest rates in the FRG applied to the total value of the GDR facilities, which were allegedly supplied and financed by western companies through a mix of foreign debt and/or counter trade buy-back arrangements.

*DOC response:* We agree that no assumptions should be made with regard to the extent of GS&A involved in production and distribution of urea. Section 353.8(c) of our regulations directs us to add "an amount of general expenses and profit as required by section 773(e)(1)(B) of the Act" to the values obtained on the basis of the GDR factors of production and valued in an appropriate surrogate country. Section 773(e)(1)(B) of the Act in turn requires us to determine GS&A expenses in the amount "equal to that usually reflected in sales of merchandise . . . in the country of exportation" 19 U.S.C. S1677b(e)(1)(B). The country of exportation in this case is determined to be state-controlled to an extent that the normal costs, expenses, and profits (including GS&A expenses for purposes of constructed value calculations) cannot be determined in that country. At the same time, our regulations do not include GS&A expenses in the category of "sepcific objective components or factors" to be obtained from the state controlled-economy country under investigation and valued in a surrogate country. Therefore, we must determine the amount of GS&A expenses as they are reflected in sales of merchandise of the same class or kind in the surrogate country without reference to specific factors or components of the GS&A expenses in the GDR. The method of financing of the GDR facilities involved in production of the subject merchandise, therefore, cannot be relied upon for purposes of our calculations, and the amount of usual general expenses involved in production and distribution of urea must be determined on the basis of normal costs and expenses in the FRG. We do not have any indication that GS&A expenses involved in production and distribution of urea in the FRG are above the statutory minimum of 10 percent. Therefore, we applied this statutory minimum in our calculations according to section 773(e)(1)(B) of the Act.

*Comment #4:* Petitioner states that the Department should adjust its calculation of the cost of natural gas by using published data for the first two quarters of 1986 which represent the price to industrial users in the FRG during the period of investigation.

*DOC response:* For our determination of foreign market value, we used updated prices for gas. In fact, we used 1986 gas prices which included the third quarter of 1986 to allow for the production of urea sold during the period of investigation which was produced and exported through the third quarter.

*Comment #5:* Petitioner argues that water usage was not accounted for in the Department's preliminary determination calculation. Petitioner contends that water used free of charge in the CDR must be valued on the basis of utility rates in the FRG.

*DOC response:* Water was not valued in the preliminary determination because it was considered to be recycled. However, for the final determination water was included in factory overhead under the methodology as explained in the "Foreign Market Value" section.

*Comment #6:* Petitioner argues that chemicals, catalysts, steam indirect materials used in the production of urea must be valued in the FRG.

*DOC response:* Values for these items in the FRG were not readily available. These factors are individual costs included in factory overhead. Therefore, they were accounted for and valued as described in the "Foreign Market Value" section.

*Comment #7:* Petitioner contends that the cost of labor was significantly undervalued in our preliminary calculations because (1) only direct labor usage was considered and (2) the 1981 FRG labor cost obtained from publishing sources were not indexed to account for inflation.

*DOC response:* For labor costs, we used only direct labor hours. Costs per hour were obtained from the "Hourly Compensation Costs for Production Workers in U.S. Dollars" (U.S. Bureau of Labor Statistics, February, 1987). The data for West Germany is from 1986. The cost information is included in petitioner's pre-hearing brief. Only direct labor usage was considered as a labor cost, since other types of labor usage are considered indirect expenses and are included in other cost components of factory overhead. See the "Foreign Market Value" section.

*Comment #8:* Petitioner argues that the depreciation of GDR plant and equipment should be based on the costs of plant and equipment purchased from market economy companies or on the costs incurred by comparable facilities in other countries which were built at the same time as the GDR facility.

*DOC response:* The estimated costs presented by the petitioner could not be used for depreciation. Depreciation was considered to be part of factory overhead and included as described in the "Foreign Market Value" section.

*Comment #9:* Petitioner argues that depreciation should be included in factory costs rather than in general expenses.

*DOC response:* We agree. The Department relied on the petition for its preliminary determination. For the final determination it has reclassified this amount as factory overhead.

*Comment #10:* Petitioner contends that the credit for sales of carbon dioxide in the final determination should be based on GDR actual quantities which were sold to unrelated parties.

*DOC response:* We disagree. Transfers to other plants can be a reduction of cost of production, therefore a credit was allowed for carbon dioxide and other by-products transferred to other plants within the Piesteritz plant complex.

*Comment #11:* Petitioner argues that interest expenses incurred relative to Chemie's sales to the U.S should be deducted from United States price.

*DOC response:* We disagree. In this investigation the Department has valued factors of production in a comparable surrogate country using the best information available. The specificity of the data obtained for valuing the factors is not sufficient for us to identify the directly related selling expense adjustments which would have to be made to foreign market value for both U.S. price and constructed value. Absent specific information that the respondent incurs extraordinary directly related selling expenses for its U.S. sales, the Department assumed, as best information available, that ordinary and similar selling expenses occur in both markets and, as such, they offset one another.

BEST COPY AVAILABLE

*Comment #12:* Petitioner argues that the Department erred in finding that critical circumstances do not exist for purposes of the preliminary determination. Petitioner claims that the decision concerning massive imports did not include analysis of the seasonal nature of urea sales.

*DOC Response:* For a discussion of this subject, refer to the "Negative Determination of Critical Circumstances" section of this notice.

*Comment #13:* Petitioner argues that the deductions from United States price for inland freight, brokerage and loading charges should be based on the cost of comparable elements in the FRG.

*DOC response:* We have made such deductions as described in the "United States Price" section.

*Respondent's Comments*

*Comment #1:* Respondent claims that the Department erred in differentiating between the GDR and the other countries subject to investigation, the USSR and Romania, for purposes of selecting a surrogate. Respondent claims that the Department drew an artificial distinction between the captive gas supplies in the various countries. This claim is based on the fact that the GRD and USSR are participating in a joint venture which guarantees a gas supply for the GDR in exchange for labor, captial and equipment necessary to develop Russian gas fields and construct pipelines. Respondent argues that, based on natural gas supplies and income comparability, appropriate surrogates are Saudi Arabia, Qatar, Kuwait, Trinidad and Tobago, Venezuela, Mexico, Malaysia, Indonesia, the United Arab Emirates and Egypt. Respondent claims that the melding of raw material supplies and income comparability is especially proper in a situation such as this involving a capital intensive industry. Respondent also relies on the size of the agricultural sectors of these nations which create a home market demand for urea. Respondent states that, although there are more appropriate surrogates than the UK, given the surrogates chosen by the Department, the most appropriate of these is the UK.

*DOC response:* We disagree. No matter how certain the contractual terms may appear, we believe there remains a substantive distinction between a country which has a contractual arrangement to obtain gas and one which has its own captive gas supplies. Our selection of the FRG as a surrogate for the GDR was based on the close comparability of their economic and demographic statistics as well as on the fact that neither country is a major natural gas producer. Moreover, in light of the methodology we ultimately deemed most appropriate to determine foreign market value, respondent's concerns should have been addressed. The method we selected for valuing natural gas applies equally to the UK and FRG contexts, whereas, those FRG values which were used in this case for other factors related more directly to the macroeconomic criteria we considered in selecting a surrogate.

*Comment #2:* Respondent argues that the Department has a strong preference for using prices rather than costs as the basis for determining foreign market value. Repondent argues that the average U.S. import price of urea from other sources is the appropriate basis for foreign market value. Respondent claims that this information is the most current verifiable data available and is supported by the preference for prices. If prices from all sources are not used, respondent states that import prices from the selected surrogates should be used.

*DOC response:* We disagree. Refer to our response to petitioner's comment #2.

*Comment #3:* Respondent contends that for purposes of the preliminary determination the Department understated United States price by deducting documentation and plant loading expenses which are improper and by overstating deductions for inland freight and handling expenses.

*DOC response:* Respondent's claim that a deduction for loading charges is improper is based on the fact that loading charges are included in the cost of producing urea, a fact that was discovered at verification. The Department would normally adjust the foreign market value by deducting the charges from the costs so that the foreign market value and the United States price would be at a comparable level. In this instance, we cannot separate loading costs from the other costs of manufacture. Therefore, we have left these costs in the foreign market value and have made no deduction from the U.S. price for plant loading charges so that they are still at the same level of comparison.

We have made no separate deduction for documentation charges since the port loading charges used for this determination include all documentation expenses. Concerning inland freight, we used an FRG rail tariff for the determination, rather than the United Kingdom tariff used in the preliminary determination.

*Comment #4:* Respondent claims that the Department overstated foreign market value in the preliminary determination due to the over valuation of the main component of urea, natural gas, as well as electricity and labor. In addition, respondent claims that the failure to give a credit for by-products resulted in a portion of the overstatement of foreign market value.

*DOC response:* For this determination we adjusted the methodology used in the preliminary with respect to these factors. For a discussion of gas costs, refer to the "Foreign Market Value" section. Concerning labor rates, refer to the "DOC Response" to petitioner's comment #7. Electricity was included in factory overhead, also discussed in the "Foreign Market Value" section.

*Comment #5:* Respondent argues that credit for the by-products of carbon dioxide, electricity, steam and condensate transferred to plants other than ammonia and urea should be allowed at their commercial value.

*DOC response:* We agree that a credit should be allowed for transfers of by-products to other plants. The transfer value to the other plants should be at cost. Therefore, for the final determination, we have used the commercial value less the eight percent statutory minimum for profit.

*Comment #6:* Respondent argues that the petitioner double counted fringe benefits by including them in direct labor cost and overhead computed at 100 percent of direct labor cost. Respondent further states that the Department should reduce the final overhead accordingly.

*DOC Response:* The elements in the overhead and included in the petition and *The Fertilizer Manual* could not be fully ascertained. Therefore, the overhead category in question was included in the 10 percent for general expenses. See Foreign Market Value section.

**Continuation of Suspension of Liquidation**

We are directing the United States Customs Service to continue to suspend liquidation, in accordance with section 733(d) of the Act, of all entries of urea from the GDR that are entered or withdrawn from warehouse, for consumption, on or after January 2, 1987. The Customs Service shall continue to require a cash deposit or the posting of a bond equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeded the United States price, which, on or after the date of publication of this notice in the Federal Register, was 44.80 percent. This suspension of liquidation will remain in effect until further notice.

BEST COPY AVAILABLE

**ITC Notification**

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. The ITC will determine whether these imports are causing material injury, or threaten material injury, to a U.S. industry within 45 days of the publication of this notice.

If the ITC determines that material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, we will issue an antidumping duty order, directing Customs Officers to assess an antidumping duty on urea from the GDR entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value of the merchandise exceeds the U.S. price

This determination is being published pursuant to secton 735(d) of the Act (19 U.S.C. 1673d(d)).

## Urea From the Socialist Republic of Romania; Final Determination of Sales at Less Than Fair Value

**AGENCY:** Import Administration, International Trade Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We have determined that urea from the Socialist Republic of Romania (Romania) is being, or is likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend the liquidation of all entries of the subject merchandise as described in the "Continuation of Suspension of Liquidation" section of this notice.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; Telephone: (202) 377-1769.

**SUPPLEMENTARY INFORMATION:**

**Final Determination**

We have determined that urea from Romania is being sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The weighted-average margin of sales at less than fair value is 90.71 percent.

**Case History**

On December 23, 1986, we preliminarily determined that urea is being sold at less than fair value (52 FR 122, January 2, 1987). A case history is included in the notice of preliminary determination. On February 12, 1987, we postponed the final determination until not later than May 18, 1987, at the request of the respondent (52 FR 5323, February 20, 1987). On May 1, 1987, we held a hearing to address the issues arising in this investigation.

**Scope of Investigation**

The merchandise covered by this investigation is solid urea as currently provided for in item 480.30 of the *Tariff Schedules of the United States.*

**Fair Value Comparisons**

To determine whether sales in the United States of the subject merchandise were made at less than fair value, we compared the United States price with the foreign market value.

Because I.C.E. Chemica (Chimica) accounted for all exports of this merchandise to the United States, we limited our investigation to that firm. We investigated all sales of urea for the period July 1, 1985, through December 31, 1985, because there were no sales during the first half of 1986.

**United States Price**

As provided in section 772 of the Act, we used the purchase price to represent the United States price for sales by Chimica when the merchandise was sold to unrelated purchasers prior to its importation into the United States. We used the exporter's sales price (ESP) as the United States price for sales made after importation to an unrelated purchaser.

We calculated the purchase price based on the f.o.b. price to unrelated purchasers. We made deductions for inland freight, port handling, and loading charges. The verified distance from the plants to the port of exportation was almost three times greater than that reported. In calculating ESP, we made an additional deduction for the selling expenses incurred by the related U.S. importer. Because such expenses were not reported, we deducted a commission paid to the U.S. importer by Chimica as the best information otherwise available, as representing U.S. sales expenses.

In accordance with the policy set forth in our final determination in the investigation of *Carbon Steel Wire Rod from Poland* (49 FR 29434, July 20, 1984), we based the port deductions upon costs in a non-state-controlled economy country, the United Kingdom (UK), for the reasons stated in the "Foreign Market Value" section.

**Foreign Market Value**

Petitioner alleged that Romania is a state-controlled-economy country and that sales of the subject merchandise in that country do not permit a determination of foreign market value under section 773(a) of the Act. Our analysis of issues relating to our determination that Romania is a state-controlled-economy country and our selection of a surrogate country are discussed in the notice of preliminary determination.

As noted in the preliminary determination, we sent a questionnaire to, and received an incomplete response from, a major producer of urea in the UK, Imperial Chemical Industries PLC (ICI). We attempted to supplement the information in this response while visiting ICI's facility in the UK.

Our analysis indicated that additional information was needed from ICI. We attempted to obtain these additional data in order to verify all of ICI's necessary information prior to the final determination. However, we were unsuccessful in obtaining these data for the record in this investigation. Lacking this information at this time, we find it inappropriate to use the ICI data for this determination.

Therefore, we calculated constructed value based on natural gas and labor inputs reported by the Romanian producer which were verified, and we used best information available for factory overhead from the petition. The factors of production were based on the weighted average of the ammonia-urea plant complexes selected by the Department for its determination.

For factory overhead, the Department developed a ration based on factory overhead and gas prices from the petition, appropriately adjusted for Romanian gas prices.

To value natural gas, we used a tariff set by Gasunie N.V., the Dutch Gas Board in the Netherlands. The category "F" of the tariff, the so-called "F" price, established gas prices which are available to large industrial users throughout the European Communities (EC). All major fertilizer producers in the EC qualify for the F price because of

their high gas usage. While the F price was established as the result of an EC complaint brought by German, French, and Belgian fertilizer producers in those countries, evidence in the record indicates that gas prices to large industrial users in the UK, such as ICI, reported to be the largest gas user in the UK, was linked to the F price during the period of investigation.

The F price is a maximum price established for each quarterly period. Since the F price declined during the preiod of investigation, we calculated the difference in F price in two succeeding quarters and allocated that difference over the intervening months in order to derive monthly gas prices which were then weight-averaged. We used this monthly weighted-average F price in order to most closely approximate the price actually paid for gas in market economy countries during the time period when production of the urea subject to our investigation would have occurred. Therefore, we believe that the F price represents the most accurate gas price for the fertilizer sector in the UK.

Labor rates were obtained in the UK from public sources. For factory overhead, certain factors could not be quantified or verified, and other factors could not be appropriately valued with prices from the United Kingdom. In these cases, the Department sought the most reliable objective information contained in the record of the investigation. Therfore, for certain data the Department relied upon supplemental reports provided by the petitioner. This included the *Fertilizer Manual* which was published prior to the Department's investigation by the International Fertilizer Development Center of the United Nations' International Development Organization; *Energy Prices and Taxes*, Fourth Quarter 1985.

Because of the unavailability of industry data in the UK, we used the statutory minimum of 10 percent of the sum of material and fabrication costs for general expenses and the statutory minimum of eight percent for profit.

For purchase price comparisons, we made currency conversions in accordance with 19 CFR 353.56(a)(1), using certified exchange rates as furnished by the Federal Reserve Bank of New York.

For ESP comparisons, we used the official exchange rate on the date of sale since the use of that exchange rate is consistent with section 615 of the Trade and Tariff Act of 1984 (1984 Act). We followed section 615 of the 1984 Act rather than § 353.56(a)(2) of our regulations because the law supersedes that section of the regulations.

**Negative Determination of Critical Circumstances**

The petitioner alleges that "critical circumstances" exist within the meaning of section 735(a)(3) of the Act with respect to imports of urea from Romania. In determining whether critical circumstances exist, we must examine whether:

(A) (i) There is a history of dumping in the united States or elsewhere of the class or kind of merchandise which is the subject of investigation at less than fair value; or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than fair value; and

(B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

To determine whether imports have been massive over a relatively short period, we analyzed recent Department of Commerce IM 146 trade statistics on imports of this merchandise for equal periods immediately preceding and following the filing of the petition, from March through December 1986. While there was an increase in imports over previous years during 1986, and the average monthly imports in the period immediately following the filing of the petition were higher than those in the period immediately preceding the filing, the post filing increase can be attributed to seasonal trends in imports of urea. Based on this analysis, we find that imports of the subject merchandise have not been massive over a short period.

Since we do not find that there have been massive imports, we do not need to consider whether there is a history of dumping or whether importers of this product knew or should have known that it was being sold at less than fair value.

Therefore, we determine that critical circumstances do not exist with respect to imports of urea from Romania.

**Verification**

In accordance with section 776(a) of the Act, we verified the information submitted in the response by using standard verification procedures, including on-site examination of records and selection of original source documentation containing relevant information.

**Comments Section**

***Petitioner's Comments***

*Comment #1:* Petitioner argues that the Department has correctly chosen the UK as a surrogate country and must proceed to use data from the UK in determining foreign market value for purposes of this determination.

DOC response: We agree. To the extent possible, the Department used the most reliable and specific information available for the UK, the surrogate country selected, according to our methodology. See our response to Respondent's Comment #1.

*Comment #2:* Petitioner argues that if the Department has verified information from the surrogate respondent, ICI, foreign market value should be based on that data. To the extent that ICI has allowed the Department to ascertain the reliability of the aggregate data furnished, petitioner further argues that we should consider the data without having supporting documents put on the record in the investigation. Finally, petitioner contends that, if the Department has reliable verified information on ICI's production costs, we must use that data as the basis of constructed value without resorting to the Romanian production factors.

*DOC response:* If the Department could have obtained complete and verifiable information from ICI, we would have based foreign market value on that data. In this case, however, we determined that we could not legitimately construct a foreign market value solely on the basis of the aggregate data furnished by ICI. As petitioner has pointed out, the cost of natural gas accounts for a significant portion of the total cost of producing urea. The Department was unable to obtain from ICI the price it pays for this critical input. This unknown value, together with the other specific information which either could not be verified or obtained from ICI, represents a substantial proportion of the constructed value and would have rendered that value unreliable and meaningless.

Since we concluded that foreign market value could not reasonably be constructed on the basis of ICI data, the Department resorted to the alternative method of constructed value calculation based on factors of production in the country of exportation as valued in the UK.

*Comment #3:* Petitioner argues that in the absence of verified data from a surrogate producer in a country at a comparable level of economic development, the Department must

determine foreign market value using factors of production valued in the UK from reliable public data, rather than rely on average import prices. Petitioner contends that the volume of urea exported from the USSR, the GDR and Romania has depressed prices from all sources. Petitioner states that since urea is a fungible commodity, prices from all sources move together.

*DOC response:* We agree that it would not have been appropriate to base foreign market value on import prices. We reached this conclusion based on a variety of factors suggesting that the pricing of urea internationally was influenced by imports from the countries under investigation.

Urea is a fungible commodity traded throughout the world. As a result, the level of market share of a specific group of imports tends to affect sales elsewhere.

Nonmarket economy producers, and in particular those subject to our investigations, have become major participants in world urea trade. There is evidence that these producers' ability to separate pricing/supply decisions from market demand conditions has significantly contributed to the distortion of urea prices worldwide. As a result, we concluded that determining foreign market value on the basis of prices in any market would be inappropriate.

Moreover, even if we had attempted to use U.S. import prices, we would have had difficulty isolating a sufficiently large basket of prices during the period of investigation to provide a reliable basis for comparison. Besides eliminating the three countries under investigation, we also would have had to disregard nearly all of the remaining foreign suppliers on grounds of minimal exports, that they were subject to foreign antidumping investigations, or that their governments were known to provide export subsidies. In addition, it would have been impossible to identify sales of solid urea within the basket of urea imports reported in the statistics in order to make the appropriate adjustments.

*Comment #4:* Petitioner states that because the Department was unable to verify all of the factors of production information which was submitted by Chimica, and because Chimica failed to supply information with regard to some other factors, the Department is required to base the foreign market value calculation on the best information otherwise available. In addition, petitioner maintains that the Department must not use data obtained at verification to "fill in" gaps in Chimica's response, nor should the Department use verification as a means of correcting significant errors in data submitted by Chimica.

*DOC response:* We agree that the use of best information available is appropriate in this case. We believe, however, that the Department has broad discretion to determine the nature and extent of best information to be used. Various circumstances of each case may be considered by the Department including, but not limited to, the degree of good faith cooperation by the respondent, whether information missing renders the Department unable to analyze effectively the information submitted and verified, and the nature of inaccuracies discovered in the response during verification.

After careful consideration of the relevant facts in this case, we determined that the factors of production such as consumption of natural gas and labor were adequately verified and should be used for purposes of the foreign market value calculation. We used the best information otherwise available including that provided by petitioner for those factors which could not be quantified or appropriately valued.

*Comment #5:* Petitioner argues that the Department should not assume that the 10 percent statutory minimum for general, selling, and administrative (GS&A) expenses is appropriate but must measure each significant element of GS&A and individually value each GS&A element, such as interest expense, rents, taxes, insurance and selling expenses. Petitioner states that such expenses are incurred in all countries and, as such, are a normal cost to producers.

*DOC response:* We agree that no assumptions should be made with regard to the extent of GS&A involved in production and distribution of urea. Section 353.8(c) of our regulations [19 CFR 353.8(c)] directs us to add "an amount of general expenses and profit as required by section 773(e)(1)(B) of the Act" to the value obtained on the basis of the Romanian factors of production and valued in an appropriate surrogate country. Section 773(e)(1)(B) of the Act in turn requires us to determine GS&A expenses in the amount "equal to that usually reflected in sales of merchandise . . . in the country of exportation" 19 U.S.C. 1677b(e)(1)(B). The country of exportation in this case is determined to be state-controlled to an extent that the normal costs, expenses, and profits (including GS&A expenses for purposes of constructed value calculations) cannot be determined in that country. At the same time, our regulations do not include GS&A expenses in the category of "specific objective components or factors" to be obtained from the state-controlled-economy country under investigation and valued in a surrogate country.

Therefore, we must determine the amount of GS & A expenses as they are reflected in sales of merchandise of the same class or kind in the surrogate country without reference to specific factors or components of the GS&A expenses in Romania. The method of financing of the Romanian facilities involved in production of the subject merchandise, therefore, cannot be relied upon for purposes of our calculation, and the amount of usual GS&A expenses involved in production and distribution of urea must be determined on the basis of normal costs and expenses in the UK. We do not have any indication that general expenses involved in production and distribution of urea in the UK are above the statutory minimum of 10 percent. Therefore, we applied this statutory minimum in our calculations according to section 773(a)(1)(B) of the Act.

*Comment #6:* Petitioner states that the Department should adjust its calculation of the cost of natural gas by using published data for the last two quarters of 1985 which represent the price to industrial users in the UK during the period of investigation.

*DOC response:* For our determination of foreign market value, we used updated gas prices. In fact, we used gas prices for the last two quarters of 1985 and the first quarter of 1986 to allow for the production of urea sold during the period of investigation which was produced and exported during those three quarters of 1985 and 1986. The use of the 1985 data on gas price resulted in a higher gas cost than that used in the preliminary determination, the latter being based on 1986 prices which were declining.

*Comment #7:* Petitioner argues that water usage was not accounted for in the Department's preliminary determination calculation. Petitioner contends that water used free of charge in Romania must be valued on the basis of utility rates in the UK.

*DOC response:* Water was not valued in the preliminary determination because it was considered to be recycled. However, for the final determination a water expense was included in factory overhead under the methodology explained in the "Foreign Market Value" section.

*Comment #8:* Petitioner argues that steam and indirect materials used in the production of urea must be included in the Department's calculation of urea

production cost. It maintains that the Department omitted such items in its preliminary calculations.

*DOC response:* These factors are individual costs included in factory overhead. Therefore, they are accounted for and valued as described in "Foreign Market Value" section of this notice.

*Comment #9:* Petitioner contends that the cost of labor was significantly undervalued in our preliminary calculations because (1) only direct labor usage was considered and (2) the 1981 UK labor costs obtained from published sources were not indexed to account for inflation.

*DOC response:* For purposes of our final determination we used direct labor hours which were obtained at verification. Costs per hour were obtained from the "Hourly Compensation Costs for Production Workers in U.S. Dollars" (U.S. Bureau of Labor Statistics, February 1987) which reflects the data for the United Kingdom in 1980. The cost information is included in petitioner's pre-hearing brief. Direct labor usage was considered in the final determination because other indirect labor expenses are included in our calculation of the overall factory overhead based on the petitioner's excerpt from the *Fertilizer Manual*.

*Comment #10:* Petitioner argues that the depreciation of Romanian plants and equipment should be included within the factory overhead rather than general expenses and should be based on the costs of plants and equipment purchased from market economy countries or on the costs incurred by other countries for comparable facilities.

*DOC response:* Depreciation was considered to be a part of factory overhead and was included within the overall amount as described in the "Foreign Market Value" section.

*Comment #11:* Petitioner contends that the credit for sales of carbon dioxide in the preliminary calculations was improper since the Romanian producers do not sell carbon dioxide.

*DOC response:* We agree. During the verfication no information on the quarterly sales of carbon dioxide was presented. Therefore, no credit was allowed.

*Comment #12:* Petitioner contends that the U.S. price of the sales which involve countertrade transactions as reported by Chimica and verified by the Department should be used as best information otherwise available because the Department does not have adequate information to adjust the U.S. price for the effects of countertrade. As the same time, however, petitioner contends that certain adjustments for credit and guarantee expenses incurred by respondent with regard to the countertrade transactions should be made by the Department.

*DOC response:* It would be distortive and inappropriate to make some adjustments while disregarding other adjustments related to countertrade. We did not make any adjustments to the U.S. price to account for the effects of the countertrade method involved in the sale of urea to the United States, because we do not have adequate means to measure those effects. In addition, some adjustments advocated by petitioner do not appear appropriate because they do not seem to related directly to, or have an effect on, the sales of urea.

*Comment #13:* Petitioner argues that the Department must value its inland freight calculation to account for revised distances from plant to port as determined during verification.

*DOC response:* We made such deductions in accordance with the plant to port distances revised at verification.

*Comment #14:* Petitioner contends that all port, brokerage and loading charges should be valued in the UK, or based on U.S. producers' costs, and deducted from U.S. price.

*DOC response:* We valued such costs in the UK. Refer to the section on "United States Price."

*Comment #15:* Petitioner argues that U.S. sales through a party related to Chimica should properly be considered exporter's sales price sales, not purchase price transactions. Because Chimica has not reported U.S. selling expenses, the amounts reported in the petition may be used as the best information available and deducted from U.S. price.

*DOC response:* We agree. Refer to the "United States Price" section of this notice.

*Respondent's Comments*

*Comment #1:* Respondents claim that the choice of the UK as a surrogate for Romania is not supported by substantial evidence in the record. They state that by using the data cited by the Department with respect to macroeconomic criteria, Romania and the UK cannot be regarded as being at a comparable stage of economic development.

*DOC response:* We disagree. Our selection of the UK as a surrogate for Romania was based on the relative comparability of economic and demographic statistics, as well as on the fact that these two countries are major producers of natural gas. Based on the macroeconomic indicators we reviewed, we could find no meaningful disparities between the two countries relative to comparisons made with other major urea-producing nations.

*Comment #2:* Respondents argue that there were no Romanian sales of urea to the U.S. during the Department's standard six-month period of investigation, and that the Romanian respondents have actually withdrawn from the market because of falling prices. Respondents therefore request an explanation as to why the Department has proceeded with the investigation.

*DOC response:* The Department may alter the period of investigation in accordance with 19 CFR 353.38 and has done so in this investigation.

*Comment #3:* Respondents argue that the values which the Department assigned to catalyst chemical inputs in its preliminary determination were overstated. They request that the Department adjust these values to reflect their verified rate of consumption.

*DOC response:* We have not valued such inputs individually for this determination but have included such materials in the factory overhead. Refer to the "Foreign Market Value" section of this notice for a further discussion of factory overhead.

*Comment #4:* Respondents also argue that the value assigned by the Department to formaldehyde anticaking agents in its preliminary determination was overstated. They note that these agents represent less than one percent by volume of the finished product but that the value assigned represented nearly two percent of the per ton purchase price. The claim that this ratio is too high and request that the value for these agents be adjusted downward.

*DOC comment:* We have also included this element in factory overhead. Refer to the "Foreign Market Value" section of this notice for a further discussion of factory overhead.

*Comment #5:* Respondents urge the Department to take account of variables affecting the "true cost" of inland rail freight, such as variable rates for distance travelled, in assigning values to the transportation factor for purposes of calculating U.S. price for the final determination.

*DOC response:* We have taken into account such variables. We used the rail rate which reflected distances from the plants to the port in Romania.

**Continuation of Suspension of Liquidation**

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to continue to suspend liquidation of all entries of urea from Romania that are entered, or

withdrawn from warehouse, for consumption, on or after January 2, 1987. The Customs Service shall continue to require a cash deposit or the posting of a bond for all entries or withdrawals from warehouse on or after the date of publication of this notice in the Federal Register, equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeded the United States price, which was 90.71 percent. This suspension of liquidation will remain in effect until further notice.

**ITC Notification**

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. The ITC will determine whether these imports are causing material injury, or threaten material injury, to a U.S. industry within 45 days of the publication of this notice.

If the ITC determines that material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, we will isue an antidumping duty order, directing Customs Officers to assess an antidumping duty or urea from Romania entered, or withdrawn, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value of the merchandise exceeds the U.S. price.

The determination is being published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

**Paul Freedenberg,**

*Assistant Secretary for Trade Administration.*

## Urea From the Union of Soviet Socialist Republics; Final Determination of Sales at Less Than Fair Value

**AGENCY:** Import Administration, International Trade Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We have determined that urea from the Union of Soviet Socialist Republics (USSR) is being, or is likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend the liquidation of all entries of the subject merchandise as described in the "Continuation of Suspension of Liquidation" section of this notice.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mary S. Clapp, (202) 377-1769, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

**SUPPLEMENTARY INFORMATION:**

### Final Determination

We have determined that urea from the USSR is being sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (the Act). The weighted-average margins of sales at less than fair value are summarized in the "Continuation of Suspension of Liquidation" section of this notice.

### Case History

On December 23, 1986, we preliminarily determined that urea is being sold at less than fair value (52 FR 124, January 2, 1987). A case history is included in the notice of preliminary determination. On February 12, 1987, we postponed the final determination until not later than May 18, 1987, at the request of the respondent (52 FR 5323, February 20, 1987). On April 28, 1987, we held a hearing to address the issues arising in this investigation.

### Scope of Investigation

The merchandise covered by this investigation is solid urea as currently provided for in item 480.30 of the *Tariff Schedules of the United States*.

### Fair Value Comparisons

To determine whether sales in the United States of the subject merchandise were made at less than fair value, we compared the United States price with the foreign market value. We limited our investigation to Sojuzpromexport (SPE) and Philipp Brothers, Inc. and Philipp Brothers, Ltd. (Phibro), which together accounted for all exports of this merchandise to the United States. We investigated all sales of urea for the period January 1, 1986, through June 30, 1986.

### United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for sales by SPE to U.S. importers other than Phibro, because the merchandise was sold to unrelated purchasers prior to its importation into the United States. For sales to Phibro, we used exporter's sales price (ESP) as the basis of United States price because SPE did not know the destination of the merchandise at the time of sale and Phibro resold the merchandise to unrelated U.S. purchasers after importation.

We calculated the purchase price and ESP based on the f.o.b. price to unrelated purchasers. We made deductions for port handling and loading charges. For ESP sales we deducted credit and other expenses incurred in selling the merchandise in the U.S.

In accordance with the policy set forth in our final determination in the investigation of *Carbon Steel Wire Rod from Poland* (49 FR 29434, July 20, 1984), we based the port handling deductions upon costs in a non-state-controlled-economy country, the United Kingdom (UK), for the reasons stated in the "Foreign Market Value" section.

### Foreign Market Value

Petitioner alleged that the USSR is a state-controlled-economy country and that sales of the subject merchandise in that country do not permit a determination of foreign market value (FMV) under section 773(a) of the Act. Our analysis of issues relating to the USSR's characterization as a state-controlled-economy country and our selection of a surrogate country are discussed in the notice of preliminary determination. As a result, we determined that section 773(c) of the Act applies to this investigation.

As noted in the preliminary determinaton, we sent a questionnaire to, and received a response from, a major producer of urea in the UK, Imperial Chemical Industries PLC (ICI). We attempted to supplement the information in this response while visiting ICI's facility in the UK. Our analysis indicated that additional information was needed from ICI. We attempted to obtain the additional data in order to verify all of ICI's necessary information prior to the final determination. However, we were unsuccessful in obtaining these data for the record in this investigation. Lacking this information at this time, we find it inappropriate to use the ICI data for this determination.

Therefore, we calculated the constructed value based on the factors of production of the Soviet producers. At verification, certain factors could not be sufficiently quantified or valued. For these factors, we used information provided by petitioner or otherwise available to the Department.

Urea is produced in thirty-six plant complexes throughout the Soviet Union as reported by the Tennessee Valley

Authority's *World Fertilizer Capacity* report. The Department selected six locations as its sample base for its determination. Two of the six plant complexes were chosen by the Department for verification. During the verification it became apparent that the information for all six plant complexes in the questionnaire response were budgeted factors. Since these budgeted factors could be higher or lower than the actual factors, the Department is using the weighted-average actual factors of the two plants which were verified for the purpose of this final determination. Certain factors could not be quantified and other factors could not be appropriately valued from the United Kingdom. In these cases, the Department used the most reliable objective information contained in the record of the investigation. For certain data the Department relied upon supplemental reports provided by the petitioner. These included the *Fertilizer Manual*, which was published prior to the Department's investigation by the International Fertilizer Development Center of the United Nations' International Development Organization, *Energy Prices and Taxes* (Fourth Quarter 1985, International Energy Agency, for West Germany) and the *Hourly Compensation Costs for Production Workers in Chemicals and Allied Products Manufacturing* (U.S. Department of Labor, Bureau of Labor Statistics, Office of Productivity and Technology, August 1985).

To value natural gas, we used a tariff set by Gasunie N.V., the Gas Board in the Netherlands. The category F of the tariff, the so-called "F" price, is established for large industrial users applicable throughout the European Communities (EC). All major fertilizer producers in the EC, qualify for the F price because of their high gas usage. While the F price was established as the result of an EC complaint brought by German, French, and Belgian fertilizer producers, and directly links prices available to fertilizer producers in those countries to the Dutch tariff, evidence in the record indicates that gas prices to large industrial users in the UK, such as ICI, reported to be the largest gas user in the UK, was linked to the F price during the perod of investigation.

The F price is a maximum price established for each quarterly period. Since the F price declined during the period of investigation, we calculated the difference in F price in two succeeding quarters and allocated that difference over the intervening months, in order to derive monthly gas prices which we then weight averaged. We used this monthly weighted-average F price in order to most closely approximate the price actually paid for gas in market economy countries during the time period when production of the urea subject to our investigation would have occurred. Therefore, we believe that the F price represents the most accurate, verifiable gas price for the fertilizer sector in the UK.

The UK labor rates were obtained from public sources. Although some of the individual items included as factory overhead were verified, others could not be sufficiently quantified or valued. Therefore, for factory overhead the Department developed a ratio of the factory overhead costs to the gas costs as provided in the petition. The individual components of the factory overhead costs were based on a utilization of plant capacity which was less than the utilization of capacity determined to exist in the USSR. The Department thus made appropriate adjustments to account for the higher capacity utilization rate in the USSR.

Because of the unavailability of industry data in the UK, we used the statutory minimum of 10 percent of the sum of material and production cost for general expenses and the statutory minimum of eight percent for profit.

We made currency conversions in accordance with 19 CFR 353.56(a)(1) using certified exchange rates as furnished by the Federal Reserve Bank of New York. For ESP comparisons, we used the official exchange rate on the date of sale since the use of that exchange rate is consistent with section 615 of the Trade and Tariff Act of 1984 (1984 Act). We followed section 615 of the 1984 Act rather than § 353.56(a)(2) of our regulations because the law supersedes that section of the regulations.

**Negative Determination of Critical Circumstances**

The petitioner alleges that "critical circumstances" exist within the meaning of section 735(a)(3) of the Act with respect to imports of urea from the USSR. In determining whether critical circumstances exist, we must examine whether:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of investigation at less than fair value; or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than fair value; and

(B) There have been massive imports of the merchandise which is the subject of the investigation over a relatively short period.

To determine whether imports have been massive over a relatively short period, we analyzed recent Department of Commerce IM 146 trade statistics on imports of this merchandise for equal periods immediately preceding and following the filing of the petition, from March through December 1986. While there was an increase in imports over previous years during 1986, and the average monthly imports in the period immediately following the filing of the petition were higher than those in the period immediately proceeding the filing, the post filing increase can be attributed to seasonal trends in imports of urea. Based on this analysis, we find that imports of the subject merchandise have not been massive over a short period.

Since we do not find that there have been massive imports, we do not need to consider whether there is a history of dumping or whether importers of this product knew or should have known that it was being sold at less than fair value.

Therefore, we determine that critical circumstances do not exist with respect to imports of urea from the USSR.

**Verification**

In accordance with section 776(a) of the Act, we verified the data used in making this determination by using standard verification procedures, including on-site examination of records and selection of original source documentaton containing relevant information.

**Comments Section**

***Petitioner's Comments***

*Comment #1:* Petitioner argues that the Department has correctly chosen the UK as a surrogate country and must proceed to use data from the UK in determining foreign market value for purposes of this determination.

*DOC response:* We agree. To the extent possible, the Department used the most reliable and specific information available for the UK, the surrogate country selected, according to our methodology.

*Comment #2:* Petitioner argues that if the Department has verified information from the surrogate respondent, ICI, foreign market value should be based on that data. To the extent that ICI has allowed the Department to ascertain the reliability of the aggregate data furnished, petitioner farther argues that

we should consider the data without having supporting documents put on the record in the investigation. Finally, petitioner contends that, if the Department has reliable verified information on ICI's production costs, we must use that data as the basis of constructed value without resorting to the Soviet production factors.

*DOC response:* If the Department could have obtained complete and verifiable information from ICI, we would have based foreign market value on that data. In this case, however, we determined that we could not construct a foreign market value solely on the basis of the aggregate data furnished by ICI. As petitioner has pointed out, the cost of natural gas accounts for a significant porton of the total cost of producing urea. The Department was unable to abtain from ICI the price it pays for this critical input. This unknown value, together with the other specific information which either could not be satisfactorily verified or obtained from ICI, represents a substantial proportion of the constructed value and would have rendered that value unreliable and meaningless.

Since we concluded that foreign market value could not reasonably be constructed based solely on ICI data, the Department resorted to the alternative method of constructed value calculation based on factors of production in the country of exportation as valued in the UK.

*Comment #3:* Petitioner argues that in the absence of verified data from a surrogate producer in a country at a comparable level of economic development, the Department must determine foreign market value by using factors of production valued in the UK from reliable public data rather than rely on an average import price as suggested by respondents. Petitioner contends that the volume of urea exported from the USSR, the German Democratic Republic (GDR) and Romania has depressed prices from all sources. Petitioner states that since urea is a fungible commodity, prices from all sources move together.

*DOC response:* We agree that it would not be appropriate to base foreign market value on import prices. We reached this conclusion based on a variety of factors suggesting that the pricing of urea internationally was influenced by imports from the countries under investigation.

Urea is a fungible commodity traded throughout the world. As a result, the level of market share of a specific group of importers tends to affect sales elsewhere.

Non-market-economy producers, and in particular those subject to our investigations, have become major participants in world urea trade. There is evidence that these producers' ability to separate pricing/supply decisions from market demand conditions has significantly contributed to the distortion of urea prices worldwide. As a result, we concluded that determining foreign market value on the basis of prices in any market would be inappropriate.

Moreover, even if we had attempted to use U.S. import prices, we would have had difficulty isolating a sufficiently large basket of prices during the period of investigation to provide a reliable basis for comparison. Besides eliminating the three countries under investigation, we also would have had to disregard nearly all of the remaining foreign suppliers on the grounds of minimal imports, that they were subject to foreign antidumping investigations, or that their governments were known to provide export subsidies. In addition, it would have been impossible to identify sales of solid urea within the basket of urea imports reported in the statistics in order to make the appropriate adjustments.

*Comment #4:* Petitioner argues that the Department should not assume that the 10 percent statutory minimum for general, selling and administrative (GS&A) expenses is appropriate, but should quantify each individual cost item and value each appropriately. For example, petitioner claims that rents, taxes and insurance, since they are incurred by companies in non-state-controlled economy countries, should be included and valued. Additionally, it contends that the costs of selling expenses incurred by the Soviet trading company, such as selling salaries, brochures and catalogues, should be valued at UK prices. Further, petitioner contends that interest expense should be calculated on the basis of interest rates in the UK applied to the total value of the Soviet facilities which were allegedly supplied and financed by western companies through a mix of foreign debt and/or counter-trade buy-back arrangements.

*DOC response:* We agree that no assumptions should be made with regard to the extent of GS&A involved in the production and distribution of urea. Section 353.8(c) of our regulations [19 CFR 353.8(c)] directs us to add "an amount of general expenses and profit as required by section 773(e)(1)(B) of the Act" to the values obtained on the basis of the Soviet factors of production and valued in an appropriate surrogate country. Section 773(e)(1)(B) in turn requires us to determine GS&A expenses in the amount "equal to that usually reflected in sales of merchandise . . . in the country of exportation" 19 U.S.C. 1677b(e)(1)(B). The country of exportation in this case is determined to the state-controlled to an extent that the normal costs, expenses, and profits (including GS&A expenses for purposes of constructed value calculations) cannot be determined in that country. At the same time, our regualtions do not include GS&A expenses in the category of "specific objective components or factors" to be obtained from the state-controlled economy country under investigation and valued in a surrogate country. Therefore, we must determine the amount of GS&A expenses as they are reflected in sales of merchandise of the same class or kind in the surrogate country without reference to specific factors or components of the GS&A expenses in the Soviet Union. The method of financing of the Soviet facilities involved in production of the subject merchandise, therefore, cannot be relied upon for purpose of our calculations, and the amount of usual GS&A expenses involved in production and distribution of urea must be determined on the basis of normal costs and expenses in the UK. We do not have any indication that general expenses involved in production and distribution of urea in the UK are above the statutory minimum of 10 percent. Therefore, we applied this statutory minimum in our calculations according to section 773(e)(1)(B) of the Act.

*Comment #5:* Petitioner states that the Department should adjust its calculation of the cost of natural gas by using published data for the first two quarters of 1986 which represent the price to industrial users in the UK during the period of investigation.

*DOC response:* For our determination of foreign market value, we used updated gas prices. In fact, we used gas prices for the first three quarters of 1986 to allows for the production of urea sold during the period of investigation which was produced and exported during these three quarters.

*Comment #6:* Petitioner argues that water usage was not accounted for in the Department's preliminary determination calculation. Petitioner contends that water used free of charge in the USSR must be valued on the basis of utility rates in the UK.

*DOC response:* Water was not valued in the preliminary determination because it was considered to be recycled. However, for the final determination water was included in

factory overhead under the methodology explained in "Foreign Market Value".

*Comment #7:* Petitioner argues that chemicals, catalysts, steam and indirect materials used in the production of urea must be valued in the UK.

*DOC response:* We included these factors as part of the overall factory overhead as described in the "Foreign Market Value" section of this notice.

*Comment #8:* Petitioner contends that the cost of labor was significantly undervalued in our preliminary calculations because (1) only direct labor usage was considered and (2) the 1981 UK labor costs obtained from published sources were not indexed to account for inflation.

*DOC response:* For purposes of our final determination, we used direct labor hours which were obtained at verification. Valuation costs per hour were obtained from the "Hourly Compensation Costs for Production Workers in U.S. Dollars," (U.S. Bureau of Labor Statistics, February, 1987), which reflect the data for the United Kingdom in 1986. The cost information is included in petitioner's per-hearing brief. Only direct labor usage was considered to be labor factor, since indirect labor, e.g. engineer's labor, is included in other cost components of factory overhead. See the "Foreign Market Value" section of this notice.

*Comment #9:* Petitioner argues that the depreciation of Soviet plants and equipment should be included in factory overhead rather than general expenses and should be based on the costs of plants and equipment purchased from market-economy countries or on the costs incurred by other countries to acquire comparable facilities.

*DOC response:* Depreciation has been considered to be part of factory overhead and is included in this overall amount as described in the "Foreign Market Value."

*Comment #10:* Petitioner contends that the credit for sales of carbon dioxide in the preliminary calculations was improper since the Soviet producers do not sell carbon dioxide but release it into the atmosphere.

*DOC response:* We agree. During the verification no information on sales of carbon dioxide was presented. Therefore, we did not offset costs with credit for such sales.

*Comment #11:* Petitioner contends that Phibro's sales of Soviet urea in the United States were made at less than Phibro's costs of acquisition, transportation and marketing. Petitioner argues, therefore, that the Department should apply its middleman dumping methodology and base the U.S. price on sales from Phibro to the first unrelated U.S. customers, regardless of whether the Soviet producer knew that its sales to Phibro were destined for the United States. Petitioner also argues that Phibro's allegation that its sales of Soviet urea to third countries should be used for purposes of FMV calculations is contrary to section 773(c) of the Act [19 U.S.C. 1677b(c)], which requires the FMV of the merchandise from a state-controlled-economy to be ascertained by reference to an appropriate surrogate country methodology.

*DOC response:* We determine that the Soviet producers do not know at the time of sale to Phibro that the urea will be destined for the U.S. market. We reach this conclusion on the following bases: (1) The contract between the Soviet producers and Phibro indicates several possible destinations of the merchandise, only one of which is the United States; (2) Phibro does in fact sell urea to locations other than the United States. Therefore, we determine that the appropriate U.S. sale price is the price from Phibro to the United States, not the price at which the Soviets sell the merchandise to Phibro. Because we determine that the appropriate U.S. sale is the sale by Phibro to unrelated purchases, it is unnecessary to address petitioner's allegation that Phibro is selling urea below its cost of acquisition.

We agree that section 773(c) requires that the FMV of merchandise from a state-controlled economy country should be ascertained by reference to an appropriate surrogate country methodology. Therefore, since urea sold by Phibro was exported directly from the Soviet Union, we determine that Phibro's foreign market value is the foreign market value determined by reference to our factors methodology, as described above. We also note that it would be inappropriate to use Phibro's third-country sales or its acquisition costs to determine foreign market value in this case given our determination that world-market prices of urea are depressed.

*Comment #12:* Petitioner argues that interest expenses for the period between SPE's payment to the suppliers and payment by the U.S. purchaser must be calculated on the basis of interest rates in the UK and that such interest expenses must be accounted for in our calculation of margins for the final determination.

*DOC response:* We disagree. In this investigation the Department has valued factors of production in a comparable surrogate country using the best information available. The specificity of the data obtained for valuing the factors is not sufficient for us to identify the directly related selling expense adjustments which would have to be made to foreign market value for both U.S. price and constructed value. Absent specific information that the respondent incurs extraordinary directly related selling expenses for its U.S. sales, the Department assumed, as best information available, that ordinary and similar selling expenses occur in both markets and, as such, they offset one another.

*Comment #13:* Petitioner argues that the Department erred in finding that critical circumstances do not exist for purposes of the preliminary determination. Petitioner claims that the decision concerning massive imports was based on an analysis of value instead of volume of imports. Petitioner also contends that our analysis should have included October imports to reflect the lag time in reporting imports. Petitioner also claims that there is a history of dumping of urea from the USSR.

*DOC response:* For this determination we analyzed the volume of imports. For a further discussion of critical circumstances, refer to the "Negative Determination of Critical Circumstances" section of this notice.

*Respondents' Comments*

*Comment #1:* Respondents claim that, in choosing the appropriate surrogate country, the Department should be cautious in applying numerical criteria such as GNP without considering its acceptability in comparison to other factors. For instance, respondents state that while the USSR has a relatively high GNP, other characteristics make the USSR more similar to lesser developed countries. Respondents state that macroeconomic considerations such as self-sufficiency of natural gas needs should be given primary consideration. Respondents argue that, based on natural gas supplies and income comparability, appropriate surrogates are Saudi Arabia, Qatar, Kuwait, Trinidad and Tobago, Venezuela, Mexico, Malaysia, Indonesia, the United Arab Emirates and Egypt. Respondents claim that the melding of raw material supplies and income comparability is especially proper in a situation such as this involving a capital intensive industry. Respondents also rely on the size of the agricultural sectors of these nations which create a home market demand for urea.

*DOC response:* Our selection of the UK as a surrogate for the USSR was based on economic and demographic statistics as well as the fact that both of these countries are major producers of natural gas. We believe that our

dismissal of macroeconomic comparability criteria would have conflicted with our regulatory guidelines and resulted in an inappropriate selection.

*Comment #2:* Respondents argue that the Department has a strong preference for using prices rather than costs as the basis for determining foreign market value. Since the prices of ICI, the sole urea producer in the UK, are significantly distorted by a number of factors, respondents argue that the average U.S. import price of urea from other surrogate countries is the appropriate basis for foreign market value. Respondents claim that U.S. import prices are the most current verifiable data available and their use is supported by the preference for prices.

*DOC response:* We disagree. See our response to petitioner's comment #3.

*Comment #3:* Respondent Phibro argues that as an independent exporter of Soviet urea it should have a separate antidumping margin calculated on the basis of its sales in the United States and third countries. In particular, Phibro contends that its sales of Soviet urea to third countries should be used for purposes of foreign market value calculations because Phibro is a market-oriented entity not subject to Soviet state controls. Furthermore, Phibro claims that the U.S. price should be based on its sales to first unrelated purchasers in the United States, instead of the sales by the Soviet agencies to Phibro, because the Soviet suppliers had no knowledge at the time of sale whether urea was destined for the United States.

*DOC response:* We agree that Phibro should have a separate antidumping margin calculated on the basis of its sales in the U.S. and the appropriate foreign market value. However, we disagree that Phibro's sales to third countries should be used for purposes of foreign market value calculations. See our response to Petitioner's comment #11.

*Comment #4:* Phibro argues that the publicly available data used by the Department in its preliminary determination to value gas, labor and electricity factors were overstated. Phibro claims that ICI, as the largest natural gas purchaser in the UK, pays a substantially lower price than the price to industrial users which formed the basis for valuing gas in the preliminary determination calculations. Phibro claims the labor rate used in our calculations for the preliminary determination includes training, clothing, insurance, social welfare costs and other items which are part of general expenses. Phibro claims that the electricity rate used is not applicable to chemical producers. It argues that, if the Department bases foreign market value for the final detemination upon factors of production, the cost used should be actual costs, in the UK, not broadly based, unreliable statistics.

*DOC response:* For this determination we adjusted the methodology used in the preliminary determination with respect to the valuation of these factors. For a discussion of the gas costs, refer to the "Foreign Market Value" section. Concerning labor rates, refer to the "DOC Response" to petitioner's comment #10. The value of electricity was included in factory overhead, as discussed in the "Foreign Market Value" section of this notice.

*Comment #5:* Phibro argues that, when calculating financing costs for urea plants in the USSR, the Department should take into account time for construction of the plants and should assume that variable rate financing would have been used for such projects.

*DOC response:* The Department included the financing costs in the 10 percent statutory minimum for general expenses. See our response to petitioner's Comment #6.

*Comment #6:* Phibro argues that an inland freight component for shipment to the port in the USSR should not be deducted from the United States price since all the urea which was exported to the United States was produced in the urea plant located at the port.

*DOC response:* As we have determined that the U.S shipments were produced at the port plant, we have not deducted any charges for inland freight or loading to rail cars from the U.S. price.

## Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation, in accordance with section 733(d) of the Act, of all entries of urea from the USSR that are entered, or withdrawn from warehouse, for consumption, on or after January 2, 1987. The Customs Service shall continue to require a cash deposit or the posting of a bond for entries for consumption made on or after the date of publication of this notice in the Federal Register equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. This suspension of liquidation will remain in effect until further notice. The weighted average margin is shown below.

| Manufacturer/Producer Exporter | Weighted-average margin percent |
|---|---|
| Soguzpromexport (SPE) | 59.20 |
| Philipp Brothers, Ltd., and Philipp Brothers, Inc. (Phibro) | 59.20 |
| All other | 59.20 |

## ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. The ITC will determine whether these imports are causing material injury, or threaten material injury, to a U.S. industry within 45 days of the publication of this notice.

If the ITC determines that material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, we will issue an antidumping duty order, directing Customs Officers to assess an antidumping duty on urea from the USSR entered, or withdrawn from warehouse, for consumption, after the suspension of liquidation equal to the amount by which the foreign market value of the merchandise exceeds the U.S. price.

This determination is being published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

## National Oceanic and Atmospheric Administration

### Application for Marine Mammals Permit; USN—Naval Facilities Engineering Command (P8D)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 through 1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531 through 1544), and the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217 through 222).

1. Applicant: Natural Resources Management Branch, Western Division, Naval Facilities Engineering Command (NFEC), P.O. Box 727, San Bruno, California 94066
2. Type of Permit: Scientific Research/ Scientific Purposes
3. Name and Number of Marine Mammals: Gray whale (*Eschrichtius robustus*), 1,000
4. Type of Take: Intentional and unintentional harassment to determine the effects of Landing Craft Cushion on gray whales and ways to mitigate those effects.
5. Location of Activity: Waters off San Diego County, California
6. Period of Activity: 3 Years

Concurrent with the publication of this notice in the Federal Register, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Office of Protected Resources and Habitat Programs, National Marine Fisheries Service, 1825 Connecticut Avenue, NW., Room 805, Washington, DC; and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731–7415.

Dated: May 20, 1987.

Nancy Foster,

*Director, Office of Protected Resources and Habitat Programs, National Marine Fisheries Service.*

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### Establishing an Import Limit for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Burma

May 20, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 27, 1987. For further information contact Kimbang Pham, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377–3715. For information on categories on which consultations have been requested call (202) 277–3740.

### Background

A CITA directive published in the Federal Register on February 27, 1987 (52 FR 6061) announced that, on January 30, 1987, the United States, in accordance with section 204 of the Agricultural Adjustment Act of 1956, had requested the Government of Burma to enter into consultations concerning exports to the United States of men's and boys' woven cotton and man-made fiber shirts in Category 340/640.

The United States has decided, inasmuch as no solution has been reached in consultations with the Government of Burma on a mutually satisfactory limit for this category, to control imports of cotton and man-made fiber textile products in Category 340/640, produced or manufactured in Burma and exported during the twelve-month period which began on January 30, 1987 and extends through January 29, 1988, at a level of 93,876 dozen.

Accordingly, in the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of textile products in Category 340/640 during the twelve-month period which began on January 30, 1987 and extends through January 29, 1988, in excess of the designated level or restraint.

The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Burma, further notice will be published in the Federal Register.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987)*.

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

### Committee for the Implementation of Textile Agreements

May 20, 1987.

Commissioner of Customs,
*Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 27, 1987, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Category 340/640, produced or manufactured in Burma and exported during the twelve-month period which began on January 30, 1987 and extends through January 29, 1988, in excess of 93,876 dozen[1].

Textile products in Category 340/640 which have been exported to the United States prior to January 30, 1987 shall not be subject to this directive.

Textile products in Category 340/640 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754),

[1] The limit has not been adjusted to account for any imports exported after January 29, 1987.

November 8, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987)*.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

BILLING CODE 3510-DR-M

## Establishment of an Import Limit for Certain Cotton Textile Products From the Republic of El Salvador

May 20, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 27, 1987. For further information contact William Dawson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

### Background

During recent consultations between the Governments of the United States and the Republic of El Salvador, agreement was reached to establish designated consultation levels for certain cotton textile products in Category 300/301 (carded and combed cotton yarn), produced or manufactured in El Salvador and exported during the period January 1, 1987 through December 31, 1988.

In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to control imports of cotton textiles and textile products in Category 300/301, produced or manufactured in El Salvador and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987, at the designated level.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 8, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987)*.

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

Committee for the Implementation of Textile Agreements

May 20, 1987.

Commissioner of Customs,
*Department of the Treasury Washington, DC*

[redacted]

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the Bilateral Cotton Textile Agreement of April 30, 1987 between the Governments of the United States and the Republic of El Salvador; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 27, 1987, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 300/301 (carded and combed cotton yarn), produced or manufactured in the Republic of El Salvador and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987, in excess of 8,500,000 pounds.[1]

Textile products in Category 300/301 which have been exported to the United States prior to January 1, 1987 shall not be subject to this directive.

Textile products in Category 300/301 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 8, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987)*.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textiles Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

BILLING CODE 3510-DR-M

## Amendment to the Export Visa Requirement for Certain Cotton, Wool and Man-Made Fiber Textile Products From the Republic of Korea

May 20, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, and the Bilateral Textile Agreement of December 1, 1982, as amended, between the Governments of the United States and the Republic of Korea, has issued the directive published below to the Commission of Customs to be effective on May 27, 1987. For further information contact Eve Anderson, International Trade Specialist (202) 377-4212.

### Background

CITA directives dated May 19, 1972, as amended, and November 4, 1982, as amended, (37 FR 10606 and 47 FR 50940), established export visa and exempt certification requirements for certain cotton, wool and man-made fiber, silk blend and other vegetable fiber textiles and textile products from Korea. The Governments of the United States and the Republic of Korea have reached agreement to further amend the visa and exempt certification requirements to include amended language regarding information required on the visa and exempt certification stamp as described in the letter published below to the Commissioner of Customs.

The two governments also agreed to further amend the visa and exempt certification system to include part and merged categories for certain cotton,

[1] The limit has not been adjusted to account for any imports exported after December 31, 1986.

wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Korea.

A complete list of merged and part-categories and a list of exempt products are published as enclosures to the letter to the Commissioner of Customs.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the *Tariff Schedules of the United States Annotated (1987).*

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

**Committee for the Implementation of Textile Agreements**

May 20, 1987

*Commissioner of Customs, Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directives of May 19, 1972, as amended, and November 4, 1982, as amended, which established an export visa and exempt requirements for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the Republic of Korea.

Effective on May 27, 1987, the directives of May 19, 1972 and November 4, 1982 are further amended to include the following revised language:

"A shipment shall be visaed or certified by the placing of original stamped markings (the visa or certification) in blue ink on the front of the invoice (Special Customs Invoice Form 5515, successor document or commercial invoice when such form is used). Each visa and certification will include its number and date and the signature of the issuing official. The visa number shall be nine digits and letters, beginning with the numeric digit for the last digit of the date of export, the two character alpha county code specified by the International Organization for Standardization (ISO), and a six digit numeric serial number identifying the shipment; e.g., 7 KR123456). Each visa will also indicate the correct category of cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products involved; the appropriate quantity and unit or units; and the authorized signature of the official using the visa.

"Annex B lists all the exempt products which will require a 'Non-Quota, Exempt Certification.' Annex A lists all the part-category and merged category visas required for entry. Products covered by merged category quotas must be accompanied by either a merged category visa or the correct category visa corresponding to the actual shipment (e.g., quota category 338/339 may be visaed as 'Category 338/339' or if the shipment consists solely of Category 338 merchandise, the shipment may be visaed as 'Category 338' but not as 'Category 339.')"

The directives of May 19, 1972 and November 4, 1982 are further amended to include part and merged categories as listed in Annex A, as well as a list of exempt products in Annex B for goods exported on or after January 1, 1987.

Categories 640–DO, 640–DY, 640–OO and 640–OY are subject to this directive for goods exported on or after March 31, 1987. Goods exported prior to March 31, 1987 shall be subject to the January 28, 1987 directive which required visas for Categories 640–D, 640–DY, 640–O and 640–OY.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386 and July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## ANNEX A—PART CATEGORIES

| Category | TSUSA No. |
|---|---|
| 359–H (Headwear) | 702.0600 and 702.1200. |
| 359–O (Other) | All TSUSAs except 702.0600 and 702.1200. |
| 369–L (Luggage) | 706.3210, 706.3650 and 706.4111. |
| 369–O (Other) | All TSUSA's except 706.3210, 706.3650 and 706.4111. |
| 459–W (Woven headwear). | 702.7500 and 702.8000. |
| 459–O (Other) | All TSUSA's except 702.7500 and 702.8000. |

## ANNEX A—PART CATEGORIES—Continued

| Category | TSUSA No. |
|---|---|
| 605–C (Cordage) | 316.5500 and 316.5600. |
| 605–O (Other) | All TSUSA's except 316.5500 and 316.5600. |
| 614–W (Man-made fiber/Wool blended fabrics). | 338.1000, 338.1505, 338.1508, 338.1511, 338.1525, 338.1528, 338.1531, 338.1552, 338.1554, 338.1556, 338.1558, 338.1562, 338.1564, 338.1568 and 338.1572. |
| 614–O (Other) | All TSUSA's except 338.1000, 338.1505, 338.1508, 338.1511, 338.1525, 338.1528, 338.1531, 338.1552, 338.1554, 338.1556, 338.1558, 338.1562, 338.1564, 338.1568 and 338.1572. |
| 640–DY (Dress shirts made from fabric with two or more colors in the warp and/or the filling). | 381.3132 and 381.9535. |
| 640–DO (Dress shirts—other). | 381.3134 and 381.9540. |
| 640–OY (Other shirts made from fabric with two or more colors in the warp and/or filling). | 381.3142, 381.3152, 381.9547 and 381.9550. |
| 640–OO (Other shirts—other). | 381.3144, 381.3154, 381.3333, 381.3558, 381.6972, 381.6666, 381.9305, 381.9400, 381.9549, 381.9844 and 381.9968. |
| 641–Y (Blouses made from fabric with two or more colors in the warp and/or filling). | 384.9110 and 384.9120. |
| 641–O (Blouses—other). | All TSUSA's except 384.9110 and 384.9120. |

ANNEX A—PART CATEGORIES—Continued

| Category | TSUSA No. |
|---|---|
| 659–C (Coveralls) | 381.3325, 381.9905, 384.2205, 384.2530, 384.8806, 384.8807 and 384.9310. |
| 659–H (Headwear) | 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650. |
| 659–S (Swimwear) | 381.2340, 381.3170, 381.9100, 381.9570, 381.1920, 381.2339, 381.8300, 381.8400 and 381.9353. |
| 659–O (Other) | All TSUSA's except: (coveralls) 381.3325, 381.9905, 384.2205, 384.2530, 384.8806, 384.8807 and 384.9310 (headwear) 703.0510, 703.0520, 703.0530, 703.0540, 703.0550, 703.0560, 703.1000, 703.1610, 703.1620, 703.1630, 703.1640 and 703.1650 (Swimwear) 381.2340, 381.3170, 381.9100, 381.9570, 384.1920, 384.2339, 384.8300, 384.8400 and 384.9353. |
| 669–C (Cordage) | 348.0065, 348.0075, 348.0565 and 348.0575. |
| 669–F (Fishnets) | 355.4520 and 355.4530. |
| 669–P (Man-made fiber bags). | 365.5300. |
| 669–T (Tents and Tarpaulins). | 366.1105 and 369.6210. |

Annex B—Exempt Products Requiring Exempt Certification

1. *Chima*—The long, formless and ample skirt portion of the traditional Korean Chima-chogori dress set.

2. *Chogori*—The short halter-type blouse or top portion of the traditional Korean chima-chogori dress set.

3. *Bosun*—An ankle boot-type article, wholly of cloth, worn by Korean women indoors.

4. *Fabrics*—not to exceed 24x48 inches in size, containing hand-embroidered or handpainted Korean scenes, and used primarily as decorations or art objects.

5. *Handmade carpets*, i.e., in which the pile was inserted or knotted by hand and classified by the U.S. Customs Service under TSUSA Numbers 360.0800, 360.1015, 360.1515, 360.7800 or 360.7820.

6. *Korean-style handbags*—and other flatgoods of the type considered by the U.S. Custom Service to be classified as luggage: women's and children's handbags, and billfolds, card cases, coin purses, eyeglass cases and similar flatgoods.

7. *Martial Arts Uniforms.*

8. *Toys for animals.*

[1] In Category 670, only TSUSA numbers 706.3415, 706.4130 and 706.4135.

BILLING CODE 3510–DR–M

## DEPARTMENT OF DEFENSE

## GENERAL SERVICES ADMINISTRATION

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

**AGENCIES:** Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Notice.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning Price Redetermination.

**ADDRESS:** Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Mr. Frank Van Lierde, Office of Federal Acquisition and Regulatory Policy (202) 523–3781.

**SUPPLEMENTARY INFORMATION:**

**a. Purpose**

Fixed price contracts with prospective price redetermination provide for firm fixed prices for an initial period of the contract with prospective redetermination at stated times during performance. Fixed price contracts with retroactive price redetermination provide for a fixed ceiling price and retroactive price redetermination within the ceiling after completion of the contract. In order for the amounts of price adjustments to be determined, the firms performing under these contracts must provide information to the Government regarding their expenditures and anticipated costs.

**b. Annual Reporting Burden**

The annual reporting burden is estimated as follows: Respondents, *3,5000*; response per respondent, *2*; total annual responses, *7,000*; hours per response, *1*; and total burden hours, *7,000*.

**Obtaining Copies of Proposals**

Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0071, Price Redetermination.

Dated: May 11, 1987.

Margaret A. Willis,

*FAR Secretariat.*

**Federal Acquisition Regulation (FAR); Information Collection Under OMB Review**

**AGENCIES:** Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Notice.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning Contract Cost Principles and Procedures (FAR 31.205–2, Automatic Data Processing Equipment Leasing Costs).

**ADDRESS:** Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Mr. Frank Van Lierde, Office of Federal Acquisition and Regulatory Policy (202) 523–3781.

**SUPPLEMENTARY INFORMATION:**

**a. Purpose**

FAR Part 31, Contract Cost Principles and Procedures, contains cost principles and procedures for (a) the pricing of contracts, subcontracts, and modifications to contracts and subcontracts whenever cost analysis is performed and (b) the determination, negotiation, or allowance of costs when required by a contract clause. However, certain cost elements that are reviewed pursuant to this part, require supporting documentation. One of these involves a justification of automatic data processing equipment leasing costs under FAR 31.205–2.

**b. Annual Reporting Burden**

The annual reporting burden is estimated as follows: Respondents, *3,172;* responses per respondent, *1;* total annual responses, *3,172;* hours per response, *.5;* and total burden hours, *1,586.*

**Obtaining Copies of Proposals**

Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0072, Contract Cost Principles and Procedures.

Dated: May 11, 1987.

Margaret A. Willis,

*FAR Secretariat.*

**Federal Acquisition Regulation (FAR); Information Collection Under OMB Review**

**AGENCIES:** Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Notice.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning Indirect Cost Rates.

**ADDRESS:** Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Mr. Frank Van Lierde, Office of Federal Acquisition and Regulatory Policy (202) 523–3781.

**SUPPLEMENTARY INFORMATION:**

**a. Purpose**

The contractor's proposal of final indirect cost rates is necessary for the establishment of rates used to reimburse the contractor for the costs of performing under the contract. The supporting cost data are the cost accounting information normally prepared by organizations under sound management and accounting practices. The contractor's execution of Certificate of Current Cost or Pricing Data is required for defense contracts by Pub. L. 87–653 Truth in Negotiations Act (10 U.S.C. 2306(f)) and for nondefense contracts by Federal acquisition policy.

**b. Annual Reporting Burden**

The annual reporting burden is estimated as follows: Respondents, *600;* responses per respondent, *1;* total annual responses, *600;* hours per response, *1;* and total burden hours, *600.*

**Obtaining Copies of Proposals**

Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0069, Indirect Cost Rates.

Dated: May 11, 1987.

## Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

**AGENCIES:** Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

**ACTION:** Notice.

**SUMMARY:** Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning Economic Price Adjustment.

**ADDRESS:** Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Mr. Frank Van Lierde, Office of Federal Acquisition and Regulatory Policy (202) 523–3781.

**SUPPLEMENTARY INFORMATION:**

**a. Purpose**

A fixed-price contract with economic price adjustment provides for upward and downward revision of the stated contract price upon occurrence of specified contingencies. In order for the contracting officer to be aware of price changes, the firm must provide pertinent information to the Government.

**b. Annual Reporting Burden**

The annual reporting burden is estimated as follows: Respondents, *7,200;* response per respondent, *1;* total annual responses, *7,200;* hours per response, *.25;* and total burden hours, *1,800.*

**Obtaining Copies of Proposals**

Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0068, Economic Price Adjustment.

## Department of the Air Force

## USAF Scientific Advisory Board; Meeting

May 18, 1987.

The USAF Scientific Advisory Board Ad Hoc Committee on Airships will meet on June 23rd and 24th, 1987, at the Pentagon, room 5D982, from 8:00 am to 5:00 pm each day. The purpose of the meeting is to review, discuss and evaluate the suitability of airships to perform certain Air Force roles and missions.

This meeting will involve discussions of classified defense matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 202–697–4811.

Patsy J. Conner,

*Air Force Federal Register Liaison Officer.*

## Delivery of Personal Mail at Air Force Installations

**AGENCY:** Department of the Air Force, Department of Defense.

**ACTION:** Notice.

**SUMMARY:** This notice serves to advise the private sector of United States Air Force policy for delivering mail from private sources to individual members or employees of the Air Force. It only applies to mail received in quantities of 50 or more on the same day from the same mailer and addressed to individuals by name at their duty office. It does not apply to personal mail addressed to family housing areas on Air Force installations, to properly addressed mail sent to unit mail rooms, or mail intended for final delivery by the United States Postal Service. Additionally all mail, regardless of source or quantity, addressed to an Air Force operated Postal Service Center will be delivered as long as the name of the addressee and the receptacle (box) number are correct.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Major R. E. Hudson, Chief of Administrative Communications, Directorate of Information Management and Administration, Office of the Administrative Assistant to the Secretary of the Air Force, Washington, DC 20330–1000. Telephone (202) 695–2165.

**SUPPLEMENTARY INFORMATION:** The Air Force has a general policy that individual members and employees are not to use their office address for the receipt of personal mail. This policy has been difficult to enforce as it's often subjective if mail from private sources is intended for people as individuals or as officials of the Air Force. At times though it's obvious, due to the nature of the mail piece and the quantities received, that the mailing can be reasonably considered to be personal. Regardless, the Air Force attempts to deliver such mail if it contains a correct name and office address. Since the Air Force and not the Postal Service sorts and delivers mail internally on all Air Force installations, the receipt of large volumes of personal mail can tax available equipment and staffing resources. Several Air Force installations have recently requested permission to refuse to deliver large volumes of personal mail addressed to individuals at their office. In accordance with Department of Defense policy regarding installation management, the Air Force has approved these requests on an individual basis. At these installations unofficial mail (from private sources) addressed to individuals by name received in quantities of 50 or more on the same day from the same mailer may be refused and returned to the Postal Service. An exception was made for mailings of less than 50 pieces since such a low volume would have a negligible impact. Any mailer in the private sector intending to make such a mailing to an Air Force installation should first contact the Chief, Base Administration, at that installation to verify local delivery policy.

Patsy J. Conner,

*Air Force Federal Register Liaison Officer.*

## Department of the Army

## Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeeting: 17–18 June 1987.

Times of Meeting: 0800–1830, 17 June 1987; 0800–1500, 18 June 1987.

Place: 1745 Jeff Davis Highway, Crystal Square #4, Arlington, VA.

Agenda: The Army Science Board 1987 Summer Study on Lightening the Force will meet in executive session for the purpose of developing and discussing Subgroup and Panel recommendations, and for preparing and rehearsing the Panel's briefing of those recommendations. The first day will be devoted primarily to Subgroup preparation of their recommendations and presentation of those recommendations. On the second day the Subgroup presentations will be combined into an overall Panel presentation and plans will be developed for the report writing meeting in July. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters and proprietary information to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039 or 695–7046.

Sandra F. Genfeast,

*Administrative Assistant, Army Science Board.*

## Corps of Engineers, Department of The Army

### Final Selection; Fort Gibson Dam Units 5 and 6; Hydroelectric Power Project; Fort Gibson, OK

**AGENCY:** U.S. Army Corps of Engineers, DOD, Tulsa District, DOD.

**ACTION:** Notice of final selection of the Grand River Dam Authority as the financial sponsor and preference customer for the proposal Fort Gibson Dam Units 5 and 6, Hydroelectric Power Project, Fort Gibson, Oklahoma.

**SUMMARY:** The tentative selection of the Grand River Dam Authority (GRDA), an agency of the State of Oklahoma, as the financial sponsor and preference customer for the proposed Fort Gibson Dam Units 5 and 6, Hydroelectric Power Project, Fort Gibson, Oklahoma was announced in the **Federal Register**, 52 FR 8099 (1987). This announcement also stated that any subsequent proposals and/or applications for financial sponsorship or scheduling and receiving of power and energy from the project received prior to April 15, 1987, would be considered in the final selection process.

No subsequent proposals or applications for financial sponsorship or scheduling and receiving of power and energy from the project were received during the above mentioned public comment period which closed on April 15, 1987. Because no additional proposals were received and because the previously announced proposal submitted by GRDA met or exceeded all financial sponsor and preference criteria, notice is hereby given that GRDA is selected as the financial sponsor and preference customer for the proposed Fort Gibson Dam Units 5 and 6, Hydroelectric Power Project, Fort Gibson, Oklahoma.

**ADDRESSES:** For futher information about the proposed project design, construction, and financing, please contact:

Welden M. Gamel, Chief, Engineering Division, Tulsa District, Corps of Engineers, P.O. Box 61, Tulsa, OK 74121-0061.

For futher information about the proposed marketing of the power and energy from the proposal project, please contact:

Francis R. Gajan, Director, Power Marketing, Southwestern Power Administration, P. O. Box 1619, Tulsa, OK 74101–1619.

Alan G. Smith,

*LTC, Corps of Engineers, Acting District Engineer.*

### Research in Education of the Handicapped; Proposed Annual Funding Priority; Correction

**AGENCY:** Department of Education.

**ACTION:** Correction notice.

**SUMMARY:** On May 5, 1987, a notice of proposed annual funding priority for the Early Childhood Research Institute—Policy under the Research in Education of the Handicapped Program was published in the **Federal Register**. On page 16766, in the third column, the first sentence under period of award should read: "The Secretary will approve one cooperative agreement with a project period of 60 months subject to the requirements of 34 CFR 75.253(a) for continuation awards." Also, in the third column, the catalog of Federal domestic assistance number should read:

"(Catalog of Federal Domestic Assistance Number 84.023: Research in Education of the Handicapped Program)"

Dated: May 20, 1987.

Madeleine Will,

*Assistant Secretary, Office of Special Education and Rehabilitative Services.*

## National Council on Vocational Education; Public Meeting

**AGENCY:** National Council on Vocational Education.

**ACTION:** Notice of public meeting of the Council.

**SUMMARY:** This notice sets forth the proposed agenda of a forthcoming meeting of the National Council on Vocational Education. It also describes the functions of the Council. Notice of this meeting is required under section 10(a) (2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend.

**ADDRESS:** Arkansas Excelsior Hotel, Three Statehouse Plaza, Little Rock, Arkansas 72201 (501) 375–5000.

**DATE:** June 12, 1987 2:30–4:30 p.m.

**SUPPLEMENTARY INFORMATION:** The National Council on Vocational Education is established under section 104 of the Vocational Education Amendments of 1968, Pub. L. 90–576.

The Council is established to:

(A) Advise the President, the Congress, and the Secretary of Education concerning the administration of, preparation of general regulations for, and operation of, vocational education programs supported with assistance under this title;

(B) Review the administration and operation of vocational education programs under this title, including the effectiveness of such programs in meeting the purposes for which they are established and operated, make recommendations with respect thereto, and make annual reports of its findings and recommendations (including recommendations for changes in the provisions of this title) to the Secretary for transmittal to Congress; and

(C) Conduct independent evaluations of programs carried out under this title and publish and distribute the results thereof.

**AGENDA:** The proposed agenda will include: Project Catalyst, Trade Assoc/

Occupational Competencies, Other Council Business.

FOR FURTHER INFORMATION CONTACT: Dr. Joyce Winterton, Executive Director, 2000 L Street NW., Suite 580 Washington, DC 20036, (202) 634-6110.

Records are kept of all Council proceedings, and are available for public inspection at the above address from the hours of 9:00 a.m. to 4:30 p.m.

Signed at Washington, DC, May 20, 1987.

Joyce Winterton,

*Executive Director.*

## DEPARTMENT OF ENERGY

### Economic Regulatory Administration

[ERA Docket No. 87-09-NG]

### Tex-Ana Gas Co.; Order Granting Blanket Authorization To Import Natural Gas From Canada and/or Mexico

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of order granting blanket authorization to import natural gas from Canada and/or Mexico.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting blanket authorization to import natural gas from Canada and/or Mexico to Tex-Ana Gas Company, Gas Division of Agronomics, Inc. (Tex-Ana). The order issued in ERA Docket No. 87-09-NG authorizes Tex-Ana to import up to 100 Bcf of natural gas from Canada and/or Mexico over a two-year period for sale in the domestic spot market.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, 20585, (202) 586-9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal Holidays.

Issued in Washington, DC, on May 15, 1987.

Constance L. Buckley,

*Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.*

## Energy Information Administration

### Publication of Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) [Pub. L. 95-621] signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under Title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain portions of their acquisition costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate costs of gas to the industrial facility should not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II of the NGPA, section 204(e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and the high cost gas incremental pricing threshold which are to be effective June 1, 1987. These prices are based on the prices of alternative fuels.

FOR FURTHER INFORMATION CONTACT: Leroy Brown, Jr., Department of Energy, Energy Information Administration, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: (202) 586-6077

### Section I

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. FERC, by an Interim Rule issued on April 2, 1981, in Docket No. RM79-21, revised the methodology for calculating the monthly alternative fuel price ceilings for State regions. Under the revised methodology, the applicable alternative fuel price ceiling published for each of the contiguous States shall be the lower of the alternative fuel price ceiling for the State or the alternative fuel price ceiling for the multistate region in which the State is located.

The price ceiling is expressed in dollars per million British Thermal Units (BTU's). The method used to determine the price ceilings is described in Section III.

| State | Dollars per million BTU's |
|---|---|
| Alabama | 2.16 |
| Arizona [1] | 1.96 |
| Arkansas [1] | 2.80 |
| California [1] | 1.96 |
| Colorado [2] | 1.97 |
| Connecticut [1] | 2.00 |
| Delaware [1] | 2.11 |
| Florida | 2.14 |
| Georgia | 2.30 |
| Idaho [2] | 1.97 |
| Illinois | 1.97 |
| Indiana | 2.09 |
| Iowa [1] | 1.80 |
| Kansas [1] | 1.80 |
| Kentucky [1] | 2.13 |
| Louisiana | 2.57 |
| Maine | 1.97 |
| Maryland [1] | 2.11 |
| Massachusetts | 1.96 |
| Michigan | 2.12 |
| Minnesota | 1.68 |
| Mississippi | 2.21 |
| Missouri [1] | 1.80 |
| Montana [2] | 1.97 |
| Nebraska [1] | 1.80 |
| Nevada [1] | 1.96 |
| New Hampshire [1] | 2.00 |
| New Jersey [1] | 2.11 |
| New Mexico [2] | 2.80 |
| New York | 2.06 |
| North Carolina [1] | 2.34 |
| North Dakota [1] | 1.80 |
| Ohio | 1.96 |
| Oklahoma [1] | 2.80 |
| Oregon | 1.90 |
| Pennsylvania [1] | 2.11 |
| Rhode Island [1] | 2.00 |
| South Carolina [1] | 2.34 |
| South Dakota [1] | 1.80 |
| Tennessee [1] | 2.34 |
| Texas | 2.58 |
| Utah [2] | 1.97 |
| Vermont [1] | 2.00 |
| Virginia | 2.23 |
| Washington | 1.96 |
| West Virginia [1] | 2.13 |
| Wisconsin [1] | 2.13 |
| Wyoming [2] | 1.97 |

[1] Region based price as required by FERC Interim Rule, issued on April 2, 1981, in Docket No. RM-79-21.

[2] Region based price computed as the weighted average price of Regions E, F, G and H.

### Section II. Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during March 1987 was $20.61 per barrel. The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for

which data are collected and the beginning of the month for which the incremental pricing threshold becomes effective. The prices found in *Platt's Oilgram Price Report* are given for each trading day in the form of high and low prices for No. 2 fuel oil in Metropolitan New York and Northern New Jersey. A lag adjustment factor was calculated using the average of the low posted price for these two areas for the ten trading days ending May 14, 1987, and dividing that price by the corresponding average price computed from prices published by Platt's for the month of March 1987. This lag adjustment factor was applied to the March price yielding $21.17 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II, section 203(a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of BTU's by dividing by 5.8. Therefore, the incremental pricing threshold for high cost natural gas, effective June 1, 1987, is $4.74 per million BTU's.

## Section III. Method Used to Compute Price Ceilings

The FERC, by Order No. 50, issued on September 28, 1979, in Docket No. RM79–21, established the basis for determining the price ceilings required by the NGPA. FERC also, by Order No. 167, issued in Docket No. RM81–27 on July 24, 1981, made permanent the rule that established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings. In addition, the FERC, by Order No. 181, issued on November 6, 1981, in Docket No. RM81–28, established that price ceilings should be published for only the 48 contiguous States on a permanent basis.

### *A. Data Collected*

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1 percent sulfur content by weight) residual fuel oil: for each selling price, the number of gallons sold to large industrial users in the months of January 1987, February 1987, and March 1987.[1] All reports of volume sold and price were identified by the State into which the oil was sold.

[1] Large Industrial User—A person/firm which purchases No. 6 fuel oil in quantities of 4,000 gallons or greater for consumption in a business, including the space heating of the business premises. Electric utilities, governmental bodies (Federal, State, or Local), and the military are excluded.

### *B. Method Used to Determine Alternative Price Ceilings*

#### (1) Calculation of Volume-Weighted Average Price

The prices which will become effective June 1, 1987, (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, January 1987, February 1987, and March 1987. Reported prices for sales in January 1987 were adjusted by the percent change in the nationwide volume-weighted average price from January 1987 to March 1987. Prices for February 1987 were similarly adjusted by the percent change in the nationwide volume-weighted average price from February 1987 to March 1987. The volume-weighted 3-month average of the adjusted January 1987 and February 1987, and the reported March 1987 prices were then computed for each State.

#### (2) Adjustment for Price Variation

States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section III.B.(1) above) for each State was adjusted downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

#### (3) Calculation of Ceiling Price

The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B(1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted average price (as calculated in Section III.B(2)) was compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State alternative fuel price ceiling base. The State's alternative fuel price ceiling base was compared to the alternative fuel price ceiling base for the multistate region in which the State is located and the lower of these two prices was selected as the final alternative fuel price ceiling base for the State. The appropriate lag adjustment factor (as discussed in Section III.B.4) was then applied to the alternative fuel price ceiling base. The alternative fuel price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million BTU's).

There were insufficient sales reported in Region G for the months of January 1987, February 1987, and March 1987. The alternative fuel price ceilings for the States in Region G were determined by calculating the volume-weighted average price ceilings for Region E, Region F, Region G, and Region H.

#### (4) Lag Adjustment

The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* are given for each trading day in the form of high and low prices for No. 6 residual oil in 19 cities throughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 high sulfur residual fuel oil for the ten trading days ending May 14, 1987, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of March 1987. A regional lag adjustment factor was similarly calculated for four regions. These are: one for FERC Regions A and B combined; one for FERC Region C; one for FERC Regions D, E, and G combined; and one for FERC Regions F and H combined. The lower of the national or regional lag factor was then applied to the alternative fuel price ceiling for each State in a given region as calculated in Section III.B.(3).

## Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

| *Region A* | *Region B* |
|---|---|
| Connecticut | Delaware |
| Maine | Maryland |

| | |
|---|---|
| Massachusetts | New Jersey |
| New Hampshire | New York |
| Rhode Island | Pennsylvania |
| Vermont | |
| *Region C* | *Region D* |
| Alabama | Illinois |
| Florida | Indiana |
| Georgia | Kentucky |
| Mississippi | Michigan |
| North Carolina | Ohio |
| South Carolina | West Virginia |
| Tennessee | Wisconsin |
| Virginia | |
| *Region E* | *Region F* |
| Iowa | Arkansas |
| Kansas | Louisiana |
| Missouri | New Mexico |
| Minnesota | Oklahoma |
| Nebraska | Texas |
| North Dakota | |
| South Dakota | |
| *Region G* | *Region H* |
| Colorado | Arizona |
| Idaho | California |
| Montana | Nevada |
| Utah | Oregon |
| Wyoming | Washington |

Issued in Washington, DC, May 19, 1987.

Dr. H. A. Merklein,

*Administrator, Energy Information Administration.*

## Federal Energy Regulatory Commission

[Docket No. TA87-4-21-004]

## Columbia Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

May 20, 1987.

Take notice that Columbia Gas Transmission Corporation (Columbia) on May 4, 1987, tendered for filing the following proposed changes to its FERC Gas Tariff, Original Volume No. 1, to be effective April 1, 1987:

Substitute One hundred and fifteenth Revised Sheet No. 16
Substitute Seventh Revised Sheet No. 16A2
Substitute Forty-eighth Revised Sheet No. 64
Substitute Thirty-second Revised Sheet No. 64A

Columbia states the foregoing tariff sheets are being filed in compliance with Ordering Paragraph (D) of the Commission's Order issued March 30, 1987, which directs Columbia to refile PGA tariff sheets to be effective April 1, 1987 which reflect the total elimination of the $18,092,620 amount contained in the February 27, 1987 PGA filing attributable to the amortization of producer payments. The result of this adjustment is a reduction to the sales commodity rate of 8.34 cent per dth, which together with a reduction in the projected cost of certain other purchased gas results in a reduction in the sales commodity rate of 8.60 cents per dth, as reflected on Substitute One hundred and fifteenth Revised Sheet No. 16.

Columbia further states that in the event that the Commission grants rehearing of its March 30 order in Columbia's PGA filing and determines that the subject payments constitute gas costs and may be properly included within the PGA, Columbia reserves the right to adjust its rates effective April 1, 1987.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before May 27, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of Columbia's filings are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

[FR Doc. 87-11870 Filed 5-22-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER87-365.000]

## Southern California Edison Co.; Filing

May 20, 1987.

Take notice that on March 31, 1987 Southern California Edison Company ("Edison") tendered for filing copies of revised tariff sheets reflecting reduced Edison resale rates due to the Tax Reform Act of 1986. Edison requests that these rates be made effective January 1, 1987, in accordance with the terms of the Settlement Agreement in Docket No. ER86-271-000.

Edison states that its filing is being made pursuant to Settlement Agreement in Docket No. ER86-271-000.

Copies of Edison's letter and all enclosures have been served on all of tis customers and other intervening parties in Docket No. ER86-271-000.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 of 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests shall be filed on or before May 28, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

*Secretary.*

## Southwestern Power Administration

## Final Selection; Fort Gibson Dam Units 5 and 6, Hydroelectric Power Project, Fort Gibson, OK

**AGENCY:** Department of Energy, Southwestern Power Administration.

**ACTION:** Notice of final selection of the Grand River Dam Authority as the financial sponsor and preference customer for the proposed Fort Gibson Dam Units 5 and 6, Hydroelectric Power Project, Fort Gibson, Oklahoma.

**SUMMARY:** The tentative selection of the Grand River Dam Authority (GRDA), an agency of the State of Oklahoma, as the financial sponsor and preference customer for the proposed Fort Gibson Dam Units 5 and 6, Hydroelectric Power Project, Fort Gibson, Oklahoma was announced in the **Federal Register**, 52 FR 8523 (1987). This announcement also stated that any subsequent proposals and/or applications for financial sponsorship or scheduling and receiving of power and energy from the project received prior to April 17, 1987, would be considered in the final selection process.

One letter requesting additional information was received. Three letters were received supporting the selection of GRDA. No subsequent proposals or applications for financial sponsorship or scheduling and receiving of power and energy from the project were received during the above mentioned public comment period which closed on April 17, 1987. Because no additional proposals were received and because the previously announced proposal submitted by GRDA met or exceeded all financial sponsor and preference criteria, notice is hereby given that GRDA is selected as the financial

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-3284-7]

### Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the Federal Register a notice of proposed information collection requests (ICRs) that EPA has forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The ICRs that follow are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Patricia Minami, (202) 382-2712 (FTS 382-2712) or Jackie Rivers, (202) 382-2740 (FTS 382-2740).

### Office of Pesticides and Toxic Substances

Title: TSCA Section 4 Test Rules and Exemptions (EPA ICR #1139). (This is an extension without change of a currently approved collection.)

Abstract: under TSCA section 4, EPA issues test rules and consent orders that require manufacturers and processors of chemicals to test their products and report the results to the Agency. EPA requires this testing whenever there is insufficient data with which to evaluate a chemical's effects on human health and the environment. Those subject to this section may apply for an exemption whenever another party performs the testing.

Frequency: Testing performed as required; test reports submitted semiannually.

Estimated Annual Burden: 31,823 hours.

Title: Section 24(c) Special Local Needs Registration (EPA ICR #0595). (Extension of an existing collection without change.)

Abstract: In order to meet special local needs, a State may register additional uses for Federally-registered pesticides under section 24(c) of FIFRA. An applicant must complete EPA's form "Application for Notification of State Registration of a Pesticide to Meet a Special Local Need." Once it approves a form, the State sends it to EPA, which reviews it for compliance with FIFRA and the Federal Food, Drug, and Cosmetic Act.

Respondents: Individuals or businesses using Federally-registered pesticides to meet special local needs.

Estimated Annual Burden: 2,490 hours.

Title: Pretest of section 313 Toxic Chemical Release Inventory Form Under SARA, Title III ((EPA ICR #1366). (This is a new collection.)

Abstract: Under section 313, owners or operators of facilities in SIC codes 20-39 must report the release of toxic chemicals. EPA must prepare a toxic chemical release form for reporting releases. This pretest of 40 selected facilities subject to 313 reporting will identify problems in reading, understanding, and completing the form.

Respondents: Forty facilities subject to section 313 reporting.

Estimated Annual Burden: 3,120 hours.

* * * * *

### Agency PRA Clearance Requests Completed by OMB

None received since the last Federal Register notice.

BILLING CODE 6560-50-M

[FRL-3208-4]

### California Marine Sanitation Device Standard; Receipt of Petition

Notice is hereby given that a petition has been received from the State of California requesting a determination by the Assistant Administrator for Water, Environmental Protection Agency, pursuant to section 312(f)(3) of Pub. L. 92-500, as amendd by Pub. L. 95-217, that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for the waters of Richardson Bay, an embayment on the northern half of San Francisco Bay. The waters of Richardson Bay covered by this petition are defined as that portion of Richardson Bay bounded by the shore and by a line bearing 257 degrees from Peninsula Point to the shore at Sausalito.

The State of California has certified that there are six pumpout facilities available to service vessels in Richardson Bay. All six facilities are on the western shore of Richardson Bay, and discharge directly to sewers served by the Sausalito-Marin City Sanitary District's sewage treatment plant. The six pumpout facilities are located at the following locations, and provide service on the specified days at the specified times. Also included in the following information is the cost per pumpout and the controlling depth at each facility for vessels that may be excluded

(1) *Kappas Yacht Harbor*—Located just outside the city limits of Sausalito, at the end of Gate Six Road.

—One pumpout facility
—Available seven days a week, 24 hours a day
—Cost per pumpout: $1.00
—Can accept vessels with a draft of up to seven feet

(2) *Clipper Yacht Harbor*—located on the fuel dock in Clipper Basin No. 2, near the end of Harbor Drive in Sausalito.

—One pumpout facility
—Available seven days a week, 24 hours a day
—Cost per pumpout: Free
—Can accept vessels with a draft of up to 10 feet

BEST COPY AVAILABLE

(3) *Marina Plaza Marina*—located in Sausalito, off the foot of Testa Street.

—One pumpout facility
—Available by appointment seven days a week, 24 hours a day.
—Cost per pumpout: $4.00
—Can accept vessels with a draft of up to 10 feet.

(4) *Pelican Yacht Harbor*—located in Sausalito, near the foot of Johnson Street.

—One pumpout facility
—Available Tuesday through Saturday, 9:00 A.M. to 5:00 P.M.
—Cost per pumpout: $10.00–15.00 for small holding tanks, and $20.00–25.00 for larger tanks.
—Can accept vessels with a draft of up to 10 feet.

(5) *Sausalito Yacht Harbor*—located in Sausalito, alongside Bay Street.

—Two pumpout facilities
—Available Monday through Friday, 9:00 a.m. to 3:00 p.m. throughout the year, and additionally on Sundays from April to October, from 3:00 p.m. to 7:00 p.m.
—Cost per pumpout: Free to marina tenants, or for those vessel owners who can operate the facility without assistance. Those vessel owners who require assistance in the use of the facility are charged at a rate of $45.00 per hour for the time of the marine personnel.

The State of California has also certified that there are presently 1852 recreational vessel berths in Richardson Bay, which results in approximately 310 vessel berths per pumpout facility. Further, of the 1852 vessel berths reported, from two to six percent of these are occupied as permanent residences. The State of California has additionally certified that the staff of the San Francisco Regional Board has determined that each pumpout facility can serve 300 vessel berths, and that this number is sufficient to handle current peak demand. The State of California has further certified that 550 houseboats are berthed in Richardson Bay, and that of these, approximately 450 currently have sewer connections. In addition, the State of California has certified that approximately 120 vessels anchor in Richardson Bay during the summer months.

Finally, the State of California has certified that a survey conducted by the San Francisco Regional Water Quality Control Board revealed that the average pumpout time at the six identified pumpout facilities varied from three to fifteen minutes, depending primarily on the tank size and the pumping rate. The State of California also certified that pumpout facility operators indicated that there was typically no problem in meeting the demand for service.

Comments and views regarding this Notice of Receipt may be filed within 30 days of the date of publication of this notice. Any such communications, or requests for information, should be addressed to Jonathan E. Amson, Marine Operations Division (WH-556F), Office of Marine and Estuarine Protection, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Mr. Amson's telephone number is 202/475–7125.

Dated: April 28, 1987.

## FEDERAL COMMUNICATIONS COMMISSION

[Gen. Docket No. 83–869; FCC 87–141]

## Multipoint Distribution Service (MDS); Interpretation of Commission Declaratory Ruling and Order

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion, Declaratory Ruling and Order.

SUMMARY: The Commission has granted, in part, a Petition for Declaratory Ruling filed by Multipoint Distribution Systems, Inc. in order to clarify that MDS common carriers may refuse to allow their facilities to be used to transmit obscene or otherwise unlawful material.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Sharon B. Kelley, Office of General Counsel, (202) 632–6990.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Memorandum Opinion, Declaratory Ruling and Order* in Gen. Docket No. 83–869: In the Matter of Enforcement of Prohibitions Against the Use of Common Carriers for the Transmission of Obscene Materials. Adopted April 13, 1987, and released May 15, 1987.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

*Summary of Memorandum Opinion, Declaratory Ruling and Order*

1. In this proceeding, the Commission addressed the issue of whether multipoint distribution service (MDS) common carriers may, consistent with the Communications Act (Act), Commission regulations and policies, deny customers the use of their facilities for unlawful purposes, which includes the transmission of obscene materials. This issue arose from a Petition for a Declaratory Ruling (Petition) filed with the Commission by Multipoint Distribution Systems, Inc. (MDSI). MDSI alleged that its customer, San Antonio Home Entertainment, breached their Programming Agreement by distributing certain "indecent and extremely offensive" unrated movies over MDSI's facilities in violation of a prohibition contained therein. Although the Programming Agreement between these parties has since been terminated, the Commission relied on the facts of this case to illustrate the general principles that MDS common carriers are expected to follow should they include similar provisions governing obscenity in their tariffs filed with the Commission.

2. While acknowledging that common carriers have a general statutory obligation to hold out their services to the public on a first-come, first-served basis without regard to content of transmissions, the Commission recognized that most authorities follow an exception to this general rule. The Commission followed such an exception in a previous case, *Humane Society* v. *Western Union, International, Inc.*, 30 FCC 2d 711, 713 (1971), in which it observed that satellite common carriers have the right to prohibit the use of their facilities for illegal purposes. In that case, the Commission emphasized that the proper course of action by a common carrier who desires to prohibit the carriage of illegal material would be to petition the "affected jurisdictions" [e.g., United States Attorney] for a determination as to whether the programming "is or would be, in violation of local, state or federal law." *Id.* The Commission concluded therein that if the governing authority determines that the transmissions are unlawful, the common carrier could take steps to prevent such transmissions over its facilities. In this proceeding, the Commission extended the application of this ruling to MDS common carriers.

3. The Commission also addressed the question of whether an MDS common carrier may face liability if its facilities are being used for illegal purposes. In response to this question, the

Commission applied to MDS common carriers the same law applicable to telephone common carriers. It held that before any liability is likely to attach to an MDS common carrier for carrying unlawful transmissions, the carrier, to a high degree, must be actually involved in or have actual notice of the illegal use, and it must also fail to take steps to prevent the illegal use. At the same time, however, the Commission was reluctant to place MDS common carriers in the uncertain position of watching all programming and assessing, in each instance, whether to engage the legal machinery for interpretive rulings under *Humane Society* procedures. The Commission therefore concluded that to the extent that an MDS common carrier confines itself to operation under § 21.903(b)(1) of the Commission's rules and the Act, it will not be subject to adverse agency action, unless the MDS common carrier has actual notice that a program has been adjudicated obscene.

4. The Commission applied its analysis to the facts of MDSI's Petition, but found insufficient evidence to conclude that all x-rated or unrated movies are necessarily obscene. The Commission therefore concluded that the prohibition contained in the Programming Agreement went beyond merely forbidding the use of MDSI's facilities for the transmission of illegal material. The Commission stated that it would reject this type of prohibition from a tariff filing, absent a strong showing that such a prohibition would ban only the transmission of illegal material. An overly broad prohibition would be inconsistent with a carrier's obligation under FCC rules and the Act to offer service without substantial involvement in influencing the content of material transmitted over its facilities.

5. In addition, the Commission stated that its ruling is not intended to prohibit MDS common carriers from taking unilateral action to restrain the transmission of program content that such carriers believe to be unlawful. The Commission concluded that MDS common carriers may prohibit such transmissions without first following the procedures articulated in *Humane Society* and securing a ruling from the appropriate legal authority as to whether or not a program is obscene, but cautioned that if such a ruling is not obtained the carrier might later be subject to legal action if the transmissions in question were found to be lawful.

6. Accordingly, *it is ordered* that the Petition for Declaratory Ruling filed by *MDSI is granted* to the limited extent indicated herein and in all other respects *is Denied*.

7. *It is further ordered* that this proceeding *is terminated* to the extent indicated herein.

Federal Communications Commission.

William J. Tricarico,

*Secretary.*

## FEDERAL RESERVE SYSTEM

**Acquisitions of Shares of Banks or Bank Holding Companies; Royce Flaming, et al.**

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than June 10, 1987.

A. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Royce Flaming* and Wilda Flaming, Cherokee, Oklahoma; to acquire 4.94 percent of the voting shares of Alfalfa County Bancshares, Inc., Cherokee, Oklahoma, and thereby indirectly acquire Alfalfa County Bank, Cherokee, Oklahoma.

2. *Leland Burke Peterson*, Healdton, Oklahoma; to acquire 100 percent of the voting shares of First Healdton Bancorproation, Inc., Healdton, Oklahoma, and thereby indirectly acquire Bank of Healdton, Healdton, Oklahoma.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Roland Walters*, Camp Verde, Texas; to acquire 74.80 percent of the voting shares of Bank of Kerrville, Kerrville, Texas.

C. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101Market Street, San Francisco, California 94105:

1. *David F. Stein*, Laguna Beach, California; to acquire 1140 percent of the voting shares of PNB Financial Group, Newport Beach, California, and thereby indirectly acquire Pacific National Bank, Newport Beach, California.

Board of Governors of the Federal Reserve System, May 20,1987.

**Formations of; Acquisitions by; and Mergers of Bank Holding Companies; Merchants National Corp., et al.**

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than June 15, 1987.

A. Federal Reserve Bank of Chicago (David S. Epstein, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Merchants National Corporation*, Indianapolis, Indiana; to merge with Ohio Valley Bancorp, Madison, Indiana, and thereby indirectly acquire Madison Bank and Trust Company, Madison, Indiana.

B. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Midlothian Bank Shares Corporation*, Midlothian, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Midlothian National Bank, Midlothian, Texas. Comments on this application must be received by June 18, 1987.

C. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *CommerceBancorp*, Newport Beach, California; to become a bank holding company by acquiring 100 percent of the voting shares of CommerceBank, Newport Beach, California.

Board of Governors of the Federal Reserve System, May 20, 1987.

## Application To Engage de Novo in Permissible Nonbanking Activities; Valley Capital Corp.

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consumation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 11, 1987.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Valley Capital Corporation*, Las Vegas, Nevada; to engage *de novo* through its subsidiary, Valley Electronic Services, Inc., Las Vegas, Nevada, in data processing and transmission activities and the issuance of money orders pursuant to § 225.25 (b)(7) and (b)(12) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 20, 1987.

## GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR A-40, Supp. 25]

## Federal Travel Regulations

**AGENCY:** Federal Supply Service, GSA.

**ACTION:** Notice of changes to the Federal Travel Regulations.

**SUMMARY:** GSA has issued GSA Bulletin FPMR A-40, Supplement 25, to transmit a change to the Federal Travel Regulations (FTR), FPMR 101-7, implementing new procedures and tax tables for computing the relocation income tax (RIT) allowance.

**EFFECTIVE DATE:** The revised provisions transmitted by Supplement 25 are effective January 1, 1987.

**FOR FURTHER INFORMATION CONTACT:** Staff members, Regulations and Policy Division, FTS 557-1253, 557-1256, or 557-7525 (for non-FTS use AC 703).

**SUPPLEMENTARY INFORMATION:** GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more, a major increase in costs to consumers or others, or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least cost to society.

### Background Information

Pub. L. 98-151 (97 Stat. 977), November 14, 1983, and Pub. L. 98-473 (98 Stat. 1969), October 12, 1984, amended the statutory authority for reimbursement of the employee relocation expenses contained in Subchapter II of Chapter 57, Title 5, United States Code, by adding a new section 5724b which authorizes agencies to reimburse transferred employees for the additional income tax liability incurred by them as a result of certain relocation expense reimbursements. Policies and procedures for the calculation and payment of a relocation income tax (RIT) allowance were implemented in the FTR, Chapter 2, Part 11 effective for transferred employees whose effective date of transfer was on or after November 14, 1983.

The Tax Reform Act of 1986 (Pub. L. 99-515, 100 Stat. 2085), October 22, 1986, created substantial changes to the Federal tax rate structure for 1987 and subsequent tax years. Consequently, new procedures for calculating the RIT allowance were developed in coordination with the Internal Revenue Service (IRS) and are incorporated in the FTR along with specifically developed tax tables for 1986 and 1987.

### Notice to Agencies

The new procedures transmitted by Supplement 25 require the use of two combined marginal tax rates (CMTR's) to calculate any RIT allowance claim paid in 1987—one CMTR for Year 2 (1987) using the Federal tax table for 1987 contained in Appendix 2-11.C and one CMTR for Year 1 using the appropriate Federal tax table contained in Appendix 2-11.A that is applicable for the calendar year (Year 1) during which the employee received reimbursement for relocation expenses.

The procedures (and formula) in effect prior to January 1, 1987, *shall not* be used for RIT allowances paid in 1987 even though the related moving expense reimbursements may have been paid to an eligible employee in prior tax years 1983–1985. For example, if an employee received reimbursement for moving expenses which were reported as income for calendar year 1984 and has not been paid a RIT allowance until 1987, the 1987 Federal tax table will be used in the CMTR formula for 1987 (Year 2) and the 1984 Federal tax table will be used in the CMTR formula for Year 1 (1984).

**Explanation of Changes**

Supplement 25 transmits an amendment to the FTR to provide new procedures and formulas for calculating the RIT allowance, to include a Federal tax table for calendar year 1987, and Federal and State tax tables for calendar year 1986. Several editorial and clarifying changes also have been made throughout FTR Part 2–11; consequently, the entire Part 2–11 is reissued except for the examples in Figures 2–11.8a, b and c (pages 2–153 through 2–154.2) and the Federal and State tax tables for calendar years 1983 through 1985 in Appendices 2–11.A and B. These examples and tax tables are to be retained in the regulation.

Accordingly, the FTR are amended as follows:

**CHAPTER 2. RELOCATION ALLOWANCES**

1. Authority. Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); 5 U.S.C. 5707; E.O. 11609, July 22, 1971, and E.O. 12486, February 27, 1984.

2. Chapter 2, Part 11 of the FTR is amended by revising the text of Part 11 and Example 4 in Figure 2–11.8d to read as follows:

**Part 11. Relocation Income Tax (RIT) Allowance**

*2–11.1. Authority*

Payment of a relocation income tax (RIT) allowance is authorized to reimburse eligible transferred employees for substantially all of the additional Federal, State, and local income taxes incurred by the employee, or by the employee and spouse if a joint tax return is filed, as a result of certain travel and transportation expenses and relocation allowances which are furnished in kind, or for which reimbursement or an allowance is provided by the Government (5 U.S.C. 5724b, as amended). The RIT allowance shall be calculated and paid as provided in this Part 11.

*2–11.2. Coverage*

a. Eligible Employees

Payment of a RIT allowance is authorized for employees transferred on or after November 14, 1983, in the interest of the Government from one official station to another for permanent duty. The effective date of an employee's transfer is the date the employee reports for duty at the new official station as provided in paragraph 2–1.4j.

b. Individuals Not Covered

The provisions of this Part 11 are not applicable to the following individuals or employees:

(1) New appointees as defined in 2–1.5e, including those covered under 2–1.5f (i.e., new appointees to shortage category or Senior Executive Service positions, and new Presidential appointees) and 2–1.5g(2) (i.e., new appointees to overseas posts of duty);

(2) Employees assigned under the Government Employees Training Act (see 5 U.S.C. 4109); or

(3) Employees returning from overseas assignments for the purpose of separation.

*2–11.3. Types of Moving Expenses or Allowances Covered and General Limitations*

The RIT allowance is by law limited as to the types of moving expenses that can be covered. The law authorizes reimbursement of additional income taxes resulting from certain moving expenses furnished in kind or for which reimbursement or an allowance is provided to the transferred employee by the Government. However, such moving expenses are covered by the RIT allowance only to the extent that they are (1) actually paid or incurred, and (2) are not allowable as a moving expense deduction for tax purposes. The types of expenses or allowances listed in a through i, below, are covered by the RIT allowance within the limitations discussed.

a. En Route Travel

Travel (including per diem) and transportation expenses of the transferred employee and immediate family for en route travel from the old official station to the new official station. (See FTR Part 2–2.)

b. Household Goods Shipment

Transportation (including temporary storage) expenses for movement of household goods from the old official station to the new official station. (See FTR Part 2–8.)

c. Nontemporary Storage Expenses

Allowable expenses for nontemporary storage of household goods belonging to an employee transferred on or after November 14, 1983, through October 11, 1984, to an isolated location in the conterminous United States. (See FTR 2–9.1.) Nontemporary storage expenses are not covered by the RIT allowance for transfers on or after October 12, 1984 (see 2–11.4c).

d. Mobile Home Movement

Expenses for the movement of a mobile home for use as a residence when movement is authorized instead of shipment and temporary storage of household goods. (See FTR Part 2–7.)

e. Househunting Trip

Travel (including per diem) and transportation expenses of the employee and spouse for one round trip to the new official station to seek permanent residence quarters. (See FTR Part 2–4.)

f. Temporary Quarters

Subsistence expenses of the employee and immediate family during occupancy of temporary quarters. (See FTR Part 2–5.)

g. Real Estate Expenses

Allowable expenses for the sale of the residence (or expenses of settlement of an unexpired lease) at the old official station and for purchase of a home at the new official station for which reimbursement is received by the employee. (See FTR Part 2–6.)

h. Miscellaneous Expense Allowance

A miscellaneous expense allowance for the purpose of defraying certain expenses associated with discontinuing a residence at one location and establishing a residence at the new location in connection with an authorized or approved permanent change of station. (See FTR 2–3.)

i. Relocation Services

Payments, or portions thereof, made to a relocation service company for services provided to a transferred employee (see FTR Part 2–12), subject to the conditions stated below and within the general limitations of this paragraph applicable to other covered expenses.

(1) *For employees transferred on or after November 14, 1983, through October 11, 1984.* The amount of a broker's fee or real estate commission, or other real estate sales transaction expenses which normally are reimbursable to the employee under FTR 2–6.2 but have been paid by a relocation service company incident to

an assigned sale from the employee, provided that such payments constitute income to the employee. For the purposes of this regulation, an assigned sale occurs when an employee obtains a binding agreement for the sale of his/her residence and assigns the inherent rights and obligations of that agreement to a relocation company that is providing services under contract with the employing agency. For example, if the employee incurs an obligation to pay a specified broker's fee or real estate commission under the terms of the sales agreement, this obligation along with the sales agreement is assigned to the relocation company and may, upon payment of the obligation by the relocation company, constitute income to the employee. (See FTR 2–12.7 entitled "Income tax consequences of using relocation companies.")

(2) *For employees transferred on or after October 12, 1984.* Expenses paid by a relocation company providing relocation services to the transferred employee pursuant to a contract with the employing agency to the extent such payments constitute income to the employee. (See FTR 2–12.7.)

Note.—See FTR reference shown in parentheses for reimbursement provisions for each allowance listed in a through i, above. See Section 217 of the Internal Revenue Code (IRC) and Internal Revenue Service (IRS) Publication 521 entitled "Moving Expenses" and appropriate State and local tax authority publications for additional information on the taxability of moving expense reimbursements and the allowable tax deductions for moving expenses.

*2–11.4. Exclusions From Coverage*

The provisions of this Part 11 are not applicable to the following:

a. Any tax liability that may result from payments by the Government to relocation companies on behalf of employees transferred on or after November 14, 1983, through October 11, 1984, other than the payments for those expenses specified in 2–11.3i(1).

b. Any tax liability incurred for local income taxes other than city income tax as a result of moving expense reimbursements for employees transferred on or after November 14, 1983, through October 11, 1984. (See definition in 2–11.5b.)

c. Any tax liability resulting from reimbursed expenses for any nontemporary storage of household goods except as specifically provided for in 2–11.3c.

d. Any tax liability resulting from paid or reimbursed expenses for shipment of a privately owned automobile.

e. Any tax liability resulting from an excess of reimbursed amounts over the actual expense paid or incurred. For instance, if an employee's reimbursement for the movement of household goods is based on the commuted rate schedule and his/her actual moving expenses are less than the reimbursement, the tax liability resulting from the difference is not covered by the RIT allowance. (See 2–11.8c(2)(e).)

f. Any tax liability resulting from an employee's decision not to deduct moving expenses for which a tax deduction is allowable under the Internal Revenue Code or appropriate State and local tax codes. (See 2–11.8b(1) and 2–11.8c(2).)

*2–11.5. Definitions and Discussion of Terms*

For purposes of this part, the following definitions will apply:

a. State Income Tax

A tax imposed by a State tax authority, that is deductible for Federal income tax purposes as a State income tax under section 164(a)(3) of the IRC. "State" means any one of the several States of the United States and the District of Columbia.

b. Local Income Tax

A tax imposed by a recognized city or county tax authority, that is deductible for Federal income tax purposes as a local (city or county) income tax under section 164(a)(3) of the IRC; except, that for employees transferred on or after November 14, 1983, through October 11, 1984, local income tax shall be construed to mean only city income tax. For purposes of this regulation:

(1) "City" means any unit of general local government which is classified as a municipality by the Bureau of the Census, or which is a town or township that in the determination of the Secretary of the Treasury possesses powers and performs functions comparable to those associated with municipalities, is closely settled, and contains within its boundaries no incorporated places as defined by the Bureau of the Census (31 CFR 215.2(b)(1)).

(2) "County" means any unit of local general government which is classified as a county by the Bureau of the Census (31 CFR 215.2(e)).

c. Covered Moving Expense Reimbursements or Covered Reimbursements

As used herein, these terms include those moving expenses listed in 2–11.3 as being covered by the RIT allowance and which may be furnished in kind, or for which reimbursement or an allowance is provided by the Government.

d. Covered Taxable Reimbursements

Covered moving expense reimbursements minus the tax deductions allowable under the IRC and IRS regulations for moving expenses. (See determination in 2–11.8c.)

e. Year 1 or Reimbursement Year

The calendar year in which reimbursement or payment for moving expenses is made to, or for, the employee under the provisions of the FTR, Chapter 2. All or part of these reimbursements (see 2–11.6) are reported to the IRS as income (wages, salary or other compensation) to the employee for that tax year under the provisions of the IRC and IRS regulations, and are subject to Federal tax withholding. The withholding tax allowance (WTA) (see 1, below) is calculated in Year 1, to cover the employee's Federal tax withholding obligations each time covered moving expense reimbursements are made that result in a Federal tax withholding obligation. For purposes of this regulation, an advance of funds for any of the covered moving expenses is not considered to be a reimbursement or a payment until the travel voucher settlement for such expenses takes place. If an employee's reimbursement for moving expenses is spread over more than one year, he/she will have more than one Year 1.

f. Year 2

The calendar year in which a claim for the RIT allowance is paid.

(1) Generally, Year 2 will be the calendar year immediately following Year 1 and in which the employee files a tax return reflecting his/her tax liability for income received in Year 1. However, there may be instances where the employee's claims submission and/or payment of the RIT allowance is delayed beyond the calendar year immediately following Year 1. (Year 1 will always be the calendar year that reimbursements are received; see e, above.) Year 2 will be the calendar year in which the RIT allowance is actually paid.

(2) The RIT allowance is calculated in Year 2 and paid to cover the additional tax liability (resulting from moving expense reimbursements received in Year 1) not covered by the WTA paid in Year 1. If an employee's covered taxable reimbursements are spread over more than one year, he/she will have more than one Year 2.

g. Federal Withholding Tax Rate (FWTR)

The tax rate applied to incremental income to determine the amount to be withheld for Federal income tax from salary or other compensation such as moving expense reimbursements. Because moving expense reimbursements constitute supplemental wages for Federal income tax purposes, the 20 percent flat rate of withholding is generally applicable to such reimbursements (see 2-11.7c). Agencies should refer to the Treasury Fiscal Requirements Manual, TFRM 3-5000, and applicable IRS regulations for complete and up-to-date information on this subject.

h. Earned Income

For purpose of the RIT allowance, "earned income" shall include only the gross compensation (salary, wages, or other compensation such as reimbursement for moving expenses and the related WTA (see n, below) and any RIT allowance (see m, below) paid for moving expense reimbursement in a prior year) that is reported as income on IRS Form W-2 for the employee (employee and spouse, if filing jointly), and if applicable, the net earnings (or loss) for self-employment income shown on Schedule SE of the IRS Form 1040. Earned income may be from more than one source. (See 2-11.8d.)

i. Marginal Tax Rate (MTR)

The tax rate (for example 25 percent) applicable to a specific increment of income. The Federal and State marginal tax rates to be used in calculating the RIT allowance are provided in appendices 2-11.A, B, and C. See 2-11.8e(3) for instructions on local marginal tax rate determinations.

j. Combined Marginal Tax Rate (CMTR)

A single rate determined by combining the applicable marginal tax rates for Federal, State and local income taxes, using the formulas provided in 2-11.8e(4).

k. Gross-up

Payment for the estimated additional income tax liability incurred by an employee as a result of reimbursements or payments by the Government for the covered moving expense reimbursements listed in 2-11.3.

l. Gross-up Formulas

The formulas used to determine the amount of the gross-up for the WTA and the RIT allowance. The formulas used herein (see 2-11.7d and 2-11.8f) compensate the employee for the initial tax, the tax on tax, etc. Note that the WTA gross-up formula in 2-11.7d is different than the RIT gross-up formula prescribed in 2-11.8f.

m. RIT Allowance

The amount of payment computed and paid in Year 2 to cover substantially all of the estimated additional tax liability incurred as a result of the covered moving expense reimbursements received in Year 1.

n. Withholding Tax Allowance (WTA)

The withholding tax allowance (WTA), paid in Year 1, covers the employee's Federal tax withholding liability on covered taxable reimbursements received in Year 1. The amount is computed by applying the withholding gross-up formula prescribed in 2-11.7d (using the Federal withholding tax rate) each time that a Federal withholding obligation is incurred on covered moving expense reimbursements received in Year 1. Grossing-up the Federal withholding amount protects the employee from having to use part of his/her moving expense reimbursement to pay Federal withholding taxes. (See 2-11.7.)

*2-11.6. Procedures in General*

a. This regulation sets forth procedures for the computation and payment of the RIT allowance and defines agency and employee responsibilities. This regulation does not require changes to those internal fiscal procedures established by the individual agencies pursuant to IRS regulations, or the Treasury Fiscal Requirements Manual, provided that the intents of the statute authorizing the RIT allowance and this regulation are not disturbed.

b. The total amount reimbursed or paid to the employee, or on his/her behalf, for travel, transportation and other relocation expenses and allowances is includable in the employee's gross income pursuant to the IRC and certain State or local government tax codes. Some moving expenses for which reimbursements are received may be deducted from income by the employee as moving expense deductions, subject to certain limitations prescribed by the IRS or pertinent State or local tax authorities. Reimbursements for nondeductible moving expenses are subject to income tax. (See IRS Publication 521 entitled "Moving Expenses" and the appropriate State and local tax codes for detailed information.)

c. Usually, if the employee is reimbursed for nondeductible moving expenses, the amount of these reimbursements is subject to withholding of Federal income tax in accordance with IRS regulations at the time of reimbursement. Under existing fiscal procedures, the amount of the employee's withholding obligation is usually deducted either from reimbursements for the moving expenses at the time of reimbursement or from the employee's salary. (See Treasury Fiscal Requirements Manual for Federal Agencies.)

d. Payment of a WTA established herein will offset deductions for the Federal withholding taxes, on moving expense reimbursements and on the WTA itself, from the employee's moving expense reimbursements or from salary.

e. The total amount of the RIT allowance can be computed after the end of Year 1 as soon as the earned income level, income tax filing status, total covered taxable reimbursements, and the applicable marginal tax rates can be determined.

f. Procedures are prescribed in 2-11.7 and 2-11.8 for computation and payment of the WTA and the RIT allowance. These procedures are built on existing fiscal procedures and IRS regulations regarding reporting of employee income from reimbursements and withholding of taxes on supplemental wages.

*2-11.7. Procedures for Determining the WTA in Year 1*

a. General Rules

The WTA is designed to cover the employee's Federal withholding tax obligation for income resulting from covered moving expense reimbursements. Withholding tax obligations, if any, for State and/or local income taxes on moving expense reimbursements shall not be included in the calculation of the WTA payment. The amount of the WTA is equal to the Federal withholding tax obligation incurred by the employee on covered moving expense reimbursements (which are not offset by deductible moving expenses) and on the WTA itself. The WTA shall be calculated, accounted for, and reported as provided in b through f, below.

b. Determination of Amount of Reimbursement Subject to Withholding

Each time that moving expenses are reimbursed to the employee, or paid on behalf of the employee, IRS regulations require that the agency determine the amount of those reimbursements that it reasonably believes will be deductible moving expenses. Reimbursements for nondeductible moving expenses are then subject to withholding of Federal income tax. Since there are some relocation expenses which may be

reimbursed but are not covered reimbursements under the RIT allowance, such as nontemporary storage of household goods (HHG) (see exclusions in 2–11.4), the amount of the nondeductible moving expenses per IRS regulations may be different than the actual amount of covered taxable reimbursements which is subject to withholding. Because the difference in these amounts should not be substantial, the amount of nondeductible moving expenses subject to Federal withholding tax, as determined by the agency pursuant to IRS regulations, may be used in computing the WTA.

c. Determination of Federal Withholding Tax Rate (FWTR)

Because moving expense reimbursements constitute supplemental wages for Federal income tax purposes, the 20 percent flat rate of withholding is generally applicable to income generated by such reimbursements. The 20 percent rate should be used in calculating the WTA unless under an agency's internal fiscal (withholding) procedures a different withholding rate is used pursuant to IRS tax regulations. In such cases, the applicable withholding rate shall be substituted for the 20 percent rate in the calculation shown in d, below.

d. Calculation of The WTA

The WTA is calculated by substituting the amounts determined in 2–11.7b and c, above, into the WTA gross-up formula shown below:

$$\text{Formula: } Y = \frac{X}{1-X}(N)$$

where:
Y = WTA
X = FWTR (generally, 20 percent)
N = nondeductible moving expenses

Example: If
X = 20 percent
N = $21,800

Then
Y = .20/1.00 − .20 ($21,800)
Y = .25 ($21,800)
Y = $5,450

e. WTA Payment and Employee Agreement for Repayment

(1) The WTA may be calculated several times within Year 1 if reimbursements for moving expenses are made on more than one travel voucher. Each time an employee is reimbursed for moving expenses which are subject to Federal tax withholding in accordance with the IRS regulations, the WTA will be calculated and paid unless the employee fails to comply with the requirements in (2), below.

(2) The employee shall be required to agree in writing to (a) repay any excess amount paid to him/her in Year 1 (see 2–11.8f(4) and 2–11.9b(3)), and (b) submit the required certified tax information and claim for his/her RIT allowance within a reasonable length of time (as determined by the agency) after the close of Year 1. Failure of the employee to comply with this requirement will preclude the agency's payment of the WTA.

f. Determination of Employee's Withholding Tax on WTA

Since the amount of the WTA is considered income to the employee, it is subject to the same tax withholding requirements as all other moving expense reimbursements.

g. End of Year Reporting

At the end of the year, agencies generally are required to issue IRS Forms W–2 for each employee showing total gross compensation (including moving expense reimbursements) and the applicable amount of Federal taxes withheld. For tax reporting purposes, the WTA is to be treated as a moving expense reimbursement. The total amount of the employee's WTA's paid during the year as well as the amount of moving expense reimbursements should be included as income on the employee's Form W–2. The Federal tax withholding amount applicable to the moving expense reimbursements and the WTA should also be included on the employee's Form W–2. The amount of the WTA's also will be furnished to the employee along with the amount of moving expense reimbursements on IRS Form 4782 or another itemized listing provided for the employee's use in preparing his/her tax return (see IRS regulations for further guidance) and in claiming the RIT allowance as provided in 2–11.8.

*2–11.8. Rules and Procedures for Determining the RIT Allowance in Year 2*

a. Summary/Overview of Procedures

The RIT allowance will be calculated and claimed in Year 2 (see definition in 2–11.5g). This can be accomplished, as soon as the employee can determine earned income (as defined herein), income tax filing status, covered taxable reimbursements for Year 1 (see definition in 2–11.5e) and the applicable marginal tax rates. The RIT allowance is then calculated using the gross-up formula under procedures prescribed herein. Since the RIT allowance is considered income, appropriate withholding taxes on the RIT allowance are deducted and the balance constitutes the net payment to the employee. Rules, procedures, examples, and prescribed tax tables for these calculations are provided in b through h, below, and in the figures and appendices to this Part 11.

b. General Rules and Assumptions

(1) The procedures prescribed herein for calculations and payment of the RIT allowance are based on certain assumptions jointly developed by GSA and IRS, and tax tables developed by IRS. This approach avoids a potentially controversial and administratively burdensome procedure requiring the employee to furnish extensive documentation, such as certified copies of actual tax returns and reconstructed returns, in support of a claim for a RIT allowance payment. Specifically the following assumptions have been made:

(a) The employee will claim allowable moving expense deductions for the same tax year in which the corresponding moving expense reimbursements are included in income;

(b) The employee will claim the maximum amount of deductible moving expenses allowable under the IRS tax rules when filing his/her tax return; and

(c) Prior to the Tax Reform Act of 1986, it was assumed that the employee's (and spouse's, if a joint return is filed) earned income, filing status, and CMTR determined for Year 1 (and used in determining the RIT allowance in Year 2) would remain the same or would not be substantially different in the second and subsequent tax years. However, the Tax Reform Act of 1986 substantially changed the Federal tax rates scheduled for 1987 and subsequent years. Therefore, it is necessary to compute a separate CMTR for Year 1 and for Year 2 (see e, below) and a new formula is prescribed to calculate any RIT allowances paid in 1987 (see f, below). It is assumed that within the accuracy of the calculation, the State and local tax rates for Year 1 and Year 2 will remain the same or will not be substantially different. Therefore, the State and local tax rates for Year 1 shall be used in calculating the CMTR for year 2.

(2) The prescribed procedures which yield an estimate of an employee's additional tax liability due to moving expense reimbursements are to be used uniformly. They are not to be adjusted to accommodate an employee's unique circumstance which may differ from the

assumed circumstances stated in (1), above.

(3) An adjustment of the RIT allowance paid in Year 2 for the covered taxable reimbursements received in Year 1 is required if the tax information certified to on the RIT allowance claim is different than that shown on the actual Federal tax return filed with IRS for Year 1 or changed for any reason after filing of the tax return, so as to affect the CMTR's used in the RIT allowance calculation. (See 2–11.10 for claims procedures.)

c. Determination of Covered Taxable Reimbursements

(1) Generally, the amount of the covered taxable reimbursements is the difference between (a) the amount of covered moving expense reimbursements for the allowances listed in 2–11.3 that was included in the employee's income in Year 1, and (b) the maximum amount of allowable moving expenses that may be claimed as a moving expense deduction by the employee on his/her Federal tax return under IRS tax regulations to offset the income resulting from moving expense reimbursements for Year 1. If the employee is precluded from claiming moving expense deductions because he/she does not meet IRS requirements for the distance test, then the amount of covered taxable reimbursements is the same as the amount of covered moving expenses (see 2–11.5d).

(2) For purposes of calculating the RIT allowance, the following special rules apply to the determination of moving expense deductions to offset moving expense reimbursements reported as income:

(a) The total amount of reimbursement (which was reported as income) for the expenses of en route travel for the employee and family (see 2–11.3a) and transportation (including up to 30 days temporary storage) of household goods (see 2–11.3b) to the new official station shall be used as a moving expense deduction. (See also 2–11.4e and f.)

(b) The total amount of reimbursement for a househunting trip, temporary quarters (up to 30 days at new station) and real estate transaction expenses (see 2–11.3e, f, g, and i), up to the maximum allowable deduction under IRS tax regulations, shall be used as a moving expense deduction. For example, an employee and spouse filing a joint return for the 1986 tax year and residing in the same household at the end of the tax year may deduct up to $3,000 for these expenses. (No more than $1,500 of the $3,000 may be claimed for a househunting trip and temporary quarters expenses combined.) If the employee was reimbursed $1,350 for a househunting trip and temporary quarters expenses and $9,000 for real estate expenses, the moving expense deductions would be $1,350 for the househunting trip and temporary quarters expenses and $1,650 for real estate expenses. If the employee's reimbursement was $1,650 for the househunting trip and temporary quarters expenses and $9,000 for real estate expenses, the moving expense deductions would be $1,500 for the househunting trip and temporary quarters expenses and $1,500 for real estate expenses. If the employee had no reimbursement for a househunting trip and temporary quarters, the full $3,000 would be applied to the $9,000 reimbursement for real estate expenses. (See IRS Publication 521, "Moving Expenses," for these and other maximums which vary by situation and filing status.)

(3) Procedures and examples are provided herein as if all moving expense reimbursements are received in one year with all moving expense deductions applied in that same year to arrive at the covered taxable reimbursements. However, when reimbursements span more than one year, the amount of covered taxable reimbursements must be determined separately for each reimbursement year (Year 1). The maximum moving expense deductions apply to the entire move. Under IRS tax regulations the employee has some discretion as to when he/she claims these deductions (e.g., in the year of the move when the expense was paid or in the year of reimbursement, if these actions do not occur in the same year). However, for purposes of the RIT allowance procedures, the moving expense deductions will be applied in the year that the corresponding reimbursement is made. For example, if an employee incurred and was reimbursed $1,000 for a househunting trip and temporary quarters in 1985 and an additional $1,000 for temporary quarters in 1986, this employee, according to his/her particular situation and tax filing status, may deduct $1,500 of these expenses in moving expense deductions. In calculating the RIT allowance for 1985, $1,000 of the $1,500 deduction is used to offset the $1,000 reimbursement in 1985 resulting in zero covered taxable reimbursements for the househunting trip and temporary quarters for 1985. The remaining $500 (balance of the $1,500 not used in determining covered taxable reimbursements for 1985) will be used to offset the $1,000 temporary quarters reimbursement in 1986 (second Year 1), leaving $500 of the temporary quarters reimbursement as a covered taxable reimbursement for 1986.

(4) Although the WTA amount is included in income (see 2–11.7), it shall not be included in the amount of covered taxable reimbursements. Under the procedures and formulas established herein, the proper amount of the RIT allowance is calculated using the RIT gross-up formula with the WTA excluded from covered taxable reimbursements.

(5) Agencies are cautioned that there may be moving expenses reimbursed to the employee that are not covered by the RIT allowance. (See exclusions in 2–11.4; also see discussion in 2–11.7 regarding covered taxable reimbursements versus nondeductible expenses.)

(6) An example showing how to calculate covered taxable reimbursements is illustrated in Figure 2–11.8a. Also, Figures 2–11.8b and 2–11.8c show an example of completed IRS Form 4782 (Employee Moving Expense Information) and of IRS Form 3903 (Moving Expense Adjustment) with dollar amounts which correspond to those shown in Figure 2–11.8a.

d. Determination of Income Level and Filing Status

In order to determine the CMTR's needed to calculate the RIT allowance, the employee must determine the appropriate amount of earned income (as prescribed herein) that was or will be reported on his/her Federal tax return for the tax year in which the covered taxable reimbursements were received (Year 1). Such amount will also include the spouse's earned income if a joint filing status is claimed. For purposes of this regulation, appropriate earned income shall include only the amount of gross compensation reported on IRS Form(s) W–2, and, if applicable, the net earnings (or loss) from self-employment income as shown on Schedule SE of IRS Form 1040 (see 2–11.5h). (Note that moving expense reimbursements including the WTA amounts are to be included in earned income and should be shown as income on the Form W–2; if they are not, other appropriate documentation shall be furnished by the agency (see 2–11.7g).) The amount of earned income as determined under this paragraph and the tax filing status (for example, from lines 1 through 5 on the 1986 IRS Form 1040) shall be contained in a certified statement on, or attached to, the voucher claiming the RIT allowance (see 2–11.10).

e. Determination of the CMTR's

The gross-up formula used to calculate the RIT allowance in *f*, below, requires the use of two CMTR's—one for Year 1 in which reimbursements were received and the other for Year 2 in which the RIT allowance is paid. CMTR's are single tax rates calculated to represent the Federal, State and/or local tax rates applicable to the earned income determined in d, above, for Year 1. The CMTR's will be determined as provided in (1) through (4), below.

(1) *Federal marginal tax rates.* The Federal marginal tax rates for Year 1 and Year 2 are determined by using the income level and filing status determined under 2–11.8d and contained in the certified statement by the employee on his/her RIT allowance claim, and applying the prescribed Federal tax tables contained in appendices 2–11.A and C. For example, if the income level for 1986 tax year (Year 1) was $65,000 for a married employee filing a Federal joint return, the Federal marginal tax rate would be 38 percent for Year 1 (1986) and 35 percent for Year 2 (1987). These rates would be used regardless of how much of the $65,000 was attributable to reimbursement for the employee's relocation expenses. (Note that these marginal rates are different from the withholding tax rate used for the WTA.) If the employee incurs only Federal income tax (i.e., there are no State or local taxes), the Federal marginal tax rates determined from appendices 2–11.A and C are the CMTR's to be used in the RIT gross-up formula provided in 2–11.8f. In such cases, the provisions of (2) and (3), below, do not apply.

(2) *State marginal tax rate.* (a) If the employee incurs an additional State income tax (see definition in 2–11.5a) liability as a result of moving expense reimbursements, the appropriate State tax table in appendix 2–11.B is to be used to determine the applicable State marginal tax rate that will be substituted into the formula for determining the CMTR for both Year 1 and Year 2. The appropriate State tax table will be the one that corresponds to the tax year in which the reimbursements are paid to the employee (Year 1). The income level determined in 2–11.8d for Federal taxes shall be used to identify the appropriate income bracket in the State tax table. The applicable State marginal tax rate is obtained from the selected income bracket column for the State where the employee is required to pay State income tax on moving expense reimbursements. The tax rates shown in the table apply to all employees regardless of their filing status, except where a separate rate is shown for a single filing status.

(b) The lowest income bracket shown in the State tax table in appendix 2–11.B is $20,000–$24,999. In cases where the employee's (employee's and spouse's, if filing jointly) earned income as determined under 2–11.8d is less than this income bracket, an appropriate State marginal tax rate shall be established by the employing agency from the applicable State tax code or regulations issued pursuant thereto. Such State marginal tax rate shall be representative of the earned income level in question but in no case more than the marginal tax rate established in appendix 2–11.B for the $20,000–$24,999 income bracket for the particular State in which an additional tax obligation has been incurred.

(c) The prescribed State marginal tax rates generally are expressed as a *percent of taxable income.* However, if the applicable State marginal tax rate is stated as a *percentage* of the *Federal income tax liability,* the State tax rate must be converted to a *percent of taxable income* to be used in the CMTR formulas in 2–11.8e(4). This is accomplished by multiplying the applicable Federal tax rate for Year 1 by the applicable State tax rate. For example, if the Federal tax rate is 38 percent for Year 1 and the State tax rate is 25 percent of the *Federal income tax liability,* the State tax rate stated as a *percent of taxable income* would be 9.5 percent. The State tax rate thus determined for Year 1 will be used in determining the CMTR for both Year 1 and Year 2.

(d) An employee may incur a State income tax liability on moving expense reimbursements in more than one State at the same or different marginal tax rates. Nevertheless, a single State marginal tax rate must be determined for use in the CMTR formulas in 2–11.8e(4). The following general rules shall apply in determining the applicable single rate.

(i) In the tax year during which the transfer actually takes place, the employee may incur a State income tax obligation at both the old and new location. However, most moving expense reimbursements will be taxed at the new location. Although the employee may receive some reimbursements (e.g., for a house-hunting trip) prior to the actual transfer which would be credited as income at the old location, these types of expenses generally are tax deductible and would not generate an additional State tax liability for the employee. In addition, procedures inherent in the travel voucher reimbursement system tend to cause most reimbursements which may be taxable to occur after the actual transfer. Therefore, the State marginal tax rate determined under 2–11.8e(2) (a) through (c) for the new location will be used in the CMTR formulas.

(ii) There may be other situations where the employee is subject to taxes on moving expense reimbursements in two States, for instance, in one State because of State residency and in another because a particular State taxes income earned within its jurisdiction irrespective of whether the employee is a resident. If the two States involved recognize such situations by allowing an adjustment or credit for taxes paid to the other State, the employee's State marginal tax rate for the State where income tax on moving expense reimbursements is actually paid will be determined and used in the CMTR formulas. However, in those situations where there is in fact double taxation on income from moving expense reimbursements and the taxes imposed by both States qualify as a State income tax (as defined in 2–11.5a), the sum of the State marginal tax rates for the two States as determined under 2–11.8e(2) (a) through (c) shall be used in the CMTR formulas.

(3) *Local marginal tax rate.* Because of the impracticality of establishing a single marginal tax rate table for local income taxes that could be applied uniformly on a nationwide basis, appropriate local marginal tax rates shall be determined as provided in (a) through (c), below.

(a) If the employee incurs an additional local income tax (see definition 2–11.5b) liability as a result of moving expense reimbursements, he/she shall certify to such fact when claiming the RIT allowance (see certification statement in 2–11.10) by specifying the name of the locality imposing the income tax and the applicable marginal tax rate determined from the actual marginal tax rate table or schedule prescribed by the taxing locality. The marginal tax rate shall be the one applicable to the taxable income portion of the amount of earned income determined under 2–11.8d for the employee (and spouse, if filing jointly). The same tax rate shall be used in calculating the CMTR for both Year 1 and Year 2. The employing agency shall establish procedures to determine whether the employee certified local marginal tax rate is appropriate for the employee's income level and filing status and approve its use in the CMTR formulas. (See also 2–11.10b(2).)

(b) If the local marginal tax rate is stated as a percentage of Federal or State income tax liability, such rate must be converted to a percent of taxable income for use in the CMTR formulas. This is accomplished by multiplying the applicable Federal or State tax rate for Year 1 as determined in 2–11.8e(1) or (2) by the applicable local tax rate. For example, if the State tax rate for Year 1 is 6 percent and the local tax rate is 50 percent of State income tax liability, the local tax rate stated as a percentage of taxable income would be 3 percent. The local tax rate thus determined for Year 1 will be used in determining the CMTR for both Year 1 and Year 2.

(c) The situations described in 2–11.8e(2)(d) with respect to State income taxes may also be encountered with local income taxes. If such situations do occur, the rules prescribed for determining the single State marginal tax rate shall also be applied to determine the single local marginal tax rate for use in the CMTR formulas.

(4) *Calculation of the CMTR's.* As stated above, the gross-up formula for calculating the RIT allowance requires the use of two CMTR's. However, the required CMTR's cannot be calculated by merely adding the Federal, State and local marginal tax rates together because of the deductibility of State and local income taxes from income for Federal income tax purposes. The State tax tables prescribed in appendix 2–11.B are designed to use the same income amount as that determined for the Federal taxes, which reflects, among other things, State and local tax deductions. The formulas prescribed below for calculating the CMTR's are designed to adjust the State and local tax rates to compensate for their deductibility from income for Federal tax purposes.

(a) *Calculation of the CMTR for Year 1.* The following formula shall be used to calculate the CMTR for Year 1.

CMTR Formula: $X=F+(1-F)S+(1-F)L$

where

X=CMTR for Year 1
F=Federal tax rate for Year 1
S=State tax rate for Year 1
L=local tax rate for Year 1

(i) *Federal, State and local taxes incurred.* If the employee incurs Federal, State and local taxes on moving expense reimbursements, the CMTR formula may be solved as follows:

Example: If
F=38 percent of income
S=6 percent of income
L=2 percent of income
Then

$X=.38+(1.00-.38).06+(1.00-.38).02$
$X=.4296$

(ii) *Federal and State income tax only.* If the employee incurs tax liability on moving expense reimbursements for Federal and State income tax but none for local income tax, the value of "L" is zero and the CMTR formula may be solved as follows:

Example: If
F=38 percent of income
S=6 percent of income
L=Zero
Then

$X=.38+(1.00-.38).06$
$X=.4172$

(iii) *Federal and local income tax only.* If the employee incurs a tax liability on moving expense reimbursements for Federal and local income tax but none for State income tax, the value of "S" is zero and the CMTR formula may be solved as follows:

Example: If
F=38 percent of income
S=Zero
L=2 percent of income
Then

$X=.38+(1.00-.38).02$
$X=.3924$

(b) Calculation of the CMTR for Year 2. The calculation of the CMTR for Year 2 is the same as described in (a), above, for Year 1 except that the Federal tax rate for Year 2 is used in place of the Federal tax rate for Year 1. State and local tax rates remain the same as for Year 1. The following formula shall be used to determine the CMTR for Year 2:

CMTR Formula: $W=F+(1-F)S+(1-F)L$

where

W=CMTR for Year 2
F=Federal tax rate for Year 2
S=State tax rate for Year 1
L=local tax rate for Year 1

f. Determination of the RIT Allowance

The RIT allowance to cover the tax liability on additional income resulting from the covered taxable reimbursements received in Year 1 is calculated in Year 2 as provided below:

(1) The RIT allowance is calculated by substituting the amount of covered taxable reimbursements for Year 1 (see 2–11.8c), the CMTR's for Year 1 and Year 2, and the total amount of the WTA's paid in Year 1 into the gross-up formula as follows:

Formula:
$Z=X/1-W\ (R)-1-X/1-W\ (Y)$
where

Z=RIT allowance payable in Year 2
X=CMTR for Year 1
W=CMTR for Year 2
R=covered taxable reimbursements
Y=total WTA's paid in Year 1

Example: If
X=.4296
W=.4020
R=$21,800
Y=$5,450
Then

$Z=.4296/1.00-.4020\ ($21,800)-1.00-.4296/1.00-.4020\ ($5,450)$
$Z=.7184\ ($21,800)-.9638($5,450)$
$Z=$15,661.12-$5,198.21$
$Z=$10,462.91$

(2) There may be instances when a WTA was not paid in Year 1 at the time moving expense reimbursements were made. In cases where there is no WTA to be deducted, the value of "Y" is zero and the formula stated in (1), above, for calculating the amount of the RIT allowance (Z) due the employee in Year 2 may be solved as shown in the following example:

Example: If
X=.4296
W=.4020
R=$21,800
Y=Zero
Then

$Z=.4296/1.00-.4020\ ($21,800)$
$Z=.7184\ ($21,800)$
$Z=$15,661.12$

(3) If the amount of the RIT allowance is greater than zero, it is payable to the employee on the travel voucher as a relocation or moving expense allowance. The RIT allowance amount is included in the employee's gross income for Year 2 and, therefore, subject to appropriate withholding taxes (see net payment to employee in 2–11.8g). The RIT allowance amount will be reported on IRS Form W–2 for Year 2 and on IRS Form 4782 for the employee's information.

(4) If the calculation of the RIT allowance results in a negative amount, the employee is obligated to repay this amount as a debt due the Government (see 2–11.7e(2) and 2–11.9b).

(5) Any changes to the employee's income level or filing status for Year 1 that would affect the marginal tax rates (Federal, State, or local) used in calculating the RIT allowance must be reported to the agency by the employee as provided in 2–11.9b(2). (See also 2–11.10 for certified statement regarding these changes.)

g. Determination of the Net Payment Due Employee in Year 2

Since the amount of the RIT allowance is income to the employee in Year 2, it is subject to the same tax withholding requirements as all other moving expense reimbursements. Agencies should determine the appropriate amounts for withholding taxes under their internal tax

withholding procedures. The amount of withholding taxes is deducted from the RIT allowance to arrive at the net payment to the employee.

h. Summary Example

The procedures provided in a through g, above, for calculating the RIT allowance and in 2–11.7 for calculating the WTA are summarized and illustrated for a hypothetical situation in Figure 2–11.8d.

*2–11.9. Responsibilities*

a. Agency

Finance offices will calculate the amount of the gross-up for the WTA in Year 1 in accordance with procedures outlined herein and credit this amount to the employee at the time of reimbursement as provided in 2–11.7e. The WTA will be reflected on the employee's Form W–2 for Year 1. The RIT allowance may be calculated in Year 2 either by the employee or by the agency finance office based on information provided by the employee on the voucher, as directed by the agency's implementing policies and procedures. In addition, agencies shall prescribe appropriate and necessary implementing procedures as provided elsewhere in this Part 11.

b. Employee

(1) The employee is required to submit a claim for the RIT allowance and to file the tax information for Year 1 specified in 2–11.10 with his/her agency in Year 2, regardless of whether any additional reimbursement for the RIT allowance is owed the employee.

(2) If any action occurs (i.e., amended tax return, tax audit, etc.) that would change the information provided in Year 2 by the employee to his/her agency for use in calculating the RIT allowance due the employee for Year 1 taxes, this information must be provided by the employee to his/her agency under procedures prescribed by the agency. (See 2–11.10.)

(3) If the calculation of the RIT allowance results in a negative amount, the employee is obligated to repay this amount as a debt due the Government (see 2–11.7e(2) and 2–11.8f(4)).

*2–11.10. Claims for Payment and Supporting Documentation and Verification*

a. Claims Forms

Claims for payment of the RIT allowance shall be submitted by the employee in Year 2 on SF 1012 (Travel Voucher) or other authorized travel voucher form. When claiming payment for the RIT allowance, the employee shall furnish and certify to certain tax information that has been or will be shown on his/her actually prepared tax returns. This information shall be contained in a certified statement on, or attached to, the SF 1012 reading essentially as follows:

I certify that the following information, which is to be used in calculating the RIT allowance to which I am entitled, has been (or will be) shown on the income tax returns filed (or to be filed) by me (or by my spouse and me) with the applicable Federal, State, and local (specify which) tax authorities for the 19__ tax year.

—Gross compensation as shown on attached IRS Form(s) W–2 and, if applicable, net earnings (or loss) from self-employment income shown on attached Schedule SE (Form 1040):

| | Forms W–2 | Schedule SE |
|---|---|---|
| Employee ..... | $_____ | $_____ |
| Spouse (if filing jointly) ..... | $_____ | $_____ |
| Total (both columns) .. | $_____ | |

Filing status: _____

(Specify one of the filing status items that was (or will be) claimed on IRS Form 1040.)

Marginal tax rates from FTR appendices 2–11.A, B and C and local tax tables derived under procedures prescribed in FTR Part 2–11:

Federal for Year 1 _____
Federal for Year 2 _____
State (specify which): _____
Local (specify which): _____

The above information is true and accurate to the best of my knowledge. I (we) agree to notify the appropriate agency official of any changes to the above (i.e., from amended tax returns, tax audit, etc.) so that appropriate adjustments to the RIT allowance can be made. The required supporting documents are attached. Additional documentation will be furnished if requested.

I (we) further agree that if the 12-month service agreement required by 2–1.5a(1) is violated, the total amount of the RIT allowance will become a debt due the United States Government and will be repaid according to agency procedures pursuant to FTR 2–11.11.

_____
Employee's signature
Date _____

_____
Spouse's signature (if filing jointly)
Date _____

b. Supporting Documentation/ Verification

The claim for the RIT allowance shall be supported by documentation attached to the voucher and by verification of State and local tax obligations as provided below:

(1) Copies of the appropriate IRS Forms W–2 and, if applicable, the completed IRS Schedule SE (Form 1040) shall be attached to the voucher to substantiate the income amounts shown in the certified statement. Employee (and spouse, if filing jointly) must agree to provide additional documentation to verify income amounts, filing status, and State and local income tax obligations if requested by the agency.

(2) In order to determine or verify whether a particular State or local tax authority imposes a tax on moving expense reimbursements, it is incumbent upon the appropriate agency officials to become familiar with the State and local tax laws that affect their transferring employees. In cases where the taxability of moving expense reimbursements is not clear, an agency may pay a RIT allowance which reflects only those State and local tax obligations that are clearly imposed under State and local tax law. Once the questionable State or local tax obligations are resolved, agencies may recompute the RIT allowance and make appropriate payment adjustments.

c. Fraudulent Claims

A claim against the United States is forfeited if the claimant defrauds or attempts to defraud the Government in connection therewith (28 U.S.C. 2514). In addition, there are two criminal provisions under which severe penalties may be imposed on an employee who knowingly presents a false, fictitious, or fraudulent claim against the United States (18 U.S.C. 287 and 1001). The employee's claim for payment of the RIT allowance shall accurately reflect the facts involved in every instance so that any violation of these provisions will be avoided.

*2–11.11. Violation of Service Agreement*

In the event the employee violates the terms of the service agreement required under 2–1.5a(1), no part of the RIT allowance or the WTA will be paid, and any amounts paid prior to such violation shall be a debt due the United States until they are repaid by the employee.

*2–11.12. Advance of Funds*

No advance of funds is authorized in connection with the allowance provided in this part.

*2–11.13. Source References*

The following references or publications have been used as source material for this Part 11.

a. Internal Revenue Code (IRC), section 164(a)(3) (26 U.S.C. 164(a)(3)) pertaining to the deductibility of State and local income taxes, and section 217 (26 U.S.C. 217), pertaining to moving expenses.

b. Internal Revenue Service Publication 521, "Moving Expenses."

c. Internal Revenue Service, Circular E, "Employer's Tax Guide."

* * * * *

Example 4. Summary of RIT Allowance Procedures

*Year 1:* In 1986, the employee received $31,050 in covered moving expense reimbursements. After subtracting $9,250 of deductible moving expenses, $21,800 of the reimbursements (nondeductible moving expenses) were subject to Federal tax withholding. (No State or local tax withholding in this case.) This example assumes that all reimbursements were paid on one voucher.

Apply WTA formula:
Y=X/1−X (N)
where
Y=WTA
X=Federal withholding tax rate (.20)
N=nondeductible moving expenses ($21,800)
Then
Y=.20/1−.20 ($21,800)
Y=$5,450

Compute net payment to employee in Year 1:

| | |
|---|---|
| Total moving expense reimbursement in year 1 | $31,050 |
| *Less deductible moving expenses* | −9,250 |
| Nondeductible moving expenses subject to withholding | $21,800 |
| *Plus WTA on $21,800* | +5,450 |
| Amount subject to withholding | $27,250 |
| *Less Federal tax withholding ($27,250×.20)* | −5,450 |
| Balance after withholding | $21,800 |
| *Plus deductible moving expenses* | +9,250 |
| Net payment in year 1 | $31,050 |

*Year 2:* In 1987, the amount of the RIT allowance is determined on the basis of covered reimbursements in Year 1. Assume that $21,800 of nondeductible moving expenses is the same as the covered taxable reimbursements. Also, assume that employee and spouse (married, filing jointly) have combined earned income of $65,000. Thus, Federal marginal tax rates would be 38% for Year 1 (from app. 2–11.A) and 35% for Year 2 (from app. 2–11.C). Also assume the applicable State and local marginal tax rates are 6% and 2%, respectively, of taxable income.

Apply CMTR formula for Year 1:
X=F+(1−F)S+(1−F)L
where
X=CMTR for Year 1
F=Federal tax rate for Year 1 (.38)
S=State tax rate for Year 1 (.06)
L=local tax rate for Year 1 (.02)
Then
X=.38+(1−.38).06+(1−.38).02
X=.38+.0372+.0124
X=.4296

Apply CMTR formula for Year 2:
W=F+(1−F)S+(1−F)L
where
W=CMTR for Year 2
F=Federal tax rate for Year 2 (.35)
S=State tax rate for Year 1 (.06)
L=local tax rate for Year 1 (.02)
Then
W=.35+(1−.35).06+(1+.35).02
W=.35+.0390+.0130
W=.4020

Apply RIT gross-up formula: Z=X/1−W (R)−1−X/1−W (Y)
where
Z=RIT allowance
X=CMTR for Year 1 (.4296)
W=CMTR for Year 2 (.4020)
R=covered taxable reimbursements for Year 1 ($21,800)
Y=WTA paid in year 1 ($5,450)
Then
Z=.4296/1−.4020 ($21,800)−1−.4296/1−.4020 ($5,450)
Z=.7184 ($21,800)−.9638 ($5,450)
Z=$15,661.12−$5,198.21
Z=$10,462.91

Compute net payment to employee in Year 2:

| | |
|---|---|
| RIT allowance payable | $10,462.91 |
| Less Federal withholding tax | −2,092.58 |
| Less State and local withholding | −0.00 |
| Net amount paid to employee | [1]$8,370.33 |

[1] If no WTA's had been paid in this example, the RIT allowance would be $15,661.12. The Federal withholding tax would be $3,132.22, leaving a net payment to the employee of $12,528.90.

3. The appendices following Part 11, Chapter 2 of the FTR are amended by adding the Federal tax table for 1986 to Appendix 2–11.A, the State tax table for 1986 to Appendix 2–11.B, and Federal tax table for 1987 as Appendix 2–11.C, reading as follows:

BILLING CODE 6820-34-M

FEDERAL MARGINAL TAX RATES BY EARNED INCOME LEVEL AND FILING STATUS - TAX YEAR 1986

The following table is to be used to determine the Federal marginal tax rate for Year 1 for computation of the RIT allowance as prescribed in FTR 2-11.8e(1). This table is to be used for employees who received covered taxable reimbursements during calendar year 1986.

| Marginal Tax Rate | Single Taxpayer | | Heads of Household | | Married Filing Jointly/Qualifying Widows & Widowers | | Married Filing Separately | |
|---|---|---|---|---|---|---|---|---|
| | Over | But not over | Over | But not over | Over | But not over | Over | But not over |
| 11% | $6,180 | $7,370 | $6,782 | $9,533 | $9,670 | $11,795 | $5,840 | $7,879 |
| 12% | 7,370 | 8,450 | 9,533 | 10,523 | 11,795 | 13,739 | 7,879 | 9,665 |
| 14% | 8,450 | 10,710 | 10,523 | 12,705 | 13,739 | 18,356 | 9,665 | 11,000 |
| 15% | 10,710 | 11,775 | N/A | N/A | N/A | N/A | N/A | N/A |
| 16% | 11,775 | 13,197 | N/A | N/A | 18,356 | 23,068 | 11,000 | 11,600 |
| 17% | N/A | N/A | 12,705 | 16,050 | N/A | N/A | N/A | N/A |
| 18% | 13,197 | 15,648 | 16,050 | 19,764 | 23,068 | 27,963 | 11,600 | 13,947 |
| 20% | 15,648 | 18,108 | 19,764 | 23,841 | N/A | N/A | N/A | N/A |
| 22% | N/A | N/A | N/A | N/A | 27,963 | 33,533 | 13,947 | 16,843 |

| 50% | 96,172 | --- | 129,934 | --- | 183,988 | --- | 106,160 | --- |

N/A means tax rate not applicable for filing status.

Appendix 2-11.A. Federal Tax Table for RIT Allowance

STATE MARGINAL TAX RATES BY EARNED INCOME LEVEL - TAX YEAR 1986

The following table (pages 9 thru 12) is to be used to determine State marginal tax rates for calculation of the RIT allowance as prescribed IN FTR 2-11.8e(2). This table is to be used for employees who received covered taxable reimbursements during calendar year 1986.

| State (or district) | Marginal tax rates (stated in percents) for the earned income amounts specified in each column. 1/ 2/ | | | |
|---|---|---|---|---|
| | $20,000-24,999 | $25,000-49,999 | $50,000-74,999 | $75,000 & OVER |
| 1. Alabama | 5% | 5% | 5% | 5% |
| 2. Alaska | 0 | 0 | 0 | 0 |
| 3. Arizona | 8 | 8 | 8 | 8 |
| 4. Arkansas | 6 | 7 | 7 | 7 |
| 5. California | 3 | 7 | 11 | 11 |
| if single status 3/ | 8 | 11 | 11 | 11 |
| 6. Colorado | 8 | 8 | 8 | 8 |
| 7. Connecticut | 0 | 0 | 0 | 0 |
| 8. Delaware | 6.9 | 9.0 | 9.7 | 9.7 |
| 9. District of Columbia | 10 | 11 | 11 | 11 |
| 10. Florida | 0 | 0 | 0 | 0 |
| 11. Georgia | 6 | 6 | 6 | 6 |
| 12. Hawaii | 8.5 | 10.0 | 10.5 | 11 |
| if single status 3/ | 10.5 | 11 | 11 | 11 |
| 13. Idaho | 7.5 | 7.5 | 7.5 | 7.5 |
| 14. Illinois | 2.5 | 2.5 | 2.5 | 2.5 |
| 15. Indiana | 3 | 3 | 3 | 3 |
| 16. Iowa | 0 | 11 | 12 | 13 |
| 17. Kansas | 7.5 | 9 | 9 | 9 |
| 18. Kentucky | 6 | 6 | 6 | 6 |
| 19. Louisiana | 4 | 4 | 6 | 6 |
| 20. Maine | 7 | 9.2 | 10 | 10 |
| if single status 3/ | 9.2 | 10 | 10 | 10 |
| 21. Maryland | 5% | 5% | 5% | 5% |
| 22. Massachusetts | 5.19 | 5.19 | 5.19 | 5.19 |

STATE MARGINAL TAX RATES BY EARNED INCOME LEVEL - TAX YEAR 1986 (cont'd)

| State (or district) | Marginal tax rates (stated in percents) for the earned income amounts specified in each column. 1/ 2/ | | | |
|---|---|---|---|---|
| | $20,000-24,999 | $25,000-49,999 | $50,000-74,999 | $75,000 & OVER |
| 49. West Virginia | 3.5 | 7.4 | 10.5 | 13 |
| if single status 3/ | 8.2 | 12.6 | 12.9 | 13 |
| 50. Wisconsin | 9.1 | 9.5 | 10 | 10 |
| 51. Wyoming | 0 | 0 | 0 | 0 |

1/ Earned income amounts that fall between the income brackets shown in this table (e.g., $24,999.45, $49,999.75, etc.) should be rounded to the nearest dollar to determine the marginal tax rate to be used in calculating the RIT allowance.

2/ If the earned income amount is less than the lowest income bracket shown in this table, the employing agency shall establish an appropriate marginal tax rate as provided in FTR 2-11.8e(2)(b).

3/ This rate applies only to those individuals certifying that they will file under a single status within the States where they will pay income taxes. All other taxpayers, regardless of filing status, will use the other rate shown.

4/ Rates shown as a percent of Federal income tax liability must be converted to a percent of income as provided in FTR 2-11.8e(2).

Appendix 2-11.B.

FEDERAL MARGINAL TAX RATES BY EARNED INCOME LEVEL AND FILING STATUS - TAX YEAR 1987

The following table is to be used to determine the Federal marginal tax rate for Year 2 for computation of the RIT allowance as prescribed in FTR 2-11.8e(1). This table is to be used for employees whose Year 1 occurred during calendar years 1983, 1984, 1985, and 1986.

| Marginal Tax Rate | Single Taxpayer | | Heads of Household | | Married Filing Jointly/Qualifying Widows & Widowers | | Married Filing Separately | |
|---|---|---|---|---|---|---|---|---|
| | Over | But Not over | Over | But Not over | Over | But Not over | Over | But Not over |
| 11% | $4,650 | $6,481 | $7,763 | $10,309 | $10,400 | $13,719 | $5,811 | $7,081 |
| 15% | 6,481 | 21,979 | 10,309 | 31,379 | 13,719 | 40,020 | 7,081 | 19,602 |
| 28% | 21,979 | 33,433 | 31,379 | 47,903 | 40,020 | 58,705 | 19,602 | 31,572 |
| 35% | 33,433 | 58,810 | 47,903 | 88,015 | 58,705 | 101,432 | 31,572 | 54,120 |
| 38.5% | 58,810 | --- | 88,015 | --- | 101,432 | --- | 54,120 | --- |

BILLING CODE 6820-24-M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Office of the Secretary

### Income Security Policy; Applications for Grants

May 19, 1987.

Pursuant to section 1110A of the Social Security Act, the Assistant Secretary for Planning and Evaluation (hereafter the Assistant Secretary) is seeking applications for research in the area of income security policy from States and public and other organizations.

**A. Type of Application Requested**

This announcement seeks applications for projects to develop and conduct a program of research relating to national policy concerns in the area of income security policy. The following paragraphs describe this general area of interest in greater detail by enumerating high priority areas of research. The questions they contain are intended as illustrations of specific concerns. Applications should be for projects that will address one or more of the priority areas discussed below; other, closely related issues may also be included if they are shown to be relevant to the general area of interest.

A broad range of methodologies are acceptable for the purpose of this grant competition. However, all proposed projects should embody a sound theoretical base upon which new and original empirical work, employing the most useful and relevant data bases, is built. Applicants must demonstrate knowledge of past and current research relating to the priority area under consideration, and they must also demonstrate access to data adequate to conduct a proposed study.

*1. The high priority research areas* for which applications for the proposed program of research are most desired are as follows:

*a. The relationship of availability of medical services to welfare dependency.* Disincentives affecting the movement of individuals from public program dependency to economic self-sufficiency are an unintended and undesirable (albeit inevitable) complement to all means-tested governmental income transfer programs. The work disincentives which strike at the margin of economic behavior (i.e. "notches") for programs such as Aid to Families with Dependent Children (AFDC) and Supplemental Security Income (SSI), are familiar to both policy makers and researchers. For the latter group, the literature devoted to econometric studies and evaluations of negative income tax demonstrations, is massive. Despite this previous analytic effort, we continue to have an inadequate understanding of both the way in which notches theoretically affect behavior, and how they work in practice.

This lack of knowledge is particularly true for the notch surrounding the availability of medical services in general, and the Medicaid program in particular. Because of a belief that health insurance was unavailable for many entry level jobs and that the prospect of losing health coverage that would accompany leaving AFDC was preventing many families from looking for and taking jobs that would allow them to become economically self-sufficient, "transitional" Medicaid Coverage provisions have been enacted. Current law requires States to provide 9 months of Medicaid coverage to all families who lose eligibility for AFDC due to the termination of the "one-third" income disregard. States have the option of extending this coverage for an additional 6 months in the case of a family that would be eligible for AFDC if the $30 plus one-third disregard were applied. Families who lose AFDC due to an increase in earnings continue to be eligible for 4 months of Medicaid benefits.

Given the above, resolution to questions such as the following are relevant to acquiring an understanding of notches that involve the availability of medical services and welfare dependency:

- How does the theory of preferences for cash wages vs. non-cash benefits relate to the notch effect for Medicaid?
- Does the Medicaid notch differ from other, similar work disincentive notches, and if so, how? How does the interaction of Medicaid with other major low-income support programs, AFDC & SSI, distinguish the Medicaid notch?
- What effect does the insurance nature of the program, especially concerning the individual-specific valuation of this insurance, have on differentiating the Medicaid notch? How do these valuations compare with the characteristics of the program recipients? Can the Medicaid notch be systematically related to the distribution of these program user characteristics? What issues of selection bias (e.g. those with actual or anticipated large medical expenses over using the program) are involved?
- What is the effect of nominally free health care availability on individuals' responses to the accompanying non-price costs (e.g. time, dignity, perceived quality)?
- What are the theoretical and practical effects of current "transition" provisions on willingness to take employment without health insurance benefits? To what extent is transition coverage used by people exiting from AFDC? When the transition benefits end, what is the subsequent health care financing behavior of the formerly assisted family unit? What is the availability of health care coverage for AFDC participants exiting to gainful employment?

Several data bases are clearly relevant for effective research in this priority area. Examples are the Survey of Income and Program Participation (SIPP) and the Current Population Survey (CPS), which since 1979 contains information on the availability of health insurance for low paying jobs. More detailed medical data bases such as the National Medical Care Utilization and Expenditure Survey will be relevant depending on the method chosen for analysis. Additionally, use of data stemming from the period following enactment of the Omnibus Budget Reconciliation Act (OBRA) of 1981, may enable new research costs to be decreased while simultaneously enhancing the product.[1]

*b. Effects and efficiency of transfers on growth and income distribution.* The effects that government transfer payments, and the taxes which are needed to finance these expenditures, have on economic growth, factors which lead to growth, and the distribution of personal income, are the source of great analytical debate in the field of economics. It has been argued that transfers inhibit economic growth, and even more strongly, that the same transfers intended as a means of moving the distribution of personal income towards greater equality, have instead, produced a more skewed income distribution. While we have a massive literature and an accompanying solid understanding of the transfer costs

[1] See for example, Research Triangle Institute, "Follow-Up Study of the 1981 AFDC Amendments", Final Report submitted to the Office of Family Assistance, Social Security Administration, Department of Health and Human Services, Research Triangle Park, NC, 1984. (This report can be obtained by writing to: Policy Information Center, Office of the Assistant Secretary for Planning and Evaluation, Department of Health and Human Services, Washington, DC 20201.)

associated with decreased labor supply, our knowledge concerning the effects of transfers on capital formation and hence long-run economic growth, is quite limited. What are the macroeconomic processes associated with and affected by the overall government transfer structure? The impact that transfers have on economic growth (i.e. the costs in terms of foregone growth due to transfers) and the resultant distribution of personal income (the "efficiency" of these transfers) sets the general study context for more specific research questions including:

- What are the most appropriate and accurate means of measuring personal income distribution and the degree of inequality? How is the behavior of the government, i.e. transfers and taxes, explicitly accounted for and integrated into the proper measurement framework?
- What is the relationship between changes in income distribution and transfer efforts through time (e.g. over the last 20 years) and across countries (including high/low income, and market/non-market economies)? Is there an identifiable trade-off between costs of transfers and changes in income distribution across time and countries? If so, can this relationship be quantified with time series data?
- What are the specific effects of the tax-transfer structure through time on the lowest population quintile, and what are the costs (in a general equilibrium setting) associated with altered savings, capital formation, labor supply, and productivity behavior, for the increased equality bought by these transfers?
- What other more general effects through time can be determined concerning trends in Lorenz curves, Gini coefficients, or other measures of inequality, as specifically related to income transfer efforts?

Corresponding to the large range of possible topics in this priority area, no single data set will have all the desired characteristics for this study. Investigators are encouraged to explore possibilities for combining and piecing together information from a variety of sources.

*c. Measurement of poverty: Optimal accounting periods and development of consumption-based poverty standards.* The measurement of poverty has been a research issue of great importance generating intense controversy for many years. It has been a policy issue, however, only since the birth of the Great Society's War on Poverty when separating the non-poor, program-ineligible population from the poor, program-eligible population became fundamental to anti-poverty policies for some of the relevant populations. A completely satisfactory method of performing this demarcation has not been devised. Sources of complexity for this type of calculation include:

- Determining the appropriate subject economic unit;
- Varying sizes and composition of these units however defined;
- Diverse geographic locations and regional economic conditions facing these units; and
- Continually changing individual and societal perceptions concerning the definition of minimum standards of living.

This priority area is concerned with research which will increase our understanding of the most appropriate measure of poverty in the context of the American economy in the late 1980s. Two themes, from a large list of valuable potential questions underlying the measurement of poverty, are emphasized here as comprising complex and contentious aspects of the larger problem:

(1) What are optimal accounting time periods?

(2) Can appropriate consumption-based poverty standards be devised?

(1) The accounting period is the time period over which income is counted for the determination of benefits for various means-tested income support programs. Short accounting periods will be more responsive to income changes, while longer accounting periods may generate benefit distributions that are generally regarded as more equitable. This is because under a short accounting period, families with relatively high incomes on an annual basis may qualify for benefits in some months if their incomes are irregular or seasonal. Thus horizontal inequity is a common result between equal-income units with steady vs. fluctuating incomes when short accounting periods are used. In the context of global questions concerning the measurement of poverty and optimal accounting periods, specific questions that arise include:

- What are the effects of alternative accounting periods on program eligibility and participation, poverty rates, and the distribution of personal income? Can poverty rates be determined for different accounting periods as an analog to different policy prescriptions being designed for differentiated poverty population segments?
- What are these effects specifically for multi-year over annual periods (i.e. employing an "averaging" concept)?
- Conversely, using e.g. the Survey of Income and Program Participation data base, what are the effects encountered by use of single or averaged (e.g. moving averaged) sub-annual accounting periods?

Use of both multi- and sub-annual accounting periods will directly address the consequences of the adoption of an altered definition of need for the programs under review. Moreover, these research questions dictate an investigation of optimal accounting time periods as fundamentally linked to individual program purposes, themselves a function of the degree to which recipient population categories have been successfully identified and defined. The proposed research is closely analogous to poverty spell and poverty turnover analysis as it relates to the study of welfare dynamics and dependency.

(2) In the current official calculation of the poverty population and hence poverty rate (for varying demographic groups), poverty thresholds are used to delineate poor from non-poor. The "Orshansky" measure in its current official usage combines elements of both a relative and absolute poverty definition. The thresholds are absolute to the extent that they reflect an earlier attempt to measure average food expenditure as a share of after-tax income combined with a measure of a minimum food consumption budget. They are relative since they were calculated in relation to an entire population at a specific time. The growth of income over time has altered the proportion of after-tax income spent on food, and large price change adjustments have been made which were calibrated to an overall consumption basket rather than a need-based one. Accordingly, the following questions arise in regard to changing this measure:

- What are the prospects for development of appropriate consumption-based poverty standards—ruling out those standards based solely on food—which would thus provide an updated, absolute poverty measure?
- An anomaly may arise when poverty measurement is directly linked to consumption of a good whose price is distorted by being set in an imperfect market. The phenomenon of "Ricardian rents" refers to a situation where an inelastically supplied good such as housing commands an "economic rent", i.e. the excess of actual price over the minimum price necessary to bring forth various supplies by owners. This situation could theoretically have a dramatic effect on the measurement of poverty in the case where welfare dollars are perceived to inflate housing

BEST COPY AVAILABLE

prices (because of the rent), which then "feedback" into the poverty measure.

Can this effect be empirically quantified and estimated? What can be determined regarding measures such as the "transfer elasticity of discretionary spending" (which underlies the extent to which housing prices are bid up by transfer income)? Can consumption-based poverty standards be adjusted to correct for this class of distortions?

• Can consumption-based standards be designed to accommodate differing consumption patterns for alternative age groups, family composition and regional location? Determination of equivalence scales would appear to be an integral component of the research.

• How would (non-human) capital asset holding be integrated into an investigation of consumption-based poverty standards? Can the ASPE-funded 1983 and 1986 Survey of Consumer Finances or the Survey of Income and Program Participation serve as the basis for novel research which integrates wealth accumulation and asset ownership into a broader framework of relative economic status?

As stated above, these two issues have been emphasized as being important and unresolved ones. Other relevant issues are not excluded from research for this priority area.

*d. The Economic Attainment of Blacks and Puerto Ricans* . Immigrant groups in the past have typically done well in the U.S. economy, rising from the bottom of the economic heap to at least an average (and in many cases, above average) position in a relatively short while. It appears that these trends have not applied to the overall American black and Puerto Rican populations. Moreover, for specific segments of these two populations there appears to be a worsening economic and socio-cultural condition. Several questions arise from this observation:

• To what extent is the overall appearance of differential progress borne out by careful examination? What hypotheses can be empirically tested to provide solid explanations for this occurrence if it is demonstrated to be true?

• In comparing and contrasting the economic experiences of blacks and Puerto Ricans, both against other minority groups and among segments of poor blacks and Hispanics respectively, can we gain a better understanding of why economic progress has differential effects on varying population segments? What factors are responsible for differential group economic status?

• What are the socio-economic and cultural causes, correlates, and consequences of the high incidence of poverty in large central cities? Is there a highly disadvantaged population among the poor residing in central cities whose condition deserves special analytic explanation (e.g. deficiency of positive social values vs. limited opportunities and barriers to the achievement of self-sufficiency) and special intensive anti-poverty remedial efforts?

As can be seen from the above, a particular focus of this priority area concerns the so-called "underclass" population. Though this poverty segment defies clear definition, and the underclass term itself elicits significant controversy, many analysts have demonstrated the existence of a severely handicapped group of poor fitting some or all of the prominent characteristics associated with this classification. One aspect of this area relates to certain segments of the AFDC population about which little is known. A significant proportion of those who leave the rolls exit because the youngest child reaches eighteen, i.e., becomes "overaged". Another group is thought to "recycle" poverty, i.e. transmit poverty intergenerationally. Concerns are increasingly voiced that those who are long-term users of AFDC belong to these groups.

Of the many questions that arise in this context; the following seem among the most salient:

• Very little data is available on this group of welfare dependents, and therefore little is known regarding changes in its size and composition over time. To what extent is it possible to use various data sources, such as the decennial census or State welfare agency case data files, for learning more about the supposed growth in this population in absolute numbers over a time period such as twenty years? Can data be found that would illustrate its growth relative to other AFDC users?

• Is it possible to address questions regarding the rural-urban composition or the racial make-up of this group? Such data are crucial to shedding light on the standard presumption that this group of people is predominantly minority and inner city.

• Can such data regarding the changes in worst-case poverty be used to illustrate some of the effects of the wider social disintegration that has occurred in many areas over the last twenty years or so?

Due to the obvious need for detailed breakdowns of characteristics, and specific comparisons between the characteristic groupings, the appropriate data base would likely be the decennial Censuses.

*e. The incidence and implications of the growth of sub-families.* Recent research demonstrates that the growth of related sub-families, defined as including families of two or more persons within a larger household, whose head is a relative of the household head, in the past 10 years represents a significant new demographic trend in household formation and structure. Due to technical changes occurring in 1981 and 1982 in the way subfamilies were recorded in the Current Population Survey (CPS), over 1 million subfamilies were newly identified (CPS counting of non-related "secondary" families does not appear to be suspect). This finding clearly demonstrates that the number of sub-families identified previous to the CPS coding change grossly undercounted the true population.[2] Three sets of issues immediately present themselves regarding this discovery:

• Taking the new CPS coding as accurate, what is the historical pattern of sub-families prior to 1981?

• What are the characteristics of these subfamilies (e.g. race, age of head and children, total income and sources of this income, asset ownership, and education), and in particular how do these characteristics compare with other categories of families such as various government program recipients?

• How can the growth of sub-families be explained, what are its causes, and what can be projected into the future about the number and composition of these sub-families?

Overall, changes to this sub-family population appear to have profound consequences for income security issues concerning both elderly and non-elderly populations. These issues include:

• To the extent that previously unidentified sub-families are categorically eligible for government programs, especially AFDC, and further that the characteristic? of AFDC eligibles are altered with the addition of the sub-families, it is likely that historical studies of the low-income population which are run on multiple CPS files using the family as the basic unit of analysis will be impaired (preliminary evidence supports this thesis). Can these multiple effects regarding our understanding of the low-income population be sorted out? Do

---

[2] Ruggles, Patricia & Richard C. Michel, "Participation Rates in the Aid to Families with Dependent Children Program: Trends for 1967 Through 1984", The Urban Institute, Washington, DC, April 1987, Contract HHS-100-84-0021, Task Order No. 5. (This report can be obtained by writing to: Policy Information Center, Office of the Assistant Secretary for Planning and Evaluation, Department of Health and Human Services, Washington, DC 20201.)

these effects include estimates of the number of families in poverty, and hence poverty rates?

- What relationships exist between the growth of sub-families and the incidence of teenage pregnancy?
- What is the interaction between large numbers of sub-families and the provision of child care?
- What can be said concerning altered living arrangements, in general, and their effects on education, work and welfare receipt?

The relevant data base for this project would most likely be the decennial Censuses, though this may possibly be substituted (or complemented) by newly enhanced Panel Study of Income Dynamics (PSID) data, produced by the University of Michigan's Survey Research Center, or DHHS in-house Integrated Quality Control (IQC) data. The research difficulty involves the complex process of identifying related sub-families when located in a multi-generational household unit. For both the PSID and IQC data bases, recently implemented changes will allow more precise identification of sub-families.

*f. Unemployment spell dynamics and displacement.* For over twenty years Federal government labor policy has actively promoted education and training programs devoted to increasing the labor market prospects for workers who lack adequate human capital. A central analytical question behind these direct job creation and training program activities involves a better understanding of employee displacement and corresponding unemployment dynamics resulting from this form of labor market intervention. This understanding is germane to defending the continuance or alteration of these programs.

Our ignorance concerning this priority area is illustrated by two facts: There have been almost no employment or training programs run on an experimental basis; and when there has, non-experimental comparative studies—the overwhelming majority of research in this area—have generated different results than the 'true' experimentally determined ones.

The following questions represent some of the important issues connected with this priority area:

- The "stylized" policy view that permeates many areas, from training programs to immigration laws, is that entry into the labor force of trainees or migrants causes displacement of current workers. The concern of many is that such displacement leads to a permanent increase in unemployment. Economic growth theory, and empirical applications thereof, tells us that this view is false, because labor supply growth is associated with an increase in the rate of growth of per capita income over time. Therefore, displacement, in so far as it ever occurs, can only be a short-run phenomenon; in other words, every entry into the labor force may or may not initiate an unemployment spell for someone already working. The relevant question therefore, is what can be discerned regarding the short-term displacement that occurs from training the AFDC population? To the extent that training of welfare dependents leads to successful job placement, does this occur at the cost of displacement? What are the prospects for the development of an appropriate model that can be used to properly evaluate the effects of training activities in the AFDC area in particular?
- What are the empirical determinants of displacement (e.g. job categories, employee characteristics, wages, and lengths of resulting unemployment spells associated with labor force participation of different population segments (e.g. immigrants; and current and potential welfare recipients))? What types of jobs do originally displaced workers eventually find? Are there differential union/non-union effects relative to displacement of program participants?
- What other displacement effects occur (e.g. on capital formation, moving costs, types of jobs provided by the economy, local labor movements, etc.)? How is displacement affected by national/regional unemployment rates or vacancy rates?

It appears that a carefully done unemployment spell-based analysis in this context would be very useful even if well-specified displacement estimation proved to be elusive. Clearly a better understanding of both long- and short-run effects of job creation and training programs is needed to design programs with a sound analytic foundation and hence which are cost-effective. This priority area covers an extremely broad set of issues. Investigators are encouraged to explore possibilities for combining and piecing together information from a variety of sources.

*g. The transfer society: Growth, composition (cash v. in-kind expenditures), and political-economic explanations and implications.* In the past 25 years, there has been a massive growth in the level of means-tested in-kind benefits to the point that they currently dwarf means-tested cash benefits. In fact, the Bureau of the Census has estimated that when in-kind benefits are counted, poverty rates are between 8 and 33 percent lower than those based solely on money income, depending on the income definition used to evaluate these non-cash benefits. A major change such as this in the nature of transfers stimulates questions such as the following:

- Why as a nation have we witnessed such a proliferation of in-kind benefits?
- What political and economic factors account for this behavior?
- What effects does this transfer structure have on poverty and the personal distribution of income?
- It is claimed by some researchers that political economic constraints account for the presumed "inefficiency" of in-kind over cash grants. What are these constraints? Is the assertion of inefficiency overstated? If, in fact, these constraints lead to a significant welfare loss, what changes would promote a more efficient transfer structure?
- Are there indirect effects of growth on the level of transfers, i.e. in a "donor—recipient" model, does economic growth affect the decisions on the part of the "donors" to change both the level and/or composition of benefits to the "recipients"?
- With the unprecedented growth of in-kind benefits, the importance of deriving proper in-kind benefit evaluation methodologies is increased for both poor and non-poor populations. Can consistent evaluation techniques be devised? Can these techniques be applied to the parallel issue of the measurement and growth of non-cash fringe benefits and the degree to which these benefits have substituted for cash remuneration? What is the relevance of a single poverty index once a "full" evaluation has been performed?

Research in this overall area would necessarily encompass work positing varied explanations and arising from several disciplines, be intended to inform an understanding of the political structure and its changes over the last 25 years, and would attempt to link these political changes to the significant changes which have occurred in the overall transfer structure.

Despite the apparent thematic nature of the proposed research, offerors are encouraged to devise empirical tests for the competing explanations of the time series changes in the level and composition of transfers.

2. *Products.* The applicant should present a schedule for delivery of interim progress reports and a final report. For any project which significantly enhances a data base in the course of the work, a well-documented public use file should also be prepared.

3. *Potential users.* Potential users of the research include policy makers at Federal, State and local levels of

government, employers, unions, financial institutions, investors, and providers of health insurance, pensions and other fringe benefits. Because many of those who will be interested in this research lack advanced technical training, it is important that the results of projects be presented in a fashion accessible to such and audience.

4. *Types of projects excluded.* In consideration of the intent of this announcement, applications concentrating on a narrow programmatic or policy focus, or on one which is not directed to concerns of national interest, will not be considered for funding.

In addition, this announcement seeks empirical analysis of the individual issues which is founded on a sound theoretical base. Applications that are limited to theoretical development or include new data collection efforts, will not be considered.

5. *Content and organization of the applications.* The application must begin with a cover sheet followed by the required application forms and an abstract (of not more than two pages) of the application. Failure to include the abstract may result in delays in processing the application. Each application should include a discussion of the relevant literature, a description of the models to be analyzed, the data sources to be used, and the methodologies proposed to test the models. Resumes of staff should be included, as should a full budget and a schedule of tasks for the proposed projects.

**B. Applicable Regulations**

1. "Grants Programs Administered by the Office of the Assistant Secretary for Planning and Evaluation" (45 CFR Part 63), *Code of Federal Regulations*, October 1, 1980.

2. "Administration of Grants" (45 CFR Part 74), *Code of Federal Regulations* on June 9, 1981.

**C. Effective Data and Duration**

1. The grants awarded pursuant to this announcement are expected to be made on or about September 30, 1987, however some may be made subsequent to this data (see Section D below).

2. In order to avoid unnecessary delays in the preparation and receipt of applications, this notice is effective immediately. The closing dates for applications are specified in Sections F and G below.

3. Applicants may present a work plan and budget covering a twelve to eighteen month period.

**D. Statement of Funds Available**

1. $400,000 has been set aside for grants to be awarded as a result of this announcement. Specifically, $100,000 is for grants covering priority area a. *The Relationship of Availability of Medical Services to Welfare Dependency.* Applications in this priority area may be for a single project costing approximately $100,000 or for smaller projects costing approximately $50,000. For the remaining six priority areas, applications may be for single projects costing as much as $150,000, but it is expected that most awards will be for single projects of $50,000 to $75,000. Up to $150,000 of additional funds (utilizing fiscal year 1988 policy research funds), may be made available for unfunded proposals which are of exceptional quality in these priority areas (b. through g.).

Applicants are encouraged to seek additional funds from other sources for this project. Applicants should discuss any commitments, plans, or hopes for additional funds, including size and sources. When it is judged that successful completion of a proposed project depends on outside funding, this office's funding commitment will be made contingent on complete demonstration of that outside funding.

2. Funds may be obligated fully at the time of award of these grants or incrementally over the following 12 to 18 months.

3. The government reserves the right to select for funding more than one application in a given priority area. Further, the selection of the priority areas from the entire set, for which awards will be made, will be made in accordance with the quality of proposals received. However, nothing in this application should be construed as committing the Assistant Secretary to make any award.

**E. Application Processing**

1. Applications will be initially screened for relevance to the needs defined in section A (as well as additional areas of interest persuasively shown to be relevant by the grantee). If judged relevant, the application will then be reviewed by a government review panel, possibly augmented by outside experts. *Three (3) copies* of each application are required. Applicants are encouraged to send an additional *seven (7) copies* of their application to ease processing, but applicants will not be penalized if these extra copies are not included.

2. Applications will be judged as to eligibility, quality, and relevance, according to the criteria set forth in Item 5.

3. An unacceptable rating on any individual criterion may render the application unacceptable. Consequently, applicants should take care to ensure that all criteria are fully addressed in the application.

4. Applications should be as brief and concise as is consistent with the information requirements of the reviewers. Applications should be limited to 25 doubled-spaced typed pages, exclusive of forms, abstract, résumés, and proposed budget; they should neither be unduly elaborate nor contain voluminous supporting documentation.

5. *Criteria for Evaluation.* Evaluation of applications will employ the following criteria. The relative weights are shown in parentheses.

a. *Usefulness.* The potential usefulness of the objectives and anticipated results of the proposed project for providing individuals and organizations concerned with the issues discussed in Section A above with improved bases for making decisions about these issues. The potential usefulness of the proposed project for the advancement of science. (25 points)

b. *Clarity and understanding.* Understanding and knowledge of prior work in the area. The cost effectiveness of the proposal and the clarity of statement of objectives, methods, and anticipated results. (15 points)

c. *Research design.* The appropriateness and soundness of methodology (which may include an interdisciplinary approach), including overall research design, statistical techniques, modeling strategies, choice of data, and other proposed procedures. Probability of successful completion of the study. (30 points)

d. *Experience and qualifications of personnel.* Principal Investigator's and other key staff's experience in this or related areas and indications of innovative approaches and creative potential. Indication of the ability of key staff to produce publishable quality reports or articles. (30 points)

**F. Applications Sent by Mail**

Applications may be sent by either the U.S. Postal Service or a commercial carrier. Applications sent by U.S. Postal Service will be considered to be received on time by the Grants Officer if the application was sent by first class, registered or certified mail not later than August 3, 1987, as evidenced by the U.S. Postal Service postmark on the wrapper or envelope, or on the original receipt from the U.S. Postal Service.

Applications sent by a commercial carrier will be considered to be received on time by the Grants Officer if sent not later than August 3, 1987, as evidenced by a receipt from the commercial carrier.

**G. Hand-Delivered Applications**

An application to be hand-delivered must be taken to the Grants Officer at the address listed at the end of this announcement. Hand-delivered applications will be accepted daily between 9:00 am and 4:30 pm, Washington, DC, time, except Saturdays, Sundays, or Federal holidays. Applications will not be accepted after close of business on August 6, 1987.

**H. Disposition of Applications**

*1. Approval, Disapproval, or Deferral*

On the basis of the review of the application, the Assistant Secretary will either (a) approve the application as a whole or in part; (b) disapprove the application; or (c) defer action on the application for such reasons as lack of funds or a need for further review.

*2. Notification of Disposition*

The Assistant Secretary will notify the applicants of the disposition of their application. A signed notification of grant award will be issued to the contact person listed in block 4 of the application to notify the applicant of the approved application.

**I. Application Instructions and Forms**

Copies of applications should be requested from and submitted to: Grants Officer, Office of the Assistant Secretary for Planning and Evaluation, Department of Health and Human Services, 200 Independence Avenue, SW., Room 426F, Hubert H. Humphrey Building, Washington, DC 20201, Phone (202) 245–1794. Questions concerning the preceding information should be submitted to the Grants Officer at the same address. Neither questions nor requests for applications should be submitted after July 17, 1987.

**J. Federal Domestic Assistance Catalog**

This announcement is not listed in the Federal Domestic Assistance Catalog.

**K. Intergovernmental Review of Federal Programs**

This program is not subject to Executive Order 12372, "Intergovernmental Review of Federal Programs" or its implementing regulations 45 CFR Part 100.

Dated: May 19, 1987.

**Robert B. Helms,**

*Assistant Secretary for Planning and Evaluation.*

**Centers for Disease Control**

## Availability of Funds for Fiscal Year 1987; Cooperative Agreements to Support State Pregnancy Risk Assessment Surveillance

**Introduction**

The Centers for Disease Control (CDC) announces the availability of funds for Fiscal Year 1987 for cooperative agreements to provide assistance only to State health departments for the purpose of undertaking one or both components of a pregnancy risk assessment surveillance system. The components of the system include development and initation of a population-based surveillance system, Pregnancy Risk Assessment Monitoring System (PRAMS) and enhancement and expansion of the existing Pregnancy Nutrition Surveillance System (PNSS).

**Authority**

These programs are authorized under section 301(a) of the Public Health Service Act (42 U.S.C. 241 (a)), as amended. The Catalog of Federal Domestic Assistance Number is 13.283.

**Program Background and Objectives**

During recent years, the U.S. infant mortality rate has ceased to decline rapidly. Moreover, the prevalence of low birthweight, the major determinant of infant mortality, has declined very little over the past 20–30 years. Regional studies have suggested that at least part of the failure to improve infant birthweight and reduce infant mortatity is related to both the prevalence of maternal factors which increase the infant's risk, including smoking during pregnancy and poor nutritional status, and to problems that result from pregnant women failing to receive adequate prenatal care. State-specific analysis from the National Infant Mortality Surveillance (NIMS) project revealed major differences among the States in infant survival rates. However, there are no State-specific data to examine how much of this differential is related to behavioral or programmatic factors. Such data could be very useful for planning and evaluating programs aimed at reducing behavioral risk factors during pregnancy and at improving prenatal programs. Through this activity, CDC proposes to assist the States to develop pregnancy surveillance through two complementary system. The Pregnancy Risk Assessment Monitoring System (PRAMS) is a population-based survey of a sample of all women who have recently given birth in the State to evaluate risk factors which are associated with infant mortality and low birth weight. The Pregnancy Nutrition Surveillance System (PNSS), which is already established in several States to collect nutritional information on low income pregnant women who attend public prenatal clinics, will be expanded to obtain additional behavioral risk factor data (e.g., smoking and alcohol use).

CDC envisions that both PRAMS and PNSS will become ongoing State surveillance systems. The State participating in this initial stage will make major contributions to the protocol development of both systems. Applications should reflect plans for progressive reliance on independent financing sources as the systems are made fully operational.

The purposes of these Cooperative Agreements are to:

•Promote the development and use of standardized pregnancy surveillance methods in support of State MCH and WIC program efforts to reduce pregnancy-related health risks and adverse pregnancy outcomes.

•Assist States in monitoring trends in the prevalence of prenatal risk factors (smoking, nutrition, alcohol, prenatal care, etc.), which are major predictors of infant mortality and low birtheweight, and in linking these risk factors to the incidence of adverse pregnancy outcomes.

•Provide information needed to the States to assess coverage, targeting, and effectiveness of prenatal care programs; to redirect health services accordingly; and evaluate the extent to which program redirections result in improved health outcomes.

**Eligible Applicants**

Because the intent of these cooperative agreements is to develop State capacity to conduct pregnancy risk assessment surveillance, competiton is restricted to the official public health agencies of States including the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, American Samoa, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau. No other applications will be accepted.

**Availability of Funds**

Appoximately $325,000 will be available for the Pregnancy Risk Assessment Monitoring System and $325,000 will be available for the Pregnancy Nutrition Surveillance System. Up to 10 awards will be made for the PRAMS and up to 10 awards for the PNSS. Applicants may apply and receive funding for either or both programs. The awards will be funded 12 months of a 3-year project period for PRAMS and for 12 months of a 2-year project period for PNSS.

**Applications Submission and Deadline**

The original and two copies of the application must be submitted to Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Places Ferry Road NW, Room 321, Atlanta, Georgia 30305 on or before July 17, 1987.

*1. Deadline:*

Applications shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date, or

b. Sent on or before the deadline date and received in time for submission to the independent review group. Applicants must request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely application.

*2. Late Application:*

Applications which do not meet the criteria in 1.a or b. above are considered late applications. Late application will not be considered in the current competiton and will be returned to the applicant.

**Other Submission and Review Requirements**

Applications are not subject to review as governed by Executive Order 12372, entitled "Intergovernmental Review of Federal Programs."

**Where to Obtain Additional Information**

Information on application procedures, copies of application forms, program announcement, and other materials may be obtained from Nealean Austin, Grants Management Specialist, Centers for Disease Control, Room 315, 255 East Paces Ferry Road NE, Atlanta, Georgia 30305 or by calling (404) 262–6575 or FTS 236–6575. Technical assistance may be obtained for PRAMS from Melissa Adams, Ph.D., Pregnancy Surveillance Branch, Division of Reproductive Health, Center for Health Promotion and Education, Centers for Disease Control, 1600 Clifton Road, Atlanta, Georgia 30333 or by calling (404) 329–3131 or for PNSS from Gary Hogelin, Division of Nutrition, Center for Health Promotion and Education, Centers for Disease Control, 1600 Clifton Road NE, Atlanta, GA 30333, or by calling (404) 329–3075.

Dated: May 19, 1987.

**National Institutes of Health**

**Division of Research Resources; Meeting of the Minority Biomedical Research Support Subcommittee of the General Research Support Review Committee**

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Minority Biomedical Research Support Subcommittee (MBRSS) of the General Research Support Review Committee (GRSRC), Division of Research Resources (DRR), July 20–21, 1987, Building 31, Conference Room 4, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

This meeting will be open to the public on July 21, from 1:30 p.m. to adjournment to discuss policy matters relating to the Minority Biomedical Research Support Program (MBRSP). Attendance by the public will be limited to space available.

In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on July 20, from 8:30 a.m. to 5 p.m. and on July 21, 8:30 a.m. to 12:30 p.m. for the review, discussion, and evaluation of individual grant applications.

The applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B10, Bethesda, Maryland 20892, (301) 496–5545, will provide a summary of the meeting, and a roster of the committee members upon request. Dr. Lawrence J. Alfred, Executive Secretary, (301) 496–4360, will provide substantive program information upon request.

(Catalog of Federal Domestic Assistance Program No. 13.375, Minority Biomedical Research Support, National Institutes of Health).

Dated: May 14, 1987.

**National Institute of Allergy and Infectious Diseases; Meeting; Allergy and Clinical Immunology Subcommittee Allergy, Immunology, and Transplantation Research Committee**

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Allergy and Clinical Immunology Subcommittee of the Allergy, Immunology, and Transplantation Research Committee, National Institute of Allergy and Infectious Diseases, on June 16, 1987, in Conference Room 4, Building 31C, at the National Institutes of Health, Bethesda, Maryland 20892.

The meeting will be open to the public from 8:30 a.m. to 10:30 a.m. on June 16, to discuss administrative details relating to committee business and for program review. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting of the Allergy and Clinical Immunology Subcommittee will be closed to the public for the review, discussion, and evaluation of individual grant applications and contract proposals from 10:30 on June 16, until adjournment. These applications, proposals, and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Patricia Randall, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Maryland 20892, telephone (301–496–5717), will provide a summary of the meeting and a roster of the committee members upon request.

Dr. Nirmal K. Das, Executive Secretary, Allergy, Immunology and

Transplantation Research Committee, NIAID, NIH, Westwood Building, Room 706, Bethesda, Maryland 20892, telephone (301–496–7966), will provide substantive program information.

## National Institute of Allergy and Infectious Diseases; Meeting; Microbiology and Infectious Diseases Research Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Microbiology and Infectious Diseases Research Committee, National Institute of Allergy and Infectious Diseases, on June 11, and 12, 1987, in Building 31C, Conference Room 8, at the National Institutes of Health, Bethesda, Maryland 20892.

The meeting will be open to the public from 9 a.m. to 12 p.m. on June 11, to discuss administrative details relating to committee business and for program review. Attendance by the public will be limited to space available. In accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting of the Microbiology and Infectious Diseases Research Committee will be closed to the public for the review, discussion, and evaluation of individual grant applications and contract proposals from 12 p.m. until recess on June 11, and from 9 a.m. until adjournment on June 12. These applications, proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Patricia Randall, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A32, National Institutes of Health, Bethesda, Maryland 20892, telephone (301–496–5717), will provide a summary of the meeting and a roster of the committee members upon request.

Dr. M. Sayeed Quraishi, Executive Secretary, Microbiology and Infectious Disease Research Committee, NIAID, NIH, Westwood Building, Room 706, Bethesda, Maryland 20892, telephone (301–496–7966), will provide substantive program information.

## National Institute of Environmental Health Sciences; Meeting; Environmental Health Sciences Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Environmental Health Sciences Review Committee on July 27–28, 1987, in Building 101 Conference Room, South Campus, NIEHS, Research Triangle Park, North Carolina. This meeting will be open to the public on July 27 from 9 a.m. to approximately 10:30 a.m. for general discussion. Attendance by the public is limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on July 27, from 10:30 a.m. to adjournment on July 28, for the review, discussion and evaluation of individual grant applications and contract proposals. These applications and proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications and proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Drs. John Braun or Carol Shreffler, Executive Secretaries, Environmental Health Sciences Review Committee, National Institute of Environmental Health Sciences, National Institutes of Health, P.O. Box 12233, Research Triangle Park, North Carolina 27709, (telephone 919–541–7820), will provide summaries of meeting and rosters of committee members.

## Public Health Service

### Public Health Conference on Records and Statistics

The Assistant Secretary for Health announces the dates and other information for the following conference scheduled to assemble during the month of July 1987:

Name: Public Health Conference on Records and Statistics

Date and time: July 13–15, 1987, 9:00 a.m.

Place: The Mayflower Hotel, 1127 Connecticut Avenue NW., Washington, DC 20036.

Open to the Public (Registration required; however, there is no registration fee.)

Purpose: The Twenth-first National Meeting of the Public Health Conference on Records and Statistics (PHCRS) is cosponsored by the National Center for Health Statistics, the National Institute on Aging, and the U.S. Bureau of the Census. This national Conference is recognized as one of the paramount meetings for workers in the field of public health statistics. The theme of the 1987 PHCRS is "Data for an Aging Population, Issues in Health, Research, and Public Policy, Now and Into the 21st Century." Older Americans comprise an increasingly larger segment of the population. This unprecedented increase forecasts changes of major consequence in the social and economic composition of the Nation. Nowhere is this more apparent than in the area of health—life expectancy has increased dramatically, but so have the use and cost of health care. How will we plan for the health needs of an aging America? What data and analyses will be important to addressing issues of health, research, and public policy in an aging America? What long-range plans and policies will help meet the challenges? This conference on data on aging was developed to provide answers to these questions, answers relevant now and into the 21st Century. This Conference is structured around three themes: Issues in measurement and metholodology; issues in public policy; and issues in analyses, trends, and projections.

Anyone wishing to obtain a program, registration information, or other relevant information concerning the Conference should contact: Program Development Staff, National Center for Health Statistics, Room 2–28, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, telephone (301) 436–7122.

**Robert A. Israel,**

*Deputy Director, National Center for Health Statistics.*

BILLING CODE 4160-17-M

## DEPARTMENT OF THE INTERIOR

## Bureau of Reclamation

### Contracting for Central Valley Project Water South of the Sacramento-San Joaquin Delta, CA

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of intent to prepare an Environmental Impact Statement (EIS) on contracting for Central Valley Project Water South of the Sacramento-San Joaquin Delta.

**SUMMARY:** Pursuant to section 102 (2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, the Department of the Interior proposes to prepare an Environmental Impact Statement (EIS) on reinitiating long-term contracting for Central Valley Project (CVP) water south of the Sacramento-San Joaquin Delta. This Delta Export Water Contracting EIS will identify the site specific and cumulative impacts of allocating available CVP water for different purposes (agriculture, municipal and industrial, fish and wildlife, and recreation) in the Delta export service area. This will not affect any water currently under contract. Existing and potential water users have been asked to identify their additional water demands. The EIS will include an analysis of actual water needs considering water conservation and conjunctive use of available surface and ground-water supplies.

Three scoping workshops have been scheduled to solicit information from interested public entities and persons in determining the scope and the significant issues of concern. Public participation is an integral part of the NEPA process and the public is encouraged to participate to ensure that consideration is given to all significant issues.

Written comments from those unable to attend the workshops and from those wishing to supplement their oral presentation should be submitted by June 23, 1987 to the Bureau of Reclamation address provided below.

**DATES:** The workshops will be held June 10, 11, and 16, 1987, 7:30 p.m. to 10:30 p.m.

**ADDRESSES:** The workshops will be held at:

June 10, 1987, 7:30 p.m.–10:30 p.m., Fresno Hilton Inn, North Ballroom, 1055 Van Ness, Fresno, CA

June 11, 1987, 7:30 p.m.–10:30 p.m., Bakersfield Hilton Inn, Ballroom, 3535 Rosedale Hwy., Hwy. 99 and 58 West, Bakersfield, CA

June 16, 1987, 7:30 p.m.–10:30 p.m., Holiday Inn Holidome, Sierra Room, 5321 Date Ave., Madison and Hwy. 80, Sacramento, CA

**FOR FURTHER INFORMATION CONTACT:** Mr. Alan Solbert, Environmental Specialist, Bureau of Reclamation, Mid-Pacific Region (MP–750), 2800 Cottage Way, Sacramento, CA 95825–1898; telephone (916) 978–5131.

**SUPPLEMENTARY INFORMATION:** The Delta Export Water Contracting EIS will include the geographic area currently served or proposed to be served by CVP water pumped from the Sacramento-San Joaquin Delta. The area under consideration generally lies between the Delta and the portion of the Tehachapi Range in Kern County and includes the San Joaquin Valley and the Santa Clara Valley.

On May 29, 1986, Reclamation published a Notice of Intent to prepare an EIS for the San Joaquin Valley Conveyance Study (51 FR 19420). The purpose of the study is to investigate means to provide an additional water supply to the San Joaquin Valley to relieve the present groundwater overdraft. Reclamation now will include the environmental analysis of the San Joaquin Valley Conveyance Study in the Delta Export Water Contracting EIS. In addition, the EIS also will discuss the impacts of the Department of the Interior and the State of California entering into a conveyance and water purchase agreement, pursuant to the Coordinated Operations Agreement. Such an agreement is expected to increase the capability of the CVP to export water from the Delta. Consequently, the EIS will also deal with proposed purchases of water from the CVP for use in the State Water Project service area.

Water needs for wildlife refuges in the San Joaquin Valley and information from Reclamation's Refuge Water Supply Study will be included in this analysis. The water for wildlife refuges in the Sacramento Valley will be

included in the Sacramento River Water Contracting EIS.

Primary impacts which will be evaluated in the EIS include potential effects on water quality, land use, fish and wildlife, recreation, and socioeconomic parameters. Environmental review and consultation requirements that will be met concurrently with the NEPA process include applicable requirements of the Clean Water Act, the Fish and Wildlife Coordination Act, the National Historic Preservation Act, the Endangered Species Act, and Executive Orders 11988 and 11990 regarding flood plains and wetlands.

Reclamation's activities to reinitiate long-term contracting in the Mid-Pacific Region are designed to meet the following objectivies: Provide an equitable allocation of the remaining project yield; repay the costs of the Central Valley Project; optimize the amount of water available for beneficial use and the economic returns at the local, regional, and national level; maximize conjunctive use of surface and ground water; and comply with applicable State and Federal environmental protection policies.

A full range of allocation alternatives will be analyzed in the EIS, including:

1. Service of municipal, industrial, agricultural, fish and wildlife and recreation needs. Representative combinations of these principal needs would be analyzed based on alternatives which are identified during the scoping process.

2. Taking no action to increase the quantity of water presently under Federal contract.

Dated: May 20, 1987.

C. Dale Duvall,

*Commissioner.*

BILLING CODE 4310-09-M

---

## Fish and Wildlife Service

## Revised List of Species Covered by the U.S./Japan Migratory Bird Treaty

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The Service proposes, in conjunction with the Government of Japan, to revise the Annex to the Convention Between the United States of America and Japan for Protection of Migratory birds and Birds in Danger of Extinction and Their Environment. The Annex lists bird species covered by the Convention. A revision is necessary to bring the Annex up-to-date. The Service proposes to add certain species and delete others from the current Annex and the revise the English (common) and/or scientific names of some previously listed species as necessary to conform with the most recent accepted terminology. Only those species being added or deleted, or undergoing a name change, are listed here. After consideration of comments received on this proposed action, a final species list will be prepared and the Treaty will be revised by exchange of Diplomatic Notes with Japan.

**DATE:** Comments must be submitted on or before July 10, 1987.

**ADDRESS:** Comments may be mailed to Director (IA), U.S. Fish and Wildlife Service, Room 2058, Department of the Interior, 18th and C Streets, NW., Washington, DC 20240.

**FOR FURTHER INFORMATION CONTACT:** Edward J. McCrea, Senior Staff Specialist, Office of International Affairs, U.S. Fish and Wildlife Service, Room 2058, Department of the Interior, 18th and C Streets, NW., Washington, DC 20240, telephone 202/343-3895.

**SUPPLEMENTARY INFORMATION:** The Covention Between the United States of America and Japan for the Protection of Migratory Birds and Birds in Danger of Extinction and Their Environment (hereinafter referred to as the U.S./Japan Treaty) of 1974 protects any migratory bird common to both the United States and Japan. The Treaty is implemented through the Migratory Bird Treaty Act (16 U.S.C. 703 through 712) which regulates most aspects of the taking, possession, transportation, sale, purchase, barter, exportation, and importation of migratory birds. (The list of species covered under the U.S./Japan Treaty is contained in 50 CFR Part 10.)

Because of taxonomic changes and new distributional records, there is a need to redefine and reconsider the species to be afforded protection under the U.S./Japan Treaty. In addition, the status of several of the Trust Territories has changed recently. The new independent or free association status of these areas necessitates delisting of certain species for which the only U.S. records were from these Territories.

Since this action involves foreign affairs functions of the U.S., it is not subject to 5 U.S.C. 553, 601, or Executive Order 12291.

### Summary of Changes

51 additionals to the list:
- 33 because of new distributional records in the United States
- 12 because of new distributional records in Japan
- 2 because of new distributional records in both countries
- 2 because of changes in nomenclature
- 1 because of reevaluation of old information
- 1 because of a taxonomic decision

14 deletions from the list:
- 8 because of exclusion of U.S. Trust Territories in Pacific
- 6 because of the lack of valid records

19 changes nomenclature

82 total changes in list

37 net additions to the list

### Environmental Effects

Based on the fact that the proposed action does not significantly alter the scope, intent, and coverage of the existing Treaty, the Service has determined that revision of the Annex is not a major Federal action with would significantly affect the quality of the human environment within the meaning of section 101(2)(c) of the National Environmental Policy Act of 1969. Accordingly, the preparation of an environmental impact statement on such revisions is not required.

### Endangered Species Act Consideration

A number of species appearing in the Annex are also designated as Endangered or Threatened Under the Endangered Species Act (16 U.S.C. 1531 through 1543). No legal complications arise from the dual listing inasmuch as the two lists are developed by separate authorities and for different purposes.

### Primary Authors

The primary authors of this proposed revision are Richard C. Banks, Division of Wildlife and Contaminant Research; and Edward J. McCrea, Office of International Affairs.

### Public Comments Invited

The policy of the Department of the Interior is, whenever practical, to afford the public an opportunity to participate in proposed Federal actions. Accordingly, interested persons may submit written comments, suggestions, or objections regarding this proposal to the location identified in the address section above. Comments must be received on or before July 10, 1987. Following review and consideration of the comments, the Service will initiate formal revision of the Annex by an exchange of diplomatic notes with Japan.

**Proposed Revision**

Accordingly, it is hereby proposed to amend the Annex to the U.S./Japan Treaty as set forth below:

Frank Dunkle,

*Director, U.S. Fish and Wildlife Service.*

Dated: May 12, 1987.

Add: Pacific Loon, *Gavia pacifica* ..... S
Delete: Horned Grebe, *Podiceps auritus.* N
Add: Streaked Shearwater, *Calonectris leucomelas.* U
Add: Dark-rumped Petrel, *Pterodroma phaeopygia.* J
Delete: Cattle Egret, *Bubulcus ibis*..... T
Add: Chinese Egret, *Egretta eulophotes*.. U
Change: Reef Heron, *Demigretta sacra,* to Pacific Reef Heron, *Egretta sacra.* S
Delete: Japanese Night-Heron, *Gorsachius goisagi.* T
Delete: Malay Night-Heron, *Gorsachius melanolophus.* T
Delete: Schrenk's Little Bittern, *Ixobrychus eurhythmus.* T
Add: Tundra Swan, *Cygnus columbianus.* B
Add: Spot-billed Duck, *Anas poecilorhyncha.* U
Change: European Wigeon, *Mareca penelope,* to *Anas penelope.* S
Change: Shoveler, *Spatula clypeata,* to Northern Shoveler, *Anas clypeata.* S
Add: Ring-necked Duck, *Aythya collaris.* J
Delete: Baer's Pochard, *Aythya baeri*..... N
Add: Greater Scaup, *Aythya marila*..... B
Add: King Eider, *Somateria spectabilis*.. J
Add: Surf Scoter, *Melanitta perspicillata.* J
Delete: Rough-legged Hawk, *Buteo lagopus.* N
Change: Japanese Sparrow Hawk, *Accipiter virgatus* to *Accipiter gularis.* S
Delete: Black Kite, *Milvus migrans*..... T
Delete: Osprey, *Pandion haliaetus*..... N
Add: Eurasian Kestrel, *Falco tinnunculus.* U
Delete: Common Gallinule or Moorhen, *Gallinula chloropus.* N
Add: Northern Lapwing, *Vanellus vanellus.* U
Change: (Eurasian) Dotterel, *Eudromias morinellus* to *Charadrius morinellus.* S
Change: Wandering or Polynesian Tattler, *Tringa incana* (incl. *T. brevipes*) to Wandering Tattler, *Tringa* (3Heteroscelus) *incana* and Polynesian Tattler, *Tringa* (Heteroscelus) *brevipes.* S
Add: Marsh Sandpiper, *Tringa stagnatilis.* U
Add: Green Sandpiper, *Tringa ochropus* (=ocrophus). U
Add: Black-tailed Godwit, *Limosa limosa.* U
Add: Terek Sandpiper, *Xenus cinereus* .. U
Change: Least Whimbrel (Curlew), *Numenius minutus* to exclude Eskimo Curlew, *Numenius borealis.* S*
Add: Western Sandpiper, *Calidris mauri.* J
Change: Sanderling, *Crocethia alba,* to *Calidris alba.* S
Add: Stilt Sandpiper, *Calidris* (*Micropalama*) *himantopus.* J
Add: Pin-tailed Snipe, *Gallinago stenura.* U
Add: Eurasian Woodcock, *Scolopax rusticola.* R
Add: Oriental Pratincole, *Glareola maldivarum.* U
Change: Northern Phalarope, *Lobipes lobatus,* to Red-necked Phalarope, *Phalaropus lobatus.* S
Change: Skua, *Catharacta skua,* to South Polar Skua, *Catharacta maccormicki.* S*
Add: Common (Mew) Gull, *Larus canus.* U
Delete: Black-tailed Gull, *Larus crassirostris.* N
Add: Red-legged Kittiwake, *Larus* (*Rissa*) *brevirostris.* J
Add: Ross' Gull, *Larus* (*Rhodostethia*) *rosea.* J
Add: Caspian Tern, *Sterna caspia*..... J
Change: Least or Little Tern, *Sterna albifrons,* to Little Tern. S*
Change: Black Noddy, *Anous tenuirostris,* to *Anous minutus.* S
Change: Tufted Puffin, *Lunda cirrhata,* to *Fratercula* (*Lunda*) *cirrhata.* S
Delete: Hawk Cuckoo, *Cuculus fugax*..... T
Add: Oriental Scops-Owl, *Otus scops* (=*sunai*).. U
Add: White-throated Needletail, *Chaetura* (*Hirundapus*) *caudacuta.* U
Add: Hoopoe, *Upupa epops*..... U
Add: Horned Lark, *Eremophila alpestris.* U
Add: Pechora Pipit, *Anthus gustavi* ..... U
Change: White or Pied Wagtail to *Motacilla alba* (including *lugens*). S
Add: Brown Shrike, *Lanius cristatus*..... U
Add: Bluethroat, *Erithacus* (*Luscinia*) *svecicus.* J
Add: Siberian Blue Robin, *Erithacus* (*Luscinia*) *cyane.* U
Add: Northern Wheatear, *Oenanthe oenanthe.* U
Add: Dusky Thrush, *Turdus naumanni*... U
Add: Fieldfare, *Turdus pilaris*..... U
Add: Red-brested Flycatcher, *Ficedula parva.* U
Delete: Narcissus Flycatcher, *Muscicapa narcissina.* T
Change: Chinese Gray-spotted Flycatcher, *Muscicapa gilselsticta,* to Gray-spotted Flycatcher.
Add: Sooty Flycatcher, *Muscicapa sibirica.* U
Add: Brown Flycatcher, *Muscicapa latirostris.* U
Add: Lanceolated Warbler, *Locustella lanceolata.* U
Change: Redpoll (incl. common and Hoary Redpoll), *Carduelis flammea* (incl. *C. hornemanni*), to Common Redpoll, *Carduelis flammea* and Hoary Redpoll, *Carduelis hornemanni.* S
Add: Oriental Greenfinch, *Carduelis sinica.* U
Add: Common Rosefinch, *Carpodacus erythrinus.* U
Add: Little Bunting, *Emberiza pusilla* ..... U
Add: Gray Bunting, *Emberiza variabilis.* U
Add: Pallas' Bunting, *Emberiza pallasi*... U
Add: Reed Bunting, *Emberiza schoeniculus.* U
Add: Lapland Longspur (Bunting), *Calcarius lapponicus.* U
Add: Snow Bunting, *Plectrophenax nivalis.* J
Add: Savannah Sparrow, *Passerculus sandwichensis.* J
Delete: Violet-backed Starling, *Sturnus philippensis.* T
Change: Ashy Starling, *Sturnus cineraceus,* to Grey Starling.

Code:

S—Change for systematic or taxonomic reason; name change not resulting in an addition or deletion to the list
S*—Change for systematic or taxonomic reason; change in coverage resulting from division of species with only one of the new species covered
J—Addition because of new distribution record in Japan
U—Addition because of new distribution record in United States
B—Addition because of new records in both countries
R—Addition because of reevaluation and acceptance of previous record
N—Deletion because of lack of valid record of mutual (sub)species
T—Deletion because of exclusion of U.S. Trust Territories

Note.—Where Japanese and U.S. use of generic names differ, the more inclusive name is given followed by the less inclusive name in parentheses.

## National Park Service

### Intention To Negotiate Concession Contract

Pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Prince William Travel Trailer Village, authorizing it to continue to provide travel trailer camping facilities and services for the public at Prince William Forest Park, Virginia, for a period of ten (10) years from January 1, 1987, through December 31, 1996.

This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1986, and therefore, purusant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Superintendent, Prince William Forest Park, Triangle, Virginia, for information as to the requirements of the proposed contract.

Dated: May 14, 1987.

**Manus J. Fish, Jr.,**

*Regional Director, National Capital Region.*

## Chesapeake and Ohio Canal National Historical Park Commission; Meeting

Notice is hereby given in accordance with Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held Saturday, June 20, 1987 at the Mather Training Center, Harpers Ferry, West Virginia.

The Commission was established by *Pub. L. 91-663* to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

**The Members of the Commission are as Follows**

Miss Carrie Johnson, Chairman, Arlington, Virginia
Mr. Carl L. Shipley, Washington, DC
Ms. Polly Bloedorn, Bethesda, Maryland
Mr. James B. Coulter, Annapolis, Maryland
Mrs. Constance Lieder, Baltimore, Maryland
Mr. William H. Ansel, Jr., Romney, West Virginia
Mr. Silas Starry, Shepherdstown, West Virginia
Mr. John D. Millar, Cumberland, Maryland
Mr. Howard Buchanan, Cumberland, Maryland
Mr. Rockwood H. Foster, Washington, DC
Mr. Barry Passett, Washington, DC
Ms. Barbara Yeaman, Brookmont, Maryland
Ms. Joan LaRock, Lovettsville, Virginia
Ms. Elise Heinz, Arlington, Virginia
Ms. Marjorie Stanley, Silver Spring, Maryland
Mrs. Minny Pohlmann, Dickerson, Maryland
Dr. James H. Gilford, Frederick, Maryland
Mr. R. Lee Downey, Williamsport, Maryland
Mr. Edward K. Miller, Hagerstown, Maryland

**Matters to be Discussed at This Meeting Include**

1. Old and new business
2. Superintendent's report
3. Committee reports
   Plans and Projects Committee
   Recreation Policies and Issues Committee
   Resource Protection Committee
4. Public comments

The meeting will be open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed. Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Richard L. Stanton, Superintendent, C&O Canal National Historical Park, P.O. Box 4, Sharpsburg, Maryland 21782.

Minutes of the meeting will be available for public inspection six (6) weeks after the meeting at Park Headquarters, Sharpsburg, Maryland.

Dated: May 14, 1987.

## INTERSTATE COMMERCE COMMISSION

### Agricultural Cooperative Intent to Perform Interstate Transportation for Certain Nonmembers

Dated: May 19, 1987.

The following Notices were filed in accordance with section 10526(a)(5) of the Interstate Commerce Act. These rules provide that agricultural cooperatives intending to perform nonmember, nonexempt, interestate transportation must file the Notice, Form BOP 102, with the Commission within 30 days of its annual meetings each year. Any subsequent change concerning

officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, DC 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC.

## JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

### Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet in the Internal Revenue Service Building, 1111 Constitution Avenue NW., in Washington, DC on June 22 and 23, 1987. The meeting will be in Room 3313 beginning at 8:30 a.m. each day.

The purpose of the meeting is to discuss topics and questions which may be recommended for inclusion on future Joint Board examinations in actuarial mathematics and methodology referred to in Title 5 U.S. Code, section 1242(a)(1)(B) and to review the May 1987 Joint Board examinations in order to make recommendations relative thereto, including the minimum acceptable pass scores. Topics for inclusion on the syllabus for the Joint Board's 1987 pension examination also will be discussed. In addition, the Society of Actuaries has requested consideration of its proposal that the Joint Board recognize successful completion of Society of Actuaries' examinations in the mathematics of life contingencies and compound interest, other than those the Society of Actuaries offers jointly with the Joint Board, as satisfying part of the basic actuarial knowledge requirement of the Joint Board's regulations governing eligibility for enrollment to perform actuarial services under the Employee Retirement Income Security Act of 1974. This matter is being placed on the agenda.

A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) has been made that the portions of the meeting dealing with the discussion of questions which may appear on the Joint Board's examinations and review of the May 1987 Joint Board examinations fall within the exceptions to the open meeting requirement set forth in Title 5 U.S. Code, section 552(c)(9)(B), and that the public interest requires that such portions be closed to public participation.

The portion of the meeting dealing with the discussion of the Joint Board examination syllabus and Society of Actuaries' request will commence at 1:30 p.m. on June 22 and will continue for as long as necessary to complete the discussion, but not beyond 3:30 p.m. This portion of the meeting will be open to the public as space is available. Time permitting, after discussion of the program by Committee members, interested persons may make statements germane to these subjects. Persons wishing to make oral statements are requested to notify the Committee Management Officer in writing prior to the meeting in order to aid in scheduling the time available, and should submit the written text, or, at a minimum an outline of comments they propose to make orally. Such comments will be limited to ten minutes in length. Any interested person also may file a written statement for consideration by the Joint Board and Committee by sending it to the Committee Management Officer. Notifications and statements should be mailed no later than June 8, 1987 to Mr. Leslie S. Shapiro, Joint Board for the Enrollment of Actuaries, c/o U.S. Department of the Treasury, Washington, DC 20220.

Dated: May 20, 1987.

**Leslie S. Shapiro,**

## DEPARTMENT OF JUSTICE

### Drug Enforcement Administration

[Docket No. 87-23]

### Charles J. Aswell, Jr., M.D., Ville Platte, LA; Hearing

Notice is hereby given that on February 5, 1987, the Drug Enforcement Administration, Department of Justice, issued to Charles J. Aswell, Jr., M.D. an Order to Show Cause as to why the Drug Enforcement Administration should not deny his Application for Registration dated October 22, 1986.

Thirty days having elaped since the said Order to Show Cause was received by Respondent, and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held commencing at 10:00 a.m. on Tuesday, June 2, 1987, in Courtroom 211, United States Tax Court, U.S. Custom House, 423 Canal Street, New Orleans, Louisian.

Dated: May 18, 1987.

**John C. Lawn,**

*Administrator, Drug Enforcement Administration.*

BILLING CODE 4410-09-M

## Importation of Controlled Substances; Application; McNeilab, Inc.

Pursuant to section 1008 of the Controlled Substances Import and Export Act (21 U.S.C. 958(i)), prior to issuing a registration under this section to a bulk manufacturer of a controlled substance in Schedule I or II, and prior to issuing a regulation under section 1002(a) authorizing the importation of such a substance, the Attorney General shall provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with § 1311.42 of Title 21, Code of Federal Regulation (CFR), notice is hereby given that on December 11, 1986, McNeilab, Inc., Welsh and McKean Roads, Spring House, Pennsylvania 19477, made application to the Drug Enforcement Administration to be registered as an importer of Difenoxin (9168), a basic class of controlled substance in Schedule I.

Any manufacturer holding, or applying for, registration as a bulk manufacturer of this basic class of controlled substance may file written comments on or objections to the application described above and may, at the same time, file a written request for a hearing on such application in accordance with 21 CFR 1301.54 in such form as prescribed by 21 CFR 1316.47.

Any such comments, objections or requests for a hearing may be addressed to the Deputy Assistant Administrator, Drug Enforcement Administration, United States Department of Justice, 1405 I Street, NW., Washington, DC 20537, Attention: DEA Federal Register Representative (Room 1112), and must be filed no later than June 25, 1987.

This procedure is to be conducted simultaneously with and independent of the procedures described in 21 CFR 1311.42(b), (c), (d), (e), and (f). As noted in a previous notice at 40 FR 43745-43746 (September 23, 1975), all applicants for registration to import a basic class of any controlled substance in Schedule I or II are and will continue to be required to demonstrate to the Deputy Assistant Administrator of the Drug Enforcement Administration that the requirements for such registration pursuant to 21 CFR U.S.C. 958(a), 21 U.S.C. 823(a), and 21 1311.42 (a), (b), (c), (d), (e) and (f) are satisfied.

Dated: May 14, 1987.

Gene R. Haislip,

## DEPARTMENT OF LABOR

### Pension and Welfare Benefits Administration

[Application No. D-6815 et al.]

### Proposed Exemptions; SEI Property Fund, et al.

**AGENCY:** Pension and Welfare Benefits Administration, Labor.

**ACTION:** Notice of proposed exemptions.

**SUMMARY:** This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

### Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this Federal Register Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

**ADDRESS:** All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5669, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public

Documents Room of Pension and Welfare Benefits Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, DC 20210.

**Notice of Interested Persons**

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

**SUPPLEMENTARY INFORMATION:** The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

**SEI Property Fund (the Fund)**

**Located in Chicago, IL.**

**[Application No. D–6815]**

*Proposed Exemption*

**Section I. Exemption for Certain Transactions Involving the Fund**

(a) The restrictions of sections 406(a), 406(b)(2) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to the transactions described below if the applicable conditions set forth in Section III are met.

(1) *Transactions Between Parties-In-Interest and the Fund: General.* Any transaction between a Party in interest with respect to a plan which has an interest in the Fund (a Participating Plan) and the Fund, or any acquisition of holding by the Fund of employer securities or employer real property, if the party in interest is not SEI Corporation (SEI), the investment manager for the Fund (the Investment Manager), or one of the affiliates of SEI or the Investment Manager), or one of the affiliates of SEI or the Investment Manager or any other Fund maintained by the SEI, Investment Manager, or one of their Affiliates, and if, at the time of the transaction, acquisition or holdings, the interest of the Participating Plan, together with the interests of all other Participating Plans maintained by the same employer or employee organization in the Fund, does not exceed 10 percent of the total of all assets in the Fund.

(2) *Special Transactions Not Meeting the Criteria of Section I(a)(1) Between Employers of Employees Covered by a Multiemployer Plan and the Fund.*

Any transaction between an employer (or an affiliate of an employer) of employees covered by a multiemployer plan (as defined in section 3(37)(A) of the Act and section 414(f)(1) of the Code) that is a Participating Plan, and the Fund, or any acquisition or holding by the Fund of employer securities or employer real property, if at the time of the Transaction, acquisition of holding—

The interest of the multiemployer plan in the Fund exceeds 10 percent of the total assets in the Fund, but the employer is not a "substantial employer" with respect to plan and would not be a "substantial employer" if "5 percent" were substituted for "10 percent" in the definition of "substantial employer."

(b) The restrictions of section 406(a)(1)(A) through (D) and section 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the transactions described below, if the conditions of section III are met.

(1) *Certain Leases and Goods.* The furnishing of goods to the Fund by a party in interest with respect to a Participating Plan or the leasing of real property owned by the Fund to such party in interest and the incidental furnishing of goods to such party in interest by the Fund, if—

(A) In the case of goods, they are furnished to or by the Fund in connection with real property owned by the Fund;

(B) The party in interest is not SEI, the Investment Manager, or any affiliate of SEI or the Investment Manager, or one of the other Funds; and

(C) The amount involved in the furnishing of goods or leasing of real property in any calendar year (including the amount under any other lease or arrangement for the furnishing of goods in connection with the real property investments of the Fund with the same party in interest, or any affiliate thereof) does not exceed the greater of $25,000 or 0.5 percent of the fair market value of the assets of the Fund on the most recent valuation date of the Fund prior to the transaction.

(2) *Transactions Involving Places of Public Accommodation.* The furnishing of services, facilities and any goods incidental to such services and facilities by a place of public accommodation owned by the Fund to a party in interest with respect to a Participating Plan, if the services, facilities and incidental goods are furnished on a comparable basis to the general public.

(c) The restrictions of section 406(a)(1)(A) through (D) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the following transaction if the conditions of Section III are met:

Any transaction between the Fund and a person who is a party in interest with respect to a Participating Plan, if—

(1) The person is a party in interest (including a fiduciary) solely by reason of providing services to the Partticipating Plan, or solely by reason of a relationship to a service provider described in section 3(14)(F), (G), (H) or (I) of the Act, or both, and the person neither exercised nor has any discretionary authority, control, responsibility or influence with respect to the investment of the Participating Plan's assets in, or held by, the Fund;

(2) At the time of the transaction, the interest of the Participating Plan, together with the interests of any other Participating Plan maintained by the same employer or employee organization in the Fund, does not exceed 20 percent of the total of all assets in the Fund; and

(3) The person is not SEI, the Investment Manager, or an affiliate of SEI or the Investment Manager.

(d) The restrictions of section 406(a)(1)(A) through (D) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to the purchase and sale of units of beneficial interest in the Fund if no more than a reasonable compensation is paid therefor, each purchase and sale is authorized in writing by a fiduciary of the Participating Plan who is independent of SEI, the Investment Manager, or any of the affiliates of SEI or the Investment Manager, and the

applicable conditions of section III are met.

Section II. Excess Holdings Exemption for Employee Benefit Plans

(a) The restrictions of section 406(a) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (D) of the Code shall not apply to any acquisition or holding of qualifying employer securities or qualifying employer real property (other than through the Fund) by a Participating Plan if: (1) The acquisition or holding constitutes a prohibited transaction solely by reason of being aggregated with employer securities or employer real property held by the Fund; (2) the requirements of either paragraph (a)(1) or paragraph (a)(2) of section I of this exemption are met; and (3) the applicable conditions set forth in section III of this exemption are met.

Section III. General Conditions

(a) At the time the transaction is entered into, and at the time of any subsequent renewal thereof that requires the consent of SEI, the Investment Manager or an affiliate of SEI or the Investment Manager, the terms of the transaction are not less favorable to the Fund than the terms generally available in arm's-length transactions between unrelated parties.

(b) SEI, the Investment Manager, or the affiliates of SEI or the Investment Manager, maintain for a period of six years from the date of the transaction the records necessary to enable the persons described in paragraph (c) of this section III to determine whether the conditions of this exemption have been met, except that: (1) A prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of SEI, the Investment Manager, or an affiliate of SEI or the Investment Manager, the records are lost or destroyed prior to the end of the six-year period, and (2) no party in interest shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (c) below.

(c)(1) Except as provided in section 2 of this paragraph (c) and notwithstanding any provision of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (b) of this Section III are unconditionally available at their customary location for examination during normal business hours by:

(A) Any duly authorized employee or representative of the Department or the Internal Revenue Service,

(B) Any fiducary of a Participating Plan who has authority to acquire or dispose of the interests in the Fund of the Participating Plan or any duly authorized employee or representative of such fiduciary,

(C) Any contributing employer to any Participating Plan or any duly authorized employee or representative of such employer, and

(D) Any participant or beneficiary of any Participating Plan, or any duly authorized employee or representative of such participant or beneficiary.

(2) None of the persons described in subparagraphs (B) through (D) of this paragraph (c) shall be authorized to examine trade secrets of SEI, the Investment Manager, or any affiliate of SEI or the Investment Manager, or commercial or financial information which is privileged or confidential.

Section IV. Definitions and General Rules

For the purposes of this exemption,

(a) The term "the Fund" shall include any collective investment fund that may hereafter be established by SEI or any affiliate of SEI, and which will be operated and managed by the Investment Manager or any affiliate of the Investment Manager in essentially the same manner as the SEI Property Fund.

(b) An "affiliate" of a person includes—

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, under common control with the person,

(2) Any officer, director, employee, relative of, or partner in any such person, and

(3) Any corporation or partnership of which such person is an officer, director, partner or employee.

(c) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(d) The term "relative" means a "relative" as that term is defined in section 3(15) of the Act (or a "member of the family" as that term is defined in section 4975(e)(6) of the Code), or a brother, a sister, or a spouse of a brother or sister.

(e) The term "substantial employer" means for any plan year an employer (treating employers who are members of the same affiliated group, within the meaning of section 1563(a)(4) and (e)(3)(c) of the Code, as one employer) who has made contributions to or under a multiemployer plan for each of—

(1) The two immediately preceding plan years, or

(2) The second and third preceding plan years, equaling or exceeding 10 percent of all employer contributions paid to or under that plan for each year.

(f) The time as of which any transaction, acquisition or holding occurs is the date upon which the transaction is entered into, the acquisition is made or the holding commences. In addition, in the case of a transaction that is continuing, the transaction shall be deemed to occur until it is terminated. If any transaction is entered into, or an acquisition is made, on or after the effective date of this exemption, or a renewal that requires the consent of the Fund occurs on or after the effective date of this exemption, and the requirements of this exemption are satisfied at the time the transaction is entered into or renewed, respectively, or at the time the acquisition is made, the requirements will continue to be satisfied thereafter with respect to the transaction or acquisition and the exemption shall apply thereafter to the continued holding of the property so acquired. Notwithstanding the foregoing, this exemption shall cease to apply to transactions exempt by virtue of subsections I(a)(1) and (I)(c) at such time as the interest of the Participatting Plan exceeds the percentage interest limitations set forth in those subsections, unless no portion of such excess results from an increase in the assets allocated to the Fund by the Participating Plan. For this purpose, assets allocated do not include the investment of Fund earnings. Nothing in this paragraph (f) shall be construed as exempting a transaction entered into by the Fund which becomes a transaction described in section 406 of the Act or section 4975 of the Code while the transaction is continuing, unless the conditions of the exemption were met either at the time the transaction was entered into or at the time the transaction would have become prohibited but for this exemption.

(g) Each Participating Plan shall be considered to own the same proportionate undivided interest in each asset of the Fund as its proportionate interest in the total assets of the Fund as calculated on the most recent preceding valuation date of the Fund.

The availability of this exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms

of the transactions to be consummated pursuant to this proposed exemption.

*Preamble*

On July 25, 1980, the Department published a class exemption, Prohibited Transaction Exemption 80–51 (PTE 80–51, 45 FR 49709), which permits collective investment funds that are maintained by banks and in which employee benefit plans participate to engage in certain transactions provided that specified conditions are met. The transactions for which the applicants have requested relief are those which, in part, are the subject of PTE 80–51.

The Department stated in PTE 80–51 that a comment had been received to the proposed class exemption requesting that it be amended to apply to collective investment funds that are not maintained by banks. Relief was granted for bank collective investment funds because, among other reasons, such funds are regulated by other governmental agencies and constitute a well-defined class of funds. In the case of collective investment funds that are not maintained by banks, the Department found that the record was insufficient to determine the nature of the funds and the entities managing the funds that would comprise the class covered by such broad relief. As a result, the Department stated that it could not make the required statutory findings for such relief, and the relief for non-bank maintained collective investment funds should be dealt with on an individual rather than a class basis.

*Summary of Facts and Representations*

1. The Fund is a group trust described in Rev. Rul. 81–100, 1981–1 C.B 326. The Fund will provide qualified employee benefit plans and certain governmental plans with a medium for pooling portins of their funds for investment primarily in income-producing real property. The Fund is intended to be exempt from Federal income taxes under section 501(a) of the Code as a qualified trust under section 401(a) of the Code.

2. SEI is a Pennsylvania corporation registered as an investment adviser under the Investment Advisers Act of 1940. SEI is the leading supplier of information, financial, and evaluation services to the financial community in the United States. SEI offers plan sponsors and money managers all the objective information and professional guidance for monitoring and evaluating the investment performance of pension plans. SEI claims thirty percent of the nation's larger trust departments as clients. SEI's financial services include a wide range of investment products that total more than $5 billion in managed assets.

The Fund will be established by SEI. The Investment Manager will be selected by SEI to manage the assets of the Fund, pursuant to a written investment management agreement entered into with the trustees of the Fund (the Trustees). The Investment Manager will be unrelated to SEI and its affiliates. The applicant represents that each Investment Manager will either qualify as a qualified professional asset manager (QPAM) under Prohibited Transaction Exemption 84–14 (PTE 84–14, 49 FR 9494, March 13, 1984, as amended on October 10, 1985, 50 FR 41430) or would be so qualified but for the $750,000 equity requirement under Part V(a)(4) of PTE 84–14.

SEI will receive fees for the formation of the Fund and for monitoring the performance of the Investment Manager as well as for serving as Trustee of the Fund. However, any Trustee who is an officer, director or employee of SEI will not be compensated by the Fund. SEI will also select an independent real estate appraiser to value the property in the Fund. the applicant states that all fees received by SEI will be based on individual, arm's-length negotiations with the Participating Plan and will be reasonable in amount.[1]

3. Interests in the Fund (the Units) will be offered pursuant to an offering memorandum (the Memorandum) which describes the Investment Manager, the investment objectives, operations, and management of the Fund. The Memorandum will precisely set out the maximum extent to which the Fund may borrow to invest in real estate. Copies of the Memorandum will be attached to the group trust agreement, the investment management agreement, and the participation agreement which will further describe the management and operations of the Fund as well as the respective rights and obligations of the participating parties. The applicant states that each subscriber must have net assets of at least $50,000,000 and the subscriber's total ownership of equity interest in real estate (including its investment in the fund) must not exceed 30% of its total net assets. The applicant states further that the subscribers' equity investment in the Fund shall not exceed five percent (5%) of plan assets. The Units are offered for a price of $250,000. Each Participating Plan must purchase a minimum of eight Units (i.e. $2,000,000).

The Units will be privately offered and will not be registered under the Securities Act of 1933. Neither the Units nor any interest therein may be resold, transferred, assigned, or otherwise disposed of or encumbered by Practicipating Plans, as required by Rev. Rul. 81–100. However, the Units may be redeemed and concurrently reissued by the Fund.

4. The decision of any plan to invest in the Fund will be made by fiduciaries of the plan which will be independent of SEI, the Investment Manager, or their affiliates. The Trustees may reject a subscription for any reason. SEI or its affiliates have traditionally acted as investment advisers and investment managers for plan assets with respect to the investment of such assets in securities and will expand to provide real estate investment advisory services to such plans in the future. With respect to its investment management duties under the Fund, the Investment Manager will exercise discretion only for a discrete portion of a Participating Plan's assets as defined in the investment management agreement. None of the individual Trustees of the Fund, nor any of the employees, officers, directors, or shareholders of SEI, the Investment Manager, or the affiliates of SEI or the Investment Manager, will exercise and discretionary authority over or otherwise particpate in the decision of any plan to invest in the Fund. Specifically, the applicant states that assets over which SEI or the Investment Manager, or any affiliate of SEI or the Investment Manager, acts as an investment manager will not be eligible for investment in the Fund. Similarly, none of the individual Trustees of the Fund, nor any of the employees, officers, directors, or shareholders of SEI, the Investment Manager or the affiliates of SEI or the Investment Manager, will serve as a director or officer of any sponsor of any Participating Plan. SEI or the Investment Manager, or any affiliate of SEI or the Investment Manager, will not within the scope of their investment advisory duties with respect to any plan, recommend the investment of such plan's assets in the Fund. SEI or the Investment Manager, if outside of the scope of any investment advisory duties or any investment management duties which SEI, the Investment Manager or their affiliates currently provide such plans, may provide the plans for which it acts as an investment adviser or an investment manager with the Memorandum and other information describing available investments in the Fund, provided that the Memorandum and information do not contain and are

[1] The Department is not proposing an exemption for the receipt by SEI of any fees beyond that provided by section 408(b)(2) of the Act.

not accompanied by any recommendation to purchase.[2]

If SEI or its affiliates provide real estate advisory services with respect to a plan, and if SEI or its affiliates recommend that such plan increase its allocation of assets in real estate, the assets of such plan shall not be eligible for investment in the Fund. In addition, the applicant states that if the Investment Manager or any affiliate provides real estate advisory or management services with respect to a plan, and if the Investment Manager or such affiliate recommends that the plan increase its allocation of assets in real estate, the assets of such plan shall not be eligible for investment in the Fund.

5. Although the Memorandum advises fiduciaries of Participating Plans that investment in the Fund should be considered on a long-term basis only, if a Participating Plan desires to dispose of its investment, it may apply to the Trustees for redemption of its Units. At the option of the Trustees, the remaining Participating Plans may be given an opportunity to purchase all or part of the withdrawing Plan's Units provided that a Participating Plan qualified under section 401(a) of the Code may not own more than a ten percent (10%) interest in the Fund. Alternatively, new investors may purchase Units in the Fund concurrently with a redemption of the Unit. In the event that a Participating Plan wishes to engage SEI to find a buyer for the Units, SEI may negotiate a fee with the Participating Plan for the sale of the Units to another qualified buyer. In such event, SEI would receive compensation from the redeeming Participating Plan on a negotiated basis that is reasonable in amount, provided that the employer or governmental units maintaining such Participating Plan may elect to directly pay SEI's compensation.

6. The Trustees, in their sole discretion, may terminate the Fund at any time. Pursuant to the group trust agreement, the Fund may be terminated by the vote of Participating Plans holding more than fifty percent of the number of Units the outstanding. In addition, SEI's role in the ongoing evaluation of the Investment Manager will be subject to the approval of the Participating Plans. The Participating Plans may replace SEI, the Investment Manager, or the appraiser with a majority vote of the Units.

7. The Fund will maintain such reserves as the Investment Manager deems appropriate. These reserves, along with any subscription proceeds not immediately used to acquire real estate, will be temporarily invested in liquid investments, including short-term United States government securities,' interest-bearing deposits, bankers' acceptances, or other short-term money market instruments, including short-term debt and commercial paper issued by major corporations some of which may be sponsors of Participating Plans. Selection of such short-term investments will be within the discretion of the Investment Manager.

8. Fees paid to the Investment Manager will be determined in negotiations between SEI and the Investment Manager. If the Investment Manager, or any affiliate, performs services beyond those provided for in the investment management agreement between SEI and the Investment Manager, the Investment Manager's, or such affiliate's, compensation will be limited to the reimbursement for direct costs for the provision of such services. The applicant states that in some instances, the property manager for the Fund will be the Investment Manager, and in other cases the Investment Manager will contract to have these duties performed by an unrelated party. In all events, the selection of the property manager will be made by SEI.[3]

9. Because each Participating Plan will incorporate as part of such plan the terms, provisions, and conditions of the group trust agreement, the Fund will occupy a position equivalent to the trust created under the Participating Plan. Accordingly, pursuant to Revenue Ruling 81–100, it is the position of the Department that a "party in interest" as defined in the Act, or a "disqualified person" as defined in the Code, with respect to a Participating Plan may be viewed as a party in interest or disqualified person with respect to the Fund. Thus, a transaction between such party and the Fund may be viewed as a prohibited transaction as described in section 406(a) of the Act, section 4975(c) of the Code, or both. The applicant represents that if the Fund is unable to enter into transactions with certain persons because such persons are parties in interest with respect to Participating Plans, the Fund's ability to prudently make its investments and conduct its operations solely for the benefit of the Participating Plans will be unduly restricted. In addition, the purchase and sale of the Units may be considered a prohibited sale or transfer of assets between a Participating Plan and the Trustees that is not exempted by operation of the statutory exemption provided in section 408(b)(8) of the Act because the Fund is not maintained by a bank or an insurance company.

10. The applicant requests prospective exemptive relief for many of those classes of transactions between the Fund and certain parties in interest which were afforded exemptive relief in PTE 80–51. The applicant proposes that such classes of transactions be subject to similar conditions, limitations, and restrictions as those delineated for the transactions afforded exemptive relief in PTE 80–51.

11. The books and records of the Fund will be audited by an independent public accountant each fiscal year. A copy of such reports, along with any other pertinent information, will be forwarded to the fiduciaries and sponsors of each Participating Plan. At the end of each of the first three quarters of each fiscal year, the Investment Management will prepare and send a detailed report of the business transacted by the Fund during such quarter. The quarterly reports will not be audited.

12. In summary, the applicant represents that the proposed exemption for certain transactions between the Fund and certain parties in interest satisfies the criteria of section 408(a) of the Act because: (a) The proposed exemption would allow the Fund to enter into transactions which, although prohibited, are necessary for the Fund to prudently make its investments and conduct its operations solely for the benefit of its Parcticipating Plans and their participants and beneficiaries; (b) the proposed exemption would only apply to various classes of prohibited transactions which were afforded relief in PTE 80–51 and would be subject to similiar conditions, limitations and restrictions as those delineated for the transactions afforded relief in PTE 80–51; and (c) independent fiduciaries, unrelated to the Fund, the Trustees, SEI, the Investment Manager, or any of their affiliates, will maintain complete discretion with respect to investment of

---

[2] To the extent that, in the ordinary course of business, SEI or any of its affiliates provides "investment advice" to a Participating Plan within the meaning of regulation 29 CFR 2510.3–21(c)(1)(ii)(B) and recommends an investment of the plan's assets in the Fund, the presence of an unrelated second fiduciary acting on the consultant/investment adviser's recommendations on behalf of the plan is not sufficient to insulate the advisers from fiduciary liability under section 406(b) of the Act. (See Advisory Opinions 84–03A and 84–04A, issued by the Department on January 4, 1984.) The Department is unable to conclude the fiduciary self dealing of this type (if present) is in the interest or protective of plans and their participants and beneficiaries and, accordingly, has limited exemptive relief for the acquisition or sales of interests in the Fund to section 406(a) violations only.

[3] The Department is not proposing an exemption for the receipt by the Investment Manager, or any affiliate, of any fees beyond that provided by section 408(b)(2) of the Act.

the Participating Plans' assets in the Fund.

**InterFirst Corporation Profit Sharing and Savings Plan (the Plan), Located in Dallas, TX**

[Application No. D-7077]

*Proposed Exemption*

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed extension of credit to the Plan by InterFirst Corporation (the Employer), the sponsor of the Plan and a party in interest with respect to the Plan.

*Summary of Facts and Representations*

1. The Employer is a bank holding company which has 68 wholly-owned banking subsidiaries and five wholly-owned banking-related subsidiaries located in 39 cities in Texas. The Employer has approximately $22.1 billion in assets, as of December 31, 1985. A proposed merger of the Employer with Republic Bank Corporation, a bank holding company, incorporated in Texas and slightly larger than the Employer, has been announced. The proposed merger is pending while regulatory approval in obtained. It is anticipated that the merger will not be completed before June 1987.

2. The Plan is a profit sharing plan with 8,232 participants, as of April 30, 1986, who are employees of the Employer and its subsidiaries. As of December 31, 1986, there were total assets of $45,335,489 in the Plan. Contributions to the Plan are made by the Employer and Plan participants and are invested, as directed by participants, in six different funds (the Funds). One of the Funds is the Real Estate Fund which has its assets invested in a unit of a group trust, maintained by a subsidiary of the Employer and designated as the InterFirst Corporation Investment Trust for Employee Benefits Plans (the Collective Trust). The segment of the Collective Trust in which the Real Estate Fund is invested is designated as the Real Estate Collective Investment Fund (RECIF). The RECIF is an open-end fund with 179 investors consisting of 71 different defined benefit plans and 108 different defined contribution plans. The Trustee for the Plan, the Funds, and the Collective Trust is a national bank, InterFirst Bank Dallas, N.A. (the Trustee), that is a wholly-owned subsidiary of the Employer. Participants in exercising their discretionary power have the right each month to change their investments within the Funds by written application to the Plan; however, changes out of the Real Estate Fund are only effective when cash is available from the RECIF.

3. The total assets of the RECIF, equaling $85,385,000 as of June 30, 1986, were invested in commercial properties located in regions experiencing adverse economic problems. These problems have resulted in an unrealized depreciation in the value per unit of the RECIF as well as a decline in the number of units outstanding. New appraisals of all RECIF properties are made by MAI appraisers every three years, and, in interim years, updates by the last appraiser are obtained annually.

New investments in RECIF have been negligible, totaling only $5,000 during the first nine months of 1986. As of June 30, 1986, the Plan has been amended to prohibit further investments in the Real Estate Fund. In addition, the Plan has requested a complete withdrawal of its investment in RECIF. Requests for withdrawals from RECIF have increased from $10,000,000 as of December 31, 1985, to a total of $34,400,000, as of June 30, 1986. On September 23, 1986, RECIF was terminated and all requests for withdrawal, which had been paid sequentially, are now being paid on a pro rata basis in accordance with the amount invested in RECIF. Requests for withdrawal from RECIF have increased to a point that the Trustee believes that there could be a significant adverse impact upon the Plan.

4. The applicant represents that, as of March 31, 1987, the remaining units in RECIF held by the Plan have a fair market value of $2,220,704 and have a cost to the Plan of $2,301,190. Since June 30, 1986, the fair market value of the units held by the Plan has declined from $3,210,281 as a result of cash distributions and decreases in property values. The Employer proposes to loan $2,856,391 to the Plan,[1] solely to permit the Employer to protect retirement benefits of its employees from losses resulting from the slipping real estate market in the region where the RECIF commercial properties are located.[2] No interest charges nor any other expense will be incurred by the Plan from the proposed loan, and no collateral for the loan will be required.[3] The loan will be in the form of a note with principal repaid by the Plan from cash obtained only from RECIF when it liquidates its properties and honors withdrawal requests. No other Plan assets can be used to pay off the loan. To the extent the Plan receives more than the amount of the loan from RECIF upon the liquidation of RECIF, such proceeds will be retained by the Plan and allocated to the accounts of the respective Plan participants. To the extent the Plan receives less than the amount of the loan upon liquidation of the RECIF units, repayment of the loan will be waived. The proceeds of the loan from the Employer will be transferred, as directed by Plan participants, to other investments in the Funds. The applicant represents that the proposed loan from the Employer to the Plan will not result in any expense to the Plan nor risk to participants of the Plan and will facilitate the participants obtaining better investment media.

5. In summary, the applicant represents and the proposed transaction satisfies the criteria of section 408(a) of the Act for the following reasons: (a) The loan is evidenced in written documentation and does not provide for the payment of interest by the Plan; (b) the proposed transaction protects the Plan participants and their beneficiaries from the decline in the value of the RECIF properties and permits new, higher yielding investments without expense or penalty; (c) the terms for the repayment of the loan is limited to cash proceeds received from liquidation of RECIF commercial properties and no other assets of the Plan will be used or affected; and (d) upon liquidation of Plan investments in RECIF, any proceeds in excess of the loan will be retained by the Plan and allocated to the accounts of Plan participants.

For Further Information Contact: Mr. C.E. Beaver of the Department,

---

[1] This amount represents the fair market value of $3,210,281 in the units of RECIF, on June 30, 1986, less cash distributions received by the Plan since that date.

[2] The applicant represents that the proposed loan will not cause a violation of section 415 of the Code.

[3] The applicant represents that the Prohibited Transaction Class Exemption 80-26 (45 FR 28545, April 29, 1980) cannot be relied upon with respect to the proposed loan because the proceeds of the loan are to be used by Plan participants for transfers between investment media. Class Exemption 80-26, in relevant part, provides exemptive relief where the proceeds of the loan or extension of credit are used only for payment of ordinary operating expenses of the plan, including the payment of benefits and periodic premiums under an insurance or annuity contract.

telephone (202) 523–8881. (This is not a toll-free number.)

**General Information**

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 20th day of May 1987.

**Elliot I. Daniel,**

*Associate Director for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.*

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

### Design Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Design Arts Advisory Panel (Design Advancement/Organizations Section) to the National Council on the Arts will be held on June 9–10, 1987, from 9:00 a.m.–6:00 p.m. and June 11, 1987, from 9:00–3:30 p.m. in Room M–17 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public on June 11, 1987 from 1:30 p.m.–3:30 p.m. The topics for discussion will include policy issues.

The remaining sessions of this meeting on June 9–10, 1987 from 9:00 a.m.–6:00 p.m. and June 11, 1987 from 9:00 a.m.–12:30 p.m. are for the purpose of application review. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

If you need special accommodations due to a disability, please contact the Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496 at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call 202/682–5433.

May 18, 1987.

**John H. Clark,**

*Office of Council and Panel Operations, National Endowment for the Arts.*

BILLING CODE 7537–01–M

### Visual Arts Advisory Panel; Printmaking/Drawing Section; National Council on the Arts; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Visual Arts Advisory Panel (Printmaking/Drawing Section) to the National Council on the Arts will be held on June 8–11, 1987, from 9:00 a.m.–6:00 p.m. and June 12, 1987 from 9:00 a.m.–6:00 p.m. in Room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

### National Endowment for the Humanities Panel Meetings

**AGENCY:** National Endowment for the Humanities.

**ACTION:** Notice of meeting.

**SUMMARY:** Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463), as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

**FOR FURTHER INFORMATION CONTACT:** Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone 202/786–0322.

**SUPPLEMENTARY INFORMATION:** The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including duscussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged

BEST COPY AVAILABLE

or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; or (3) information the disclosure of which significantly frustrate implementation of proposed agency action, pursuant to authority granted me by the Chairman's Delegation of Authoirty to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552(b) of Title 5, United States Code.

1. *Date:* June 8, 1987
   *Time:* 8:30 a.m. to 5 :00 p.m.
   *Room:* 315
   *Program:* This meeting will review applications in the fields of the humanities submitted to the Publication Subvention category of the Texts Program, Division of Research Programs, for projects beginning after October 1, 1987.
2. *Date:* June 11–12, 1987
   Time: 9:00 a.m. to 5:00 p.m.
   *Room:* M–07
   *Program:* This meeting will review applications in the fields of the humanities submitted to the Conferences category of the Regrants Program, Division of Research Programs, for projects beginning after September 1, 1987.
3. *Date:* June 15, 1987
   *Time:* 8:30 a.m. to 5:00 p.m.
   *Room:* 415
   *Program:* This meeting will review Biennial Proposals submitted by State humanities councils to the Division of State Programs, for projects beginning after November 1, 1987.
4. *Date:* June 22, 1987
   *Time:* 8:30 a.m. to 5:00 p.m.
   *Room:* 415
   *Program:* This meeting will review Biennial Proposals submitted by state humanities councils to the Division of State Programs, for projects beginning after November 1, 1987.
5. *Date:* June 11–12, 1987
   *Time:* 9:00 a.m. to 5:00 p.m.
   *Room:* 315
   *Program:* This meeting will review Higher Education Programs applications, submitted to the Division of Education Programs, for projects beginning after October 1, 1987.

Stephen J. McCleary,
*Advisory Committee Management Officer.*

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50–245]

### Northeast Nuclear Energy Co.; Millstone Nuclear Power Station Unit No. 1; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.49 to Northeast Nuclear Energy Company (the licensee) for the Millstone Nuclear Power Station, Unit No. 1 (Millstone 1), located in Waterford, Connecticut.

### Environmental Assesment

*Identification of Proposed Action*

The licensee would be exempted from the requirements of 10 CFR 50.49, "Environmental qualification of electric equipment important to safety for nuclear power plants," in that seven of nine requested valve motor operators would not be qualified for the harsh environment of the design basis accident (DBA). One motor operator would be qualified for a DBA environment and one is outside the scope of equipment required to be environmentally qualified.

*The Need for the Proposed Action*

The proposed exemption is needed for continued operation of Millstone 1 beyond the June-July 1987 refueling outage with seven of nine valve motor operators that do not satisfy the requirements of 10 CFR 50.49, "Environmental qualification of electric equipment important to safety for nuclear power plants." One of the nine valve motor operators must be replaced with an environmentally qualified motor operator during the June-July 1987 refueling outage and one motor operator is outside the scope of equipment required to be environmentally qualified. According to the licensee, the installed motor operators, though not fully qualified for a harsh accident environment, satisfy the underlying purpose of the rule and literal compliance would not significantly enhance plant safety, enhance the health and safety of the public, or significantly reduce core melt frequency.

*Environmental Impact of the Proposed Action*

The proposed exemption, except for one of the nine motor operators, would not impact the ability to effect safe shutdown of the plant in the event of a DBA and would provide an acceptable level of safety, equivalent to that attained by compliance with 10 CFR 50.49. The request for exemption of the motor operator in the isolation condenser supply line piping, valve IC–2, will be denied; the motor operator in the emergency condensate transfer pump discharge piping, valve MV–96A, is outside the scope of equipment required to be environmentally qualified. On this basis, the Commission concludes there are no significant radiological environmental impacts associated with this proposed exemption.

With regard to potential non-radiological impacts, the proposed exemption involves features located entirely within the restricted areas as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed exemption.

*Alternatives to the Proposed Action*

Since we have concluded that the environmental effects of the proposed action are negligible, any alternatives with equal or greater environmental impacts need not be evaluated.

The principal alternative would be to deny all of the requested exemptions. Except for one motor operator this would not reduce the environmental impacts associated with installing environmentally qualified motor operators and compliance with the rule would not significantly enhances plant safety. Denial of the exemption request for the IC–2 valve motor operator exemption from the rule, the staff has concluded, enhance safety, i.e., the motor operator must be qualified for operation in the accident environment.

*Alternative Use of Resources*

This action involves no use of resources not previously considered in the Final Environmental Statement (construction permit and operating license) for Millstone 1.

*Agencies and Persons Consulted*

The NRC staff reviewed the licensee's request and consulted with its contractors at Science Applications International Corporation.

### FINDING OF NO SIGNIFICANT IMPACT

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, we conclude

BEST COPY AVAILABLE

that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the exemption requests dated January 17, 1986 and March 12, 1987, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and the Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Dated at Bethesda, Maryland, this 19th day of May 1987.

For the Nuclear Regulatory Commission.

**Cecil O. Thomas,**

*Director, Integrated Safety Assessment, Project Directorate, Division of Reactor Projects—III, IV, V and Special Projects.*

## Advisory Committee on Reactor Safeguards; Meeting Agenda

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b), the Advisory Committee on Reactor Safeguards will hold a meeting on June 4–6, 1987, in Room 1046, 1717 H Street NW., Washington, DC. Notice of this meeting was published in the **Federal Register** on April 20, 1987.

**Thursday, June 4, 1987**

*8:30 a.m.–8:45 a.m.: Report of ACRS Chairman* (Open)—The ACRS Chairman will report briefly regarding items of current interest to the Committee.

*8:45 a.m.–10:45 a.m.: NRC Severe Accident Policy* (Open)—Consider proposed NRC generic letter regarding implementation of the NRC severe accident policy statement for existing nuclear power plants.

*11:00 a.m.–12:00 Noon: Foreign Nuclear Power Plant Safety Features* (Open/Closed)—Discuss proposed ACRS report to NRC regarding safety features in foreign nuclear plants.

Portions of this session will be closed as required to discuss information provided in confidence by a foreign source.

*1:00 p.m.–2:15 p.m.: Improved Safety for Future Light Water Reactors* (Open)—Discussion with NRC Executive Director for Operations regarding proposed NRC Staff resolution of recommendations of the ACRS in its report dated January 15, 1987, Subject: ACRS Recommendations on Improved Safety for Future Light Water Reactor Plant Design.

*2:15 p.m.–3:45 p.m.: Improved Safety for Future Light Water Reactors* (Open)—Discuss proposed ACRS response to NRC request for additional information regarding the feasibility, benefit, and cost effectiveness of systems recommended in its report of January 15, 1987, Subject: ACRS Recommendations on Improved Safety for Future Light Water Reactor Plant Design.

*4:00 p.m.–6:00 p.m.: Preparation of ACRS Reports to the NRC* (Open/Closed)—Discuss proposed ACRS reports to the NRC regarding: Foreign Nuclear Power Plant Safety Features; Development and Utilization of NRC Policy Statement on the Regulation of Advanced Nuclear Power Plants (NUREG–1226), proposed NRC rule on Loss of Alternating Current Power at Nuclear Power Plants, and the high-level radioactive waste program.

Portions of this session will be closed as required to discuss information provided in confidence by a foreign source.

**Friday, June 5, 1987**

*8:30 a.m.–11:30 a.m.: Operating Experience at Nuclear Power Plants* (Open/Closed)—Briefing and discussion of recent incidents and events at nuclear facilities.

Portions of this session will be closed as appropriate to discuss applicable Proprietary Information and/or detailed security arrangements at the facility being considered.

*11:30 a.m.–12:00 Noon: Future ACRS Activities* (Open)—Discuss anticipated ACRS subcommittee activities and items proposed for consideration by the full Committee.

*1:00 p.m.–2:15 p.m.: Long Range Planning* (Open)—Briefing and discussion regarding proposed NRC Strategic Plan for agency activities.

*2:30 p.m.–3:30 p.m.: Renewal of Nuclear Power Plant Licenses* (Open)—Briefing and discussion regarding proposed NRC policy for renewal of nuclear power plant licenses.

*3:30 p.m–6:00 p.m.: ACRS Subcommittee Activities* (Open)—Hear and discuss reports of ACRS subcommittee activities in assigned areas, including radioactive waste management, resolution of generic issues, and reliability of nuclear power plant components.

**Saturday, June 6, 1987**

*8:30 a.m.–12:00 Noon: Preparation of ACRS Reports* (Open/Closed)—Discuss proposed ACRS reports to NRC regarding items considered during this meeting and a proposed reply to a Congressional inquiry regarding the Nuclear Protection and Safety Act of 1987.

Portions of this session will be closed as necessary to discuss information provided in confidence by a foreign source.

*1:00 p.m.—2:00 p.m.: ACRS Subcommittee Activities* (Open/Closed)—Hear and discuss reports of ACRS subcommittee activities in assigned areas, including nuclear power plant containment spray systems, fission-product removal/cleanup, the NRC SIMS program, and seismic qualification of nuclear power plant components. The qualifications of proposed new ACRS members will also be discussed.

Portions of this session will be closed as necessary to discuss information that would represent a clearly unwarranted invasion of personal privacy.

*2:00 p.m.—2:30 p.m.: Quality Assurance in Nuclear Facilities* (Open)—Discuss proposed ACRS recommendations regarding a review of quality assurance practices in foreign countries.

*2:00 p.m.—3:00 p.m.: Miscellaneous* (Open)—Complete discussion of items considered during this meeting.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 20, 1986 (51 FR 37241). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion

picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a prepaid telephone call to the ACRS Executive Director, R.F. Fraley, prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with subsection 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss information provided in confidence by a foreign source [5 U.S.C. 552b(c)(4)], Proprietary Information [5 U.S.C. 552b(c)(4)], safeguards information related to physical security of nuclear facilities [5 U.S.C. 552b(c)(3)], and information the release of which would represent a clearly unwarranted invasion of personal privacy [5 U.S.C. 552b(c)(6)].

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Director, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 a.m. and 5:00 p.m.

Dated: May 20, 1987.

## Atomic Safety and Licensing Board; Order Establishing Schedule for Hearing; Florida Power and Light Co. (Turkey Point Plant, Units 3 & 4)

May 15, 1987.

### Order Establishing Schedule for Hearing (Expansion of Spent Fuel Pool Storage Capacity)

Before Administrative Judges: Dr. Robert M. Lazo, Chairman, Dr. Richard F. Cole, and Dr. Kenneth A. Luebke.

Based on agreement reached among the parties, the following schedule is hereby established for conduct for the above-captioned license amendment proceeding:

*Tuesday, June 23, 1987*—Deadline for each party to identify the witnesses who will testify with respect to each contention.

*Monday, July 20, 1987*—Last day for filing written testimony.

*Tuesday, September 15, 1987*—Hearing to commence at 9:30 a.m. in North Court Room, Second Floor, United States District Courthouse, Old Building, 300 NE First Avenue, Miami, Florida 33101 and remain in continuous sessions day to day until completed or until continued by further order of the Board.

It is so ordered.

Dated at Bethesda, Maryland, this 15th day of May 1987.

For the Atomic Safety and Licensing Board.

Robert M. Lazo,

*Chairman, Administrative Judge.*

## Washington Public Power Supply System, et al.; WPPSS Nuclear Project No. 1; Reconstitution of Board

Pursuant to the authority contained in 10 CFR 2.721 (1980), the Atomic Safety and Licensing Board for *Washington Public Power Supply System, et al.* (WPPSS Nuclear Project No. 1), Docket No. 50–460–OL, is hereby reconstituted by appointing Administrative Judge Peter B. Bloch in place of Administrative Judge Herbert Grossman who has resigned.

As reconstituted, the Board is comprised of the following Administrative Judges:

Peter B. Bloch, Chairman
Glenn O. Bright
Jerry Harbour

All correspondence, documents and other material shall be filed with the Board in accordance with 10 CFR 2.701 (1980). The address of the new Board member is:

Administrative Judge Peter B. Bloch, Chairman, U.S. Nuclear Regulatory Commission, Atomic Safety and Licensing Board, Washington, DC 20555.

B. Paul Cotter, Jr.,

*Chief Administrative Judge, Atomic Safety and Licensing Board Panel.*

Dated at Bethesda, Maryland, this 19th day of May 1987.

BILLING CODE 7590–01–M

---

[Docket No. 30–11982, License No. 25–16883–01, EA 86–196]

## Yellowstone County Surveyor's Office; Order Imposing Civil Monetary Penalty

I

Yellowstone County Surveyor's Office (licensee), Attn: Mr. Harlan M. Lund, County Surveyor, Room 312, Courthouse, Billings, Montana 59101 is the holder of Materials License No. 25–16883–01 issued by the Nuclear Regulatory Commission on April 6, 1981 and last amended on April 15, 1983. The license authorizes the licensee to possess and use cesium-137 and americium-241 in Troxler gauges to measure properties of materials in accordance with the conditions specified therein.

II

A routine inspection of the licensee's activities was conducted on October 21, 1986. The results of this inspection indicated that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty was served upon the licensee by letter dated February 9, 1987. The Notice stated the nature of the violations, NRC requirements that were violated, and the amount of civil penalty proposed. The licensee responded to the Notice of Violation and Proposed Imposition of Civil Penalty by letter dated March 2, 1987.

III

After consideration of the licensee's response and the statements of fact, explanation, and mitigation contained therein, the Deputy Executive Director for Regional Operations, has determined as set forth in the appendix to this Order that the violations occurred as stated.

However, because of the licensee's corrective actions the penalty proposed for the violations described in the Notice of Violation of Proposed Imposition of Civil Penalty should be mitigated by 50 percent.

IV

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (Act), 42 U.S.C. 2282, and 10 CFR 2.205, *it is hereby ordered that:*

The licensee pay a civil penalty in the amount of Two Hundred Fifty Dollars ($250) within 30 days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

The licensee may request a hearing within 30 days of the date of this Order. A request for a hearing should be clearly marked as a "Request for Enforcement Hearing" and shall be addressed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Regional Administrator, U.S. Nuclear Regulatory Commission, Region IV, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within 30 days of the date of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issues to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above and

(b) Whether, on the basis of such violations, this Order should be sustained.

For The Nuclear Regulatory Commission.

Dated at Bethesda, Maryland, this 12th day of May 1987.

James M. Taylor,

*Deputy Executive Director for Regional Operations.*

**Appendix—Evaluations and Conclusions**

On February 9, 1987 a Notice of Violation and Proposed Imposition of Civil Penalty (NOV) was issued for violations identified during a routine NRC inspection. Yellowstone County Surveyor's Office (licensee) responded to the Notice on March 2, 1987. The licensee neither specifically admitted nor denied the violations; however, it described corrective steps taken to ensure compliance now and in the future. The licensee requested that the violations be reclassified at a lower severity level and the civil penalty be mitigated to zero. The NRC's evaluation and conclusion regarding the licensee's request are as follows:

*Summary of Licensee's Request for Mitigation*

The licensee argued: (1) That the instrument users are trained, certified, and aware of safety procedures, (2) that the instrument was used very little, (3) that the citations basically were for record keeping oversights, (4) that use of the instrument presented no threat to any person's health or welfare, and (5) that the licensee took prompt corrective action and cooperated fully with NRC. The licensee's corrective measures included immediately placing the instrument in storage, obtaining dosimetry film badges for all personnel, advising all personnel of requirements for use and storage of the instrument, establishing a record of radiation exposure, establishing a physical inventory book, confirming HKM Engineering as an authorized user, completion of a leak test, obtaining a Type A Shipping Package Certificate, preparing a Shipper's Certificate, and establishing future management controls that includes a review of documentation and operator education. In addition, the licensee requested that the violations be reclassified to a lower severity level and that the civil penalty be dropped.

*NRC Evaluation of Licensee's Request for Mitigation*

Although the licensee contends that instrument users are trained, certified, and aware of safety procedures, the fact that the violations occurred is strong evidence that users were not sufficiently qualified at the time of the inspection. The staff acknlowledges the licensee's assertion that the instrument was used very little, and recognizes that this situation may have contributed to the licensee's inattention to regulatory matters; however, the NRC expects a high level of compliance with its requirements. The NRC does not accept the licensee's characterization of the violations as "basically * * * record keeping oversights." In these instances poor record keeping was symptomatic of a generally weak program for complying with regulatory requirements. In addition, the NRC does not agree that there was "no threat to any person's health or welfare." The violations involving the failure to provide personnel dosimetry and the failure to perform leak tests provide the potential for safety problems to have gone unrecognized, thus increasing the safety significance of the violations. For these reasons, the violations have been appropriately categorized at Severity Level III.

Regarding the licensee's request for mitigation of the civil penalty based on its corrective actions, the Enforcement Policy allows mitigation up to 50% for unusually prompt and extensive corrective actions. In this case, the licensee promptly put the licensed source into storage, performed a leak test, obtained dosimetry and a shipping certification, and established a training program and a periodic management audit.

*NRC Conclusion*

The NRC staff concludes that the licensee's request to reclassify the violations at a lower severity level is not supported by the licensee's arguments made in its March 2, 1987 response. However, the licensee's corrective actions do warrant reduction of the base civil penalty by 50 percent. Therefore, a civil penalty in the amount of $250.00 should be imposed.

## Abnormal Occurrence Report; Section 208 Report Submitted to the Congress

Notice is hereby given that pursuant to the requirements of section 208 of the Energy Reorganization Act of 1974, as amended, the Nuclear Regulatory Commission (NRC) has published and issued another periodic report to Congress on abnormal occurrences (NUREG–0090, Vol. 9, No. 3).

Under the Energy Reorganization Act of 1974, which created the NRC, an abnormal occurrence is defined as "an unscheduled incident or event which the Commission (NRC) determines is significant from the standpoint of public health or safety." The NRC had made a determination, based on criteria published in the **Federal Register** (42 FR 10950) on February 24, 1977, that events involving an actual loss or significant

reduction in the degree of protection against radioactive properties of source, special nuclear, and byproducts materials are abnormal occurrences.

The report to Congress is for the third quarter of 1986. The report identifies the occurrences or events that the Commission determined to be significant and reportable; the remedial actions that were undertaken are also described. During the report period, there were four abnormal occurrences at the nuclear power plants licensed to operate. The events were (1) a differential pressure switch problem in safety systems at LaSalle facility, (2) abnormal cooldown and depressurization transient at Catawba Unit 2, (3) significant safeguards deficiencies at Wolf Creek and Fort St. Vrain, and (4) significant deficiencies in access controls at River Bend Station. There was one abnormal occurrence at the other NRC licensees; it involved a therapeutic medical misadministration. There was one abnormal occurrence reported by an Agreement State; it involved a therapeutic medical misadministration.

The report also contains information updating some previously reported abnormal occurrences.

Interested persons may review the report at the NRC's Public Document Room, 1717 H Street, NW., Washington, DC or at any of the nuclear power plant Local Public Document Rooms throughout the country.

Copies of microfiche of NUREG–0090, Vol. 9, No. 3 (or any of the previous reports in this series), may be purchased by calling (202) 275–2060 or (202) 275–2171, or by writing to the Superintendent of Documents, U.S Government Printing Office, Post Office Box 37082, Washington, DC 20012–7982. A year's subscription to the NUREG–0090 series publication, which consists of four issues, is also available. Documents may be purchased by check, money order, Visa, Mastercard, or charged to a GPO Deposit Account.

Copies of the report may also be purchased from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, VA 22161.

Dated at Washington, DC, this 14th day of May 1987.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

*Secretary of the Commission.*

## OFFICE OF PERSONNEL MANAGEMENT

### Excepted Service

**AGENCY:** Office of Personnel Management.

**ACTION:** Notice.

**SUMMARY:** This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

**FOR FURTHER INFORMATION CONTACT:** Sylvia Cole, (202) 632–6817.

**SUPPLEMENTARY INFORMATION:** The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on April 28, 1987 (52 FR 15403). Individual authorities established or revoked under Schedule A, B, or C between April 1, 1987, and April 30, 1987, appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

### Schedules A and B

No Schedule A or B exceptions were established or revoked during April.

### Schedule C

*Department of Agriculture*

One Private Secretary to the Deputy Under Secretary for International Affairs and Commodity Programs. Effective April 3, 1987.

One Private Secretary to the Deputy Secretary. Effective April 14, 1987.

One Secretary (Typing) to the Director, Executive Secretariat. Effective April 14, 1987.

One Confidential Assistant to the Assistant Secretary for Food and Consumer Services. Effective April 16, 1987.

One Confidential Assistant to the Administrator, Food and Nutrition Service. Effective April 17, 1987.

*Department of Commerce*

One Confidential Assistant to the Deputy Assistant Secretary for Trade Information and Analysis, International Trade Administration. Effective April 8, 1987.

One Confidential Assistant to the Director of Legislative Affairs, National Oceanic and Atmospheric Administration. Effective April 22, 1987.

One Deputy Director to the Director, Office of Public Affairs. Effective April 14, 1987.

*Department of Defense*

One Private Secretary to the Deputy Under Secretary of Defense (Research and Advanced Technology). Effective April 3, 1987.

*Department of Education*

One Special Assistant to the Chief of Staff/Counselor to the Secretary. Effective April 3, 1987.

One Executive Secretary to the Chief of Staff/Counselor to the Secretary. Effective April 3, 1987.

One Confidential Assistant to the Director, Office of Bilingual Education and Minority Languages Affairs. Effective April 14, 1987.

One Special Assistant to the Administrator for Management Services. Effective April 21, 1987.

One Staff Assistant to the Deputy Secretary. Effective April 3, 1987.

*Department of Health and Human Services*

One Special Assistant to the Commissioner (Systems), Social Security Administration. Effective April 3, 1987.

*Department of Housing and Urban Development*

One Special Assistant to the Executive Vice President, Government National Mortgage Association. Effective April 2, 1987.

One Staff Assistant to the Deputy Assistant Secretary for Multifamily

Housing Programs. Effective April 14, 1987.

*Department of the Interior*

One Public Affairs Specialist to the Director, Office of Public Affairs. Effective April 14, 1987.

One Public Affairs Specialist (Speechwriter) to the Director, Office of Public Affairs. Effective April 21, 1987.

*Department of Justice*

One Special Assistant to the Director, Bureau of Justice Assistance. Effective April 6, 1987.

One Special Assistant to the Director, Office of Public Affairs. Effective April 10, 1987.

One Confidential Assistant to the Assistant Attorney General. Effective April 21, 1987.

One Assistant Director to the Director, Asylum Policy and Review Unit, Office of Legal Policy. Effective April 24, 1987.

*Department of Labor*

One Special Assistant to the Secretary. Effective April 17, 1987.

One Assistant to the Secretary's Representative. Effective April 22, 1987.

*Department of State*

One Secretary (Steno) to the Deputy Assistant Secretary for Policy and Counter Terrorism. Effective April 10, 1987.

One Policy and Press Advisor to the U.S. Permanent Representative to the U.S. Mission to the Organization of American States. Effective April 21, 1987.

One Director of Programs to the Assistant Secretary for Human Rights and Humanitarian Affairs. Effective April 21, 1987.

*Department of Transportation*

One Director, Executive Secretariat to the Administrator, National Highway Traffic Safety Administration. Effective April 10, 1987.

One Supervisory Public Affairs Specialist to the Director, Office of Public and Consumer Affairs, National Highway Traffic Safety Administration. Effective April 10, 1987.

*Department of the Treasury*

One Special Assistant to the Assistant Secretary (Public Affairs and Public Liaison). Effective April 3, 1987.

One Staff Assistant to the Director of the Mint. Effective April 3, 1987.

One Staff Assistant to the Director of the Mint. Effective April 7, 1987.

One Confidential Assistant to the Deputy Assistant Secretary for Administration. Effective April 24, 1987.

*Administrative Conference of the U.S.*

One Secretary (Steno) to the Chairman. Effective April 14, 1987.

*Commission on Civil Rights*

One Special Assistant to the Staff Director. Effective April 24, 1987.

*Consumer Product Safety Commission*

One Special Assistant (Legal) to a Commissioner. Effective April 7, 1987.

*Federal Home Loan Bank Board*

One Secretary (Steno) to the Director, Office of District Banks. Effective April 8, 1987.

One Secretary to the Deputy Chief of Staff. Effective April 14, 1987.

*General Services Administration*

One Special Assistant to the Regional Administrator. Effective April 3, 1987.

One Director, Office of the Executive Secretariat to the Administrator. Effective April 10, 1987.

*International Trade Commission*

One Staff Assistant (Legal) to the Chairman. Effective April 14, 1987.

*Office of Management and Budget*

One Public Affairs Specialist to the Assistant Director of Public Affairs. Effective April 22, 1987.

One Writer to the Director, Office of Management and Budget. Effective April 23, 1987.

One Secretary to the Director, Effective April 23, 1987.

*Office of Personnel Management*

One Confidential Assistant to the Assistant Director for Congressional Relations. Effective April 3, 1987.

One Confidential Assistant to the Director, Office of Public Affairs. Effective April 14, 1987.

*Office of Science and Technology Policy*

One Confidential Secretary to the Director. Effective April 22, 1987.

*President's Commission on Executive Exchange*

One Confidential Assistant to the Executive Director. Effective April 17, 1987.

One Special Assistant to the Executive Director. Effective April 23, 1987.

*Selective Service System*

One Deputy Director, Congressional and Intergovernmental Affairs, to the Assistant Director. Effective April 14, 1987.

*Small Business Administration*

One Confidential Assistant to the Assistant Administrator for Congressional and Legislative Affairs. Effective April 14, 1987.

*United States Tax Court*

Two Secretaries (Confidential Assistants) to a Judge. Effective April 16, 1987.

U.S. Office of Personnel Management.

Authority: 5 U.S.C. 3301, 3302, E.O. 10577, 3 CFR 1954–1958 Comp., P. 218.

James E. Colvard,

*Deputy Director.*

## OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

### Services Policy and Investment Policy Advisory Committees; Meetings and Determination of Closing of Meetings

The meetings of the Services Policy Advisory Committee to be held Friday, June 5, 1987, from 9:30 a.m. to 12:00 noon; the Investment Policy Advisory Committee to be held Friday July 17, 1987, from 9:30 a.m. to 12:00 noon in Washington, DC, will include the development, review and discussion of current issues which influence the trade policy of the United States. Pursuant to section 2155(f)(2) of Title 19 of the United States Code, I have determined that these meetings will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions.

Inquiries may be directed to Barbara W. North, Director, Office of Private Sector Liaison, Office of the United States Trade Representative, Executive Office of the President, Washington, DC 20500.

Clayton Yeutter,

*United States Trade Representative.*

BILLING CODE 3190–01–M

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-24475; File No. SR-DTC-87-05]

### Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Depository Trust Company

On April 7, 1987, the Depository Trust Company ("DTC") filed a proposed rule change with the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 ("the Act") to

permit the National Securities Clearing Corporation ("NSCC") branch facility located in London to act for DTC as a depository facility. The proposal includes a Depository Facility Agreement between NSCC and DTC, and a Regional Facilities Agreement between NSCC and the International Stock Exchange of the United Kingdom and the Republic of Ireland Limited ("ISE") pursuant to which ISE operates the NSCC London facility.

Under the Depository Facility Agreement, NSCC's London branch will act as a depository facility for DTC, accepting securities and transmitting or delivering them to DTC in accordance with DTC's procedures then in effect. NSCC will have no title to or interest in the securities by virtue of the agreement but will accept securities for transmittal to DTC after DTC has confirmed that the securities are in acceptable form.[1] The agreement requires NSCC to provide adequate insurance to cover losses on securities prior to delivery to any carrier, and to provide, or require the carrier to provide, adequate insurance to cover losses occurring in transit. The agreement may be terminated by mutual consent of DTC and NSCC or by either party on not less than 60 day's written notice to the other party. In addition, upon receiving notice of an amendment to DTC's procedures, NSCC could terminate the agreement prior to the effective date of the amendment. Termination would not release either party from any liability or obligation arising from transactions prior to termination. Finally, DTC will instruct NSCC regarding the disposition of securities held by NSCC at least 30 days before termination of the agreement (or a lesser period if NSCC terminates the agreement after receiving notice of an amendment to DTC's procedures).

In addition to the Depository Facility Agreement, the proposal includes a Regional Facilities Agreement between NSCC and ISE whereby ISE operates a branch facility for NSCC in London for comparsion, clearance and settlement of securities transactions in accordance with procedures set forth in NSCC's Regional Facilities Operating Procedures Manual. Under the agreement, NSCC would indemnify ISE for all losses incurred as a result of its securities processing operation except losses resulting from the negligence of ISE's agents or employees. In this connection, ISE agrees to notify NSCC of any action or proceeding so that NSCC could assume control of the defense. If, within, 30 days after being notified of the action, NSCC does not assume control of the defense, NSCC will be bound by any defense or settlement that ISE may make. The agreement further provides that NSCC agrees to maintain insurance coverage in an amount not less than $15 million (U.S.) to insure against risks arising out of this agreement, and ISE likewise agrees to maintain coverage in an amount not less than $10 million (U.S.). The agreement also provides that termination of the contract is by mutual consent of ISE and NSCC or by either party by giving the other at least 90 days written notice. Moreover, the parties agree that the contract is to be governed by and construed in accordance with New York law. In this regard, ISE has appointed, and agrees to maintain, an agent for service of process in New York in the event of a dispute between the parties arising out of the agreement.[2] Finally, amendments to the agreement must be in writing and signed by both NSCC and ISE.

DTC states in its filing that the proposed rule change is consistent with section 17A of the Act. DTC believes that the proposal promotes the prompt and accurate clearance and settlement of securities transactions by permitting greater accessibility of the depository services offered by DTC to its Participants and other users of the system in the prompt transmittal and delivery of securities traded on international markets.

The foregoing rule has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and subparagraph (e) of the Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors or otherwise in furtherance of the purpose of the Act.

Interested persons are invited to submit written data, views and arguments concerning the proposal. Persons making written submissions should file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549.

Copies of the filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to the file number in the caption above and should be submitted by June 15, 1987.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: May 19, 1987.

Jonathan G. Katz,

*Secretary.*

[FR Doc. 87-11899 Filed 5-22-87; 8:45 am]

BILLING CODE 8010-01-M

[1] NSCC may refrain from delivering securities affected by a notice of levy, seizure, order or judgment issued by a government agency or court pending further direction by the agency or court.

[2] Under the terms of the agreement, the parties also waive any objection to the laying of venue in the courts of New York, and agree that any action or proceeding to enforce a judgment related to this agreement may be brought in any jurisdiction where the parties or any of their property may be found.

---

[Release No. 34-24468; File No. SR-Phlx-87-15]

## Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Filing and Order Granting Accelerated Approval to Proposed Rule Change

On May 4, 1987, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change that would modify the bid-ask differential applicable to equity options and index options.

Phlx Rule 1014(c)(i) sets forth maximum bid-ask differentials for single equity options, using integers of $1, $5, and $10. Phlx Rule 1000(a) does the same for index options. Currently, an option trading at or below a given integer is subject to a specified maximum bid-ask differential. Accordingly, each option is subject to a maximum bid-ask differential of ⅛ of $1 if its prevailing bid does not exceed $1, ⅜ of $1 if its prevailing bid is more than $1 and does not exceed $5, ½ of $1 if its prevailing bid is more than $5 and does not exceed $10, ¾ of $1 if its prevailing bid is more than $10 and does not exceed $20, and $1 if its prevailing bid exceeds $20. The proposed rule change

[1] 15 U.S.C. 78s(b)(1) 1984).

[2] 17 C.F.R. 240.19–4 (1986).

would modify the parameters so that the ¼ of $1 limit would apply only to options for which the prevailing bid is less than $1, the ⅜ of $1 limit would apply to options for which the prevailing bid is $1 or more and less than $5, the ½ of $1 limit would apply to options for which the prevailing bid is $5 or more and less than $10, the ⅝ of $1 limit would apply to options for which the prevailing bid is $10 or more and less than $20, and the $1 limit would apply to options for which the prevailing bid is $20 or more.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6,[3] and the rules and regulations thereunder. The revised rule, which will subject an option trading at or above a given integer to a certain maximum bid-ask differential, will make it easier for options specialists, registered options traders, and floor brokers to keep track of the applicable maximum spread. This will contribute to the efficient functioning of the marketplace.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of the proposal in the Federal Register. Effectuation of the rule change will involve modifications of the Phlx's overhead computer screens, which also will have to be modified in connection with a pending Phlx proposal respecting expansion of its near-term expiration month pilot program.[4] The Phlx has requested accelerated approval of this rule change so that it can make both modifications at the same time. As the proposed rule change is minor and technical in nature, the Commission assents to accelerated approval in order to facilitate the Phlx's operational needs.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[5] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.[6]

Dated: May 18, 1987.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

### Advisory Circular 25-10; Guidance for Installation of Miscellaneous, Nonrequired, Electrical Equipment

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of issuance of advisory circular.

**SUMMARY:** This notice announces the issuance of Advisory Circular (AC) 25-10; Guidance for Installation of Miscellaneous, Nonrequired, Electrical Equipment, which sets forth a method of compliance with the requirements of Part 25 of the Federal Aviation Regulations (FAR) pertaining to installations of miscellaneous, nonrequired, electrical equipment in transport category airplanes.

**DATE:** Advisory Circular 25-10 was issued by the Transport Airplane Certification Directorate in Seattle, Washington, on March 6, 1987.

How to Obtain Copies: A copy of AC 25-10 may be obtained by writing to the U.S. Department of Transportation, M-494.3, Subsequent Distribution Unit, Washington, DC 20590.

Issued in Seattle, Washington, on May 14, 1987.

Darrell M. Pederson,

*Acting Manager Aircraft Certification Division, Northwest Mountain Region.*

[FR Doc. 87-11898 Filed 5-22-87; 8:45 am]

BILLING CODE 4910-13-M

### Federal Highway Administration

### Environmental Impact Statement; Calhoun County, MI

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice of intent.

**SUMMARY:** The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for the proposed improvements and relocation of I-94BL (Michigan Avenue) from the M-66/Dickman Road interchange east of Columbia Avenue in Calhoun County, Michigan.

**FOR FURTHER INFORMATION CONTACT:** Mr. James A. Kirschensteiner, District Engineer, Federal Highway Administration, P.O. Box 10147, Lansing, Michigan 48901, Telephone (FTS) 374-1851 or (Commerical) (571) 377-1851 or Mr. Ross E. Lowes, Manager, Social and Economic Studies Section, Bureau of Transportation Planning, Michigan Department of Transportation, P.O. Box 30050, Lansing, Michigan 48909, Telephone (517) 335-2905.

**SUPPLEMENTARY INFORMATION:** The FHWA in cooperation within the Michigan Department of Transportation (MDOT), is preparing an Environmental Impact Statement (EIS) for the proposed improvements and relocation of I-94BL in the City of Battle Creek, Calhoun County, Michigan. The proposed action will include the reconsideration, widening, and extension of Dickman Road from M-66 easterly to Gilbert and the widening of existing I-94BL (Michigan Avenue) form Gilbert to Columbia Avenue. A detour would be required for through traffic using existing I-94BL. The proposed project is approximately 2.2 miles long and a 5-lane facility is planned.

Alternatives under consideration include (1) No Action, (2) the At Grade Alternative, and (3) the Grade Separation Alternative. Alternatives (2) and (3) would both require the acquisition of right-of-way and relocation of residential and commercial properties. Approximately 95 to 109 residential, commercial units would be affected. Two schemes for the acquisition of right-or-way at the east end of the project are being considered under each of these alternatives.

The At Grade Alternate (2) would also require the relocation of the Grand Trunk Western and Conrail railroad tracks. Changes in the local street system to access the Kellogg Plant, limit the number of railroad crossings and maintain traffic circulation are also proposed.

The Grade Separation Alternate (3) proposes the construction of an 1100 foot-long overpass to carry the proposed I-94BL over Michigan Avneu, the Conrail railroad tracks and the Grand Trunk Western railroad spur tracks into the General Foods plant. Two other structures to carry the proposed I-94BL over Elm Street and the Conrail tracks are planned. Greenville Street would be extended north from Michigan Avenue to provide access to the General Foods plant. No railroad track relocations are proposed under Alternate (3).

A scoping document describing the alternatives under consideration and potential effects of the proposed action is available for review. No significant issues other than relocation have been identified. Accordingly, no federal agency scoping meeting is planned at this time. Comments on the scoping document are invited from all interested parties. Requests for a copy of the scoping document or any comments concerning the proposed action or issues involved should be addressed to the

above contact persons. The closing date for comment is June 30, 1987.

The Draft EIS is scheduled for completion in late 1987 and will be made available for public and agency review and comment.

## Federal Railroad Administration

[FRA Docket No. 87-2, Notice No. 1]

## Automatic Train Control on Northeast Corridor Carriers; Report of Investigative Findings, Proposed Orders and Public Hearing

**AGENCY:** Federal Railroad Administration (FRA), Department of Transportation (DOT).

**ACTION:** Report and proposed orders of particular applicability.

**SUMMARY:** FRA is reporting its findings regarding the need for automatic train control (ATC) devices on Northeast Corridor (NEC) trains. Based on those findings, FRA is proposing to issue carrier-specific orders requiring that all trains operating on the NEC be controlled by locomotives equipped with ATC. FRA is requesting comments from the public and affected parties regarding the proposed orders and is scheduling a public hearing concerning its contemplated action.

**DATES:** (1) A public hearing in this proceeding will begin at 10:00 a.m. on Wednesday, June 24, 1987. Any persons who desire to make a statement at the hearing should submit their prepared statements to the Docket Clerk at least five days before the hearing date.

(2) Written comments must be received not later than June 25, 1987. Comments received after that date will be considered to the extent possible without incurring additional delay.

**ADDRESSES:** (1) Hearing location—Room 2230, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590.

(2) Written comments should be submitted to the Docket Clerk, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590.

**FOR FURTHER INFORMATION CONTACT:** S.H. Stotts, Jr., Chief, Standards Division, Office of Safety, FRA, 400 Seventh Street, SW., Washington, DC 20590 (telephone (202) 366-0495), or Mark Tessler, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590 (telephone (202) 366-0628).

**SUPPLEMENTARY INFORMATION**

### Statutory Authority

The Federal Railroad Administration has both discrete and plenary legal authority to require that all trains operating on the NEC be equipped with automatic train control devices. Under the Federal Railroad Safety Act of 1970, FRA has broad legal authority to "prescribe, as necessary, appropriate rules, regulations, orders, and standards for all areas of railroad safety * * *." 45 U.S.C. Section 431(a). Section 25 of the Interstate Commerce Act (49 U.S.C. Section 26) specifically provides that FRA may, "after investigation, if found necessary in the public interest, order any carrier within a time specified in the order to install * * * automatic train stop, train control, and/or cab-signal devices, and/or other similar appliances, methods, and systems intended to promote the safety of railroad operation * * *." This authority has been previously invoked to require the installation of systems on 49 specific railroads and to require all railroads desiring to operate at high speeds to install signal systems of varying degrees of sophistication consonant with those higher speeds.

### Background

The NEC is a high speed corridor serving more than 28,000 intercity railroad passengers every day on 97 trains operating at speeds up to 125 mph. In addition, three freight carriers operate approximately 40 trains per day (many of which carry hazardous materials) at speeds up to 50 mph. Further adding to the operational mix on the NEC are various communter carriers operating more than 750 trains carrying at least 220,000 passengers daily. The extent of this operational and speed mix is unique in this country.

FRA has for a number of years worked to reduce the volume of freight traffic on the NEC. That effort and others, such as scheduling freight trains for off-peak hours, have reduced the problems associated with the NEC operational mix. However, given the constraints on further change of the mix and on varying the speeds on the NEC, FRA has determined that public safety can and should be increased by ensuring, to the extent technologically feasible, that all trains obey signal indications.

The only system now capable of ensuring that a train is operated in conformity with signal indications is the automatic train control system.[1] When a locomotive equipped with an ATC device encounters a more restrictive indication and the engineer fails to reduce speed to the prescribed limit, the system brings the train to a stop.[2]

At present, all Amtrak locomotives used in passenger service on the NEC are equipped with ATC devices, and the limited number of locomotives currently used for work train service soon will be equipped with ATC devices. All Massachusetts Bay Transportation Authority, Maryland Department of Transportation, and most Metropolitan Transportation Authority (New York City communter railroad system) trains operating on the NEC are equipped with ATC devices, while a portion of New Jersey Transit's NEC fleet is also ATC-equipped. The remaining NEC users (Conrail, Delaware and Hudson Railway, the Providence and Worcester Railroad, and the Southeastern Pennsylvania Transportation Authority) have a combination of automatic train stop and automatic cab signal-equipped locomotives.

There are two "hardware" elements to the ATC system—a signal transmission system, set in the roadbed, and ATC receiver units built into the locomotives and power units. The principal cost of installing the system—up to $240,000 a mile for double track line—lies in installation of the roadbed transmission network. The "receiving" units are far less expensive, ranging between $25,000 and $40,000 per unit.

The practical problem with attempting to install ATC on a nationwide basis lies in the fact that installation cost for the system is so prohibitive that it at least approaches and possibly exceeds the net worth of the railroads themselves. At the same time, a more modern, more effective, and less costly system—ATCS—is being field tested, and should be available to the industry within the next few years.

The Northeast Corridor, however, presents a very different situation. The most expensive part of the system—the roadbed transmission network—is

---

[1] Automatic train stop systems, while capable of stopping a train whose operator has not acknowledged a more restrictive signal, will not stop a train whose engineer acknowledges a more restrictive signal but who fails to reduce speed.

[2] There is one exception. If an engineer has properly acknowledged signal indications and reduced speed to 20 mph or less, the ATC system will impose no further restrictions, and thus would not prevent the train from running through a stop signal at that speed.

already in the track. That system has recently been modernized and extended by FRA as part of the Northeast Corridor Improvement Project. The cost of equipping all power units operating on the NEC with receiver units is comparatively small, particularly when viewed in the context of the losses sustained in a single high speed accident such as that which occurred at Chase, Maryland in January 1987.

**Investigations**

The advisability of requiring all trains operating on the NEC to be ATC-equipped has been the subject of numerous investigations by FRA and other agencies since the late 1970's.

The idea of mandating ATC on the Corridor is not a new one. Both FRA and the National Transportation Safety Board (NTSB) at one time proposed such installation, but each agency drew back from those proposals in the face of strong opposition from the affected parties.

In 1978, following an accident at Seabrook, Maryland, NTSB recommended that all trains operating on the NEC be ATC-equipped (Recommendation-78-39). FRA considered a similar proposal in a 1979 proceeding under the Signal Inspection Act (Block Signal Application No. 1588) (BS-AP-1588). The FRA Safety Board held public hearings on BS-AP-1588 in Philadelphia, Pennsylvania (October 16, 1979), Boston, Massachusetts (October 18, 1979), and Washington, DC (August 26, 1980).

Block Signal Application No. 1588 drew opposition from railway labor and all Northeast Corridor railroads except Amtrak. In 1982, Amtrak altered its position, withdrawing its support for and application in BS-AP-1588 and offering a scaled down proposal for NEC signalling that did not include mandatory ATC installation.

On September 30, 1982, NTSB altered its position, closing the recommendation for mandatory ATC installation and concluding that Amtrak had operating rules that were an "acceptable alternative." FRA took similar action in August 1983. In the course of the investigation into the January 4 accident at Chase, Maryland, both agencies reopened their consideration of the issue.

During its Chase investigation, as well as its previous proceedings under the Signal Inspection Act, FRA has thoroughly examined the merits and feasibility of an ATC mandate for the NEC. We believe that the evidence is clear in establishing the public safety benefit of such mandate, as well as its positive cost benefit.

During FRA's investigations relating to BS-AP-1588, freight carriers expressed concern that full service brake applications initiated by ATC systems could cause derailments of freight trains of the tonnage typically carried on the NEC. There is certain evidence that in some situations involving rolling terrain and long, heavy trains, application of automatic train control devices could create dangerous buff (cars bunched together) and draft (cars stretched out) forces in the train. This concern is limited to freight trains because of their greater length and carrying capacity. FRA, in its extensive investigations under BS-AP-1588, concluded that there was some legitimacy to the freight carriers' concerns, and formed a Special Task Force Committee to study the problem. Representatives of both Amtrak and Conrail were included on this Committee. Computer simulations of train handling problems were conducted and the results analyzed. Approximately 18 tests were performed. These tests confirmed that there was indeed a potential problem in certain instances when conventionally programmed ATC initiated a full service brake application on a heavy freight. After study and deliberations, the Special Task Force Committee agreed on a technical solution to the problem, consisting of design and program modifications to existing equipment. However, it should be noted that freight railroads elsewhere in the country have operated very safely for many years with ATC systems, demonstrating the safety of such devices on freight operations. FRA will shortly begin testing NEC equipment under actual work conditions to ensure the validity of the conclusions reached by the Task Force Committee. At the conclusion of the testing program, details regarding the necessary equipment modifications will be shared with railroads and equipment manufacturers.

**Findings**

After lengthy investigations, FRA finds it necessary in the public interest to propose requiring that every locomotive used as a controlling locomotive on the NEC main line be equipped with a functioning automatic train control device.

**Proposed Orders**

With respect to freight trains, the orders we propose to issue would provide for notice of required modifications of the devices, if necessary, and would require progressive implementation of ATC on the NEC over the next 24 months. The schedule would also provide for phasing in installation of receiver units on passenger locomotives. The timetable would be as follows:

*June 15, 1987—October 15, 1987*

Construction/procurement of test ATC systems modified in accordance with FRA specifications.

*October 16, 1987—December 15, 1987*

Service testing of prototype systems.

*December 15, 1987*

FRA will issue notice of modifications required to adapt ATC devices to freight operations.

*January 15, 1988*

All freight and passenger carriers operating on the NEC must have completed ordering "receiver units" for all power units that will operate as lead locomotives on the NEC.

**Implementation**

Each carrier will, in carrier-specific orders, be given 6 to 24 months to complete retrofitting of existing power units. The time period will begin to run on the date of delivery of the first unit. Installation must proceed at a pace no slower than one-third implementation over the initial one-third of the designated implementation period, two-thirds implementation over the initial two-thirds of the designated implementation period, and complete installation by the expiration of the installation period.

The orders would apply only to carriers operating on the Northeast Corridor. FRA estimates the number of locomotives affected by this order to range from a minimum of 456 to a maximum of 763, depending on operational decisions of the affected carriers. The orders would require railroads to document their compliance, by indicating the purchase contract date, delivery schedules, and monthly progress reports. The proposed orders are included as an appendix to this Notice.

**Regulatory Impact**

FRA has evaluated the proposed action and its potential impacts in accordance with existing regulatory policies.

The cost of equipping each locomotive depends on the type of signal equipment already installed on the unit; thus, the cost of equipping one locomotive can range from $25,000 to $40,000. When both the cost range and the possible numbers of locomotives to be equipped is calculated, the potential cost of these

orders ranges from $17.5 million to a maximum of approximately $90.5 million.

The technology used in ATC devices is not new and has been thoroughly tested and refined over the years. While we do not anticipate any reliability problems or more than minimal maintenance costs associated with these devices, we invite comment from current ATC users regarding these costs.

FRA is constrained in its analysis of the benefits of its proposed orders because of the impossibility of predicting with any degree of accuracy the occurrence of an accident absent these devices. Of the three percent of reported railroad accidents that were investigated by the FRA during a recent six-year period (1980–1985), there were approximately 95 accidents nationwide that could have been avoided had ATC been installed. Fortunately, the vast majority of these accidents involved only freight trains and thus resulted in the relatively low number of 29 deaths and 477 injuries. The eight accidents involving passenger trains during the 1980 to 1985 period resulted in a disportionate number of injuries (over 300 injuries and one death). The devastating results from just one passenger or commuter train accident is made even more evident from the 16 deaths and 170 injuries caused by the Chase, Maryland accident.

We are limiting these orders to a heavily travelled passenger corridor constituting less than two percent of Amtrak's trackage, yet carrying more than 25 percent of Amtrak's passenger traffic (1.3 billion passenger-miles). The high number of passengers carried over a relatively short distance, when combined with heavy commuter and freight service, presents risks we need not accept. Fortunately, because the large costs involved in installing the track infrastructure have already been borne, the cost of reducing the risks of a catastrophic accident is relatively small. We note that the accident on January 4, 1987 at Chase, Maryland would have been avoided if the Conrail locomotive had been equipped with ATC equipment. Preliminary estimates indicate the cost of that accident to approximate $40 to $50 million.

FRA has therefore tentatively concluded that the benefits of installation of ATC devices on all controlling locomotives on the NEC outweigh the costs associated with their purchase and installation. FRA solicits the opinions of the public regarding the need for these devices and especially requests information related to the costs and benefits of such devices. Public comments on costs and benefits will be considered before final action is taken.

The five carriers affected by these orders include two large regional transit authorities and two Class I railroads, Consolidated Rail Corporation and Delaware and Hudson Railway Company. The only arguably "small entity," the Providence and Worcester Railroad Company, would have to equip seven of its 15 locomotives at a cost of approximately $175,000.

Based on the facts set forth in this Notice, it is certified that these orders will not have a significant economic impact on a substantial number of small entities under the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

FRA has concluded that the proposed actions will have no significant impact on the environment.

**Public Participation**

Interested parties are invited to participate in this proceeding by submitting to the Docket Clerk written data, views, or comments and this proposal, and the proposed implementing orders that appear in the Appendix to this Notice, may be changed in light of the comments received. In addition, FRA is scheduling a public hearing to permit all interested parties to furnish FRA with information concerning its proposed action. This hearing is scheduled to begin at 10:00 a.m. on Wednesday, June 24, 1987 in Room 2230 of the Nassif Building in Washington, D.C.

**Authority:** The Signal Inspection Act (49 U.S.C. sec. 26), and the Federal Railroad Safety Act of 1970, as amended (45 U.S.C. sec. 431 *et seq.*), delegated to the Federal Railroad Administrator by the Secretary of Transportation (49 CFR 1.49(f), (g), and (m)).

Issued in Washington, DC on May 20, 1987.

**John H. Riley,**

*Administrator.*

**Appendix—Proposed Report and Orders**

*Affected Party:* Consolidated Rail Corp. (Conrail)

*Findings:* Based on investigation and after opportunity for comment, the Federal Railroad Administration (FRA) has determined that the party noted above operates freight service over portions of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts; the locomotives employed to provide that service are not currently equipped with automatic train control (ATC) devices; and it is necessary in the public interest that all trains operating on this trackage be equipped with automatic train control devices.

FRA has further determined that field testing of equipment is necessary to assure the establishment of safe braking specifications for such ATC devices on freight trains, and therefore will conduct appropriate tests. If found to be necessary, FRA will issue revised ATC specifications to all interested parties prior to January 15, 1988.

*Therefore:* 1. No later than January 15, 1988, Conrail shall execute a contract for acquisition of sufficient numbers of automatic train control devices to comply with this Order. The initial delivery of automatic train control devices shall be at the earliest practical date achievable by the device manufacturer. Conrail's purchasing program and delivery schedule should, at a minimum, be at a pace consistent with the installation requirements set forth in Paragraph 2 below.

2. a. No later than 18 months after delivery of the first automatic train control devices purchased pursuant to this Order, any train operated by or on behalf of Conrail, its successors and assigns, that operates on or over any portion of the Northeast Corridor trackage between Washington, DC and Boston, Massachusetts, shall have as its controlling locomotive a unit equipped with an automatic train control device.

b. Installations of automatic train control devices shall proceed at a pace no slower than one-third of the needed devices installed during the first one-third of the period stated in Paragraph 2.a. above.

c. Installation of automatic train control devices shall proceed at a pace no slower than two-thirds of the needed devices installed during the first two-thirds of the period stated in Paragraph 2.a. above.

3. The automatic train control devices installed on locomotives pursuant to this Order shall comply with the minimum standards set forth in 49 CFR Part 236, Subpart E.

4. FRA shall be notified (i) when the contract for acquisition of automatic train control devices is executed, indicating the date of the contract and the terms of the planned delivery schedule, and (ii) when the installation of the devices commences. FRA shall be sent monthly progress reports which shall include delivery and installation information.

5. Failure to comply with any requirement of this Order subjects the railroad to a civil penalty of not more than $2,500. Each day of violation constitutes a separate violation.

6. This Order is effective thirty days after receipt. Any petition for reconsideration must be filed with the

Federal Railroad Administration within thirty days of the effective date of this Order.

*Affected Party:* Delaware and Hudson Railway Co. (D&H)

*Findings:* Based on investigation and after opportunity for comment, the Federal Railroad Administration (FRA) has determined that the party noted above operates freight service over portions of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts; the locomotives employed to provide that service are not currently equipped with automatic train control (ATC) devices; and it is necessary in the public interest that all trains operating on this trackage be equipped with automatic train control devices.

FRA has further determined that field testing of equipment is necessary to assure the establishement of safe braking specifications for such ATC devices on freight trains, and therefore, will conduct appropriate tests. If found to be necessary, FRA will issue revised ATC specifications to all interested parties prior to January 15, 1988.

*Therefore:* 1. No later than January 15, 1988, D&H shall execute a contract for acquisition of sufficient numbers of automatic train control devices to comply with this Order. The initial delivery of automatic train control devices shall be at the earliest practical date achievable by the device manufacturer. D&H's purchasing program and delivery schedule should, at a minimum, be at a pace consistent with the installation requirements set forth in Pargraph 2 below.

2. a No later than 12 months after delivery of the first automatic train control devices purchased pursuant to this Order, any train operated by or on behalf of D&H, its successors and assigns, that operates on or over any portion of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusets, shall have as its controlling locomotive a unit equipped with an automatic train control device.

B. Installation of automatic train control devices shall proceed at a pace no slower than one-third of the needed devices installed during the first one-third of the period stated in Paragraph 2.a. above.

c. Installation of automatic train control devices shall proceed at a pace no slower than two-thirds of the needed devices installed during the first two-thirds of the period stated in Paragraph 2.a. above.

3. The automatic train control devices installed on locomotives pursuant to this Order shall comply with the minimum standards set forth in 49 CFR Part 236, Subpart E.

4. FRA shall be notified (i) when the contract for acquisition of automatic train control devices is executed, indicating the date of the contract and the terms of the planned delivery schedule, and (ii) when the installation of the devices commences. FRA shall be sent monthly progress reports which shall include delivery and installation information.

5. Failure to comply with any requirement of this Order subjects the railroad to a civil penalty of not more than $2,500. Each day of violation constitutes a separate violation.

6. This Order is effective thirty days after receipt. Any petition for reconsideration must be filed with the Federal Railroad Administration within thirty days of the effective date of this Order.

*Affected Party:* Providence and Worcester Railroad Co. (P&W)

*Findings:* Based on investigation and after opportunity for comment, the Federal Railroad Administration (FRA) has determined that the party noted above operates freight service over portion of the Northeast Corridor trackage between Washington, DC and Boston, Massachusetts; the locomotives employed to provide that service are not currently equipped with automatic train control (ATC) devices; and it is necessary in the public interest that all trains operating on this trackage be equipped with automatic train control devices.

FRA has further determined that field testing of equipment is necessary to assure the establishment of safe braking specifications for such ATC devices on freight trains, and therefore will conduct appropriate tests. If found to be necessary, FRA will issue revised ATC specifications to all interested parties prior to January 15, 1988.

*Therefore:* 1. No later than January 15, 1988, P&W shall execute a contract for acquisition of sufficient numbers of automatic train control devices to comply with this Order. The initial delivery of automatic train control devices shall be at the earliest practical date achievable by the device manufacturer. P&W's purchasing program and delivery schedule should, at a minimum, be at a pace consistent with the installation requirements set forth in Paragraph 2 below.

2. a. No later than six months after delivery to your railroad of the first automatic train control devices purchased pursuant to this Order, any train operated by or on behalf of P&W, its successors and assigns, that operates on or over any portion of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts, shall have as its controlling locomotive a unit equipped with an automatic train control device.

b. Installation of automatic train control devices shall proceed at a pace no slower than one-third of the needed devices installed during the first one-third of the period stated in Paragraph 2.a. above.

c. Installation of automatic train control devices shall proceed at a pace no slower than two-thirds of the needed devices installed during the first two-thirds of the period stated in Paragraph 2.a. above.

3. the automatic train control devices installed on locomotives pursuant to this Order shall comply with the minimum standards set forth in 49 CFR Part 236, Subpart E.

4. Failure to comply with any requirement of this Order subjects the railroad to a civil penalty of not more than $2,500. Each day of violation constitutes a separate violation.

5. FRA shall be notified (i) when the contract for acquisition of automatic train control devices is executed, indicating the date of the contract and the terms of the planned delivery schedules, and (ii) when the installation of the devices commences. FRA shall be sent monthly progress reports which shall include delivery and installation informtion.

6. This Order is effective thirty days after receipt. Any petition for reconsideration must be filed with the Federal Railroad Administrator within thirty days of the effective date of this Order.

*Affected Party:* New Jersey Transit Rail Operations, Inc. (New Jersey Transit).

*Findings:* Based on investigation and after opportunity for comment, the Federal Railroad Administration has determined that the party noted above operates passenger service over portions of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts; the locomotives employed to provide that service are not currently equipped with automatic train control devices; and it is necessary in the public interest that all trains operating on this trackage be equipped with automatic train control devices.

*Therefore:* 1. No later than January 15, 1988, New Jersey Transit shall execute a contract for acquisition of sufficient numbers of automatic train control devices to comply with this Order. The initial delivery of automatic train control devices shall be at the earliest practical date achievable by the device

manufacturer. New Jersey Transit's purchasing program and delivery schedule should, at a minimum, be at a pace consistent with the installation requirements set forth in Paragraph 2 below.

2. a. No later than 20 months after delivery of the first automatic train control devices purchased pursuant to this Order, any train operated by or on behalf of New Jersey Transit, its successors and assigns, that operates on or over any portion of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts, shall have as its controlling locomotive a unit equipped with an automatic train control device.

b. Installation of automatic train control devices shall proceed at a pace no slower than one-third of the needed devices installed during the first one-third of the period stated in Paragraph 2.a. above.

c. Installation of automatic train control devices shall proceed at a pace no slower than two-thirds of the needed devices installed during the first two-thirds of the period stated in Paragraph 2.a. above.

3. The automatic train control devices installed on locomotives pursuant to this Order shall comply with the minimum standards set forth in 49 CFR Part 236, Subpart E.

4. FRA shall be notified(i) when the contract for acquisition of automatic train control devices is executed, indicating the date of the contract and the terms of the planned delivery schedule, and (ii) when the installation of the devices commences. FRA shall be sent monthly progress reports which shall include delivery and installation information.

5. Failure to comply with any requirement of this Order subjects the railroad to a civil penalty of not more than $2,500. Each day of violation constitutes a separate violation.

6. This Order is effective thirty days after receipt. Any petition for reconsideration must be filed with the Federal Railroad Administration within thrity days of the effective date of this Order.

*Affected Party:* Southeastern Pennsylvania Transportation Authority (SEPTA).

*Findings:* Based on investigation and after opportunity for comment, the Federal Railroad Administration has determined that the party noted above operates passenger service over portions of the Northeast Corridor trackage between Washington, DC and Boston, Massachusetts; the locomotives employed to provide that service are not currently equipped with automatic train control devices and it is necessary in the public interest that all trains operating on this trackage be equipped with automatic train control devices.

*Therefore:* 1. No later than January 15, 1988, SEPTA shall execute a contract for acquisition of sufficient numbers of automatic train control devices to comply with this Order.

The initial delivery of automatic train control devices shall be at the earliest practical date achievable by the device manufacturer. SEPTA's purchasing program and delivery schedule should, at a minimum, be at a pace consistent with the installation requirements set forth in Paragraph 2 below.

2. a. No later than 24 months after delivery of the first automatic train control devices purchased pursuant to this Order, any train operated by or on behalf of SEPTA, its successors and assigns, that operates on or over any portion of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts, shall have as its controlling locomotive a unit equipped with an automatic train control device.

b. Installation of automatic train control devices shall proceed at a pace no slower than one-third of the needed devices installed during the first one-third of the period stated in Paragraph 2.a. above.

c. Installation of automatic train control devices shall proceed at a pace no slower than two-thirds of the needed devices installed during the first two-thirds of the period stated in Paragraph 2.a. above.

3. The automatic train control devices installed on locomotives pursuant to this Order shall comply with the minimums standards set forth in 49 CFR Part 236, Subpart E.

4. FRA shall be notified (i) when the contract for acquisition of automatic train control devices is executed, indicating the date of the contract and the terms of the planned delivery schedule, and (ii) when the installation of the devices commences. FRA shall be sent monthly progress reports which shall include delivery and installation information.

5. Failure to comply with any requirement of this Order subjects the railroad to a civil penalty of not more than $2,500. Each day of violation constitutes a separate violation.

6. This Order is effective thirty days after receipt. Any petition for reconsideration must be filed with the Federal Railroad Administration within thrity days of the effective date of this Order.

*Affected Party:* National Railroad Passenger Corp.

*Findings:* Based on investigation and after opportunity for comment, the Federal Railroad Administration has determined that the National Railroad Passenger Corporation operates passenger service and permits other railroads to operate passenger for freight service over portions of the Northeast Corridor trackage between Washington, DC, and Boston Massachusetts; some of the locomotives employed to provide that service are not currently equipped with automatic train control devices; and it is necessary in the public interest that all trains operating on this trackage be equipped with automatic train control devices.

*Therefore:* Effective July 1, 1990, the National Railroad Passenger Corporation, its successors and assigns, shall not permit any train to be operated on or over any portion of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts subject to its operational control, unless that train has as its controlling locomotive a unit equipped with an automatic train device in compliance with the minimum standards set forth in 49 CFR Part 236, Subpart E.

This Order is effective thrity days after receipt. Any petition for reconsideration must be filed with the Federal Railroad Administration within thirty days of the effective date of this Order.

*Affected Party:* Metro North Commuter Railroad Co.

*Findings:* Based on investigation and after opportunity for comment, the Federal Railroad Administration has determined that Metro North Commuter Railroad Company operates passenger service and permits other railroads to operate passenger or freight service over portions of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts; some of the locomotives employed to provide that service are not currently equipped with automatic train control devices; and it is necessary in the public interest that all trains operating on this trackage be equipped with automatic train control devices.

*Therefore:* Effective July 1, 1990, Metro Northeast Commuter Railroad Company, its successors and assigns, shall not permit any train to be operated on or over any portion of the Northeast Corridor trackage between Washington, DC, and Boston, Massachusetts subject to its operational control, unless that train has as its controlling locomotive a unit equipped with an automatic train control device in compliance with the minimum standards set forth in 49 CFR Part 236, Subpart E.

This Order is effective thirty days after receipt. Any petition for reconsideration must be filed with the Federal Railroad Administration within thrity days of the effective date of this Order.

BILLING CODE 4910-62-M

## DEPARTMENT OF THE TREASURY

### Public Information Collection Requirements Submitted to OMB for Review

Dated: May 18, 1987.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

**Comptroller of the Currency**

*OMB number:* 1557-0142.
*Form number:* None.
*Type of review:* Extension.
*Title:* Recordkeeping and Confirmation Requirements for Security Transactions.
*Description:* Requirement provides record of information relevant to purchase or sale of security by national bank or national bank trust department for a customer.
*Respondents:* Businesses.
*Estimated burden:* 153,671 hours.
*Clearance officer:* John Ference (202) 447-1177, Comptroller of the Currency, 5th Floor, L'Enfant Plaza, Washington, DC 20219.
*OMB reviewer:* Robert Fishman (202) 395-7340, Office of Management and Budget, Room 3228, New Executive Office Building, Washington, DC 20503.

**Internal Revenue Service**

*OMB number:* 1545-0015.
*Form number:* 706.
*Type of review:* Revision.
*Title:* United States Estate (and Generation-Skipping Transfer) Tax Return.
*Description:* Form 706 is used by executors to report and compute the Federal Estate Tax imposed by Internal Revenue Code section 2001, the Federal Generation-Skipping Transfer tax imposed by Internal Revenue Code section 2601 and the additional Estate Tax imposed by Code section 4981A. IRS uses the information to enforce these taxes and to verify that the tax has been properly computed.
*Respondents:* Individuals or households, Businesses.
*Estimated burden:* 2,349,024 hours.
*OMB number:* New.
*Form numbers:* None.
*Type of review:* New Collection.
*Title:* 1987 General Purpose Taxpayer Opinion Survey.
*Description:* This project is designed to collect information concerning taxpayer behavior that cannot be obtained through other data colleciton means, but which is central to the mission of the agency. The last IRS Public Opinion Survey was conducted in 1984.

### Public Information Collection Requirements Submitted to OMB for Review

Dated: May 19, 1987.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2224, 15th and Pennsylvania Avenue NW., Washington, DC 20220.

**Internal Revenue Service**

*OMB number:* New.
*Form number:* None.
*Type of review:* New Collection.
*Title:* Focus Group Interviews on Federal Tax Forms.
*Description:* The group interviews are necessary to obtain public input on some of the major tax forms that have been revised or developed due to the Tax Reform Act of 1986. The results will be used to further simplify and improve the forms so that they will be more easily understood by taxpayers.
*Respondents:* Individuals or households, Farms, Businesses.
*Estimated burden:* 180 hours.
*Clearance officer:* Garrick Shear (202) 566-6150, Internal Revenue Service, Room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.
*OMB reviewer:* Milo Sunderhauf (202) 395-6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

# Sunshine Act Meetings

Federal Register
Vol. 52, No. 100
Tuesday, May 26, 1987

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

**FEDERAL DEPOSIT INSURANCE CORPORATION**

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 10:00 a.m. on Thursday, May 28, 1987, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings:

Application for Federal deposit insurance:

Silvergate Thrift and Loan Association, a proposed new industrial loan company to be located at 5119 Jackson Drive, La Mesa, California.

Application for Federal Deposit Insurance and for consent to merge and establish twenty-two branches:

Barnett Bank of Pinellas County, a proposed new bank to be located at 1901 Central Avenue, St. Petersburg, Florida, for Federal deposit insurance, for consent to merge, under its charter and title, with Barnett Bank of Pinellas County, National Association, Clearwater, Florida, and for consent to establish twenty-one existing and one approved, but unopened, offices of Barnett Bank of Pinellas County, National Association as branches of Barnett Bank of Pinellas County.

Applications for Federal deposit insurance and for consent to purchase assets and assume liabilities:

First State Bank, Elkins, Inc., a proposed new bank to be located at the southeast corner of Davis Avenue and Fifth Street, Elkins, West Virginia, for federal deposit insurance and for consent to purchase certain assets of and assume the liability to pay deposits made in the Elkins, West Virginia, branch of Fed One Savings Bank, FSB, Wheeling, West Virginia, a non-FDIC-insured institution.

Application for consent to merge:

The First National Bank of Manchester, Manchester, Tennessee, for consent to merge, under its charter and title, with The Meltons Bank, Cassaway, Tennessee, a non-FDIC-insured institution.

Application for consent to merge and establish one branch:

Mercer County Bank, Princeton, West Virginia, and insured State nonmember bank, for consent to merge, under its charter and title, with Bank of Athens, Athens, West Virginia, and for consent to establish the sole office of Bank of Athens as a branch of the resultant bank.

Application for consent to purchase assets and assume liabilities:

The First National Bank of Boston, Boston, Massachusetts, for consent to purchase certain assets of and assume the liability to pay deposits made in the Star Market, Harvard Square, Alewife, Marlborough, Newton, Westborough, and Quincy Branches of Northeast Savings, F.A., Hartford, Connecticut, a non-FDIC-insured institution.

Application for consent to transfer assets in consideration of the assumption of deposit liabilities:

Bank of America National Trust and Savings Association, San Francisco, California, for consent to transfer certain assets to Home Federal Savings and Loan Association, San Diego, California, a non-FDIC-insured institution, in consideration of the assumption of the liability to pay deposits in the Julian Branch of Bank of America National Trust and Savings Association.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or an Associate Director of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Director, Division of Liquidation:

Memorandum re: Monthly Report of Actions Approved Under Delegated Authority by the Committee on Liquidations, Loans and Purchases of Assets March 16, 1987–April 30, 1987

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Summary Audit Report re:
Bank of Kiowa, Kiowa, Kansas (6716), (Memo dated April 20, 1987).
Summary Audit Report re:
Union Deposit Bank, Union, Kentucky (6708), (Memo dated April 20, 1987).
Summary Audit Report re:
Albany State Bank, Albany, Missouri (2594), (Memo dated April 20, 1987).
Summary Audit Report re:
Western Bank, Midland, Texas (2596), (Memo dated April 20, 1987).
Summary Audit Report re:
Travel Voucher Claims, (Memo dated March 31, 1987).

Discussion Agenda

Memorandum re: Statement of Policy regarding Applications for Federal Deposit Insurance by Operating Non-FDIC-Insured Institutions, which policy statement sets forth specific guidelines that would apply to all applications for Federal deposit insurance which must be considered by the FDIC.

Recommendation regarding the continuation of the Corporation's Boston Regional Office.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: May 21, 1987.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
*Executive Secretary.*

BILLING CODE 6714-01-M

**FEDERAL DEPOSIT INSURANCE CORPORATION**

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:30 a.m. on Thursday, May 28, 1987, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or

assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(6), and (c)(9)(A)(ii).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

**Discussion Agenda**

Recommendation regarding the Corporation's liquidation activities.

Report of the Director, Division of Accounting and Corporate Services:

Memorandum re: Investment Management Report March 31, 1987.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the Sixth Floor of the FDIC Building located at 550 17th Street, NW., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 898–3813.

Dated: May 21, 1987.

Federal Deposit Insurance Corporation.

**Hoyle L. Robinson,**

*Executive Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of May 26, 1987:

A closed meeting will be held on Wednesday, May 27, 1987, at 3:00 p.m. An open meeting will be held on Friday, May 29, 1987, at 2:00 p.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording securities will attend the closed meeting. Certain staff members who are responsible for the calendared matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Peters, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Wednesday, May 27, 1987, at 3:00 p.m., will be:

Formal orders of investigation.
Settlement of injunctive action.
Institution of injunctive action.
Settlement of administrative proceedings of an enforcement nature.
Institution of administrative proceedings of an enforcement nature.

The subject matter of the open meeting scheduled for Friday, May 29, 1987, at 2:00 p.m., will be:

1. Consideration of whether to approve or disapprove proposed rule changes submitted by the New York and Pacific Stock Exchanges relating to the listing of stock having unequal voting rights, and whether to adopt a rule pursuant to section 19(c) of the Securities Exchange Act of 1934 which would amend the rules of national securities exchanges and associations concerning the listing or authorization for quotation or reporting of securities of an issuer that has issued any security having unequal voting rights. For further information, please contact Sharon Lawson at (202) 272–2910 or Ellen K. Dry at (202) 272–2843.

2. Consideration of a release approving proposed rule changes by the American and New York Stock Exchanges that would permit the exchanges to waive or modify certain of their listing standards for foreign companies. For further information, please contact Robert J. Sevigny at (202) 272–2409.

3. Consideration of rule amendments governing the designation of National Market System Securities and changes to the National Association of Securities Dealers Transaction Reporting Plan, including the additon of certain corporate governance requirements. For further information, please contact William M. Harter, Jr. at (202) 272–2414.

4. Consideration of a release announcing amendments to the Commission's financial responsibility rules involving the treatment of repurchase and reverse repurchase agreements by registered broker-dealers. The amendments affect Securities Exchange Act Rules 15c3–1, 15c3–3, 17a–3 and 17a–13. For further information, please contact Michael P. Jamroz at (202) 272–2398 or Michael A. Macchiaroli at (202) 272–2904.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Patrick Daugherty at (202) 272–3077.

**Jonathan G. Katz,**

*Secretary.*

## TENNESSEE VALLEY AUTHORITY

[Meeting No. 1387]

**TIME AND DATE:** 10:00 a.m. (e.d.t.), May 27, 1987.

**PLACE:** Regional High Technology Training Center Auditorium (Haywood Technical College), 10 Industrial Park Drive, Waynesville, North Carolina.

**STATUS:** Open.

Agenda

Approval of minutes of meetings held on May 22, 1987.

*Discussion Item*

1. Swannanoa Valley Project.

*Action Items*

B—Purchase Awards

B1. Req. 60— Long Term Spot Coal for Johnsonville Steam Plant.

B2. Request for Proposal MA–37902A— Requirements Contract for Rapid Dewatering System and Associated Containers, Casks, and Transportation for Browns Ferry Nuclear Plant

C—Power Items

C1. Renewal Power Contract with City of Tullahoma, Tennessee.

D—Personnel Items

* D1. Revision of Management and Physician Staffing Arrangement Guidelines.

D2. Supplement No. 5 to Personal Services Contract No. TV–64447A with Science Applications International Corporation, Erwin, Tennessee, for Technical Assistance at the Browns Ferry Nuclear Plant, Requested by the Office of Nuclear Power.

D3. Supplement No. 3 to Consulting Contract No. TV–71028A with Aptech Engineering Services, Palo Alto, California, to Provide Consulting Services in Connection with Issues Related to Welding Review Activity at Watts Bar Nuclear Plant, Requested by Office of Nuclear Power.

D4. Supplement No. 1 to Personal Services Contract No. TV–70530A with Manpower Temporary Services, Chattanooga, Tennessee, for Temporary Clerical Services, Requested by Division of Property and Services.

E—Real Property Transactions

E1. Filing of Condemnation Cases

---

* Item approved by individual Board members. This would give formal ratification to the Board's action.

F—Unclassified

F1. Supplement No. 5 to Agreement No. TV-[illegible]A with Tennessee State University, Nashville State Technical Institute, and the State of Tennessee Board of Regents for Coordination and Administration of the Craft/Skill Upgrade Training Program at the Industrial Training Center at Cockrill Bend in Nashville, Tennessee.

F2. Supplement No. 2 to Agreement No. TV-67766A with Tennessee State University for TVA to Assist the University in Administering the Craft/Skill Upgrade Training Program at the Industrial Training Center of the Nashville Project.

F3. Project Order Under Memorandum of Understanding (TV-71249A) Between TVA and Directorate of Engineering and Housing for TVA Support to the United States Army Forces Command at Fort Sam Houston, Texas, in Connection with Energy Resources Management.

**CONTACT PERSON FOR MORE INFORMATION:** Alan Carmichael, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call (615) 632-8000, Knoxville, Tennessee. Information is also available at TVA's Washington Office (202) 245-0101.

Dated: May 20, 1987.

**W.F. Willis,**

*General Manager.*

# Corrections

Federal Register
Vol. 52, No. 100
Tuesday, May 26, 1987

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents and volumes of the Code of Federal Regulations. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

# Department of the Treasury

**Office of the Assistant Secretary (Domestic Finance)**

**17 CFR Ch. IV**

**Implementation of Regulations; Government Securities Act of 1986; Temporary Rule With Request for Comments**

BEST COPY AVAILABLE

DEPARTMENT OF THE TREASURY

Office of the Assistant Secretary (Domestic Finance)

17 CFR Ch. IV

**Implementation of Regulations; Temporary Issuance With Request for Comments; Government Securities Act of 1986**

**AGENCY:** Office of the Assistant Secretary (Domestic Finance), Treasury.

**ACTION:** Temporary rule with request for comments.

**SUMMARY:** The Department of the Treasury is issuing temporary regulations as required by the Government Securities Act of 1986 (the "Government Securities Act" or "GSA"). These temporary regulations reflect proposed regulations issued by the Treasury on February 25, 1987 (52 FR 5660) and the Treasury's response to comments received thereon.

The GSA requires the Secretary of the Treasury (the "Secretary") to adopt rules and regulations concerning the financial responsibility, protection of investor securities and funds, recordkeeping, reporting and audit of brokers and dealers in government securities. The GSA also requires the Secretary to adopt regulations relating to the custody of government securities held by depository institutions. The temporary regulations are designed to enhance the protection of investors in government securities while maintaining a fair, honest and liquid market in such securities. Subchapter A of the temporary regulations covers government securities brokers and dealers. Subchapter B of the temporary regulations deals with custody of government securities by depository institutions, including those that are government securities brokers or dealers.

Under the GSA, the Department must publish final regulations by July 25, 1987. Moreover, the GSA requires that all government securities brokers and dealers either be registered with the Securities and Exchange Commission ("Commission" or "SEC") by July 25, 1987, or have provided notice of their status as a government securities broker or dealer to either the SEC (in the case of registered brokers or dealers) or the appropriate federal financial institution supervisory agency (in the case of commercial banks and thrift institutions) by July 25, 1987.

**DATES:** Temporary rule effective May 26, 1987; comments must be submitted on or before June 10, 1987. No extensions of time for comment will be provided.

**ADDRESSES:** Send comments to: The Government Securities Regulations Project, Department of the Treasury, Room 4417, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Copies of all written comments will be available for public inspection and copying from 9:00 a.m. to 5:30 p.m. at the Treasury Department Library, Room 5030, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

**FOR FURTHER INFORMATION CONTACT:** Ellen Seidman (Special Assistant to the Under Secretary), Room 4414, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220, (202) 566–2276, or Anne Meister (Federal Reserve Liaison Officer), Room 553, Bureau of Public Debt, Department of the Treasury, 999 E Street, NW., Washington, DC 20239, (202) 376–4304.

For information concerning financial responsibility (capital) and Form G–405, contact: Norman Carleton (Assistant Director, Office of Government Finance & Market Analysis), Room 3044, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220, (202) 566–2330.

For information concerning possession or control of customer securities and Part 450, contact: Virginia Rutledge (Attorney-Advisor), Room 2025, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220, (202) 535–4890, or Cindy Reese (Senior Attorney and Special Assistant), Room 503, Bureau of Public Debt, Department of the Treasury, 999 E Street NW., Washington, DC 20239, (202) 376–4320.

**SUPPLEMENTARY INFORMATION:**

## I. Background

The GSA establishes, for the first time, a Federal system for regulation of brokers and dealers who transact business exclusively in government securities, or a government securities business combined with business in non-security financial instruments, exempted securities and/or futures and other commodity interests regulated by the Commodity Futures Trading Commission ("CFTC"). The Secretary is to adopt rules and regulations concerning the financial responsibility, protection of investor securities and balances, recordkeeping, reporting and audit of government securities brokers and dealers.[1] Previously unregulated government securities brokers and dealers must also register with the SEC and join a self-regulatory organization.[2]

Enforcement of the Secretary's regulations with respect to newly registered government securities brokers and dealers will be carried out by the SEC and the appropriate self-regulatory organizations.[3] The GSA also provides for regulation of all other brokers and dealers in government securities, all of whom must, by July 25, 1987, notify their principal regulatory agency of their status as government securities brokers or dealers.[4] Enforcement of the regulations for such entities will be carried out by the appropriate regulatory agencies.[5]

The purpose of such registration and regulation is to enhance the protection of investors in government securities by establishing and enforcing appropriate financial responsibility and custodial standards for government securities brokers and dealers. At the same time, the standards must respect and protect the integrity, liquidity and efficiency of the world's largest securities market, which is vital to the effective implementation of fiscal and monetary

---

[1] Section 15C(b) of the Securities Exchange Act of 1934 [15 U.S.C. 78o–5(b)]. All citations to the Securities Exchange Act (hereinafter the "Act") will refer to the section of the Act followed by the parallel citation to the United States Code in brackets. Title I of the GSA, which provides for regulation of government securities brokers and dealers, amends the Act, in part by adding section 15C.

[2] Section 15C(a)(1)(A), (c) [15 U.S.C. 78o–5(a)(1)(A), (c)]. Currently unregulated entities that believe they are government securities brokers or dealers are urged to contact the appropriate self-regulatory organization, in most cases the National Association of Securities Dealers ("NASD"), for membership information as soon as possible. The NASD has informed the Department that it will make every effort to expedite membership processing before the July 25, 1987 deadline, but because of the number and complexity of pending and anticipated applications, it is essential that all potential registrants who have not already filed applications do so immediately. Currently unregulated persons (including subsidiaries and affiliates of financial institutions) and registered brokers or dealers uncertain of their status as government securities brokers or dealers are urged to contact the Office of the Chief Counsel, Division of Market Regulation, Mail Stop 5–1, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, as soon as possible. Financial institutions uncertain of their status should contact their appropriate regulatory agency or the SEC.

[3] Sections 15C(c)(1), 19(g)(1) [15 U.S.C. 78o–5(c)(1), 78s]. The Act also contains criminal penalties enforced by the Department of Justice. Section 32 [15 U.S.C. 78ff].

[4] Section 15C(a)(1)(B), (b) [15 U.S.C. 78o–5(a)(1)(B), (b)].

[5] Generally, the appropriate regulatory agency for a financial institution is that institution's federal supervisory agency and it is the SEC for all others, including brokers and dealers registered with the SEC under sections 15 or 15B of the Act. Section 3(a)(34)(G) [15 U.S.C. 78c(a)(34)(G)].

policy in the United States.[6] In adopting regulations concerning those entities that are already regulated, such as brokers and dealers registered under sections 15 or 15B of the Securities Exchange Act of 1934 (the "Act") and financial institutions, the Secretary of the Treasury is to take into consideration already existing regulation with a view toward preventing overly burdensome or duplicative regulation.[7]

The temporary regulations constitute the Secretary's second response to these mandates. As required by the GSA, they become effective on May 26, 1987.[8] The Treasury will publish final regulations to take effect on July 25, 1987 by that date. All government securities brokers and dealers must register or give notice by July 25, 1987, and must be in compliance with the regulations that will become final on that date.[9]

The Department recognizes that those affected by the regulations require a degree of certainty so that operations may be brought into compliance with the regulations before July 25. The more than 70 comments the Department received on the proposed regulations were generally favorable but provided extremely useful and in general consistent suggestions for changes in a number of areas, to which the Department has responded in these temporary regulations. Therefore, although comments on the temporary regulations are invited, it is the intention of the Department to change the temporary regulations in the final regulations only in response to comments demonstrating serious and widespread operational difficulties in implementing the temporary regulations. On the other hand, development of the regulatory scheme is a continuing process, and the Department invites comments and suggestions for future changes or modifications to the regulations.

### *Consultation and Comments*

As discussed in the preamble to the proposed regulations, in developing that proposal the Department consulted extensively with other Federal regulators, affected parties, and trade and professional associations. During the period since publication of the proposed regulations, that process has continued. In addition, representatives of the Department have participated in a number of conferences and seminars to discuss the proposed regulations, and have met with representatives of the North American Association of Securities Administrators.

The Department received over 70 written comments from 65 entities in response to the proposed regulations. Among the commenters were two government agencies, four self-regulatory organizations, 21 of the 40 primary dealers, seven other dealers (or their representatives), four brokers, eleven other banks and two futures commission merchants ("FCMs"). The Department also received comments from eleven trade or professional associations including the Public Securities Association, the Securities Industry Association, the American Bankers Association, the Bank Capital Markets Association (formerly Dealer Bank Association), the Credit Union National Association, the United States League of Savings Institutions, the Government Finance Officers Association and the American Institute of Certified Public Accountants.

In general the comments were supportive of the approach taken in the regulations. The comments generally supported the decision to adopt by reference many of the applicable regulations of the SEC, with which the industry is familiar, although many of those commenting on this issue emphasized the need for continuous formal and informal coordination between the Treasury and the SEC to assure consistency in interpretation of the regulations. Many of the comments pointed out areas where clarification was needed, and there was also a general concern that delayed effective dates were needed in several of the areas where the regulations would require substantial operational changes. The major areas in which commenters requested significant changes to the proposed regulations were (i) the financial institution dealer exemption (§ 401.4); (ii) whether a choice of capital regulations was appropriate (Part 402); and (iii) the treatment of hold in custody repurchase agreements, particularly with respect to intra-day segregation of securities and prior notification of substitutions. Each of these areas, as well as other comments and the Department's response, is discussed in the appropriate part of the following section-by-section analysis of the temporary regulations.

A number of the comments requested that the Treasury exercise its exemptive authority to delay the statutory deadline for registration, and either in concert or in the alternative, to recommend that the SEC grant temporary exemptions from the requirement that new registrants become members of a self-regulatory organization. Other comments requested a moratorium on enforcement (i.e., no penalties for good faith attempts at compliance) for a limited period after the regulations become fully effective.

The Department believes that it is unnecessary and inappropriate at this time to provide for a delay in registration. The GSA was enacted after eighteen months of Congressional debate, during which it was unchallenged that it was necessary that, as soon as possible, all brokers and dealers in government securities become known to the federal government and subject to federal oversight.[10] Congress therefore established the tight schedule for regulations and set an explicit date in the statute for registration.[11] In recognition of some of the operational difficulties arising out of the proposed regulatory scheme, and the fact that final regulations will not be effective until the date set for registration, the temporary regulations include delayed effective dates for many provisions. As a result, it will not be necessary for firms to demonstrate compliance with,

---

[6] Government Securities Act of 1986, Pub. L. 99-571, section 1, 100 Stat. 3208 (1986) (hereinafter cited as *GSA*).

[7] Section 15C(b)(3)(C) [15 U.S.C. 78o-5(b)(3)(C)]; 132 Cong. Rec. H9251 (Oct. 6, 1986).

[8] The requirement that the temporary regulations become effective immediately results from the confluence of the statutory requirements of section 402 of the GSA, mandating the date on which the rules are to take effect, and of the Administrative Procedure Act to receive and take into account comments on the proposed regulations published February 25, 1987. See 5 U.S.C. 553(b), (c). The Department notes, however, that since section 401 of the GSA provides that the statutory requirements of the GSA do not become effective until July 25, 1987, as a practical matter the temporary rules will be effective only to allow the completion of registration procedures until they are superseded by the final rules on July 25. Moreover, the effective date of a number of the most difficult requirements in the temporary rules is delayed beyond July 25. The Department therefore finds that there is good cause to provide for immediate effectiveness of the temporary rules. 5 U.S.C. 553(d)(3).

[9] *GSA, supra* note 6, section 402. Because of the difficulties of achieving compliance with several of the regulations in the maximum of 15 days that will be available between May 26 and June 10, 1987, the date on which entities must file registration applications with the SEC in order to assure registration before July 25, several of the regulations, in particular the market risk ("haircut") calculations of Part 402 relating to financial responsibility, and related possession or control, reporting and audit rules, will not become fully effective until the end of October 1987. In addition, the regulations in Part 403 relating to hold in custody repurchase agreements take effect in stages and become fully effective on January 31, 1988.

Previously unregulated government securities brokers and dealers are reminded that, in addition to the regulations to be promulgated under the GSA, they are subject to the provisions of sections 10(b), 15(c)(1), 17(f)(1) and 17(f)(2) of the Act and the regulations promulgated by the SEC thereunder.

[10] See H.R. Rep. No. 99-258, 99th Cong., 1st Sess. at 15 (1985); S. Rep. No. 99-426, 99th Cong., 2d Sess. at 10 & n.28 (1986).

[11] *GSA, supra* note 6, Title IV.

for example, the ultimate possession or control rules, in order to register. On the other hand, firms will be required to gather and submit the required information about the firm and associated persons, as well as to have the required minimum dollar amounts of liquid capital and to establish an audit relationship with an independent public accountant. These are not unreasonable requirements within the statutory time frame.[12]

The Department has been and will continue to be in continuous contact with both the SEC and the NASD, both of which have assured the Department of their intention to act reasonably with respect to both registration and enforcement to assure that the purposes of the GSA are achieved without unnecessary disruption in the market.

## II. Section-by-Section Analysis of Proposed Regulations

### *A. Part 400. Rules of General Application*

1. *Section 400.1.* This section notes the requirements of the Act, as amended by the GSA, for regulation, registration and notice of status. It cross-references the SEC and Federal Reserve regulations and forms providing for registration and notice.

2. *Section 400.2.* This section specifies the Office of the Deputy Assistant Secretary (Federal Finance) as the office within Treasury responsible for the regulations, and discusses interpretations of the regulations.

A number of the major comment letters specifically requested that the Treasury establish by May 26, 1987 an office empowered to give definitive interpretations of the regulations and to grant exemptions. Additional letters emphasized the need for coordination between Treasury and the SEC in light of the adoption by reference but with modifications of SEC regulations, as well as for rules of precedence in the case of conflict.

The temporary regulations amend the proposed regulations by adding new paragraphs (c) and (d) to § 400.2 to deal with official interpretations. Paragraph (c) establishes the procedures under which the Department will provide exemptions, classifications and formal advice. These procedures are effective starting May 26, 1987. The Department has consulted with the SEC and the other appropriate regulatory agencies, and the regulation reflects the Department's understanding that the Department's interpretations will be given deference by those agencies. The procedures, which generally follow SEC procedures for no action letters with modifications appropriate to the non-collegial structure of the Treasury, require a written request from an affected party, with full description of the relevant facts, a clear and concise statement of the request, a proposed response and analysis of why the proposed response is appropriate.[13] Consistent with the SEC's policy on no action letters, the regulations provide that such requests and their responses will be made public 30 days after the response, but provide for a potential delay of an additional 90 days.[14] Paragraph (c) also provides that the Department will give informal oral and written advice. However, because of the extremely informal nature of such advice, including the lack of full information, such advice is not binding on the Department or any other agency.

The temporary regulations provide that the Office of the Deputy Assistant Secretary (Federal Finance) is the office responsible for interpretations and exemptions. However, it is the intention of the Department to transfer this function to the Office of the Commissioner, Bureau of the Public Debt when the final regulations become effective in July.

Paragraph (d) deals with the question of the effect of SEC interpretations. SEC interpretations of statutes and regulations arise through formal releases adopted by the Commission and, more commonly, through advice from the staff that is not binding on the Commission.[15] Therefore, paragraph (d) simply states that the effect of an SEC interpretation of an SEC regulation adopted by the Treasury by reference is the same as if the SEC regulation were considered in isolation. If Treasury issues a contradictory binding interpretation as provided in paragraph (c), the Treasury expects that the SEC will give that interpretation deference in subsequent no-action positions and with respect to the continued validity of previous no-action positions. Treasury intends to work closely with the SEC to minimize situations of this sort. As stated in the preamble to the proposed regulations, the Department "intends to enable newly registered entities to rely on SEC interpretations of the rules."[16] The Department recognizes the need for constant coordination, not only with the SEC but also with the appropriate regulatory agencies and the self-regulatory organizations. To date the Treasury has found a generous willingness on the part of those agencies to operate in a cooperative manner, and the Department expects that to continue.

3. *Section 400.3.* This section provides definitions for the purpose of these regulations. Nine comments were received concerning the definition of "associated person," at § 400.4(e)(1) in the proposed regulations, but moved to § 400.3(c) in the temporary regulations. The comments from banks and bank trade associations asserted that the definition in the proposed regulation was overbroad primarily in two areas: (i) It covered trust personnel, whose activities in a non-dealer bank would not require registration and who are already well regulated; and (ii) in contrast to Rule D–11 of the Municipal Securities Rulemaking Board and Appendix C of the NASD Rules of Fair Practice, there was no exemption for employees whose functions were solely clerical or ministerial. In connection with the second issue, the commenters requested clarification of the status of branch bank personnel who provide customers with the terms and conditions of, and accept customer funds for, investment in government securities, and asserted that these people should not be covered. The NASD requested that the definition of associated person, which in the proposed regulations applied only to financial institution personnel, be expanded to cover other government securities brokers and dealers. Several commenters also requested that the definition of "fiduciary capacity" in § 450.2(d) of the proposed regulations also be made applicable to Subchapter A, particularly since the term is used in the financial institution dealer exemption in § 401.4.

New paragraph (c) defines "associated person" for all government securities brokers and dealers. The definition provides an explicit exception for persons whose functions are solely clerical or ministerial. For financial institutions, three additional exceptions are provided: (i) For those who function solely in a fiduciary capacity; (ii) for those whose only government securities activities are to act as non-discretionary order-takers, without giving investment advice or receiving transaction-based compensation, and (iii) for directors and

---

[12] The Department has, however, provided for a delay to October 31, 1987 for registration of FCMs because of the continuing uncertainty over their status, combined with the existing scheme of federal regulation to which they are subject. See § 401.8, and the section-by-section analysis related thereto.

[13] See Exchange Act Release 34-9005, 36 FR 2600 (Jan. 25, 1971), 6 CCH Fed. Sec. L. Rep. ¶ 80461.10.

[14] See 17 CFR 200.81.

[15] See 17 CFR 202.1(d); Securities Act Release 33-6253, 1 CCH Fed. Sec. L. Rep. ¶ 134A.

[16] 52 FR 5661 (February 25, 1987).

senior officers who set broad policy guidelines for the firm as a whole.

New paragraph (d) defines "Board" to mean the Board of Governors of the Federal Reserve System. New paragraph (e) defines "branch or agency of a foreign bank" to mean Federal or State branches or agencies, as those terms are used in the International Banking Act of 1978. New paragraph (f) defines "CFTC" to mean the Commodity Futures Trading Commission. New paragraph (i) incorporates the definition of "fiduciary capacity" from Part 450 into the Subchapter A regulations, for use in, among other places, the definition of "associated person" and the financial institution dealer exemption, § 401.4. Former paragraph (l) (now paragraph (q)) has been amended to provide explicitly that the term "Treasury" or "Department" includes the Bureau of the Public Debt.

4. *Section 400.4.* This section deals with the filing of information by associated persons of financial institutions in order to determine the possibility of statutory disqualifications. In addition to the comments on "associated person" discussed above, the Department received one comment asserting that if an associated person of a financial institution ceases to be such but remains employed by the financial institution, the financial institution should have the option to maintain and update that person's Form G–FIN–4 rather than being required to file a Form G–FIN–5.

New paragraph (d)(2)(ii) provides a financial institution with the option to maintain and update a Form G–FIN–4 for an associated person whose functions change but who remains employed by the financial institution in lieu of filing a Form G–FIN–5. This should facilitate the movement of personnel within the financial institution with no loss of information to the regulatory system. Once the associated person ceases employment with the financial institution, a Form G–FIN–5 must be filed within 30 days.

The Department expects that the self-regulatory organizations will amend their rules to require associated persons of registered government securities brokers and dealers (as well as such persons who are affiliated with government securities brokers and dealers that are registered broker-dealers but who have not previously been required to file a Form U–4) to provide, through filing of a Form U–4 or otherwise, the necessary information to determine whether any statutory disqualifications might apply.

5. *Sections 400.5 and 400.6.* No comments were received in connection with these sections, which deal with updating information and notices of withdrawal from government securities broker or dealer status of a financial institution. These sections as proposed are therefore adopted as the temporary regulations.

*B. Part 401. Exemptions*

Section 15C(a)(4) of the Act authorizes the Secretary to exempt any government securities broker, government securities dealer or class of such brokers and dealers from any provision of section 15C (a), (b) and (d) of the Act or the regulations issued under those subsections. Any exemption must be consistent with the public interest, the protection of investors, and the purposes of the GSA.

The proposed regulations contained an exemption from all relevant portions of the Act and regulations for entities engaged in Savings Bond transactions, and four additional exemptions for depository or financial institutions and corporate credit unions performing limited activities that could be deemed to make them government securities brokers or dealers.[17] The Department received a number of comments on the exemptions proposed, mainly asking for clarification of a number of points in §§ 401.3, 401.4 and 401.5, respectively the exemptions for brokerage activities of financial institutions, dealer activities of financial institutions, and repurchase and reverse repurchase transactions of corporate credit unions with other credit unions.

In addition, a number of comments requested exemptions from registration and all other requirements for CFTC-registered entities, small arbitrageurs, brokers of repurchase transactions, and government securities brokers and dealers winding down their business. In general, these requests for total exemption were coupled with requests for accommodations under specific regulations, particularly the capital rules.

1. *Section 401.1.* Section 401.1 of the proposed rules provided an exemption from the provisions of the GSA and regulations thereunder for those organizations whose government securities transactions are limited to savings bond transactions and any other activity as provided in Part 401. Two comments concerning this exemption were received, both supportive.

As stated when this rule was proposed, thousands of organizations handle transactions in United States Savings Bonds ("savings bonds"). The Department determined that these organizations should be exempt because savings bonds offer terms and conditions that protect investors from risk.

Additionally, the organizations that handle most of these transactions have been qualified by the Department to act as savings bond issuing and paying agents pursuant to 31 CFR Parts 317 and 321 and are governed by those regulations. The remaining organizations that handle savings bond transactions do so as an accommodation to customers and employees and must forward requested savings bond transactions to qualified issuing and paying agents or the Department. Therefore § 401.1 as proposed is adopted as the temporary rule.

2. *Section 401.2.* Section 401.2 of the proposed rules provided an exemption for depository institutions whose government securities transactions are limited to submitting tenders on a fully disclosed basis for customers for the purchase on original issue of United States Treasury securities. While the comments received supported the exemption, two comments requested that the exemption be expanded.

One comment requested that the activity of submitting tenders by any depository institution government securities broker or dealer be exempt from any of the provisions of the rules. The problem raised by the commenter appears to relate to the status of those acting as "order takers" for such transactions as "associated persons," and the revised definition of "associated person" in § 400.3(c) of the temporary regulations should resolve the difficulty.

A second comment requested that the exemption be expanded to include issues of securities by government sponsored agencies. The process by which sponsored agency securities are sold on original issue differs from the process by which Treasury securities are sold on original issue. On original issue of Treasury securities, depository institutions submit tenders for securities directly to the Treasury or to its fiscal agent, the Federal Reserve System, neither of which compensates the depository institution. Sponsored agency securities, on the other hand, are marketed through selling groups that actively promote their sale and earn fees paid by the sponsored agency issuer in connection with their sale. Sales on original issue of agency securities therefore resemble traditional underwritings rather than the incidental customer accommodation transactions

[17] The exemptions for depository institutions were conditioned upon those organizations' agreement to comply with the custody requirements of Part 450 of the regulations.

encompassed by the proposed rule, and the Department therefore believes that expansion of the exemption would be inappropriate. Financial institutions that effect limited numbers of brokerage transactions in sponsored agency securities as an accommodation to customers may be exempt from the GSA and regulations thereunder under § 401.3.

The wording of paragraph (b) requiring that an entity taking advantage of this exemption comply with the regulations in Part 450 concerning custodial holdings of customer securities, has been revised. The previous language required a financial institution to "agree" to comply with Part 450, raising such questions as with whom the institution would agree and what the effect of such agreement would be. The revised wording states simply that a depository institution relying on the exemption is subject to Part 450. Parallel changes have been made in the exemptions contained in §§ 401.3, 401.4 and 401.5.

3. *Section 401.3.* In the proposed regulations, this section provided an exemption for financial institutions (including federal credit unions) that did not hold themselves out as government securities brokers or engaged in fewer than 500 solicited government securities brokerage transactions per year or performed such transactions through a networking arrangement with a government securities broker or dealer required to be registered or give notice pursuant to section 15C(a)(1) of the Act.

The Department received five comments from banks and bank trade associations that were generally supportive but requested clarification that (i) if a financial institution does not actively solicit brokerage transactions, it is not limited by the 500 transaction limitation; (ii) inclusion of this service on a summary list of services available to customers and providing it on customer request constitutes neither "active solicitation" nor "holding out"; (iii) a financial institution's purchase or sale of a government security in a brokerage transaction on the order of a customer is a single transaction even though the financial institution must initially take delivery of the security before transferring it to the customer; (iv) the 500 transaction limitation applies to each member of a holding company group; (v) the 500 transaction limit can include networking transactions but does not include other exempt transactions; and (vi) the financial institution may network with more than one government securities broker or dealer. One comment also requested that the rule be changed to provide that disclosure for the purpose of the networking exemption requires only that the customer know the name of the transacting government securities broker or dealer and not that the broker or dealer know the name of the customer.

The Department also received a request to raise the transaction limit to 1000, a request to lower it to 50, two requests to extend it to federally insured and/or state chartered non-federally insured credit unions, and a request to extend it to registered broker-dealers.

Minor adjustments have been made in § 401.3(a)(2) to clarify the intention of the scope of the exemption. First, the words "Notwithstanding the provisions of paragraph (a)(1) of this section" have been added to the start of the paragraph to make clear that if a financial institution does not hold itself out as a government securities broker or actively solicit brokerage transactions, it is not limited by the 500 transaction or networking limitations. The Department suggests, however, that even though inclusion of brokerage services on a summary list of services available to customers would not be considered "holding out," any financial institution that performs substantially more than 500 such transactions per year may wish to analyze carefully whether it is in fact actively soliciting such transactions.

Second, paragraph (a)(2)(ii), concerning networking, has been revised to make clear that a financial institution may network with more than one government securities broker or dealer. The Department intends that the 500 transaction limitation apply to each corporate entity within a holding company group and that the networking exemption may be used by members of such a group to network with another member that is a government securities broker or dealer that has registered or given notice under section 15C(a)(1) of the Act. Any networking transactions count against the 500 transaction limitation, but transactions exempt under §§ 401.1 and 401.2 do not.

Paragraph (a)(2)(ii)(D), concerning disclosure, has been retained but rewritten for clarity. Disclosure of customer names to the transacting broker or dealer is essential if that broker or dealer is properly to take responsibility for the customer and to meet his own responsibilities concerning, for example, limitations on exposures to single customers.

The characterization of a transaction as a brokerage transaction rather than a dealer transaction can be difficult, particularly in a book entry environment where all customer securities must be held on the books of another entity, often one from, to or through whom the customer has purchased or sold the security. Two major characteristics of a brokerage transaction are that the transacting broker purchases or sells a security on the order of the customer, not from or to its own inventory, and that the customer is charged an explicit transaction-based fee or commission. It should be noted that the counterparty of the transacting broker need not and indeed usually does not know that the transaction is a brokerage rather than a dealer transaction except perhaps by the size of the order.

Therefore, a purchase by a transacting broker for the account of a customer with an essentially contemporaneous transfer of the security to the account of the customer is a single transaction. By the same token, since fiduciary transactions are undertaken not on the order of a customer but rather by a financial institution in its fiduciary role, such transactions are not in general brokerage transactions, but rather reflect the financial institution acting as an investor. Based on these clarifications, the 500 transaction limitation is an appropriate line of demarcation between accommodating customers and being in the brokerage business.

The Department has also concluded that the exemption should be broadened to include federally insured credit unions (including federally insured corporate credit unions), which are subject to the examination authority of the National Credit Union Administration ("NCUA"). A major tenet of the GSA is the recognition of the special importance of federal regulation of entities that are transacting business in government securities.[18] The Department notes that § 401.3 is essentially a safe harbor provision. Any credit union following the requirements of NCUA Interpretive Ruling and Policy Statement 85-1 (November 15, 1985), concerning self-directed IRA accounts, would not be considered a government securities broker in any event. The Department has decided not to extend the exemption to registered broker-dealers, both because of the difficulty of applying it in the context of a general securities business and because of the minimal burden the regulations place on such entities. In addition, for reasons described in the discussion of new § 401.6 below, the Department has

[18] See, for example, H.R. Rep. No. 99-358, 99th Cong., 1st Sess. at 13-15 (1985); 132 Cong. Rec. S15795 (Oct. 9, 1986, remarks of Senator D'Amato).

deleted branches and agencies of foreign banks from the class of financial institutions to which this exemption is available.

4. *Section 401.4.* In the proposed regulations, this section provided an exemption for financial institutions whose only government securities dealer activities were activities in a fiduciary capacity, sales and subsequent repurchases pursuant to a repurchase agreement, and up to 500 purchases and subsequent resales pursuant to a reverse repurchase agreement per year. The exemption was conditioned on an agreement to comply with the custody rules of Part 450 of the proposed regulations, and was not available to financial institutions that engaged in other traditional dealer activities.

The Department received ten comments on this section. Most of the comments requested clarification of a number of issues concerning how to count reverse repurchase transactions for the purposes of determining compliance with the 500 transaction annual limitation. Five comments, including comments from the American Bankers Association and the Bank Capital Markets Association, requested an explicit exemption for transactions by a financial institution for its own account as an investor. In addition, the NCUA, Credit Union National Association and the Missouri Credit Union League all requested that the exemption be made applicable to some or all credit unions. Finally, the NASD requested that the reverse repurchase limitation be lowered to 50 and made applicable to registered broker-dealers.

In the preamble to the proposed regulations, the Department noted that as part of the regular business of being a bank or a thrift institution, almost all financial institutions engage in a variety of activities that could, under traditional interpretations of the term "dealer" under the Act, cause them to be regarded as government securities dealers. The Department noted that since the financial institutions eligible for the exemption were all subject to federal supervision and to the custody rules of Part 450, it was neither necessary for investor protection nor within the intent of Congress to subject all financial institutions to regulation as government securities dealers. However, the Department was concerned that financial institutions that truly were acting as government securities dealers be regulated as such. The proposed regulations attempted to achieve this result through the limitation on reverse repurchase transactions.

The comments and further discussion with the federal financial institution supervisory agencies have raised significant issues concerning both the need for and efficacy of the reverse repurchase limitation. For example, loans by a bank that are secured by government securities, a normal banking activity, are the financial equivalent of reverse repurchase agreement transactions. There are also definitional issues, such as the treatment of reverse repurchase agreements with government securities dealers and the treatment of "good until canceled" repurchase agreements.

The temporary regulations therefore delete the 500 transaction limitation on reverse repurchase transactions. However, in recognition of the fact that this would result in allowing non-dealer banks to do unlimited hold-in-custody repurchase transactions with full right of substitution without the protections of § 403.5(d), any entity relying on the exemption must comply with the written agreement and disclosure requirements of § 403.5(d) with respect to hold-in-custody repurchase transactions if it retains the right of substitution. This will also provide consistency in counterparty protection no matter what type of entity a counterparty does a repurchase transaction with—a dealer, a dealer bank or a non-dealer bank.[19]

The FFIEC policy guidelines already urge banks entering into repurchase transactions to do so pursuant to a written agreement. Section 403.5(d) would impose custody and disclosure requirements for repurchase transactions where securities transferred to customers are held by the financial institution outside of its trust or safekeeping functions or where, although the security is transferred to safekeeping, the financial institution retains a right of substitution. Although the regulations of Part 450 will adequately protect securities subject to repurchase agreements when they are in safekeeping, the securities may not be in safekeeping during the trading day if substitution is allowed. Existing financial institution capital rules, as well as the current proposed risk-based capital rules, should discourage financial institutions from using the repurchase and reverse repurchase exemptions to operate matched books for non-banking purposes, as no netting is permitted for purposes of determining capital requirements.

New § 401.4(c) extends the availability of the dealer exemption to federal and federally insured credit unions for the reasons noted under the discussion of the broker exemption. The reserve requirements applicable to natural person federally insured credit unions, like those applicable to commercial banks and thrift institutions, discourage operation of matched books for non-banking purposes. For the reasons discussed in connection with § 401.6, the Department has deleted branches and agencies of foreign banks from the class of financial institutions to which this exemption is available.

The Department has decided not to include an explicit exemption for financial institutions engaging in proprietary trading in government securities. This is an issue that arises for all persons engaging in transactions in government securities. The line between an investor or trader—who would not be required to register or give notice as a government securities dealer—and a dealer is one that has been the subject of a number of SEC staff no-action positions.[20] The SEC staff has taken the position that an entity may be regarded as a trader even if it buys and sells a high volume of government securities on a fairly regular basis, as long as the transactions are done by the entity as principal and not directly or indirectly for or at the request of customers, and the entity does not hold itself out or otherwise act as a dealer. Like other institutions that have concerns about their status as traders or dealers, financial institutions should address their concerns to the Chief Counsel of the SEC's Division of Market Regulation under SEC staff no-action procedures.

The Department wishes to emphasize that the exemption provided in this section is not meant to insulate government securities dealers from regulation as such simply because they are financial institutions. Congress made a considered decision in section 3(a)(44) of the Act (defining

[19] Several comments stated that the Federal Financial Institutions Examining Council ("FFIEC") guidelines on repurchase agreements, when coupled with the proposed regulations, appeared to place an uneven burden on dealer banks and non-dealer banks who did the same repurchase transactions with customers. See Office of the Comptroller of the Currency BC 210, October 31, 1985; Federal Deposit Insurance Corporation, BL-43-85, November 1, 1985; 50 FR 46704 [December 4, 1985, Board of Governors of the Federal Reserve System]; 50 FR 44460 [December 6, 1985, Federal Home Loan Bank Board proposed rule]. With the change noted above, this discrepancy is eliminated. The Department notes that the FFIEC guidelines serve different purposes than the requirements of § 403.5(d), such as protection of banks as customers with respect to marking to market, and also that those guidelines apply to all repurchase transactions, not just hold-in-custody transactions.

[20] See, for example, United Savings Association of Texas, SEC No-Action Letter, April 2, 1987; National Council of Savings Institutions, SEC No-Action Letter, June 28, 1986; First National Bank of Allentown, SEC No-Action Letter, April 28, 1982.

"government securities dealer"), unlike section 3(a)(5) (defining "dealer"), to include banks within the definition. Any financial institution that advertises or otherwise holds itself out as a government securities dealer (as for example by holding itself out as being willing to buy and sell particular government securities on a continuous basis), that purchases or sells government securities from or to customers other than pursuant to a repurchase or reverse repurchase agreement, participates in a selling group or underwrites government securities, carries a dealer inventory, or quotes a market in government securities must file notice that it is a government securities dealer pursuant to section 15C(a)(1)(B) of the Act.

5. *Section 401.5.* This section of the proposed regulations provided an exemption for corporate credit unions (including non-federally insured corporate credit unions) whose sole government securities dealer activities are other exempt activities and engaging in repurchase and reverse repurchase transactions with other credit unions. The Department received a comment requesting that the exemption be broadened to include repurchase transactions by a corporate credit union with a government securities dealer.

The Department believes that the requested exemption is unnecessary and may prove confusing. A corporate credit union engaging in a government securities transaction with a government securities broker or dealer, be it a repurchase transaction or an outright purchase or sale, is acting as an investor or customer. As long as the corporate credit union engages only in transactions with government securities brokers or dealers, the repurchase and reverse repurchase transactions described in this section, and other exempt transactions, it would not be considered to be a dealer. The rule has been amended, however, in the manner described in connection with §§ 401.2 and 401.4, to revise paragraph (b) relating to conditions of exemption.

6. *Section 401.6.* The Department received a request from the Institute of Foreign Bankers to exempt branches and agencies of foreign banks [21] that are government securities brokers or dealers from the capital rules of Part 402 and related recordkeeping rules. The comment notes that these branches and agencies are subject to supervision and examination by federal financial institution supervisory agencies, and states that an exemption from the capital rules is warranted because the capital regulations of the home countries of the branches (combined with U.S. supervision and examination) provide adequate protection to investors.

The Department has discussed this request with the federal financial supervisory agencies and has conducted its own investigation. Regulation of foreign banks in the United States follows principles of national treatment, under which foreign banks are accorded "equality of competitive opportunity with domestic institutions in similar circumstances, even if some specific regulations or requirements applied to foreign banks differ from those affecting domestic banks." [22] Based on this principle, the Department has determined that equality of competitive opportunity for domestic banks and branches and agencies of foreign banks requires slightly different regulatory approaches.

First, in recognition that the government securities activities of many branches and agencies are solely for the purpose of serving the needs of foreign governments and other foreign customers, which entities do not expect the protection of the United States securities laws in dealing with a home country bank, new § 401.6 exempts from the Act and all government securities broker or dealer regulations under the Act branches and agencies all of whose customers for government securities transactions are non-United States citizens resident abroad. (These branches and agencies will still be subject to the Part 450 regulations relating to custodial holdings of government securities which are not part of the securities laws and which apply to all depository institutions regardless of their status as government securities brokers or dealers.) An exempt branch or agency would be able to transact business with United States government securities brokers and dealers.

Second, with respect to branches and agencies that engage in government securities transactions with United States customers, the Department is concerned that, unlike domestic banks, these entities are required to have little or no (in the case of agencies) capital in the United States that would be available to United States securities customers in the event of a failure. The Department considered whether imposition of the Part 402 capital requirements would be an appropriate response to this situation and concluded that it was not. Therefore, the Department has adopted the request of the Institute of Foreign Bankers concerning capital and related recordkeeping requirements in Parts 402 and 404. However, as described below, § 403.5 has been amended to provide that a branch or agency of a foreign bank that acts as a non-exempt government securities broker or dealer will be subject to a modified version of the reserve requirement applicable to non-bank brokers and dealers. This requirement is meant to provide a degree of assurance to securities customers to whom the branch or agency owes money that such funds would be available in the United States in the event of a failure.

7. *Section 401.7.* The Department received two comments requesting an exemption from registration for a brief period after July 25, 1987 for government securities brokers and dealers that are being folded into affiliated entities, either registered brokers or dealers or other government securities brokers or dealers, but that have non-assignable open contractual commitments entered into prior to July 25. The Department understands that the major problem arises with respect to forward commitments for mortgage-backed securities.

New § 401.7 provides an exemption from registration and all regulations for the period ending October 31, 1987 for entities that are affiliated with registered brokers or dealers or government securities brokers or dealers that have registered or filed notice under section 15C(a)(1) of the Act, whose sole government securities business consists of meeting contractual obligations entered into prior to July 25, 1987, and who cease to be government securities brokers or dealers on or before October 31, 1987. Because the market risk ("haircut") feature of the financial responsibility rules, as well as related possession or control rules, do not become effective until that date and because the entity would be entering into no new transactions, the major effects of this exemption are to avoid the need for short-term registration and not to place regulatory capital requirements on entities with respect to transactions with counterparties who

[21] Branches and agencies of foreign banks are unincorporated offices of foreign banks. They may be federally or State licensed, and a limited number are insured by the FDIC. Federally licensed branches and agencies are subject to examination by the Office of the Comptroller of the Currency; State-licensed branches and agencies are subject to state oversight with additional examination authority in the Federal Reserve Board.

[22] Department of the Treasury, National Treatment Study (1988 Update), at 1 (1988).

did not rely on such requirements being in place.

The Department notes that the exemption is very limited, and that since dealing with customers in order to provide financing for the open commitments would be prohibited, entities contemplating consolidation may wish to start moving their government securities business into the registered broker or dealer or registering government securities broker or dealer substantially before July 25. Moreover, this exemption is not meant to provide a general three-month delay in the registration requirement; any entity that does not register relying on this exemption and that continues to enter into transactions as a government securities broker or dealer after July 25, 1987, will be in violation of the Act after July 25 as an unregistered government securities broker or dealer.

8. *Section 401.8.* The Department received seven comments concerning the effect of the regulations on CFTC-regulated entities, four of which specifically asked that such entities be exempt from registration and/or other specific requirements in the regulations. Three of the comments came from designated self-regulatory organizations, and one from the Commodity Futures Trading Commission.

The question whether any CFTC-regulated entity should be regulated as a government securities broker or dealer was one that was considered by Congress as the GSA was nearing final passage. Rejecting the request of the futures industry for a complete exemption, Congress provided in sections 3(a)(43)(B) and 3(a)(44)(D) of the Act that CFTC-regulated entities whose government securities business was "incidental" to their futures related business, as determined by the SEC in consultation with the CFTC, would not be considered to be government securities brokers or dealers. As the Senate Committee Report noted, "[i]f it is found [by the SEC] that firms under the CFTC's jurisdiction are acting as government securities dealers, then the regulatory provisions of the bill would apply to their activities." [23]

On February 25, 1987, the SEC published a proposed rule defining the term "incidental" for purposes of sections 3(a)(43)(B) and 3(a)(44)(D) of the Act.[24] The Commission received a number of comments suggesting that the proposed rule was not broad enough to cover fully all incidental transactions. The Department has consulted with the Commission and is confident that, with the benefit of the comments received on its proposed rule, the Commission will be able effectively to distinguish government securities brokers and dealers who happen also to be CFTC-regulated entities from CFTC-regulated entities whose government securities transactions are incidental to their futures related business.

The Department is of the opinion that if Congress had regarded it as proper for the Department to exempt all CFTC-regulated entities from registration, not only would sections 3(a)(43)(B) and 3(a)(44)(D) of the Act have been unnecessary, but the task of defining "incidental" would have been assigned to the Department rather than the Commission. The Department therefore is not providing such an exemption. However, in recognition of the uncertainty that has necessarily been created by the need for the Commission to issue its rule and the fact that CFTC-regulated entities are in fact subject to federal regulation, new § 401.8 of the temporary regulations provides that government securities brokers and dealers that are CFTC-regulated entities not currently the subject of any disciplinary action shall not be required to register and shall be exempt from all GSA regulations until October 31, 1987. The Department expects that this delay will provide an opportunity for the NASD and the National Futures Association and other CFTC designated self-regulatory organizations to develop a set of procedures that will minimize the paperwork and examination burden on entities that must register under the GSA.

Issues concerning capital, segregation and reporting and audit requirements applicable to government securities brokers and dealers that are CFTC-regulated are discussed in the section-by-section analysis of Parts 402, 403 and 405 respectively. The Department has acceded to requests to allow CFTC-regulated entities to compute capital using the methodology of the CFTC and the SEC, rather than the methodology of § 402.2, but is requiring compliance with the Treasury's possession or control rules for the non-futures related portion of such an entity's business.

9. *Other exemption requests.* Five comments were received concerning "small arbitrageurs," four of which asked for an exemption from registration. The entities at issue are described as firms that "carry a substantial inventory and bid and offer securities in order to invest their assets or put on the desired arbitrages," and that do business with both brokers and dealers and large investors. All five comments suggested that, because of several features of the capital requirements, the firms could be put out of business if required to register, thereby harming the liquidity of the market.

As noted in the discussion of offset haircut factors in the analysis of Part 402 below, the Department has determined to lower the offset haircut factors. The Department believes that, as a result, the dire consequences of regulation predicted by the comments are unlikely. Moreover, an exemption from registration would be inappropriate in any event. The purpose of the GSA was to make certain that those who trade government securities with customers are subject to Federal registration, oversight and regulation.[25] The entities harmed by the dealer failures that led to passage of the GSA were not small individuals but institutions controlling large sums of money. To the extent the arbitrageurs are acting solely as traders, they are not dealers and not subject to registration.[26] If they are dealing with customers, however, they must register.

Two entities that broker repurchase transactions also requested registration exemptions. The Department believes that the business of such entities, even if done on a fully-disclosed basis, is brokerage business within the definition of the Act and that such entities should be registered. The Department notes, however, that neither the capital nor the possession or control rules will be particularly burdensome on entities that do business on a fully disclosed basis and do not clear transactions or hold customer securities.

### *C. Part 402. Financial Responsibility*

1. *Section 402.1.* This section provides that certain government securities brokers and dealers are not subject to this part, provides a special capital rule that certain government securities brokers may elect, and states the effective date of the part.

#### Futures Commission Merchants

Several commenters pointed out that futures commission merchants that may be required to register as government securities brokers or dealers are already

---

[24] Securities Exchange Act Release No. 34-24135 (February 25, 1987), 52 FR 6940 (March 3, 1987).

[25] Unlike financial institutions, the arbitrageurs are not subject to any system of federal supervision.

[26] See SEC No-Action Letters cited at note 20 above.

subject to the capital requirements of the Commodity Futures Trading Commission and felt that an additional capital rule was unnecessary. One commenter suggested that futures commission merchants that are also government securities brokers or dealers be required to meet the higher of the CFTC's capital rule (17 CFR 1.17) or the Treasury capital rule (§ 402.2).

The temporary regulations amend the proposed regulations by adding new paragraph (d) stating that the capital rule applicable to a government securities broker or dealer which is also a futures commission merchant subject to the CFTC's capital rule is the higher of the requirement of the CFTC's Rule at 17 CFR 1.17 or the SEC's Rule 15c3–1.[37] Forcing already federally regulated entities to calculate haircuts on government securities two different ways is needlessly burdensome. The SEC and the CFTC impose identical haircuts on positions in government securities, and new paragraph (d) puts the same capital requirement on newly registered government securities brokers and dealers that are also futures commission merchants as applies to currently registered broker-dealer/futures commission merchants.

### Branches and Agencies of Foreign Banks

One commenter requested that branches and agencies of foreign banks be exempt from this part. As discussed above in connection with § 401.6, the Department has acceded to that request.

### Interdealer Brokers

One commenter requested that the definition of "government securities interdealer broker" be broadened to include brokers that provide brokerage services for entities other than dealers. Also, several commenters requested that the definition be changed to allow such brokers to engage in overnight repurchase and reverse repurchase agreements for certain purposes. These commenters suggested in addition that "give-up receivables," "net pair-off receivables," and "money differences" be allowed a grace period before being deducted as unsecured receivables and that a grace period longer than five days be given for fails to deliver of mortgage-backed securities and zero-coupon instruments.

The Department is aware that there are government securities brokers who will not be covered by the definition of government securities interdealer broker because their client base includes non-dealers. Under the temporary regulations such brokers will be subject to § 402.2 rather than § 402.1(e). Neither of these two rules, however, may be entirely appropriate for these brokers. If the definition of brokers eligible to elect § 402.1(e), which incorporates much of SEC Rule 15c3–1, were broadened to include brokers that have non-dealer counterparties, such brokers could find that the definition of aggregate indebtedness would cause them difficulty. The Treasury understands that when a "customer" of a broker, as distinguished from a counterparty who is a dealer or broker, does not deliver a security to the broker on the settlement date, the resulting customer payable is included in aggregate indebtedness.

The Department was reluctant, in the short time available to prepare these temporary regulations, to make alterations to basic SEC concepts or to broaden the definition of government securities interdealer broker without having adequate time to study the implications of such changes. However, the Department is aware of the significant contribution to market liquidity of certain government securities brokers and plans to continue discussing their concerns with them. The Department will consider whether the more appropriate response to these concerns, if some accommodation is necessary, is a change in the rule or exemptions from certain requirements of the rule on a case-by-case basis.

A significant change in the government securities interdealer broker rule from the version in the proposed rule is the introduction of a counterparty exposure haircut. This haircut, which is the same as the one now in § 402.2 (discussed below), results in a five percent deduction for a government securities interdealer broker's exposure to counterparties. This net exposure does not include the deductions taken from net worth for unsecured receivables, repurchase and reverse repurchase agreement deficits, aged fails to deliver, and aged fails to receive. The net exposure to different counterparties may not be netted against each other.

An example of net exposure is a broker fail to deliver outstanding for less than five days. If the price of the underlying security has dropped below the contract price, the difference in the two prices is the exposure. The Department believes that the greatest exposure of government securities interdealer brokers is during the when-issued period for Treasury securities and believes that this five percent haircut will serve to encourage brokers to monitor more carefully what their counterparties are doing. While Treasury does not want to contract the when-issued market, government securities interdealer brokers should be encouraged to monitor risk. The counterparty exposure haircut should thus serve to reduce the risks inherent in the type of blind brokering engaged in by the government securities interdealer brokers and will ensure that these brokers have some capital to serve as a cushion in case of unexpected developments.

The temporary regulations allow a grace period of one business day for government securities interdealer brokers for net pair-off receivables and money differences. A pair-off is the offsetting with the same counterparty of contracts for identical par amounts of the same security, and a net pair-off receivable is the amount owed by the counterparty after taking into account all pair-offs. Since pair-offs reduce the number of transfers of securities, including transfers over the book-entry system for Treasury and other government securities, and since exposure while a net pair-off receivable is outstanding is similar to exposure due to fails, a one-day grace period seemed reasonable to grant government securities interdealer brokers. The Department's understanding is that many of the firms likely to qualify as government securities interdealer brokers do substantial pairing off of government securities transactions. The Department understands that the NASD will modify its interpretation concerning the required bookkeeping with respect to pair-offs in light of the substantial volume of pair-offs done by government securities brokers. The Department also deemed it reasonable to grant the same treatment for money differences, which arise from various types of errors.

A 30-day grace period from the billing date for give-up receivables is also granted to government securities interdealer brokers in these temporary regulations. The billing date may not be later than the last day of the month in which the transaction in question arose. Give-up receivables arise from the practice of brokers of giving up the names of parties to a trade in mortgage-backed securities after a certain amount of time has elapsed. The principals settle the trade with each other and the broker bills the principals for its commission. This commission is the "give-up receivable." Since the SEC grants 30 days for commissions receivable from other brokers or dealers before requiring a deduction from net worth, it seemed reasonable that government securities interdealer brokers also have 30 days. The distinction, due to the nature of the

[37] 17 CFR § 240.15c3–1.

transaction, in that while under the SEC rule, the 30-day period commences on the date on which the receivable arose, the temporary regulations begin the period from the billing date, since the broker has no part in the transfer of the funds or the securities in connection with the transaction.

Since the SEC only grants five days grace for fails to deliver on mortgage-backed securities and zero-coupon instruments based on Treasury securities, it was not deemed appropriate to grant a longer grace period in this rule. If a longer grace period is needed for these instruments, the Department believes that this should be granted all brokers and dealers at the same time and hence such action should be taken in coordination with the SEC.

Changes were made in the definition of government securities interdealer broker in order to describe better their activities and to permit them to engage in repurchase and reverse repurchase transactions in limited circumstances. The Treasury plans to review the capital rule for government securities interdealer brokers at a later date in light of possible changes in the business of these entities and in order to ascertain whether a rule based on a volume to capital ratio test might be more appropriate.[28]

Paragraph (f) concerning exemptions has been deleted as redundant with § 400.2.

### Effective Date

Several commenters suggested that the Treasury rule exempt from the haircut calculations positions entered into before the effective date of the rule. The Department has decided not to follow that suggestion. It is felt that the changes in the offset haircut factors, discussed below, will mitigate some of the concerns of arbitrage houses that are government securities brokers or dealers, that there is sufficient time to adjust positions in order to be in compliance with the rule, and that "grandfather" provisions add an extra, and unnecessary, layer of complexity to the capital rule and its enforcement.

The effective date of the capital rule, except for certain minimum liquid capital requirements effective July 25, 1987, has been changed from October 25, 1987 to the last business day in October 1987.

2. *Sections 402.2 and 402.2a.* Section 402.2 is the capital rule for government securities brokers and dealers, and § 402.2a (Appendix A) is the detailed description of the calculation of the market risk haircut.

### Option To Use SEC Capital Rule

Several commenters advocated that a choice be allowed between this capital rule and SEC Rule 15c3–1. The Department considers this rule more appropriate to firms specializing in government securities both because of the ratio requirements and the risk measurement principles.

The Treasury haircut methodology provides a more accurate system for recognizing the reduced risk of hedged positions than the SEC methodology, which in some cases is more generous and in other cases less generous than the Treasury rule. Also, the inclusion of financings, mainly repurchase and reverse repurchase agreements, in the total haircut calculation in the temporary rule is a recognition of the importance of a major financing technique in the market and a recognition that term repurchase and reverse repurchase agreements can serve to offset the risk in the position being financed.

Linking capital requirements to aggregate indebtedness or aggregate debit items as computed in accordance with the Formula for Determination of Reserve Requirements for Brokers and Dealers (Exhibit A to SEC Rule 15c3–3)[29] may not be appropriate in all cases for specialized firms. The activities of government securities brokers and dealers may generate very little aggregated indebtedness or aggregate debit items. Consequently, the Department believes that the direct link between liquid capital and measured risk of the Treasury rule serves better to focus a government securities broker's or dealer's attention on the amount of liquid capital needed in order to undertake prudentially a given level of risk.

Since many SEC concepts are incorporated in this rule, the major innovation and element of complexity is the haircut calculation. However, the haircut calculation is in fact simpler than it appears on the surface, and it is relatively simple to write a computer program to calculate the numbers. In fact, most of the complexity once that is done is the same as with the SEC Rule and revolves around definitional issues. There seems no way around this problem for a financial responsibility rule that is meant to apply to a complex and fast changing business.

Some commenters emphasized that there should be a goal of having a uniform capital rule for all brokers and dealers. The Department agrees with that goal and intends to work with other government agencies and market participants towards that end.

### Definition of Liquid Capital

Three additional modifications, not in the proposed rule, have been made to SEC net capital in order to arrive at liquid capital. The temporary rule clarifies that the deduction for securities that are Treasury market risk instruments that are not delivered to "customers" 5 days after the settlement date is based on the appropriate haircut factors of § 402.2(f)(2). The same provision made for government securities interdealer brokers regarding net pair-off receivables, give-up receivables and money differences is granted here. The Department intends, for this purpose, to make no distinction between dealers and customers. Also, as discussed below, the treatment of unlisted options that are Treasury market risk instruments has been modified.

### "Excess" Margin on Reverse Repurchase Agreements

In response to the specific question concerning whether "excess" margin on reverse repurchase agreements is better treated in the financial responsibility rule or in the possession and control rules, no commenter favored capturing excess margin in the Reserve Formula of

---

[28] The Department received one comment from a large non-primary dealer requesting that the Department require open trading access to interdealer brokers in its regulations. Section 101 of the GSA requires the General Accounting Office (GAO) to study and report to Congress on this issue.

The Department has concluded that Treasury does not have the authority to require open access. In mandating the study, the House Banking Committee stated that "the issues relating to blind brokering are complex. Therefore, on the basis of the existing record, a final resolution of this issue is premature." H. Rep. No. 99 296, 99th Cong., 1st Sess. at 36 (1985). It is highly unlikely that Congress nevertheless intended to give the Department the authority to resolve the issue. Moreover, the extent of the Department's rulemaking authority under the GSA is limited, and is restricted to the items listed in section 15C(b)(1) of the Act, none of which in any way suggests the authority to require any government securities broker to trade with any given party or group of parties. Section 15C(b)(2), cited by the commenter as providing such authority, is "not intended, however, either to expand or to limit the scope of the Secretary's rulemaking authority under the bill." 132 Cong. Rec. S15796 (Oct. 9, 1986, remarks of Senator D Amato).

[29] 17 CFR 240.15c3–3a. Under SEC rules, aggregated indebtedness may not be greater than 15 times the amount of "net capital," the determination of which includes all securities haircuts and other deductions. For broker-dealers electing the alternative net capital requirement of Rule 15c3–1, net capital must be the greater of $100,000 or 2 percent of aggregate debit items in the Reserve Formula. Electing the alternative has the effect of increasing the amount of funds a broker-dealer is required to maintain in a "Special Reserve Account for the Exclusive Benefit of Customer."

SEC Rule 15c3–3.[30] The Department posed the question because, in general, the financial responsibility rules treat risk that the dealer or broker bears, including exposure to others, while risk that customers are exposed to is dealt with in the possession and control rules. Incorporating excess margin on reverse repurchase agreements in the capital rules, such margin being the dealer's counterparty's, not the dealer's, exposure, is a departure from this normal distinction. However, the Department appreciates that market participants do not wish this particular element of risk to counterparties to be included in the Reserve Formula. As these temporary rules are being prepared, the SEC is preparing to issue its rule on this subject. After the Department has a chance to study the SEC rule regarding excess margin on reverse repurchase agreements, it will decide whether some variant of the rule should be incorporated in Treasury,s capital rule.

Repurchase Agreement and Reverse Repurchase Agreement Deficits

Because § 402.2 starts with a calculation of net capital as defined in Rule 15c3–1(c)(2), SEC charges for repurchase agreement and reverse repurchase agreement deficits will be picked up by this rule. The Department understands that the SEC will be giving a grace period for margin calls, as two commenters to Treasury's proposed regulations mentioned should be done. The Department hence plans to allow the SEC changes to affect government securities brokers and dealers subject to the Treasury rule. Treasury plans, when the SEC promulgates its rule, to clarify that tests involving repurchase agreement deficits and tentative net capital should be made with respect to a preliminary determination of liquid capital for those subject to the Treasury capital rule.

Fails To Deliver on Mortgage-Backed Securities

The Department has decided not to grant a longer grace period than the SEC allows for fails to deliver on mortgage-backed securities. The Department believes that such action should be undertaken in coordination with the SEC in order to assure comparable treatment for those covered by the Treasury capital rule and the SEC capital rule.

Unlisted Options

It was pointed out by several commenters that the treatment of unlisted options in the proposed rule contained a double charge. Since the proposed rule incorporated SEC Rule 15c3–1(c)(2)(i)(B) (*1*) and (*2*),[31] the time value of an unlisted option was disallowed in determining net worth. For a long position in an unlisted option, this meant that there was in effect a deduction of the time value of an unlisted option in determining liquid capital and in addition a haircut, which could be the market value of the option. Moreover, short positions in unlisted options received favorable treatment under the proposed rule, because only the intrinsic value, not the market value, was counted as a liability.

This unintended treatment of unlisted options has been changed in these temporary regulations. Unlisted options which are Treasury market risk instruments are evaluated the way listed options are for the determination of net worth and liquid capital (i.e., unlisted options which are Treasury market risk instruments are removed from Rule 15c3–1(c)(2)(i)(B)(*2*) and put in (B)(*1*)). Unlisted options which are not Treasury market risk instruments are treated as before, i.e., they are evaluated as set forth in Rule 15c3–1(c)(2)(i)(B)(*2*) and the haircut is as specified in Appendix A to 15c3–1.[32]

The haircut scheme for unlisted options that are Treasury market risk instruments is the same as in the proposed regulations, and such options can be used to hedge other positions for haircut purposes. In addition, long positions in unlisted options which are Treasury market risk instruments are subject to a new five percent counterparty exposure haircut, which is discussed below.

Commenters are again invited to address the capital treatment of options, both listed and unlisted. Would a more sophisticated and complex measurement of risk be desirable? Should unlisted options be treated significantly differently because of the difficulty of realizing more than the intrinsic value of long positions in a liquidation situation and the absence of a readily available market, or should they be in the same framework as listed options in order that the risk reduction of hedging between the two can be recognized?

REMICs, CMOs and Stripped Mortgage-Backed Securities

Several commenters advocated that all mortgage-backed instruments that are government securities, including real estate mortgage investment conduits, collateralized mortgage obligations, and stripped mortgage-backed securities be included in the definition of Treasury market risk instruments. Some argued that not including these securities in the definition of Treasury market risk instruments constituted unfair treatment.

The Department does not believe that the exclusion of certain mortgage-backed securities from the definition of Treasury market risk instrument is unwarranted or prejudicial.

The Treasury market risk haircut is designed to measure market risk. Conventional mortgage-backed securities which are government securities are included in the Treasury market risk haircut framework. Other types of mortgage-backed securities are accorded the haircuts found in the SEC Rule. The new mortgage-backed instruments that the market is creating have substantially different market risk profiles than conventional mortgage-backed securities or Treasury securities. In fact, a primary reason that these new types of securities have been developed has been to alter the market risk profile that attaches to conventional mortgage-backed securities. Inclusion of these instruments in the Treasury market risk haircut framework, which not only applies haircuts to positions in securities but also attempts to quantify the reduction in risk for hedged positions, would require a rule of much greater complexity than the present one. Moreover, new instruments are being created all the time in this area and it would be impossible for the rule to keep up with the new products.

Given this, there is no perfect solution as to how to treat positions in these instruments for purposes of the capital rule. It was decided to accord government securities brokers and dealers the same treatment for positions in these instruments as is accorded registered broker-dealers under the SEC Rule. In fact, for many of these instruments the treatment is quite favorable since the haircuts for these instruments under the SEC Rule are the same as for Treasury securities despite greater market risk. Furthermore, if it serves to lower the haircut on other securities, Treasury market risk instruments may be removed from the Treasury market risk haircut scheme and placed in the SEC framework. Hence, reduction in haircuts permitted under the SEC rule for offsetting positions of Treasury market risk instruments and other instruments, including mortgage-backed securities that are not Treasury market risk

[30] 17 CFR 240.15c3–3.

[31] 17 CFR 240.15c3–1(c)(2)(i)(B)(*1*), (*2*).

[32] 17 CFR 240.15c3–1a.

instruments, is allowed under the Treasury rule.

Money Market Instruments

One commenter suggested that the maximum permitted maturity of money market instruments that are included in the definition of Treasury market risk instrument be no more than one year rather than less than one year. This change has been made.

When-Issued Positions

Commenters that addressed the Department's question whether there should be a valuation method given in the rule for when-issued positions in Treasury securities before the coupon is known responded in the negative. Accordingly, no valuation methodology for such positions is given in the temporary regulations. It is expected that the designated examining authority can ascertain whether a government securities dealer's or broker's valuation methodology is reasonable.

In response to one commenter's question whether when-issued positions may give rise to a deduction as an unsecured receivable to the extent that the position shows an unrealized gain, the answer is no. When-issued positions are, however, included in net credit exposure for purposes of the counterparty exposure and concentration of credit haircut calculations discussed below. When-issued positions in Treasury market risk instruments are treated as net immediate positions for purposes of the Treasury market risk haircut calculations, and when-issued positions in other securities are treated as open contractual commitments.

Haircut Factors

A number of commenters criticized the futures and options offset haircut factor of twenty percent as too high; however, there was less comment about the category offset haircut factors. To compare the category offset haircut factors and the futures and options offset haircut factor, which is applied to a haircut rather than a position, the category offset haircut factors need to be expressed in terms of a percentage of the net position haircut factors. Comparing the factors in this way, it will be apparent that the futures and options offset haircut factor was lower than the category offset haircut factors in the proposed rule.

Nevertheless, the Department has concluded that the category offset haircut factors were too high. These have been significantly lowered as a result of study of the correlation of yields of various maturities within the maturity categories over various time periods. The revised category offset haircut factors expressed as in the rule and as a percentage of the net position haircut factor for their respective categories are given in the table below:

| Category | Offset haircut factor (percent) | Offset haircut factor as a percent of net position haircut factor (percent) |
|---|---|---|
| A | ([1]) | ([2]) |
| B | 0.02 | 15 |
| C | .03 | 15 |
| D | .07 | 15 |
| E | .22 | 20 |
| F | .44 | 20 |
| G | .50 | 15 |
| H | 1.00 | 20 |
| I | 1.55 | 20 |
| J | 3.38 | 30 |
| MB | .66 | 20 |
| AR | .22 | 20 |

[1] None.
[2] Not meaningful.

However, study of the correlation of the implied yields of futures prices with yields on cash market instruments has led the Department to conclude that the futures and options offset haircut factor of 20 percent is appropriate. With the reduction in the category offset haircut factors, the futures and options haircut factor is at a comparable level.

The Department is cognizant that the offsetting methodology within categories does not give relative credit for the reduction in risk due to duration-based hedging. To better deal with duration-based hedging would require either more categories or a more complicated offsetting procedure within categories. If a significant number of government securities brokers and dealers feel that a more complicated methodology for recognizing hedges would be beneficial to them and worth the extra complexity, the Department will consider the possibility of providing a more complex rule as an alternative to the present rule for those desiring it.

The hedging disallowance haircut factors have been revised by examining yield volatilities over a longer time period and, hence, a wider range of market conditions. Greater weight, however, has been given to recent market conditions. Compared to the factors in the proposed rule, six factors have been decreased, three factors have been increased, one has been added and one has been disallowed. In general, the revised hedging disallowance factors increase the recognition of the reduction in risk obtained by hedging between categories.

A number of commenters expressed concern about the frequency of changes in haircut factors. The Department does not intend to change haircut factors unless there is a significant change in market conditions and will provide government securities brokers and dealers notice of changes before they become effective and a chance to comment.

Changes in haircut factors would most likely become appropriate if there is a significant change in the level of interest rates. Other things equal, an increase in interest rates would justify lowering the net position haircut factors. The reason is that the "duration" of fixed income instruments decreases as interest rates increase; in other words, the price of a bond moves less to effect a given change in yield at a higher level of interest rates than at a lower level. Of course, if higher rates are accompanied by significantly increased volatility in yields, the two effects could cancel out, leading to no reason to change net position haircut factors. Also, higher interest rates will mean that the mapping of zero-coupon instruments into the categories will have to be changed. The reason is that the aforementioned effect of an increase in rates does not apply to zero-coupon instruments since the duration of such an instrument is always its maturity. Of course, lower rates would, other things being equal, imply that the net position haircut factors should be increased and would also affect the mapping of zero-coupon instruments into the categories.

The Department believes it would be useful to provide government securities brokers and dealers with a more detailed discussion of the derivation of the net position and category pair hedging disallowance haircut factors than was presented in the preamble to the proposed rule. Such a description is included in Appendix B to this preamble.

The Department has considered the request of some primary dealers that they be granted a 25 percent reduction in haircuts in recognition of their large size and frequency of turnover of positions. The Department has decided not to include such a reduction in the temporary regulations. The Department does not believe that the capital requirement of firms in a similar business should differ depending on whether they have a business relationship with the Federal Reserve Bank of New York. The significant reduction in offset haircut factors in the temporary regulations from the proposed regulations should meet much

of the concern of primary dealers of excessive haircuts.

"Synthetic Futures"

Several commenters urged special treatment for identified synthetic forward transactions. The Department believes that a special rule for identified offsetting positions introduces an unwarranted element of complexity. Moreover, it is not immediately apparent that a synthetic forward has exactly the same risk characteristics as an actual forward or futures position. Composed of more than one transaction, it would appear that a synthetic forward would be more difficult to liquidate, if that should prove necessary, than a forward or futures position. The Department believes that arbitrage firms concerned about this will find that the reduction in offset haircut factors meets many of their concerns.

Category Placement of Options

With respect to options in the haircut framework, the temporary regulations have been clarified to indicate that an option on a futures contract is placed in the category in which the underlying instrument, in this case the futures contract, would be placed. This becomes important in the case of options on futures on Treasury bills.

Repurchase and Reverse Repurchase Agreements to Maturity

One commenter said that the treatment of repurchase and reverse repurchase agreements to maturity is inappropriate under the proposed rule. However, the Department understands that the SEC views a repurchase agreement that matures on the same day as the underlying security as a sale and a reverse repurchase agreement that matures on the same day as the underlying security as a purchase. The Department expects that these transactions will be viewed in this manner by the SEC and the designated examining authority for the purposes of this rule.

Concentration of Credit and Counterparty Exposure Haircuts

Several commenters criticized the concentration of credit haircut as applying to credit exposure to counterparties for which a capital charge had already been taken. The temporary regulations provide that net credit exposure to a counterparty does not include the deductions taken from net worth for unsecured receivables, repurchase and reverse repurchase agreement deficits, aged fails to deliver, and aged fails to receive in connection with the counterparty.

In addition, the definition of net credit exposure has also been changed to include exposure to all banks, except for demand deposits at commercial banks. Custodial holdings of securities at a clearing bank or clearing broker of a government securities dealer or broker are removed from net credit exposure. In response to the comment of a clearing bank, the reference made in the rule to clearing banks and brokers no longer contains the modifier "principal." It is expected that the designated examining authority can ascertain whether a clearing relationship is "genuine."

As indicated above, the credit risk ascribable to long positions in unlisted options which are Treasury market risk instruments is measured by including the market value of such positions in the calculation of net credit exposure to the writer of the unlisted option.

The elimination of double counting of exposure in the definition of net credit exposure allows the introduction into the rule of the counterparty exposure haircut contained in the FRBNY capital adequacy guidelines and not included in the proposed regulations because of the double counting problem. The temporary regulations provide that net credit exposure to a counterparty is assessed a five percent haircut. This new counterparty exposure haircut is assessed on net credit exposure to a single counterparty of less than or equal to 15 percent of liquid capital. When the net credit exposure to a single counterparty is greater than 15 percent of liquid capital, the counterparty exposure haircut of 5 percent is calculated on the amount equal to 15 percent of liquid capital and a concentration of credit haircut factor of 25 percent is applied to the net credit exposure in excess of 15 percent of liquid capital.

The Department believes that the counterparty exposure and concentration of credit haircuts are an important innovation to securities market regulation. While these haircuts are much less onerous than 100 percent capital charges, they reinforce the prudent discipline of monitoring exposure to all counterparties. There is no grace period before the exposure is included in these haircut calculations. Thus these haircuts both reaffirm the principle that greater risk requires greater capital and require firms to have systems in place enabling them to monitor net credit exposure to counterparties at all times.

3. *Section 402.2c.* Appendix C has been rewritten to clarify that when consolidation of subsidiaries or affiliates is required in the case of a guarantee, or desired in order to obtain flow through capital benefits which is permitted under certain conditions, the entire consolidated entity (parent, subsidiaries, and affiliates) must as a whole meet the liquid capital to total haircut requirement. In addition, any subsidiary or affiliate that is a government securities broker or dealer must meet the liquid capital or net capital requirement to which it is subject.

4. *Section 402.2d.* Appendix D relates to satisfactory subordination agreements. No comments were received, and no modifications have been made to this section and the proposed regulations are adopted as the temporary regulations.

*D. Part 403. Protection of Customer Securities and Balances*

Of the more than 70 comment letters that the Department received on the proposed regulations, 32 included comments specifically on Part 403. Most of these comments related to the provisions governing the treatment of securities that are the subject of hold-in-custody repurchase transactions.

1. *Section 403.1.* This section sets forth the applicability of Part 403 to registered brokers and dealers. Technical changes have been made to this section to make applicable to registered brokers and dealers the various Treasury modifications to SEC rules that are contained in Part 403. As stated in the preamble to the proposed regulations, many of these modifications are expected ultimately to be unnecessary as the SEC adopts amendments to its rules concerning hold-in-custody repurchase transactions.[33] In addition, as provided in § 400.2(d) of these temporary regulations, interpretations of the Commission are expressly adopted by reference. Thus, for example, the written consent of a customer to the hypothecation and commingling of securities referred to in SEC Rule 8c–1(a)(1) and § 403.2 need be only a one-time consent. Similarly, in conformity with SEC interpretations, securities acquired by a broker or dealer that are subject to a reverse repurchase agreement transaction are not required to be taken into account in the reserve formula in Rule SEC 15c3–3.[34]

2. *Section 403.2.* This section makes SEC Rule 8c–1 [35] governing

[33] See Exchange Act Release 34–22602, 51 FR 32658 [September 15, 1986].

[34] 17 CFR 240.15C3–3.

[35] 17 CFR 240.8c–1.

hypothecation of customer securities applicable to registered government securities brokers and dealers. A minor change has been made in paragraph (b) of this section to take into account the fact that a loan incidental to clearing services is extended on the date of settlement for the purchase of securities, rather than on the date of the trade.

3. *Section 403.3.* This section makes SEC Rule 15c3–2 [36] applicable to registered government securities brokers and dealers. With the addition of a clarification of terminology, the proposed rule has been adopted as the temporary rule.

4. *Section 403.4.* Section 403.4 contains the rules concerning protection of customer funds and securities that are applicable to registered government securities brokers and dealers. With the exception of § 403.4(e), which governs hold-in-custody repurchase transactions, the rule requires compliance generally with SEC Rule 15c3–3.[37]

One commenter requested that the segregation rule applicable to brokers and dealers be amended to permit an exception similar to § 450.4(a), which permits liens expressly agreed to in writing by the customer for whose account securities are held. As explained below in the discussion of the revisions to § 450.4, that exception was not intended to represent a general exemption from the lien-free possession or control requirements based solely on the written agreement of the customer. It was intended to permit liens directly between a depository institution and its customer. Section 450.4 has been restructured to clarify this by deleting the reference to liens agreed to by a customer and providing that customer securities must be kept free of liens of third parties.

For ease of reference, discussion of other issues in this section has been organized under appropriate subparagraph headings.

Section 403.4 (a)–(d)

Paragraphs (a)–(d) contain technical modifications to the SEC rule that were necessary for applicability to registered government securities brokers and dealers. No changes from the proposed were made to these paragraphs in the temporary rule.

In the commentary to the proposed rule, the Department invited comments on subparagraph (d), which defines "excess margin securities." Specifically, the Department questioned whether, for government securities, 140% of a customer's total debit balance is the appropriate cut-off between margin and excess margin securities. Only three commenters responded to this question directly, although a number of commenters indicated general support for the Public Securities Association's (PSA) comment letter, which did address this issue. The PSA indicated that 140% is appropriate and that, in any case, Treasury should not adopt a percentage below 125%. One dealer also expressed agreement with the 140% and the NASD indicated that the issue requires further study. The Department has decided to retain the 140% in the temporary regulations but may examine the issue further to determine if a lower percentage would be appropriate.

Section 403.4(e)

*Exemption for Certain Dealers.* A few commenters requested that the Department clarify whether government securities brokers and dealers that engage in hold-in-custody repurchase transactions are subject to all the requirements of SEC Rule 15c3–3. They noted that Rule 15c3–3 contains an exemption in paragraph (k)(2)(i) for brokers and dealers who do not hold funds or securities for customers.

The Department has clarified the applicability of the exemption by adding the language "notwithstanding paragraph (k)(2)(i) of this section" at the beginning of § 403.4(e). The effect of this clarification is that registered government securities brokers or dealers that would otherwise be exempt from the requirements of Rule 15c3–3 by virtue of the fact that they hold no customer securities or funds, but that engage in hold-in-custody repurchase transactions, must comply only with new paragraph (b)(4) of SEC Rule 15c3–3 as set out in § 403.4(e), which is specifically applicable to such repurchase transactions. The Department understands from the SEC and the NASD that a specific request for an exemption under paragraph (k)(2)(i) is not required.[38]

One commenter who does hold-in-custody repurchase transactions also urged that it be eligible for the (k)(2)(i) exemption as discussed above if it also performs a non-proprietary function of acting as escrow agent for foreign entities. The Department has concluded that there does not appear to be a sufficient basis for extending the (k)(2)(i) exemption to this escrow agent activity.

*Issues common to §§ 403.4(e) and 403.5(d) relating to hold-in-custody repurchase transactions.* The majority of comments received on § 403.4 relate specifically to § 403.4(e), which governs hold-in-custody repurchase transactions of registered government securities brokers and dealers and § 403.5(d), which governs hold-in-custody repurchase transactions of financial institutions that are government securities brokers and dealers. Common issues raised on both of these sections are discussed jointly here.

In brief, the proposed regulations contained provisions that required (1) that hold-in-custody repurchase agreements be in writing; (2) that the agreements contain specified disclosure language; (3) that the broker or dealer maintain 24-hour possession or control of securities that are the subject of a hold-in-custody repurchase agreement, except under specific circumstances; and (4) that confirmations identifying the subject securities be provided to the counterparty at the initiation of a hold-in-custody repurchase transaction and on any day on which substitutions of the subject securities occur. The comments received on §§ 403.4(e) and 403.5(d) are grouped by issue for discussion below.

Requirement for Written Repurchase Agreement

All but one of those specifically commenting on the proposed rule's requirement that investor hold-in-custody repurchase agreements be in writing agreed with this requirement. Only one commenter objected to it. Two other commenters felt that the broker or dealer should be required to offer a written agreement but the counterparty should be left the option of entering into repurchase transactions without signing a written agreement.

The Department believes that it is important that hold-in-custody repurchase agreements be in writing to reduce the opportunity for misunderstanding the terms under which the transaction will be conducted. The requirement for a written agreement, particularly when combined

---

[36] 17 CFR 240.15c3–2.

[37] 17 CFR 240.15c3–3. The Department is aware that, for certain brokers whose counterparties include both dealers and other investors, but that ordinarily do not maintain securities or funds of such investors, the reserve requirement of Rule 15c3–3(e) may not be appropriate. The Department anticipates discussing this issue further to determine if either a class exemption or exemptions granted on a case-by case basis would be appropriate.

[38] It is the Department's understanding that the NASD requires a broker or dealer to declare its qualification for the (k)(2)(i) exemption but does not require prior application and approval by the NASD. However, if a broker or dealer qualifying for the exemption wishes to begin activities that will result in its no longer being qualified for the exemption, it must obtain the prior approval of the NASD.

with the required disclosure language, should provide greater protection for the counterparty to a hold-in-custody repurchase transaction by providing the counterparty with more information on which to make a decision about the risks involved. The Department understands that the master repurchase agreement designed by the PSA is coming into standard use by the industry and that the PSA is preparing to undertake the necessary revisions to meet other provisions of this rule. This effort should substantially reduce the difficulties in implementing the requirement for a written agreement. While this requirement of the rule only applies to hold-in-custody repurchase transactions, the Department believes that, as a good business practice, repurchase agreements involving third-party custody or delivery of securities should also be reduced to writing to evidence clearly the terms of the agreement.

### General Concept of Special Restrictions for Certain Hold-in-Custody Repurchase Transactions

The Department's proposed rule required a broker or dealer to maintain possession or control at all times of securities subject to hold-in-custody repurchase transactions and to obtain the prior consent of its counterparty to each substitution of securities, if the aggregate contract price of all currently outstanding repurchase transactions with that counterparty was less than $5,000,000. When the aggregate outstanding repurchase transactions with a single counterparty exceeded $5,000,000, the proposed rule required possession or control of the securities only at the end of the trading day, provided certain other requirements were met.

Twenty-one commenters responded to this issue generally, fourteen of whom also provided specific alternative recommendations for determining transactions or investors that would be subject to the additional prior consent requirements. Nearly all of the commenters felt that it would be preferable not to place any special restrictions on a particular segment of the repurchase transaction market. These commenters stated that the disclosures proposed by the Department would provide sufficient protection and would enable all repurchase counterparties to make informed decisions about the risks involved in consenting to intra-day use of securities by the broker or dealer. They further noted that the regulated environment now being imposed on all government securities brokers and dealers will also provide additional protection for all customers and counterparties.

Most of the commenters on this issue suggested that any special restrictions for smaller-volume repurchase transactions would probably exclude certain investors from the repurchase market altogether. They felt that most brokers and dealers would simply discontinue offering hold-in-custody repurchase transactions to any investors who could not meet the minimum dollar threshold described above, rather than incur additional operational costs that may be associated with the more restricted transactions. They also suggested that these smaller investors would not be willing or able to enter into repurchase transactions involving third-party custody or actual delivery because of the higher transaction costs associated with these types of arrangements. Out of concern for this potential result, one commenter, the Government Finance Officers Association, a professional association representing state and local government investors, requested that Treasury "revisit this issue." Finally, many of the commenters objected to the imposition of a minimum dollar threshold on the basis that any dollar amount would be arbitrary and would not provide an accurate measure of an investor's ability to understand the risks being undertaken.

The Department recognizes that many other measures being adopted under these regulations, such as the broadening of registration requirements and the financial responsibility, recordkeeping and audit rules, will provide substantial additional protection for government securities investors beyond that which exists currently. However, the Department continues to believe that some additional protection is necessary for the small and possibly less experienced investor in hold-in-custody repurchase transactions.

As noted in the preamble to the proposed rule, it was in large part congressional concern for losses experienced by these investors that resulted in the legislation under which these regulations are promulgated. The Department continues to believe that less experienced investors may not fully appreciate the risks they assume with hold-in-custody repurchase transactions. Although the Department has expanded the disclosures to be required in connection with such transactions, as discussed below, in an effort to describe these risks more explicitly, the Department is unwilling to rely solely on the required disclosure language as an assurance that all investors will understand fully the ramifications of such transactions and will be able adequately to assess both the risks and the benefits. Therefore, the Department has chosen to continue to require stricter possession or control of securities that are the subject of smaller volume repurchase transactions. The Department expects to monitor the efficacy of all of the measures adopted in these regulations, with the assistance of the appropriate regulatory agencies, and may consider modifications to the requirements of the rule at some future date.

### Specific Recommendations for Determining Transaction Levels or Classes of Investors Subject to Additional Consent Requirements

Although as noted above, most commenters opposed any special restrictions for smaller repurchase transactions, fourteen commenters, recognizing that the Department might conclude that some additional restrictions would be appropriate for some class of repurchase transactions, suggested alternatives to the $5,000,000 cut-off described above. A number of commenters indicated their preference for the $1,000,000 transaction threshold suggested by the SEC in its proposed rule governing hold-in-custody repurchase transactions.[39] This proposed rule provided that, for repurchase agreements with a contract price of $1,000,000 or more, possession or control by the broker or dealer is not required during the trading day. Although a few commenters recommended that a $1,000,000 threshold be applied to aggregate outstanding transactions, most commenters opposed any type of threshold based on an aggregate of repurchase transactions. The aggregation concept was viewed by these commenters as too complex and difficult to administer, particularly where overnight or open repurchase transactions are involved and therefore the amount outstanding may be changing daily. Several commenters also indicated that it would be difficult for these purposes to define what constituted a single counterparty, particularly where parent companies, affiliates and subsidiaries of a counterparty may all be doing business with the same dealer.

Several commenters also proposed a variation of the SEC proposed rule that would be based on a dollar threshold

[39] Exchange Act Release No. 34-23652, 51 FR 32656 (September 15, 1986)

during a specified time period. For example, the requirements for 24-hour segregation would not apply if a counterparty had entered into a single repurchase transaction exceeding the minimum threshold amount at any time within a specified period preceding the transaction in question.

One commenter proposed a combination of an "accredited investor" exemption with a minimum dollar threshold applicable to those who would not be exempt as accredited investors. This proposal would adopt a test similar to the accredited investor test of SEC Regulation D under the Securities and Exchange Act of 1933,[40] but would exclude individuals from the list of accredited investors and would raise the required asset size to $20,000,000 for certain categories of accredited investors. This commenter felt that its proposal would identify more accurately those investors who should be considered sophisticated enough to have no additional restrictions placed on their repurchase transactions, regardless of the size of the transaction. Several commenters also suggested adoption of an "accredited investor" exemption alone.

Lower transaction levels of both $500,000 and $250,000 were also proposed by two commenters. Finally, one commenter recommended that dealers with regulatory capital in excess of $200 million and whose volume of activity in the government securities market would entitle them to be considered primary dealers should be exempt from special restrictions on hold-in-custody repurchase transactions.

The Department considered but rejected the proposals that would attempt to distinguish between types of investors as difficult to administer fairly and consistently. Proposals that would test the level of activity over a prescribed period of time were also rejected because the Department felt that such proposals also would be more difficult to administer and would significantly weaken the intent of the rule. Similarly, the Department believes that setting a threshold at an amount significantly less than $1,000,000 is not appropriate in view of the dollar size of the hold-in-custody repurchase transactions involved in some of the losses that led to passage of the GSA.

Furthermore, based on the comments described above, the Department has eliminated from §§ 403.4(e) and 403.5(d) reliance on a measure based on the aggregate of outstanding transactions conducted under a repurchase agreement with a single counterparty because of the administrative difficulties of applying the aggregation concept. Instead, the temporary regulations provide that special restrictions apply for hold-in-custody repurchase transactions with a contract price of less than $1,000,000.

In lowering the limit from the $5,000,000 threshold of the proposed rule, the Department was influenced in part by the fact that many of the commenters felt that disclosure alone would be sufficient protection for investors. Based on these comments, the Department decided to lower the limit and thereby expand the number of investors for whom disclosure would be the primary means of protection. However, as already described, the Department is unwilling to conclude at this time that sole reliance on disclosure is sufficient for all investors. Given the number of commenters that favor the $1,000,000 transaction size limit, the Department believes that this limit would provide adequate protection, when combined with the other measures adopted in these regulations, including the expanded disclosures described below, without eliminating completely a significant group of investors from the hold-in-custody repurchase transaction market or otherwise unnecessarily disrupting the market.

### Right of Substitution

For hold-in-custody repurchase transactions, the Department's proposed rule required consent of the counterparty to limited possession or control of the subject securities by the broker or dealer. This consent, if given, was to be obtained in the repurchase agreement. In addition, for counterparties whose transactions did not, in the aggregate, meet the $5,000,000 threshold of the proposed rule, substitution of securities could occur only with the prior agreement of the counterparty to each specific substitution.

Most commenters supported the requirement for general consent in the repurchase agreement. The PSA suggested that Treasury permit this general consent to be in the form of a notice to customers as to which no objection is made within a reasonable period of time specified in such notice. The Department believes that this proposal is fraught with a number of problems, such as the timing of the notice relative to the occurrence of a substitution, the possibility of non-receipt, the creation of additional paperwork, and most importantly, the fact that the assumption of additional risk would result from the inaction of the counterparty rather than affirmative agreement to those risks. The temporary regulations retain the limitation that substitution of securities subject to hold-in-custody repurchase transactions is not permitted unless the counterparty has granted to the broker or dealer a right of substitution in the written repurchase agreement.

Most of those commenting on this section opposed any additional requirement for specific prior consent to each substitution for smaller transactions. The commenters felt that this additional requirement was unnecessary, extremely burdensome and would likely force most brokers and dealers to stop dealing with counterparties affected by this requirement.

A few commenters also expressed the view that the requirement for confirmation of substitute securities would serve the same purpose as a specific prior consent requirement. One commenter proposed, as an alternative, a requirement for initial consent with recurring confirmation required at specified intervals, such as every two years. The commenter felt that this would address concerns that turnover of personnel might result in the continuation of a practice which new personnel were not aware of or did not fully understand. The commenter also noted that this proposal would reduce the administrative burden and expense of a prior consent requirement.

The Department has retained the concept of an additional consent to substitutions of securities for investors whose transactions fall below a certain threshold. As incorporated in the temporary regulations this rule requires that, if the contract price of a hold-in-custody repurchase transaction is less than $1,000,000, the broker or dealer may not, on any given trading day, substitute or commingle the subject securities with its own securities unless it has received the counterparty's specific consent to substitution for that trading day and has kept a record of such consent. It is the Department's expectation and intent that substitution involving these smaller transactions will not become a routine occurrence and that securities that are the subject of transactions with a contract price of less than $1,000,000 will, for the most part, be kept continuously in the broker or dealer's possession or control. The Department does not intend for a right of substitution for transactions of less than $1,000,000 to be used as a means of circumventing the basic requirement for 24-hour possession or control. The Treasury anticipates that all agencies

[40] 17 CFR 230.501(a).

responsible for enforcement will monitor broker and dealer practices for abuse of the substitution provisions and is prepared to modify the rule if necessary. It is the Department's hope that the additional consent requirements will serve as a reminder to smaller investors of the risks incurred with consent to substitution; additionally, these investors will be afforded the opportunity to refuse substitution for any given trading day. The Department does not agree that the same protection is afforded by after-the-fact confirmations of substitutions.

As a point of clarification, the Department recognizes that once substitution is permitted on a given trading day, as a practical matter there may be multiple substitutions of the subject securities occurring that day. The Department has modified the wording of the consent requirement slightly to reflect that it does not intend that separate consent be required for each separate occurrence of substitution on the same day.

### Required Disclosures

Nearly all commenters agreed with the requirement of the proposed rule for uniform disclosures concerning hold-in-custody repurchase transactions. A few comments suggested some minor language changes.

One commenter felt that the disclosure language regarding coverage of the Securities Investor Protection Act of 1970 ("SIPA") [41] could be "affirmatively misleading" as to registered brokers and dealers in light of a recent court decision in which the court concluded that counterparties to hold-in-custody repurchase transaction are customers that may be eligible for coverage under SIPA. The Department notes that the matter is still pending in the District Court and may be subject to appeal once a final order is entered.[42] Furthermore, the Department understands that, in spite of the decision just described, the Securities Investor Protection Corporation has taken the position that SIPA protection is inapplicable to counterparties to repurchase transactions. Another commenter felt that the language in the proposed regulations indicating that SIPA protection may not apply was confusing as applied to registered government securities brokers and dealers, since they clearly are not eligible for SIPA insurance. In response to these comments, the Department has modified the SIPA disclosure language, providing one statement for use by registered brokers and dealers which discloses the SIPC position with respect to repurchase transactions and another statement for use by registered government securities brokers and dealers.

Two commenters who are major clearing banks urged the Department to adopt a mandatory disclosure requirement, such as that proposed by the SEC in Release No. 34-23602, which would require disclosure of the rights and liabilities of the parties to the arrangement. These commenters felt that the disclosure requirements proposed by the Department would provide a false sense of security regarding the nature of "bulk" segregation accounts used by brokers and dealers to meet requirements for segregating hold-in-custody repurchase transaction securities from the broker's or dealer's own securities. These commenters indicated that, since clearing banks do not recognize any property or other interest of "customers" in the contents of such segregated accounts and the disposition of securities in these accounts is entirely within the control of the broker or dealer, repurchase counterparties need to receive more specific disclosures "setting forth the significant risks that attend such transactions."

Although clearing banks may not recognize interests of individual customers in segregated securities, the Department notes that, pursuant to Parts 403 and 450 of this chapter, both the clearing bank and its dealer customer have certain responsibilities with respect to customer securities. See also the discussion below relating to § 450.2. Furthermore, the Department believes that it is well-recognized that hold-in-custody arrangements generally carry greater risk than a third-party custody or delivery arrangement, based on the fact that the securities are left in the dealer's possession or control. The Department also believes, however, that many counterparties do not understand the full meaning of and the risks associated with standard language contained in most repurchase agreements that provides for substitution of the securities. The Department notes that the SEC proposed rule contained only a general requirement that "the rights and liabilities" of the parties to the transaction be disclosed. In view of a number of legal uncertainties still surrounding various aspects of repurchase transactions, the Department felt that a general requirement for disclosure would lead to broad and varying responses to this requirement. The Department feels that it is preferable to require standard disclosure language that clearly describes the consequences of substitution.

In the temporary regulations, the Department has restructured the proposed disclosure language relating to substitution and intra-day use of the securities into a single statement and has expanded the disclosure language to explain more fully the risks that a counterparty undertakes when it agrees to limited possession or control in a hold-in-custody repurchase transaction. Certain terms ("buyer", "seller") in the required disclosure language appear in brackets. The broker or dealer is permitted to substitute other terms to conform the disclosure language to the terminology used in the repurchase agreement to identify these same parties. However, no discretion is permitted to change any other language in the statements.

### Applicability of Requirements to Overnight Repurchase Transactions

One commenter suggested that overnight repurchase transactions, including those that may be rolled over solely at the customer's specific direction (not automatically as in a sweep arrangement) should be exempt from all of the requirements of the rule relating to hold-in-custody repurchase transactions. This proposed exemption is based on the view that the investor's funds are at risk only overnight, rather than for a specified term.

In a single overnight hold-in-custody repurchase transaction, the counterparty sends funds to the broker or dealer for the securities during the trading day and the broker or dealer segregates the securities for the benefit of the customer at the close of the trading day; at the start of the next trading day, the securities are removed from segregation and funds are then returned to the counterparty. In this scenario, the counterparty is exposed to risk during the time on both trading days that the securities are commingled with the dealer's own securities and the dealer retains control of the funds. In an arrangement in which a counterparty agrees to the "rollover" of an overnight repurchase agreement, either for a specified period of time or under a "good until canceled" agreement, the counterparty bears the additional risk described above for each trading day that the arrangement continues unless

---

[41] Public Law 91-598, 84 Stat. 1636, as amended (codified at 15 U.S.C. 78aaa-eee.

[42] *In re Bevill, Bresler & Schulman Asset Management Corp.*, 67 B.R. 557 (D.N.J. 1986) (denying in part cross-motions for summary judgment).

the funds are returned to the counterparty each trading day.

The Department has concluded that such overnight transactions should not be exempt from the possession or control requirements of Part 403. An exemption for overnight transactions, if granted, could encourage the conversion of term repurchase transactions to rolling overnight repurchase transactions, as a means of avoiding the consent and disclosure requirements. Since the counterparty would continue to be exposed to the same risks with overnight as well as term transactions, the counterparty should receive the required disclosures in either case. For these reasons, the Department has not chosen to include in the temporary regulations an exemption for overnight repurchase transactions.

Pool Repurchase Transactions; Specificity of Confirmations

Four commenters suggested that the proposed regulations should not eliminate the possibility of a dealer's entering into hold-in-custody repurchase transactions in which the segregation of collateral is in pooled or bulk form. The Department's understanding is that, under this practice, a dealer will set aside a pool of securities with an aggregate value at least equal to the amount of its outstanding repurchase transactions. The dealer does not identify specific securities as belonging to specific counterparties, and confirmations for these repurchase transactions do not include a description of specific collateral. Instead, the confirmation would only refer to "various securities." Although not always explicitly stated, these comments appear to be directed primarily to the requirement in the proposed rule to confirm the securities that are the subject of a repurchase transaction.

The primary justification given for the practice of pool repurchase transactions is that it relieves the dealer from the operational burden and cost of identifying specific securities to specific transactions. Most of the commenters indicated that they believed that the counterparties to these transactions are no less protected than when specific securities are allocated to their transactions.

A fifth commenter indicated that its practice for some repurchase transactions was to confirm only "various collateral" but nevertheless to allocate specific securities to a specific counterparty at the end of each trading day. This commenter therefore merely suggested that the requirement for confirming securities that are the subject of a repurchase transaction permit confirming "various securities" so long as the dealer maintains records that permit identification of the interest of a counterparty in a specific security.

In addition to the comments just described, other commenters requested clarification of the degree of specific information that must be included in the required confirmation of securities subject to a repurchase transaction. Some of these commenters suggested that the confirmations be required to specify only the issuer, the maturity and the coupon rate, but not either a CUSIP number or, for GNMA mortgage-backed securities, a specific pool number.

The Department has serious questions whether any type of property interest in securities is conveyed to a counterparty when specific securities are not allocated to that counterparty's repurchase transactions. Under the recently proposed TRADES regulations [43] that will govern the majority of transactions in Treasury book-entry securities, the proposed rule of 31 CFR 357.12(a)(3) for transferring securities would require identification of a specific security. The proposed general provision governing transfers of limited interests, located in 31 CFR 357.12(a)(4), does not explicitly require identification of a specific security. However, that provision was drafted on the assumption that whenever a dealer marked its books to show a limited interest in a security in favor of a transferee, it logically would be necessary to identify the specific security in which the limited interest is being granted. Therefore, whether a repurchase transaction is characterized as a secured loan, as an outright sale of a security accompanied by the obligation to later repurchase that security, or as a transaction conveying some other type of limited interest in the underlying securities, under the proposed TRADES regulations, it does not appear that the described practice of segregating collateral for repurchase transactions in pooled or bulk form is effective to transfer an interest in securities.

Furthermore, it is not clear that interests would be conveyed under the existing Treasury and other agency regulations governing transactions in book-entry securities or under other law applicable to government securities not subject to such regulations. If this is the case, then it appears that a counterparty to a pool repurchase transaction would have no greater rights than a general creditor in the event of a failure of its dealer counterparty with respect to a hold-in-custody repurchase transaction.

Given these concerns, the Department has concluded that bulk segregation or pooling of repurchase collateral without identification of specific securities should not be permitted and that the practice of confirming only "various securities" in connection with repurchase transactions is not sufficient to comply with the requirements of §§ 403.4(e) and 403.5(d).

All government securities brokers and dealers are reminded that, aside from the requirements of the temporary rules, they are required to comply with section 10(b) of the Act and all of the rules promulgated thereunder, including SEC Rule 10b–10 concerning issuance of confirmations to customers for security transactions.[44] Under that rule a broker or dealer is required to include in the confirmation, among other items, the identity of the security purchased or sold. The Department believes that confirmations for hold-in-custody repurchase transactions should generally comply with the same standards of specificity as the confirmations required by Rule 10b–10.

To clarify that specific information is required, §§ 403.4(e) and 403.5(d) have been amended to state that a confirmation must include, at a minimum, the issuer, maturity date and coupon rate of the security that is the subject of a repurchase transaction and that the confirmation also must include a CUSIP or GNMA pool number unless other records of the broker-dealer are maintained that identify the interest of the counterparty in a specific security. In addition, the rule now requires that the confirmation also specify the market value of the securities being confirmed. The Department believes that, particularly since market value is the primary basis for determining if substitute securities are acceptable, it should be included on all confirmations relating to a repurchase transaction. Furthermore, since it is information that must be available in any case, requiring its inclusion on the confirmation should not create a substantial burden to the broker or dealer. In connection with this requirement, the Department notes that the PSA standard repurchase agreement incorporates a definition of market value that requires the parties to the agreement to agree on an appropriate source for the determination of market value, which could serve as a basis for

[43] 51 FR 43027 (November 28, 1986). It is anticipated that, when the *Trades* regulations are finalized, other government agencies will adopt similar regulations for their own securities.

[44] 17 CFR 240.10b–10.

the market value reported on the confirmation.

One commenter also inquired whether multiple confirmations would be required where more than one type of security was included in a single repurchase transaction. The Department believes that, as long as all relevant securities are specifically identified, it would be acceptable simply to attach to a single confirmation and incorporate by reference a listing of those securities. The listing, of course, would be required to include all specific information required by §§ 403.4(e) and 403.5(d) for each security.

For purposes of the confirmation requirement, if several substitutions are made during the course of a single trading day, the broker or dealer is required to confirm only the final substitution, i.e., those securities that are being segregated for the counterparty under the transaction at the end of the trading day. As a point of clarification, the reference to confirmation "at the initiation of a transaction" has been modified in the temporary rule to indicate that such confirmation is required at the end of the day on which the transaction is initiated.

Finally, one comment was made to the effect that the rules should specify whether all of the information required to be shown on the confirmations of substitutions must also be included on month-end statements. These rules only address confirmations. Also it is unclear to what requirement the comment refers. Neither the SEC nor the NASD has such a requirement, although the New York Stock Exchange (NYSE) does and the Department understands that many firms not subject to the NYSE rule send such statements to their customers. Except under the NYSE rule, the content of the statements is determined by the individual firm.

Timing of Segregation

Two commenters requested that the rule requiring segregation of securities make clear that segregation of securities that are the subject of hold-in-custody repurchase agreements could occur promptly after the close of the Federal Reserve's securities transfer network. The Department does not believe that it is appropriate as a general matter to attempt to specify the time at which segregation must occur. However, the Department believes that the commenters' concerns in requesting more specificity are adequately covered by § 403.5(b), which allows temporary lags in segregation resulting from normal business operations.[45]

Delivery of Securities to an Affiliate; Delivery to Safekeeping or Trust Departments

Since both §§ 403.4(e) and 403.5(d) impose requirements on hold-in-custody repurchase transactions, certain questions have arisen as to whether a repurchase transaction in which a government securities broker or dealer delivers the subject securities to an affiliated entity would be considered a hold-in-custody repurchase transaction. Since a major purpose of the provisions governing hold-in-custody repurchase transactions is to assure to the extent possible that the securities are handled in a manner that recognizes the interest of the broker's or dealer's counterparty in those securities, the Department is of the view that delivery of the securities to an affiliate allows the transaction to fall outside the requirements of § 403.4(e) or § 403.5(d) only if the counterparty is or becomes a direct customer of the affiliate and the affiliate is then subject either to the requirements of SEC Rule 15c3–3 or the provisions of Part 450 with respect to such securities. If, on the other hand, the affiliate holds the securities for the government securities broker or dealer so that those securities would be subject to disposition solely on the instruction of the government securities broker or dealer, then the government securities broker or dealer would be viewed as "retaining" the securities for purposes of §§ 403.4(e) and 403.5(d) and the transaction would be subject to the hold-in-custody rules.

A related question arises with respect to securities that are the subject of a repurchase transaction between a financial institution and an investor when the securities are delivered to the financial institution's own safekeeping or trust department. The Department is of the view that, if the securities are delivered to a trust function of the financial institution so that the securities are held for the benefit of the counterparties to the repurchase transactions in a manner that would qualify for exemption under § 450.3, then the financial institution would not be viewed as retaining the securities for purposes of § 403.5(d). The Department is also of the view that, if securities are delivered to ordinary safekeeping or custody, then the financial institution would not be viewed as retaining the securities for purposes of § 403.5(d) unless the financial institution also retained the right to substitute securities.

Acceptable Control Locations

Some commenters noted that § 403.4(e) limited acceptable control locations for hold-in-custody repurchase transactions to certain locations described in Rule 15c3–3 and the clearing bank location described in proposed § 403.4(f). The commenters suggested that the other acceptable control locations listed in Rule 15c3–3 (possession or control by another broker or dealer; bona fide items of transfer; and foreign control locations) might also be relevant, though rarely used, and suggested that they not be excluded. The Department has concluded that the control location described in SEC Rule 15c3–3(c)(2), which permits a registered broker or dealer to serve as an acceptable control location, could be an appropriate location for securities that are the subject of a hold-in-custody repurchase transaction. However, the SEC Rule links this control location with an omnibus account for customer securities that is maintained pursuant to Regulation T of the Board of Governors of the Federal Reserve System. Since a registered government securities broker or dealer will not be subject to the requirements of Regulation T, the temporary rule includes a modified version of this control location in § 403.4(f)(2).

However, the Department continues to believe that the other control locations are not relevant or appropriate to hold-in-custody repurchase transactions and has therefore not incorporated them into the temporary regulations. Paragraph (c)(3) of SEC Rule 15c3–3 is a control location for certificated securities that have been forwarded to a transfer agent to record the transfer and issuance of a new certificate. Since government securities are generally not maintained in this manner, the control location would not likely ever be relevant. Even if it were, the Department does not believe that securities that have been forwarded to record a transfer should be the subject of hold-in-custody repurchase transactions. Ordinarily, a hold-in-custody repurchase transaction should be done using only a dealer's own securities. The control location described in paragraph (c)(4) of SEC Rule 15c3–3 includes only foreign entities that have been approved by the SEC as satisfactory control locations. It is the Department's understanding that the SEC has only approved such locations for purposes of maintaining possession or control of foreign

[45] SEC Rule 15c3–3(b)(2) contains a similar provision for non-bank dealers.

securities. Therefore, the control location would not be relevant for hold-in-custody repurchase transactions involving government securities.

Section 403.4(f)

No changes have been made in the temporary rule to the provision that addresses a clearing bank segregated account as a control location, which is now § 403.4(f)(1) (formerly § 403.4(f)). One commenter stated that all depository institutions maintaining securities accounts at a Federal Reserve Bank should qualify as acceptable control locations under proposed § 403.4(f). The Department notes that SEC Rule 15c3–3(c)(5) already generally recognizes such institutions as acceptable control locations. Proposed paragraph (f) was explicitly added to the Treasury rule because the Department felt that the SEC's list of acceptable control locations does not clearly include segregation accounts maintained by brokers and dealers at clearing banks.

One clearing bank commenter noted that agreements with a dealer concerning a segregated account that may qualify as an acceptable control location, as described in proposed paragraph (f), are often handled in side letters rather than directly in the dealer's clearing agreement. The commenter suggested that this subparagraph be amended to permit the segregated account to be established pursuant to a written agreement other than the clearing agreement. Because of the importance of the segregated account as a means of assuring that securities are free of clearing and other liens when required, the Department believes that the provisions necessary to qualify as an acceptable control location, as described in § 403.4(f)(1), should be part of the clearing agreement itself to avoid any ambiguity.

Section 403.4(g)

Paragraph (g) has been modified slightly, in response to a comment, to clarify that a broker or dealer's obligation to give telegraphic notice of its clearing bank's refusal to place securities in a segregated account does not arise unless the clearing bank refuses to segregate the securities by the end of the day on which the broker or dealer instructed such segregation.

Section 403.4(h)

No changes have been made to paragraph (h), regarding delivery or disposition of securities. One commenter requested confirmation that government securities brokers and dealers are permitted to retain as much collateral as they believe reasonably necessary to collateralize indebtedness of their customers. The Department believes that this is already made clear from the wording of the last clause of paragraph (h) which refers to excess margin securities not reasonably required for collateral.

Sections 403.4(i) and 403.5(c)(1)

Paragraph (i) of the proposed regulations made applicable to government securities paragraph (m) of Rule 15c3–3 requiring a buy-in of securities after ten days to complete a sell order of a customer (other than a short sale). This provision had been suspended indefinitely by the SEC in 1973 with respect to certain securities, including government securities, because of the difficulty of obtaining these securities and the operational hardships that could result from the buy-in requirement of paragraph (m), particularly with respect to municipal obligations.[46]

The preamble to the proposed regulations also asked specifically whether the time frame for this buy-in requirement or any other time frames in Rule 15c3–3 were longer than necessary. One of these is found in the requirement in paragraph (d)(2) of Rule 15c3–3 that a broker or dealer take action to acquire securities shown as "failed to receive" for more than thirty days.

The commenters who addressed the appropriateness of making paragraph (m) of Rule 15c3–3 applicable to government securities opposed its inclusion, particularly with respect to mortgage-backed securities. They stated that fails of long duration are common in the case of mortgage-backed securities, and that it is likely to be very difficult to buy in a particular security, given the necessity of obtaining a security with a particular pool number.

With respect to paragraph (d)(2) of Rule 15c3–3 (and the similar principle incorporated in § 403.5(c) of the proposed regulations that is applicable to financial institutions that are government securities brokers or dealers), commenters suggested that the thirty-day time frame generally should not be shortened and that it is already too short for mortgage-backed securities, for the reasons cited above. Two of the commenters seemed to suggest that any buy-in requirements for the government securities market could affect its liquidity, although others appeared to support the buy-in requirements in general except for the operational problems with specific securities already mentioned. Two of the commenters suggested some sort of requirement for confirmation of fails as an alternative.

The temporary regulations retain the expansion of paragraph (m) of Rule 15c3–3 with certain modifications. The basic rationale for this provision, along with certain other provisions in Rule 15c3–3, is to require the close-out of transactions after a given period of time. The provision also tends to discourage customers from "playing the market" against a broker when the price of a security goes up after a sell order (other than a short sale) has been executed. The Department believes that these goals are also appropriate for the government securities market, although the provision may be of limited applicability in a market that is primarily a dealer market and where short sales are common practice. The modifications in these regulations make clear that to be deemed a "short sale" for purposes of the rule, the customer must so indicate to the broker or dealer. Also, a longer time period is provided for the buy-in procedure in the case of certain government securities that are more difficult to obtain.

Several commenters indicated that fails of sixty days or more are not uncommon with respect to mortgage-backed securities and suggested that a sixty-day buy-in period be allowed. The Department notes that this situation is likely to improve if the conversion of all mortgage-backed securities to book-entry form is successful. Rule 15c3–3(n) provides authority for an extension of the time periods of both paragraphs (d)(2) and (m), commensurate with the circumstances, upon application of a broker or dealer. For these reasons, the Department has concluded that a thirty-day period is sufficient for these securities for purposes of paragraph (m).

For the same reasons, the Department has concluded that the thirty-day time frame in paragraph (d)(2) of Rule 15c3–3 is appropriate. However, in § 403.5, which contains similar provisions applicable to government securities brokers and dealers that are financial institutions, the Department concluded that it would be appropriate to extend the buy-in period for fails of mortgage-backed securities to forty-five days since the appropriate regulatory agencies for financial institutions do not have authority to grant extensions of time on a case-by-case basis.

The Department plans to monitor the practices in this area with the assistance of the appropriate regulatory agencies and may propose modifications in the future, if appropriate.

[46] 38 FR 12103 (May 9, 1973).

With respect to the suggestion that a confirmation of fails-to-receive be required, the Department believes that it would generally be unworkable. Since a dealer may have several transactions at a time in any given security, questions would arise regarding which customer or customers should be treated as affected by the fail.

Sections 403.4 (j) and (k)

No changes have been made in the temporary rule to these paragraphs relating to the computation of reserve deposits other than technical changes to bring them into conformity with the "liquid capital" references in § 402.2 for registered government securities brokers and dealers other than government securities interdealer brokers or government securities brokers and dealers that are futures commission merchants registered with the CFTC.

One commenter requested confirmation that a government securities broker or dealer that is an affiliate of a financial institution may maintain its reserve deposits at its affiliated financial institution. The Department views this as acceptable, provided that the reserve account at the affiliated financial institution has been established in accordance with all of the requirements of SEC Rule 15c3–3 and of this part, including the requirement in 15c3–3(f) for notification from the financial institution that the reserve account is held for the exclusive benefit of customers of the broker or dealer and that it is not subject to any lien of the financial institution.

4. *Section 403.5.* This section sets forth the possession or control requirements applicable to financial institutions that are government securities brokers and dealers. It incorporates provisions applicable to hold-in-custody repurchase transactions that parallel the requirements of § 403.4(e) discussed above.

Three bank commenters requested that the proposed rules be clarified to indicate that the requirements for possession or control under §§ 403.5 and 450.4 do not prohibit the issuance of "due bills" which are permitted under Regulation D of the Federal Reserve Board, which prescribes reserve requirements for depository institutions.[47] A "due bill" is the obligation that results when a bank sells a security and receives payment but does not deliver the security to the purchasing customer. Section 204(a)(1)(iv) of Regulation D defines "deposit" to include due bills if, after three days from issuance of the due bill, the depository institution has not delivered the securities to the customer or collateralized the due bill with a security of the same type and comparable maturity to that purchased by the customer.

According to one commenter, due bills provide liquidity for the government securities market since a depository institution can offer a security to a customer at a time when the security is unavailable in the market. All three of the commenters on this issue suggested that the provisions of Regulation D provide adequate protection for customers receiving due bills instead of the actual security purchased and that the Department should not adopt duplicative regulations in this area.

The Department notes that Regulation D was issued "for the purpose of facilitating the implementation of monetary policy of the Federal Reserve System," [48] and is not a customer protection rule. Therefore, the Department does not believe that the proposed rules, insofar as they would apply to due bill transactions, constitute duplicative or contradictory regulation.

Under SEC Rule 15c3–3 and under § 403.4, a broker or dealer is precluded from creating a position similar to a due bill with respect to a customer and at the same time accepting and using the customer's funds in its business. The Department believes that banks should be subject to similar constraints. However, because banks are not subject to the provisions of Rule 15c3–3 that require setting aside funds to cover certain broker or dealer obligations to customers,[49] a somewhat different approach is necessary. To assure that good faith efforts are made to obtain the security sold to a customer, § 403.5 is amended in the temporary rules to provide that if the purchase of the security has not been initiated within 24 hours of receipt of the customer's funds, the depository institution is required to place the customer's funds in a deposit account belonging to such customer. It should be noted that if the depository institution has placed an order for the necessary security but the seller fails to deliver it, then the position would be subject to the 30-day possession or control requirement of § 403.5(c)(1)(iii).

Section 403.5(e) is new and is part of the Department's response to the issues discussed above in connection with new § 401.6. As explained above, branches and agencies of foreign banks that do not qualify for the exemption of § 101.6 must comply generally with the provisions of § 403.5 regarding custody of customer securities and securities that are the subject of a hold-in-custody repurchase transaction. In addition, under new § 403.5(e) a branch or agency is required to pledge assets in an amount that represents the net amounts relating to government securities owed to its securities customers.

In calculating the required pledge, the branch or agency may take into account amounts already pledged pursuant to Federal or state banking regulations with respect to customer deposits and other liabilities of the branch or agency, including securities-related third-party liabilities. The amount that must be pledged under § 403.5(e) is to be calculated in accordance with the provisions of SEC Rule 15c3–3(e) and Exhibit A thereto, except that customer credit balances are to be taken into account only to the extent that they relate to or arise from government securities activities.

One commenter pointed out that the terms "fully paid securities" and "excess margin securities" are defined for purposes of § 403.4 but not for this section. A new § 403.5(f)(1) has been added to incorporate the definitions of these terms set out in § 403.4 (b), (c), and (d). In addition, § 403.5(f)(2) includes a definition of the term "customer" that is similar to the definition in SEC Rule 15c3–3 but does not include a customer for which a financial institution holds funds but does not effect securities transactions or maintain securities on the customer's behalf. Another commenter also suggested that the terms "fully-paid" and "excess margin" securities in fact are inapplicable to banks, which do not extend margin to customers. The Department recognizes that in the past the terminology may not have been applied to financial institutions, given their limited securities activities. The Department nevertheless believes the concepts may be relevant, particularly as modified in § 403.4.

This commenter also suggested more generally that § 403.5 appeared not to recognize that broker-dealers and financial institutions function differently and have developed significantly different accounting structures. The Department believes that, since many of the entities involved in the government securities market, whether or not they are financial institutions, engage primarily in dealer activities rather than brokerage, the suggested differences are not as great as suggested by this

[47] 12 CFR Part 204.

[48] 12 CFR 204.1(b).

[49] Section 403.5(c) of the temporary rules, which makes provisions similar to SEC Rule 15c3–3 applicable to government securities brokers and dealers that are financial institutions, does not include the reserve requirement of SEC Rule 15c3–3(e).

BEST COPY AVAILABLE

commenter. The Department also understands that as a general proposition there may be differences in accounting structures depending on whether an entity is primarily a dealer or a broker. However, the Department also believes that the requirements of § 403.5, which parallel the basic concepts of SEC Rule 15c3–3 that apply to both brokers and dealers, are necessary to assure protection of customer securities to whatever extent they are held by a broker or dealer.

This same commenter stated that although securities are sold "from position to customer," they are not retained for customer accounts. The Department assumes that this comment means that the securities are not maintained for the customer by the bank's dealer function but are delivered to the bank's custody or safekeeping department, unless a customer specifically requests delivery to a third party. The Department continues to believe that the requirements of § 403.5 and Part 450 are appropriate to assure that customer securities are properly handled.

One commenter also suggested that the Department define specifically *when* a security becomes fully-paid. The Department does not believe that, as a general proposition, a definition more specific than the one already incorporated into both §§ 403.4 and 403.5 is feasible. As already noted, these definitions parallel the definitions found in SEC Rule 15c3–3.

5. *Section 403.6.* Section 403.6 is new. It is added simply to make clear that a registered futures commission merchant ("FCM") that is also a government securities broker or dealer must comply with the provisions of Part 403 with respect to all customer funds or securities except those that are incidental to the FCMs futures-related business. What constitutes customer funds or securities incidental to the futures-related business is defined in proposed SEC Rule 3a43–1, which provides that an FCM will not be a government securities broker or dealer if it affects certain specified transactions in government securities only as an incident to its futures-related business.

6. *Section 403.7.* Most commenters requested delayed effective dates to implement various provisions of this part. Many commenters requested a delay generally to implement the system modifications required to comply with SEC Rule 15c3–3. These commenters pointed out that, in contrast to the capital rule, where additional capital can be maintained to avoid violations, any inadvertent malfunctions in the systems required by Rule 15c3–3 could result in technical non-compliance with the rule.

Nearly all commenters requested a delay in the requirement to obtain a written repurchase agreement where the broker or dealer retains custody of the securities subject to the repurchase agreement. They stated that since the disclosure language to be included in the agreement will not be available until the final regulations are published in July, it would be desirable to delay preparation and distribution of the agreements until that time. Also, they indicated that based on their experience, it is a time-consuming process to obtain written agreements from customers, particularly where the customer must obtain approval of its board of directors or other managing authority. In this regard, a suggestion was also made that a written agreement should not be required before an initial repurchase transaction with a counterparty, provided it is obtained within thirty days after the first transaction.

Proposals for a delayed effective date for the requirement of obtaining a written agreement varied widely, with most suggesting some type of disclosure agreement in the interim. The PSA indicated that it was planning to revise its prototype master repurchase agreement as necessary to conform to these rules, and suggested that beginning August 25, 1987, new customers be required to execute repurchase agreements. PSA further proposed that in the case of existing customers, an agreement be in place by January 31, 1988, with a disclosure letter containing the disclosures required by these rules in the interim.

A few commenters requested a delay in the requirement to send confirmations of substitutions of securities subject to hold-in-custody repurchase agreements, based on changes that would be required in their current practice.

Section 403.7 is new. In response to the concerns in the comments about the time needed to develop systems that would enable compliance with SEC Rule 15c3–3, § 403.7 provides that such systems must be in place by the last business day of October. With respect to written repurchase agreements, the section essentially follows the PSA proposal and requires that for existing customers, a written agreement containing the provisions required by §§ 403.4(e) and 403.5(d) need not be in place until January 31, 1988, but that disclosures must be provided in the interim based on the disclosure language that appears in these temporary regulations. For new customers after July 25, 1987, written agreements are required beginning October 31, 1987, with disclosure required in the interim period. Although it may be current practice for some entities to engage in hold-in-custody repurchase transactions before an agreement is in place, the Department is of the opinion that an advance written agreement is desirable to assure proper consideration is given to the advisability of such transactions based on the required disclosures. The Department has therefore not adopted the proposal to allow an initial transaction without a written agreement, once the written agreement requirement becomes effective.

In the case of confirmations of substitttions, the Department has concluded that there is insufficient evidence of operational difficulties that will be incurred by a significant number of government securities brokers or dealers to provide a delayed effective date. Thus, the confirmation requirement will be effective July 25, 1987.

### *E. Part 404. Recordkeeping and Record Preservation*

Part 404 of the proposed regulations responded to the requirement of the Act that government securities brokers and dealers be required to make, keep current and preserve records relating to the operation of their businesses. The proposed rules on recordkeeping were not the subject of adverse comment except for the provisions pertaining to financial institutions that are government securities brokers or dealers.

1. *Section 404.4.* Seven comments addressed the requirement in § 404.4(a)(2)(i) that financial institution government securities brokers and dealers make and keep current a securities position ledger. Five comments questioned the necessity and/or appropriateness of this requirement. The comments made several arguments: (1) These institutions are already subject to appropriate regulatory agency reporting requirements that are adequate and therefore should not be burdened with additional requirements; (2) to the extent that there are perceived deficiencies in this area, the appropriate regulatory agency regulations should be changed; (3) the manner in which these financial institutions operate would make it difficult and costly to construct position records of the type required; and (4) a position record would serve no useful purpose because the proportion of an institution's position attributable to customers is small. The sixth comment did not object to the requirement but

pointed out that activities of a financial institution in its fiduciary capacity should be exempt from the recordkeeping requirements for the same reasons that activities in a fiduciary capacity are exempt under Part 450. The seventh comment did not object to the requirement, but requested a six month delay in the effective date of this requirement. Of the five comments that question this requirement, three requested a delayed effective date if the requirement is adopted.

The Department has carefully considered these comments and has modified § 404.4(a)(2)(i) to take into consideration what these comments have indicated concerning how financial institutions operate their dealer activities. It appears that the dealer area of the institution does not usually hold securities but instead transfers securities to safekeeping. Once securities are in safekeeping, that area of the institution is responsible for the specific location of the securities.

The rule as modified would limit the requirement for position records to those securities carried for the bank's own account or for the account of customers or others, such as affiliates. The dealer-bank would not be required to keep position records of the location of securities that had been transferred to safekeeping other than to note the safekeeping location. With regard to customer securities that the dealer has transferred to safekeeping, the financial institution government securities broker and dealer is required to comply with the Part 450 requirements concerning records, counts and reconciliations. In addition, the rule has been modified to make clear that it does not apply to securities held in a fiduciary capacity as defined in § 403.3(i) of these temporary rules. Finally, institutions subject to this securities position recordkeeping requirement will have until October 31, 1987 to develop systems to keep such records.

This modification would be consistent with the Municipal Securities Rulemaking Board Rule G–3(a)(iii), while assuring adequate records of the location and movement of customer securities by the requirement that the bank dealer comply with the Part 450 rules for securities held in safekeeping. The bank dealer would still be required to maintain a record of its own positions and the positions of customer securities that have not been transferred to safekeeping. The requirement that a financial institution dealer maintain a record of positions carried for its own account is intended to capture the financial institution's dealer inventory as well as all repurchase and reverse repurchase positions of the financial institution.

The Department also received a comment from the Institute of Foreign Bankers requesting that the exemption from the recordkeeping and record preservation requirements of §§ 404.2 and 404.3 for certain financial institutions be clarified and/or extended to cover all United States branches and agencies of foreign banks, to the extent that these entities comply with the recordkeeping requirements of their supervisory agency. The comment stated that branches and agencies of foreign banks are effectively subject to the rules of the Comptroller of the Currency and of the FDIC and that while uninsured state licensed branches and agencies are not subject to FRB recordkeeping requirements, they are subject to FRB supervision.

After consultation with the appropriate regulatory agencies, the Department has modified the rule to make clear that branches and agencies of foreign banks that comply with the recordkeeping requirements of the bank regulatory agency responsible for their supervision are exempt from the recordkeeping requirements of §§ 404.2 and 404.3.

2. *Section 404.6.* Three comments stated that the requirement in § 404.6 of the proposed rule that financial institutions that are government securities brokers and dealers conduct annual counts of customer securities that are not held in a fiduciary capacity is unnecessary. The comments also stated that the requirements of the appropriate regulatory agencies for these institutions were adequate.

The Department has deleted § 404.6 of the proposed rule as redundant. The Department notes that § 403.5 of these temporary rules requires financial institutions holding customer securities to comply with requirements of Part 450. Section 450.4(c) requires that securities held for customers be counted at least annually.

3. *Other portions of Part 404.* Sections 404.2 and 404.3 have been modified to reflect the different capital rules applicable to certain interdealer brokers and to CFTC-regulated entities. Except for these changes and clarifications of language, these sections and §§ 404.1 and 404.5 are adopted as proposed.

### *F. Part 405. Reporting and Audit Requirements*

The reporting and audit regulation generally follows the provisions of SEC Rules 17a–5, 17a–6 and 17a–11. Registered government securities brokers and dealers, except for interdealer brokers and CFTC-regulated entities, will be required to file reports on Form G–405, which is similar to the SEC FOCUS report. Interdealer brokers and CFTC-regulated entities will be required to file FOCUS reports. The Department received two general comments on Part 405, both favorable, and the temporary regulations reflect minimal changes from the proposed regulations, as noted below.

1. *Section 405.2.* This section requires registered government securities brokers and dealers to follow the requirements of SEC Rule 17a–5, concerning financial reporting and audits.[50] The rule as originally proposed is now paragraph (a) of the section and new paragraphs (b) and (c) have been added to apply to interdealer brokers and CFTC-regulated entities, respectively. These entities are required by § 402.1 (d) and (e) to follow capital rules that are more closely related to SEC Rule 15c3–1 than to § 402.2 of these rules. Therefore, they should file FOCUS reports, rather than reports on Form G–405, and other minor modifications are needed to conform the rule to their requirements.

2. *Section 405.3.* This section requires registered government securities brokers and dealers to follow the requirements of SEC Rule 17a–11, relating to supplementary "early warning" financial reports.[51] As is the case with § 405.2, modifications were needed to accommodate the special capital rules applicable to interdealer brokers and CFTC-regulated entities. The original proposal is now paragraph (a) and paragraphs (b) and (c) have been added to provide, respectively, the interdealer broker and CFTC-regulated entity modifications.

3. *Section 405.4.* This section requires government securities brokers and dealers to comply with the reporting, recordkeeping and record retention requirements of the Currency and Foreign Transaction Reporting Act of 1970. The Department received several comments suggesting that, at least as to financial institutions and registered brokers and dealers, the requirement was surplusage. After discussions with the Office of the Assistant Secretary of the Treasury (Enforcement), which is responsible for enforcement of these requirements, the Department has concluded that the section should be limited to registered government securities brokers and dealers. This will allow the SEC to use its authority under the Act to enforce the Currency and

[50] 17 CFR 240.17a–5.
[51] 17 CFR 240.17a–11.

Foreign Transaction Reporting Act requirements administratively against registered government securities brokers and dealers, as it may against registered brokers and dealers under Commission Rule 17a–8.[52]

*G. Part 450. Custodial Holdings of Government Securities by Depository Institutions*

This part governs the custody of government securities by financial institutions that are not government securities brokers or dealers. In addition, § 403.5 of Subchapter A of the regulations provides that financial institutions that are government securities brokers or dealers must comply with this part with respect to customer securities and, more particularly, securities that are the subject of hold-in-custody repurchase transactions.

One commenter stated that new federal regulation of nondealer depository institutions is unnecessary and inappropriate. Another commenter suggested that regulation in the area of custody and safekeeping of customers government securities by nondealer depository institutions should be promulgated by bank regulatory agencies rather than by the Department.

The Department disagrees with both of these comments. The Department has consulted with the bank regulatory agencies and has concluded, based upon information they have supplied as well as the Department's own analysis, that there is no explicit regulatory or supervisory framework governing the practices of depository institutions providing custodial or safekeeping services for customers except where securities are held in a fiduciary capacity. Furthermore, the GSA mandates that the Department prescribe the standards for the custody of government securities for nondealer financial institutions, taking into account existing regulation.

1. *Section 450.1.* This section describes the scope of Part 450. No comments were received on this section and no changes have been made.

2. *Section 450.2.* This section defines various terms for the purposes of the subchapter including "customer" and "fiduciary capacity." As to the definition of "customer," two clearing bank commenters stated that they only recognize as "customers" those persons or entities with whom they have a direct contractual relationship. They therefore requested that the definition be amended to provide that depository institutions cannot be responsible for the interests or rights of anyone with whom they have no direct contractual relationship.

In light of the discussion below concerning clearing banks and correspondent banks, the Department does not believe such a statement is appropriate or necessary. The responsibility set forth in this rule of a depository institution for securities belonging to customers of another entity is necessary to assure adequate protection of customer securities in general and is crucial to the acceptance of depository institutions as acceptable control locations for customer securities for purposes of SEC Rule 15c3–3 and Part 403. However, § 450.4 does not create contractual or other liabilities of the depository institution to the individual customers of the entity for which it is holding securities. Rather the requirement is intended to assure that the holding financial institution recognizes that securities that are identified to it in bulk as customer securities are to be kept free of liens and segregated from its own assets.

Another comment was made generally to the effect that a depository institution should not be required to investigate whether the securities it maintains for a broker or dealer are customer securities. For purposes of Part 450, a depository institution may rely on statements made by another entity as to what portion of the securities held at the depository institution represent securities of customers of such other entity. The depository institution is not required by the provisions of this part to initiate an investigation into the status of such securities.

The PSA requested clarification as to how the definition of "customer" would be applied in practice because it would seem to include a government securities broker or dealer when the depository institution holds securities of the customers of the broker or dealer. The PSA interpretation, which parallels a similar concept in the definition of customer in SEC Rule 15c3–3, is correct. To express this idea more clearly and avoid ambiguity, § 450.2(b) has been modified and a new paragraph (d) has been added to § 450.4 that affirmatively states that a depository institution shall treat a government securities broker or dealer, including a financial institution government securities broker or dealer, as a customer with respect to securities the government securities broker or dealer identifies as customer securities pursuant to Part 403. Note that under both the proposed rule and the modified temporary rule, a depository institution that is not a government securities broker or dealer is not excluded from the definition of customer.

Another commenter, without explanation, suggested that "fiduciary capacity" be expanded by adding "safekeeping agent" to the definition. The Department's purpose in defining "fiduciary capacity" was to distinguish fiduciary activities from purely custodial activities. Since the term "safekeeping agent" appears to denote a person or entity acting in a custodial capacity and the commenter provided no explanation of the need for its suggested addition, the Department has concluded that the amendment to the definition is inappropriate.

3. *Section 450.3.* This section provides an exemption for government securities held in a fiduciary capacity in a trust department, as well as custodial holdings in a trust department so long as the depository institution subjects such holdings to fiduciary standards. Several commenters suggested that this exemption be broadened because fiduciary activities and custodial services are not necessarily limited to a single trust department but are carried out in other departments or organizational units within the depository institution. One commenter suggested that the exemption be expanded to include such activities, regardless of location in the depository institution, as long as the institution agrees to and abides by all regulatory requirements applicable to fiduciary accounts. Another commenter asked what form the agreement to subject custodial arrangements to fiduciary standards must take in order to qualify for the exemption.

In response to these comments, § 450.3(a) has been amended to expand the exemption to include fiduciary and custodial activities conducted throughout a depository institution as long as (1) the depository institution has adopted policies and procedures applying fiduciary standards to such activities and (2) such activities are subject to examination for compliance with such standards by the appropriate regulatory agency. The Department notes that, in order to assist depository institutions in meeting this second requirement, it will be necessary for all of the appropriate regulatory agencies for financial institutions to adopt by October 31, 1987, appropriate procedures in their examination guidelines.

4. *Section 450.4.* This proposed rule required a depository institution to segregate customer securities from proprietary assets of the depository institution and to keep such securities

[52] 17 CFR 240.17a–8.

free of any charge, lien, or claim, unless agreed to in writing by the customer. Where customer securities are held by a depository institution through a correspondent bank or other custodian institution, the depository institution would be in compliance with this requirement if it had instructed the custodian to maintain the securities free of liens. The temporary rule contains essentially the same provisions with the additions and modifications noted below.

Segregation at FRB Level

Several commenters requested clarification as to whether this provision would require a depository institution that maintains an account at a Federal Reserve Bank to segregate customer securities in a separate account at the Federal Reserve Bank. These commenters pointed out that if such segregation were required, the volume of transactions on the Federal Reserve wire system ("Fedwire") would increase, creating problems at peak times of the day and increasing the operational costs. It was also noted that a requirement of segregation of customer securities at the Federal Reserve Bank level could potentially put bank dealers at a disadvantage in relation to other dealers who maintain accounts of securities at a depository institution, since the recording of transactions on the books of the dealer's depository institution can be completed at a later time, i.e., after the close of Fedwire.

The Department is of the opinion that segregation of customer securities at all levels of the book-entry system is desirable both as a means of assuring that such securities are kept free of liens and as a means of assuring that there are adequate internal controls to assure that customer securities positions are covered at all times. These aspects of the requirements of § 450.4 are especially important since banks are the primary acceptable control locations for customer securities under Part 403 of subchapter A and SEC Rule 15c3–3.

It is recognized, however, that to require segregation of customer securities at the Federal Reserve Bank level would require significant operational changes, which cannot practically be achieved in the short term. For the present, § 450.4(a) (formerly § 450.4(b)) has been modified with respect to depository institutions that maintain accounts at a Federal Reserve Bank. Such depository institutions will be deemed to have complied with the possession or control requirement if any lien granted to a Federal Reserve Bank in securities other than proprietary securities of the depository institution expressly excludes securities that the depository institution is required to keep free of liens pursuant to this part.

Applicability to Correspondent Banks

As noted in the discussion of the proposed rule, where government securities are being maintained by a depository institution for its customers (including counterparties to repurchase transactions) at a correspondent bank or other custodian institution, the depository institution would be required to instruct that entity to maintain possession or control of such securities free of all liens. It was the intention of the proposed rule that, to the extent it has received such an instruction, the correspondent bank or other custodian institution would be required to treat those securities as customer securities and likewise comply with the requirements of § 450.4 with respect to those securities. However, as one commenter noted, the applicability of the possession and control requirements in these circumstances was not clearly stated in the proposed rule.

Section § 450.4 has been restructured to set forth more clearly its applicability to correspondent banks and other custodian entities that hold securities for customers of another depository institution. New § 450.4(a)(2) of the temporary rules describes more specifically how a depository institution complies with the basic requirements for custody of customer securities when another custodian institution is involved in the chain of ownership. Note that neither this provision nor the recordkeeping requirements of § 450.4(b) require the custodian institution to keep records identifying the individual customers of the depository institution.

Applicability to Clearing Banks

As one clearing bank commenter noted, as applied to banks providing clearing services for government securities dealers, the requirements of § 450.4 would mean that a clearing bank would be required to move securities from the dealer clearance account to a segregated account whenever the dealer gives the clearing bank an instruction to do so. However, since clearing banks rely on securities in the dealer clearance account as collateral for all extensions of credit to the dealer to finance its daily trading activities, the result of requiring segregation at the direction of a dealer gives the dealer and not the clearing bank control over the amount of collateral available to secure that credit. This result would place a clearing bank in the untenable position of not being able to assure that its extensions of credit to a dealer were adequately secured.

For this reason, the Department has concluded that it is necessary to provide an exception from the requirements of Part 450 for securities maintained by a bank for a dealer for whom it provides clearing services. The Department believes that such an exception will not detract from the basic goal of protecting customer securities since the dealer involved will itself be subject to the possession and control requirements of proposed Part 403. Therefore, if a clearing bank fails to segregate securities at the end of a trading day because such securities continue to be required as collateral by the clearing bank, the dealer will be in violation of the Part 403 requirement to obtain possession or control of customer securities and will be required to send a notice of the failure to segregate to its regulatory agency. To further assure proper oversight in this area, Part 450 has been amended to require that the clearing bank itself also provide a notice to the dealer's appropriate regulatory agency.

Other Liens of Depository Institutions

Two clearing banks commented that the requirements of proposed § 450.4 appeared to preclude certain liens that traditionally have been recognized in favor of depository institutions. According to the commenters, a bank may hold customer securities in custody which have not been fully paid for and for which credit has been extended, or for which custodial fees are owed. In addition, one commenter stated that the provision does not recognize "traditional common law clearing liens" held by depository institutions or their custodians. Another commenter requested that the Department clarify and delay the application of this provision.

The proposed rule specifically permitted liens to which a customer had agreed in writing. In conformity with the basic structure of SEC Rule 15c3–3, this provision was intended to make clear that liens directly between a depository institution and its customer would be permitted and that the possession or control requirements were aimed at precluding rehypothecation. Since one commenter viewed the language as providing a broader exemption from possession or control requirements based solely upon the agreement of a customer, § 450.4(a) has been modified to make clear that customer securities must be kept free of liens of third parties, i.e., any entities other than the

depository institution holding the securities directly for such customer. The reference to liens agreed to in writing has been deleted. A new § 450.4(a)(5) has been added to make clear that, for depository institutions that are subject to Part 408, the prohibition against third-party liens applies only to fully paid and excess margin securities as defined in § 403.5(f)(1). In conformity with SEC Rule 15c3–3, where a financial institution that is a government securities broker or dealer extends credit to finance the purchase of a government security, it may rehypothecate that security to another entity that in turn is providing credit to the financial institution broker or dealer.

The Department believes that these changes respond to the concerns noted regarding the effect of the rule on liens for custodial fees as well as other liens between the depository institution and its customer.

### Securities Lending

A new § 450.4(a)(6) has been added to permit loans of customer securities by financial institutions if the transactions are carried out pursuant to the written agreement of the customer and in full compliance with the securities lending guidelines of the appropriate regulatory agencies.

### Recordkeeping Requirements

Section 450.4(b) also imposes a number of recordkeeping requirements on depository institutions holding securities for customers. Several commenters objected to the recordkeeping requirements. Two commenters felt that the fiduciary activities of depository institutions are supervised adequately by regulatory agencies and that, therefore, there is no need for recordkeeping requirements. However, the rule imposes recordkeeping requirements on custodial activities other than fiduciary activities. As described above, the Department has discussed this requirement with the appropriate regulatory agencies and determined that such requirements were needed in the area of custodial holdings of customer securities.

Two commenters indicated that the requirement that records of government securities held for customers be kept separate from other records is overly burdensome. One commenter stated that government security positions are part of computerized record facilities and that it would be impossible to keep records physically separate without great waste, duplication and unnecessary expense. Another commenter requested clarification of the provision as to whether the separation of records requires separation of government securities from other securities.

The Department's requirement that records of holdings of customer securities should be kept separate from other records of the depository institution does not require placement in a separate physical location. The provision is intended to require that records of customer securities be easily accessible and readable and that they be in a form that permits immediate location of any particular record. Furthermore, the rule does not require that a customer's government securities be kept separate from other securities of the customer as long as the securities are kept free of any charge, lien or claim as provided in the rule.

Section 450.4(b) (formerly § 450.4(c)) requires that a depository institution provide a system for identifying each government security held for a customer. Note that, as mentioned above, pursuant to new § 450.4(d) a government securities broker or dealer is to be treated as a customer with respect to securities that the government securities broker or dealer identifies as customer securities and with respect to securities it maintains in a Segregated Account as defined in § 403.4(f)(1). However, as explicitly stated in new paragraph (d), the depository institution maintaining such securities for the government securities broker or dealer is not required to keep records identifying individual customers of the government securities broker or dealer. Because of this addition and the modifications incorporated in § 450.4(a) as described above, language included in § 450.4(b)(1) of the proposed rule, which provided an exception for depository institutions holding securities for customers of other depository institutions or government securities brokers or dealers, has been eliminated as unnecessary.

One commenter pointed out that the majority of government securities are issued only in book-entry form and therefore records will only identify the amount of a given issue that is held for a particular customer. The rule has been modified to clarify that such records will satisfy the recordkeeping requirements.

Section 450.4(b) also requires that the depository institution keep records describing a customer's interest in a government security. One commenter pointed out that a depository institution will not necessarily know the nature of a customer's interest in a given security.

This requirement was not intended to place an affirmative duty on a depository institution to determine the exact extent of a customer's interest. It was, however, intended to require that a depository institution's records concerning a customer's securities contain any relevant information the depository institution actually has as to any limitations on a customer's interest, either because the depository institution itself has an interest in the security or because the depository institution has notice of another interest as may be the case pursuant to 31 CFR 357.12 of the Department's proposed regulations governing transfers of limited interests in Treasury book-entry securities.[53]

This section also requires that a depository institution's records "indicate all receipts and deliveries of government securities and all receipts and disbursements of cash in connection with such securities." The language parallels language found in regulations of the Federal financial institution supervisory agencies concerning securities transactions for customers.[54] Two commenters stated that a depository institution cannot link receipts and disbursements of cash with specific receipts and deliveries of securities.

The purpose of the provision in § 450.4(b) is to assure that a record is kept that reflects proper crediting of all principal and interest payments with respect to customer securities and also reflects the debit or credit, as appropriate, of proceeds in connection with a purchase or sale of such securities by a customer. It is unclear how this information could not be available with respect to a particular customer's account and the Department continues to believe that such records should be maintained by the depository institution.

For the most part, the monthly statement for a customer's demand deposit account and the associated debit and credit memoranda prepared by the bank as a result of a securities transaction or the payment of principal or interest to the customer will satisfy the requirements of this section regarding receipts and disbursements of cash. The section is not intended to suggest that the depository institution determine whether every receipt or disbursement initiated solely by the customer relates to a securities transaction, nor is it intended to suggest that the depository institution must keep records relating to any receipts and disbursements made in connection with such securities outside of the depository institution.

---

[53] 51 FR 43027 (November. 28, 1986).

[54] See 12 CFR 12.2(b); 12 CFR 344.3(b).

Section 450.4(b) also requires that a safekeeping receipt or a confirmation be issued for every government security held for a customer. Several commenters indicated that the requirement is impractical and unworkable and suggested that the provision be modified to permit periodic account statements or listings instead of individual confirmations. Others requested that the requirement should be negotiable with the customer and that the customer should be able to waive the requirement.

The Department has determined that periodic account statements are not an adequate substitute for individual safekeeping receipts and confirmations particularly where the bank has no responsibility to the customer except as a custodian. The Department, therefore, has not modified the proposed rule. In addition, the Department determined not to permit general customer waiver of confirmations because such a waiver would likely become a standard part of the depository institution's custodial agreements.

The Department recognizes that depository institutions may also be subject to regulations relating to confirmations that have been promulgated by the institution's appropriate regulatory agency and the question has arisen how those regulations affect the requirement of § 450.4(b). It is the Department's understanding that those regulations deal primarily with the timing, form and content of confirmations issued by financial institutions. Since § 450.4(b) does not contain such specific detail, it is the Department's view that those regulations complement the basic requirement of § 450.4(b). It should be noted, however, that for any depository institution subject to § 450.4(b), the provision must be complied with regardless of whether any other regulations are applicable.

One commenter noted that the requirement duplicated the requirement to send a confirmation that is included in 31 CFR 357.16 of the Department's proposed TRADES regulations that will govern generally transactions in Treasury book-entry securities.[55] This commenter suggested that the requirement in § 450.4 be retained with modifications and that the requirement in the proposed *Trades* regulations be eliminated. In preparing the TRADES regulations for publication in final form, the Department may consider whether it is appropriate to retain the requirement given the applicability of other regulations, including § 450.4, that also impose such a requirement.

One clearing bank commenter requested that the Department clarify whether it would be sufficient for purposes of § 450.4(b) (formerly § 450.4(a)) for records to show transactions processed (listing "purchases," "sales" and "reversals") and pending transactions (listing "sales due to settle," "purchases due to settle," "pending free delivery" and "fails"). Without additional detail it is difficult to be certain, but it appears possible that these listings would have sufficient specificity to indicate receipts and deliveries for purposes of § 450.4(b)(3).

Section 450.4(b)(5) requires that the depository institution's records provide an adequate basis for audit. Two commenters requested clarification as to who will perform the "audit" and what constitutes "adequacy." The person who is to perform the audit on behalf of the depository institution and what constitutes "adequacy" are to be determined by the appropriate examining regulatory agency.

Section 450.4(c) requires that counts of government securities held for customers be conducted annually and reconciled with customer account records. One commenter requested clarification as to what constitutes "counts" of government securities sufficient for compliance with the proposed provision. Another felt that the requirement should be eliminated because account positions of customers holding book-entry securities show only a single aggregate figure comprised of many different pieces.

Finally, § 450.4(d) has been added to clarify the duties of a depository institution with respect to securities identified as customer securities, or placed in a Segregated Account, by a government securities broker or dealer, including a financial institution government securities broker or dealer.

Some additional details concerning procedures to be used in a securities count have been included in this section. These procedural requirements were formerly included in § 404.6 of the proposed regulations, which has been deleted because it duplicated the requirements of this part. Periodic counts in both physical and book-entry form are needed to ensure that the government securities back the customer's position. Any further clarification as to procedures for counts are to be determined by the appropriate examining agency.

4. *Section 450.5.* This section is new. It provides that Part 450 will be effective October 31, 1987. Two commenters requested that the Department delay effectiveness of the regulation to allow financial institutions and systems vendors time to develop the necessary recordkeeping systems and procedures. The Department believes that a delayed effective date would be appropriate in recognition of the systems changes that financial institutions may be required to make in order to comply with Part 450. This provision parallels the delayed effective date for the general possession or control requirements of Part 403 specified in § 403.7(a).

### III. Executive Order 12291; Regulatory Flexibility Act; Burden on Competition

As noted in the preamble to the proposed regulations, the statutory timetable under which the Department is required to develop and publish these regulations provides no opportunity for a systematic study of the effect of the regulations on the economy, on small entities and on competition. The Department stated in that preamble that "based on discussions with government securities brokers and dealers, including those currently subject to federal regulation and those that are not, it is the Department's view that the proposed regulations will not impose any significant cost on those affected or affect the economy in a manner other than that explicitly required by the GSA. In addition, the Department believes that the proposed regulations will not have an unnecessary or inappropriate differential impact on classes of government securities brokers or dealers such as to create a burden on competition."[56] The Department did, however, ask for comments on these issues.

The Department received five comments that specifically mentioned issues related to the Regulatory Flexibility Act and several others that raised those issues by implication. In addition, the Department received eight comments on a related issue—the incorporation of SEC rules by reference—seven of which (including comments from the NASD, Public Securities Association and American Association of Certified Public Accountants) were favorable.

The two major issues cited with respect to the potential impact of the proposed regulations on small entities were their potential effect on small arbitrageurs and the possibility that the regulations concerning hold-in-custody repurchase agreements, which were designed to protect small investors,

[55] 51 FR 43027 (November. 28, 1987).

[56] 52 FR 5678 (February 25, 1987).

would instead make such investments unavailable to such investors.

The Department believes both issues have been dealt with in the temporary regulations in a manner that minimizes these impacts. First, with respect to small arbitrageurs, the major complaint was that the market risk factors of § 402.2 were so high that the arbitrageurs would be put out of business. The Department recognizes that the offset haircut factors, which are the ones that most impact arbitrage positions, were too high and has lowered them substantially, particularly for securities at the short end of the maturity spectrum. The Department believes that, as a result, these entities will be required only to be capitalized adequately to cover their risk to customers and to the market—an impact required by the GSA. Second, as discussed in the section-by-section analysis of Part 403, the Department has substantially limited the scope of transactions subject to strict rules concerning intra-day segregation of securities sold subject to hold-in-custody repurchase agreements. At the same time, the temporary regulations increase the required degree of disclosure for all such transactions with customers. As a result, the transactions will still remain available for small entities, who will be further benefited over the current situation by being given more complete information about precisely the degree of safety provided by the transactions.

For the above reasons, the Department concludes that the temporary regulations do not constitute a major regulation for purposes of Executive Order 12291 and that a regulatory impact analysis is not required. Similarly, it is hereby certified that the temporary regulations will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required.

The collection of information requirements contained in the proposed rules were submitted to the Office of Management and Budget ("OMB") pursuant to section 3504(h) of the Paperwork Reduction Act.[57] The Department received a few comments on those requirements as noted above.

No comments were received on any of the forms. However, after discussions with OMB, the Department has agreed to delete the requirement for information about educational background on Form G–FIN–4 as unnecessary to meet the statutory purposes of the form. The instructions to that form have also been modified to take into account the revised definition of "associated person" in § 400.3(c). Minor modifications have also been made in Form G–405 to correct errors and to take into account minor alterations in the capital rules. The collection of information requirements, as amended in the temporary regulations, have been approved by OMB.

[57] 44 U.S.C. 3504(h).

## Appendix A—Example of Capital Computation

*Example (1)*

On October 31, 1986 firm A's proprietary position contains a long position of Treasury notes due November 15, 1991 with a market value of $20 million and a short position of Treasury notes due October 15, 1990 with a market value of $30 million. The short position is financed through a reverse repurchase agreement with a contract value of $30 million. The reverse repurchase agreement terminates on January 30, 1987. The firm would enter these holdings on Schedule B,[1] "Calculation of Net Immediate Positions in Securities and Financings," the financing in row B (45–134 day maturity category) and the short and long positions in row F (3.5–7.5 year maturity category for conventional securities), as follows:

[1] Because Schedule A can only be filled out after the haircut calculations are completed, it is discussed in the last of these examples.

SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITION IN SECURITIES AND FINANCINGS

[In millions of dollars]

| Maturity category | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions |
|---|---|---|---|---|---|---|---|---|
| | Long | Short | Long | Short | | | | |
| | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| B 45–134 days | +30 | | | | +30 | | 0 | +30 |
| F 3.5–7.5 yr. (3–5.5 yr.) | +20 | −30 | +20 | +30 | 20 | −10 | | |
| Column # | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| | | | | | (1+3) | (2+4) | | (5+6) |

where the net immediate position is the sum of the positive and negative entries under "Total Securities and Financing Positions" and the offset portion is the lesser of the absolute values of the positive and negative entries under "Total Securities and Financing Positions."

*Example (2)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Example 1, a long position of Treasury bills due September 3, 1987 with a market value of $50 million. This bill position has been financed by a $50 million repurchase agreement terminating on August 14, 1987. The firm would enter these holdings on Schedule B, "Calculation of Net Immediate Positions in Securities and Financings," in row D (9–18 month maturity category for conventional securities) as follows:

SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITION IN SECURITIES AND FINANCINGS

[In millions of dollars]

| Maturity category | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions |
|---|---|---|---|---|---|---|---|---|
| | Long | Short | Long | Short | | | | |
| | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| D 9–18 mn | | −50 | +50 | | +50 | −50 | 50 | 0 |
| Column # | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| | | | | | (1+3) | (2+4) | | (5+6) |

where the net immediate position is the sum of the positive and negative entries under "Total Securities and Financing Positions" and the offset portion is the lesser of the absolute values of the positive and negative entries under "Total Securities and Financing Positions."

*Example (3)*

On October 31, 1986 firm A's proprietary position contains, in addition to the position given in Examples 1 and 2, a long position in commercial paper which has received a rating in one of their three highest categories from two nationally recognized statistical rating organizations and has a market value of $70 million, and a long position in a Eurodollar certificate of deposit with a market value of $80 million. The commercial paper matures on January 30, 1987, and the Eurodollar CD matures on February 13, 1987. The firm's proprietary position also contains short positions in a Treasury bill maturing on November 28, 1986 with a market value of $100 million, a domestic negotiable certificate of deposit maturing on March 31, 1987 with a market value of $90 million, and commercial paper which has not received a rating in one of their three highest categories from a least two nationally recognized statistical rating organizations. This commercial paper has a market value of $40 million and matures on May 15, 1987. These short positions are being financed by overnight reverse repurchase agreements with contract values of $99 million, $39.5 million, and $39.9 million, respectively. The firm would enter the reverse repurchase agreements, the holdings of the Treasury bill, the highly-rated commercial paper, and the domestic and Eurodollar CDs on Schedule B, "Calculation of Net Immediate Positions in Securities and Financings," in rows A, B, and C (0–44 day, 45–134 day, and 135 day–9 month maturity categories for conventional securities) as follows:

SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITIONS IN SECURITIES AND FINANCINGS

[In millions of dollars]

| Maturity category | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions |
|---|---|---|---|---|---|---|---|---|
| | Long | Short | Long | Short | Long | Short | | |
| | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| A 0–44 days | +228.5 | | | −100 | +228.5 | −100 | 100 | +128.5 |
| B 45–134 days | +30 | | +150 | | +180 | 0 | 0 | +180 |
| C 135 days-9 mn | | | | −90 | 0 | −90 | 0 | −90 |
| Column # | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| | | | | | (1+3) | (2+4) | | (5+6) |

where the net immediate position is the sum of the positive and negative entries under "Total Securities and Financing Positions" and the offset portion is the lesser of the absolute values of the positive and negative entries under "Total Securities and Financing Positions." The $40 million position in commercial paper which is not rated in one of their three highest categories by at least two rating agencies is not entered on this schedule because it is not a qualified money market instrument. The haircut on this position should be calculated as specified by the Security and Exchange Commission's Rule 15c3–1 and entered on Schedule A under "Other securities haircut (use SEC factors)." The long position in category B is combined with the financing entered in category B in Example 1 to calculate the net immediate position of +$180 million.

*Example (4)*

On October 31, 1987 firm A's proprietary position contains, in addition to the positions given in Example 1 through 3, long positions in a coupon stripped from a U.S. Treasury bond through the STRIPS program and due November 15, 1995 with a market value of $50 million, and a coupon physically stripped from a Treasury security in bearer form due November 15, 1988 with a market value of $15 million. It also contains a short position in a receipt based on a single coupon or principal payment from a Treasury security. The payment is due on November 15, 2001 and has a market value of $45 million. The short position is being financed by a overnight reverse repurchase agreement with a contract value of $43 million. The firm would enter the reverse repurchase agreement and these holdings of zero-coupon securities on schedule B, "Calculation of Net Immediate Positions in Securities and Financings," in row A, H, E, and I (9–12 years, 1.5–3 years, and 12–21 years maturity categories for zero-coupon instruments), respectively, as follows:

SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITIONS IN SECURITIES AND FINANCINGS

[In millions of dollars]

| Maturity category | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions |
|---|---|---|---|---|---|---|---|---|
| | Long | Short | Long | Short | | | | |
| | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| A 0–44 days | +271.5 | | | −100 | +271.5 | −100 | 100 | +171.5 |
| E 1.5–3.5 yr. (1.5–3 yr.) | | | +15 | | +15 | 0 | 0 | +15 |
| H 15–30 yr (9–12 yr.) | | | +50 | | +50 | 0 | 0 | +50 |
| I (12–21 yr.) | | | | −45 | 0 | −45 | 0 | −45 |
| Column # | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| | | | | | (1+3) | (2+4) | | (5+6) |

where the net immediate position is the sum of the positive and negative entries under "Total Securities and Financing Positions" and the offset portion is the lesser of the absolute values of the positive and negative entries under "Total Securities and Financing Positions." The reverse repurchase agreement is combined in category A with the financings and securities positions entered in Example 3.

*Example (5)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Examples 1 through 4, a long position in FNMA mortgage-backed securities with a market value of $30 million, and a short position in GNMA I adjustable rate mortgage-backed securities with a market value of $20 million. This short position is being financed by an overnight reverse repurchase agreement with a contract value of $19.5 million. The firm would enter the financing and these holdings of mortgage-backed securities on Schedule B, "Calculation of Net Immediate Positions in Securities and Financings," in the rows marked A, MB, and AR (the categories for mortgage-backed and adjustable rate mortgage-backed securities), respectively, as follows:

SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITIONS IN SECURITIES AND FINANCINGS

[In millions of dollars]

| Maturity category | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions |
|---|---|---|---|---|---|---|---|---|
| | Long | Short | Long | Short | | | | |
| | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| A 0–44 days | +291 | | | −100 | +291 | −100 | 100 | +191 |
| MB mortgage backed | | | +30 | | +30 | 0 | 0 | +30 |
| AR adjustable rate mortgage-backed | | | | −20 | 0 | −20 | 0 | −20 |
| Column # | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| | | | | | (1+3) | (2+4) | | (5+6) |

where the net immediate position is the sum of the positive and negative entries under "Total Securities and Financing Positions" and the offset portion is the lesser of the absolute values of the positive and negative entries under "Total Securities and Financing Positions." The reverse repurchase agreement is combined in category A with the financings and securities positions entered in Example 3 and 4.

*Example (6)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Examples 1 through 5, a short position in the Treasury bond due November 15, 1996 with a market value of $30 million. The firm has partially financed the short position by borrowing $25 million of the bonds (market value). The borrowing arrangement will terminate on April 30, 1987. The firm would enter this short position and its financing on schedule B, "Calculation of Net Immediate Positions in Securities and Financings," in rows G and C (7.5–15 year and 4.5–9 month maturity categories for conventional securities), respectively, as follows:

SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITIONS IN SECURITIES AND FINANCINGS

[In millions of dollars]

| Maturity category | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions |
|---|---|---|---|---|---|---|---|---|
| | Long | Short | Long | Short | Long | Short | | |
| | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| C 135 days—9 mn. | +25 | | | −90 | +25 | −90 | 25 | −65 |
| G 7.5–15 yr. (5.5–9 yr.) | | | | −30 | 0 | −30 | 0 | −30 |
| Column # | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| | | | | | (1+3) | (2+4) | | (5+6) |

where the net immediate position is the sum of the positive and negative entries under "Total Securities and Financing Positions" and the offset portion is the lesser of the absolute values of the positive and negative entries under "Total Securities and Financing Positions." The financing in category C is combined with the short position entered in category C in Example 3 to calculate the net immediate position of −$65 million

*Example (7)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Examples 1 through 6, a long when-issued position in the Treasury note due October 31, 1988. (Although this note was issued on October 31, 1986, in order to show an example of a when-issued position, it is postulated that the note has not yet been issued.) The position was put on at par for $50 million, but its market value has since increased to $50.1 million. The firm would enter this position as a immediate position on Schedule B, "Calculation of Net Immediate Positions in Securities and Financings," in row E (1.5–3.5 year maturity category for conventional securities) as follows:

SCHEDULE B.—CALCULATION OF IMMEDIATE POSITIONS IN SECURITIES AND FINANCINGS

[In millions of dollars]

| Maturity category | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions |
|---|---|---|---|---|---|---|---|---|
| | Long | Short | Long | Short | Long | Short | | |
| | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| E 1.5–3.5 (1.5–3 yr.) | | | +65.1 | | +65.1 | | 0 | 0 | +65.1 |
| | 1 | 2 | 3 | 4 | 5 | | 6 | 7 | 8 |
| | | | | | (1+3) | | | | (5+6) |

where the net immediate position is the sum of the positive and negative entries under "Total Securities and Financing Positions" and the offset portion is the lesser of the absolute values of the positive and negative entries under "Total Securities and Financings Positions." The entry of $65.1 million is the sum of this $50.1 million when-issued position and the $15 million position entered in category E in Example 4.

**Schedule C**

*Example (8)*

To calculate the net immediate position interim haircuts and the governments offset portion haircuts on the positions given in Examples 1 through 7, the offset portions and the net immediate positions are carried to Schedule C and entered in columns 7 and 8 in their respective maturity categories. The governments offset portion haircuts are determined by multiplying each governments offset portion by the corresponding governments offset portion factor. The governments offset portion haircut for maturity category C is $25 million×0.0003=$0.0075 million, or $7.5 thousand. The net immediate position interim haircuts are determined by multiplying each net immediate position by the corresponding net immediate position factor. The net immediate position interim haircut for maturity category C is −$65 million×0.002.0=−$0.13 million, or −$130 thousand. The completed Schedule C, "Governments Offset Portion and Net Immediate Position Interim Haircuts Calculation," reads as follows:

SCHEDULE C.—GOVERNMENTS OFFSET PORTION AND NET IMMEDIATE POSITION INTERIM HAIRCUTS CALCULATION

[In millions of dollars]

| Maturity category | Governments offset portion | | | Net immediate position | | |
|---|---|---|---|---|---|---|
| | Dollar amounts | Factors | Haircuts | Dollar amounts | Factors | Interim haircuts |
| | (+) | | (+) | (+/−) | | (+/−) |
| A 0-44 day | 100 | (1) | 0.0000 | +191 | (1) | 0.0000 |
| B 45-134 days | 0 | 0.0002 | .0000 | +180 | 0.0012 | +0.2160 |
| C 135 days-9 mn | 25 | 0003 | .0075 | −65 | .0020 | −.1300 |
| D 9-18 mn | 50 | .0007 | .0350 | 0 | .0045 | .0000 |
| E 1.5-3.5 yr. (1.5-3 yr.) | 0 | .0022 | .0000 | +65.1 | .0110 | +0.7161 |
| F 3.5-7.5 yr. (3-5 yr.) | 20 | .0044 | .0880 | −10 | .0220 | −0.2200 |
| G 7.5-15 yr. (5.5-9 yr.) | 0 | .0050 | .0000 | −30 | .0330 | −0.9900 |
| H 15-30 yr. (9-12 yr.) | 0 | .0100 | .0000 | +50 | .0500 | +2.5000 |
| I (12-21 yr.) | 0 | .0155 | .0000 | −45 | .0775 | −3.4875 |
| J (21 yr. & over) | 0 | .0338 | .0000 | 0 | .1125 | .0000 |
| MB mortgage-backed | 0 | .0066 | .0000 | +30 | .0330 | +0.9900 |
| AR adjustable rate mortgage-backed | 0 | .0022 | .0000 | −20 | .0110 | −0.2200 |
| Total Governments offset portion haircut | | | .1305 | | | |
| Column # | 7 | 9 | 10 (7×9) | 8 | 11 | 12 ((8×11) |

[1] None.

**Schedule D**

*Example (9)*

On October 31, 1986 firm A's proprietary position contains, in addition to the immediate positions given in Examples 1 through 7, a short position in forward contracts in GNMA I mortgage-backed securities with a market value of $5 million. The forward contracts mature January 15, 1987. The gross futures and forward interim haircut would be calculated by taking the negative of the product of 0.0330 (the net position haircut factor for mortgage-backed securities) and the market value of the position, −($5 million × 0.0330) = −$0.1650 million, or −$165 thousand. This haircut is then entered on Schedule D, "Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts," in the row marked MB (the category for mortgage-backed securities) as follows:

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| Maturity category | Net immediate position interim haircuts | Gross interim haircuts | | | | Aggregate interim haircuts | | Futures and options offset portions | Residual position interim haircuts |
|---|---|---|---|---|---|---|---|---|---|
| | | Futures and forward | | Options | | | | | |
| | (+/−) | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| MB mortgage-backed | +990.0 | | −165.0 | | | +990.0 | −165.0 | 165.0 | +825.0 |
| Column # | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 (17+18) |

where the positive aggregate interim haircut is the sum of all positive net immediate position, gross futures and forward, and gross options interim haircuts in category MB, and the negative aggregate interim haircut is the sum of all negative net immediate position, gross futures and forward, and gross options interim haircuts in category MB. The futures and options offset portion (column 19) is the smaller of the absolute values of the positive and negative aggregate interim haircuts, and the residual position interim haircut (column 20) is the sum of the positive and negative aggregate interim haircuts. The net immediate position interim haircut is carried over from column 12 of Schedule C.

*Example (10)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Examples 1 through 9, a long position of 25 futures contracts on Treasury bills with a closing price of $94.88. The futures contracts mature in March 1987. The market value of the 25 contracts is $24.68 million. The gross futures and forward interim haircut is calculated by multiplying 0.0012 (the net position haircut factor for maturity category B, 45–135 days) by the market value of the position, $24.68 million x 0.0012=$0.0296 million, or $29.6 thousand. Since the sum of the remaining time to maturity of the futures contract and the maturity of the underlying security is about 7.5 months, this haircut is entered in row C (4.5–9 month maturity category for

conventional securities) of Schedule D, "Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts," as follows:

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| Maturity category | Net immediate position interim haircuts | Gross interim haircuts | | | | Aggregate interim haircuts | | Futures and options offset portions | Residual position interim haircuts |
|---|---|---|---|---|---|---|---|---|---|
| | | Futures and forward | | Options | | | | | |
| | 1(+/−) | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| C 135 days-9 mn | −130.0 | +29.6 | | | | +29.6 | −130.0 | 29.6 | −100.4 |
| Column # | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 (17+18) |

where the positive aggregate interim haircut is the sum of all positive net immediate position, gross futures and forward, and gross options interim haircuts in category C, and the negative aggregate interim haircut is the sum of all negative net immediate position, gross futures and forward, and gross options interim haircuts in category C. The futures and options offset portion (column 19) is the smaller of the absolute values of the positive and negative aggregate interim haircuts, and the residual position interim haircut (column 20) is the sum of the positive and negative aggregate interim haircuts. The net immediate position interim haircut is carried over from column 12 of Schedule C.

*Example (11)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Examples 1 through 10, 25 purchased put option contracts on Treasury bill futures. The options expire in March 1987 and have an exercise price of 94.75. The closing premium on these options for October 31, is $0.19. The interim haircut on a purchased put is the lesser of the market value of the option contracts or the gross futures and forward interim haircut on the underlying bill futures contracts. The market value of the option contracts is found by multiplying the premium per $100 par value times the total par value of the underlying futures contracts, ($0.19/$100) x $25 million=$0.475 million, or $47.5 thousand. The gross futures and forward interim haircut on the underlying futures contract was calculated in Example 9 to be $29.6 thousand. The interim haircut on these purchased puts is equal to the negative of the lesser of these two values, −$29.6 thousand. This haircut is entered as follows on Schedule D, "Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts," in the row C (4.5–9 month maturity category for conventional securities) as were the underlying bill futures contracts:

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| Maturity category | Net immediate position interim haircuts | Gross interim haircuts | | | | Aggregate interim haircuts | | Futures and options offset portions | Residual position interim haircuts |
|---|---|---|---|---|---|---|---|---|---|
| | | Futures and forward | | Options | | | | | |
| | (+/−) | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| C 135 days-9 mn | −130.0 | +29.6 | | | −29.6 | +29.6 | −159.6 | 29.6 | −130.0 |
| Column # | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 (17+18) (17+18) |

where the positive aggregate interim haircut is the sum of all positive net immediate position, gross futures and forward, and gross options interim haircuts in category C, and the negative aggregate interim haircut is the sum of all negative net immediate position, gross futures and forward, and gross options interim haircuts in category C. The futures and options offset portion (column 19) is the smaller of the absolute values of the positive and negative aggregate interim haircuts, and the residual position interim haircut (column 20) is the sum of the positive and negative aggregate interim haircuts. The net immediate position interim haircut is carried over from column 12 of Schedule C.

*Example (12)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Examples 1 through 11, 40 purchased call option contracts on Treasury bonds due May 2016. The call options expire in December 1986 and have an exercise price of $94. The cash price of the bond is $95.78125. The closing premium on these options for October 31 is $2–18/32 ($2.5625 in decimals). The interim haircut on purchased calls is the lesser of the market value of the option contracts or the net immediate position interim haircut on the underlying bonds. The market value of the option contracts is found by multiplying the premium per $100 par value of the bond times the total par value of the underlying bonds ($2.5625/$100) x $4 million=$0.1025 million, or $102.5 thousand. The net immediate position interim haircut on the underlying bonds is found by multiplying 0.0500 (the net position haircut factor for maturity category H, 15–30 years for conventional securities) by the market value of the bonds, 0.0500 x 40 x $100,000 x $95.78125/$100=$191.6 thousand. The interim haircut on these purchased calls is equal to the lesser of these two values, $102.5 thousand. This haircut is entered on Schedule D, "Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts," in row H (15–30 year maturity category for conventional securities) as follows:

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| Maturity category | Net immediate position interim haircuts | Gross interim haircuts | | | | Aggregate interim haircuts | | Futures and options offset portions | Residual position interim haircuts |
|---|---|---|---|---|---|---|---|---|---|
| | | Futures and forward | | Options | | | | | |
| | (+/−) | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| H 15–30 yr. (9–12 yr.) | +2,500.0 | | | +102.5 | | +2,602.5 | 0.0 | 0.0 | +2,602.5 |
| Column # | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 (17+18) |

where the positive aggregate interim haircut is the sum of all positive net immediate position, gross futures and forward, and gross options interim haircuts in category H, and the negative aggregate interim haircut is the sum of all negative net immediate position, gross futures and forward, and gross options interim haircuts in category H. The futures and options offset portion (column 19) is the smaller of the absolute values of the positive and negative aggregate interim haircuts, and the residual position interim haircut (column 20) is the sum of the positive and negative aggregate interim haircuts. The net immediate position interim haircut is carried over from column 12 of Schedule C.

*Example (13)*

On October 31, 1986 firm A's proprietary position contains, in addition to the positions given in Examples 1 through 12, a long unlisted call on $7 million of the 7⅛ percent Treasury notes due August 15, 1991. The option contract expires January 15, 1987 and has an exercise price of $100. The cash price of the note is $102.34. The interim haircut on a long call position is the lesser of the market value of the option contract or the net immediate position interim haircut on the underlying notes. The market value of the option contract is $192.5 thousand. The net immediate position interim haircut on the underlying notes is found by multiplying 0.0220 (the net position haircut factor for maturity category F, 3.5–7.5 years for conventional securities) by the market value of the notes, 0.0220 x $102.34/$100 x $7 million = $0.1576 million, or $157.6 thousand. The interim haircut on this unlisted option is the lesser of these two values, $157.6 thousand. This haircut is entered on Schedule D, "Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts," in row F (3.5–7.5 year maturity category for conventional securities) as follows:

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| Maturity category | Net immediate position interim haircuts | Gross interim haircuts | | | | Aggregate interim haircuts | | Futures and options offset portions | Residual position interim haircuts |
|---|---|---|---|---|---|---|---|---|---|
| | | Futures and forward | | Options | | | | | |
| | (+/−) | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) |
| F 3.5–7.5 yr. (3–5.5 yr.) | −220.0 | | | +157.6 | | +157.6 | −220.0 | 157.6 | −62.4 |
| Column # | 12 | 13 | 14 | 15 | 16 | 17 | 18 | 19 | 20 (17+18) |

where the positive aggregate interim haircut is the sum of all positive net immediate position, gross futures and forward, and gross options interim haircuts in category F, and the negative aggregate interim haircut is the sum of all negative net immediate position, gross futures and forward, and gross options interim haircuts in category F. The futures and options offset portion (column 19) is the smaller of the absolute values of the positive and negative aggregate interim haircuts, and the residual position haircut (column 20) is the sum of the positive and negative aggregate interim haircuts. The net immediate position interim haircut is carried over from column 12 of Schedules C.

**Example (14)**

To calculate the total futures and options offset haircut, the futures and options offset haircut factor of 20 per cent is multiplied by the sum of all the futures and options offset portions, which have been entered in column 19. This calculation would be entered on Schedule D, "Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts," as follows:

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| Maturity category | Futures and options offset portions | Residual position interim haircuts |
|---|---|---|
| | (+) | (+/−) |
| B 45–134 days | 0.0 | +216.0 |
| C 135 days-9 mn. | 29.6 | −130.0 |
| D 9–18 mn. | 0.0 | 0.0 |
| E 1.5–3.5 yr. (1.5–3 yr.) | 0.0 | +716.1 |
| F 3.5–7.5 yr. (3–5.5 yr.) | 157.6 | −62.4 |
| G 7.5–15 yr. (5.5–9 yr.) | 0.0 | −990.0 |
| H 15–30 yr. (9–12 yr.) | 0.0 | +2,602.5 |
| I (12–21 yr.) | 0.0 | −3,487.5 |
| J (21 yr. and over) | 0.0 | 0.0 |
| MB mortgage-backed | 165.0 | +825.0 |
| AR adjustable rate mortgage-backed | 0.0 | −220.0 |
| Total Futures and Options Offset Portion: | $352.2 | |
| Factor: | ×20% | |
| Total Futures and Options Offset Haircut: | $70.4 | |
| Column # | 19 | 20 (17+18) |

**Schedule E**

*Example (15)*

[i] Schedule E is used to calculate the hedging disallowance haircuts, the net residual position interim haircuts, the total hedging disallowance haircut, and the residual net position haircut. The residual position interim haircut for each category is carried forward from Schedule D, column 20 to Schedule E, column 20. Categories between which a 20% hedging disallowance is permitted are the first to be paired. For firm A's positions given in Examples 1 through 13, categories E and F, with residual position interim haircuts of +$716.1 thousand and −$62.4 thousand, are first offset, leaving a net residual position interim haircut of +$653.7 thousand (+$716.1 thousand + −$62.4 thousand) in category E and a hedging disallowance haircut of $12.5 thousand in category F (20% × $62.4 thousand=$12.5 thousand). The second offset is between categories H and I with residual position interim haircuts of +$2,602.5 thousand and −$3,487.5 thousand, leaving a net residual position interim haircut of −$885.0 thousand in cateogry I and a hedging disallowance haircut of $520.5 thousand in category H. The results of these calculations would be recorded in rows E, F, H, and I of the 20% disallowance category of Schedule, E, "Calculation of Hedging Disallowance Haircuts When Netting Haircuts Across Categories," as follows:

SCHEDULE E.—CALCULATION OF HEDGING DISALLOWANCE HAIRCUTS WHEN NETTING HAIRCUTS ACROSS CATEGORIES

[In thousands of dollars]

| Maturity category | Residual position interim haircuts (+/−) | 20 percent disallowance | |
|---|---|---|---|
| | | Hedging disallowance haircuts (+) | Net residual position interim haircuts (+/−) |
| E 1.5–3.5 yr. (1.5–3 yr.) | +716.1 | 0.0 | +653.7 |
| F 3.5–7.5 yr. (3–5.5 yr.) | −62.4 | 12.5 | 0.0 |
| H. 15–30 yr. (9–12 yr.) | +2,602.5 | 520.5 | 0.0 |
| I (12–21 yr.) | −3,487.5 | 0.0 | −885.0 |
| Column # | 20 | 21 | 22 |

[ii] With completion of offsetting of category pairs to which the 20% hedging disallowance is applicable, categories between which the 30% hedging disallowance is applicable are offset. Category E's net residual position interim haircut of +$653.7 thousand is first offset against category G's residual position interim haircut of −$990 thousand, leaving a net residual position interim haircut of −$336.3 thousand in category G and a hedging disallowance haircut of $196.1 thousand in category E. The results of this first offset would be shown in rows E and G of Schedule E, "Calculation of Hedging Disallowance Haircuts when Netting Haircuts across Categories," as follows:

SCHEDULE E.—CALCULATION OF HEDGING DISALLOWANCE HAIRCUTS WHEN NETTING HAIRCUTS ACROSS CATEGORIES

(In thousands of dollars)

| Maturity category | Residual position interim haircuts (+/−) | 20 percent Disallowance: Net residual position interim haircuts (+/−) | 30 percent Disallowance: Hedging disallowance haircuts (+) | 30 percent Disallowance: Net residual position interim haircuts (+/−) |
|---|---|---|---|---|
| E 1.5–3.5 yr. (1.5–3 yr.) | +716.1 | +653.7 | 196.1 | 0.0 |
| G (7.5–15 yr.) (5.5–9 yr.) | −990.0 | | 0.0 | −336.3 |
| Column # | 20 | 21 | 22 | 23 |

The net residual position interim haircut of −$336.3 thousand in category G can be further offset against the residual position interim haircut of +$825.0 in category MB at this 30% level. This offsetting leaves a new net residual position interim haircut of +$488.7 in category MB. Category G's net residual position interim haircut becomes $0.0, but it receives a hedging disallowance haircut of $100.9. Finally, categories B and C with residual position interim haircuts of +$216.0 and −$130.0, respectively, can also be offset at the 30% level. This offsetting leaves a net residual position interim haircut of +$86.0 thousand in category B and a hedging disallowance haircut of $39.0 thousand in category C. The final results of all these calculations would be shown in rows B, C, E, G, and MB of Schedule E, "Calculation of Hedging Disallowance Haircuts when Netting Haircuts across Categories," as follows:

SCHEUDLE E.—CALCULATION OF HEDGING DISALLOWANCE HAIRCUTS WHEN NETTING HAIRCUTS ACROSS CATEGORIES

[In thousands of dollars]

| Maturity category | Residual position interim haircuts | 20 percent Disallowance | | 30 percent Disallowance | |
|---|---|---|---|---|---|
| | | Net residual position interim haircuts | | Hedging disallowance haircuts | Net residual position interim haircut |
| | (+/−) | (+/−) | | (+) | (+/−)* |
| B 45–134 days | +216.0 | | | 0.0 | +86.0 |
| C 135 days-9 mn | −130.0 | | | 39.0 | 0.0 |
| E 1.5–3.5 yr. (1.5–3 yr.) | +716.1 | +663.7 | | 196.1 | 0.0 |
| G 7.5–15 yr. (5.5–9 yr.) | −990.0 | | | 100.9 | 0.0 |
| MB mortgage-backed | +825.0 | | | 0.0 | +466.7 |
| Column # | 20 | | 22 | 23 | 24 |

[iii] At the 40% level there are no pairs remaining for which offsetting is both permissible and possible.

[iv] Calculation of the total hedging disallowance haircut and the residual net position haircut is shown on Schedule E in the last two columns, "Hedging Disallowance Haircuts" and "Qualified Netting Interim Haircuts," where the hedging disallowance haircut and the qualified netting interim haircut for each category are entered as follows:

SCHEDULE E.—CALCULATION OF HEDGING DISALLOWANCE HAIRCUTS WHEN NETTING HAIRCUTS ACROSS CATEGORIES

[In thousands of dollars]

| Maturity category | Hedging disallowance haircuts | Qualified netting interim haircuts |
|---|---|---|
| | (+) | (+) |
| B 45–134 days | 0.0 | 86.0 |
| C 135 days-9 mn | 39.0 | 0.0 |
| D 9–18 mn | 0.0 | 0.0 |
| E 1.5–3.5 yr (1.5–3 yr.) | 196.1 | 0.0 |
| F 3.5–7.5 yr (3–5.5 yr.) | 12.5 | 0.0 |
| G 7.5–15 yr (5.5–9 yr) | 100.9 | 0.0 |
| H 15–30 yr (9–12 yr.) | 520.5 | 0.0 |
| I (12–21 yr) | 0.0 | 985.0 |
| J (21 yr. and over) | 0.0 | 0.0 |
| MB mortgage-backed | 0.0 | 466.7 |
| AR adjustable rate mortgage-backed | 0.0 | 220.0 |
| Total hedging disallowance haircut | 869.0 | |
| Residual net position haircut | | 1,579.7 |
| Column | 27 | 28 |

**Schedule A**

**Example (16)**

On Schedule A haircuts from Schedules C through E and the elements of the liquid capital calculation are entered. Liquid capital and the capital-to-risk ratio are then calculated. On October 31, 1986, firm A has total ownership equity of $12,123.2 thousand and subordinated liabilities of $2,000.0 thousand, of which $853.3 thousand are non-allowable, or illiquid, assets. These amounts with various deductions and credits give firm A liquid capital of $13,121.4 thousand.

The sum of firm A's net credit exposure to each of its customers is $4,464 thousand. Included in this net credit exposure are firm A's exposure of $100 thousand on its when-issued position (the $50.1 million market value minus the $50 million contract value) and the market value of $192.5 thousand on the long unlisted option. Excluded from this figure is any net credit exposure, or portion thereof, which has already been deducted from or charged against liquid capital. Also excluded is the $80 thousand of excess exposure to a single counterparty used in calculating the concentration of credit haircut below. The counterparty exposure haircut of $223.2 thousand is found by taking five percent of the net credit exposure.

With one of its counterparties firm A has a net credit exposure of $2,048.2 thousand. This is in excess of 15 per cent of firm A's liquid capital of $13,121.4 thousand, so a concentration of credit haircut of $20 thousand is found by multiplying the excess, $80 thousand, by 25 per cent. A credit volatility haircut of $225 thousand is found by multiplying the larger of the qualifying long or short

money market positions, $150 million, by 0.15 per cent.

Since the $40 million commercial paper position is rated in one of the four highest rating categories (though not in one of the three highest) by two nationally recognized statistical rating organizations, it has a haircut of 2% x $40 million = $800 thousand according to SEC Rule 15c3–1.

The haircuts and the elements making up liquid capital are entered on Schedule A, "Liquid Capital Requirement Summary Computation," as follows:

**Schedule A.—*Liquid capital requirement summary computation***

[In thousands of dollars]

| | |
|---|---|
| 1. Liquid capital [1] | 13,121.4 |
| 2. Haircuts on security and financing positions including contractual commitments: | |
| a. Total governments offset portion haircut (Schedule C) | 130.5 |
| b. Total futures and options offset haircut (Schedule D) | 70.4 |
| c. Toital hedging disallowance haircut (Schedule E) | 869.0 |
| d. Residual net position haircut (Schedule E) | 1,679.7 |
| e. Other securities haircut (use SEC factors) | 800.0 |
| 3. Haircuts on credit exposure: | |
| a. Total counterparty exposure haircut | 223.2 |
| b. Total concentration of credit haircut | 397.9 |
| c. Total credit volatility haircut | 325.0 |
| 4. Total haircuts (sum of lines 2a through e, 3a, b, and c) | 4,017.6 |
| 5. Capital-to-risk ratio (line 1 divided by line 4) | 3.3:1 |

[1] Identical to the amount reported on line 3040 of the Report on Finances and Operations of Government Securities Brokers and Dealers, Form G–405.

A completed set of the remaining schedules, using firm A's positions from the examples above, follows.

SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITIONS IN SECURITIES AND FINANCINGS

| | Maturity category [1] | Financings | | Securities positions | | Total securities and financing positions | | Offset portions (+) | Net immediate positions (+/−) |
|---|---|---|---|---|---|---|---|---|---|
| | | Long [2] (+) | Short [2] (−) | Long (+) | Short (−) | (+) | (−) | | |
| A | 0–44 days | +291 | | | −100 | +291.0 | −100 | 100 | +191.0 |
| B | 45–134 days | +30 | | +150.0 | | +180.0 | 0 | 0 | +180.0 |
| C | 135 days–9 months | +25 | | | −90 | +25.0 | −90 | 25 | −65.0 |
| D | 9–18 months | | −50 | +50.0 | | +50.0 | −50 | 50 | 0 |
| E | 1.5–3.5 years (1.5–3 years) | | | +65.1 | | +65.1 | 0 | 0 | +65.1 |
| F | 3.5–7.5 years (3–5.5 years) | | | +20.0 | −30 | +20.0 | −30 | 20 | −10.0 |
| G | 7.5–9 years (5.5–9 years) | | | | −30 | 0 | −30 | 0 | −30.0 |
| H | 15–30 years (9–12 years) | | | +50.0 | | +50.0 | 0 | 0 | +50.0 |
| I | (12–21 years) | | | | −45 | 0 | −45 | 0 | −45.0 |
| J | (21 years and over) | | | | | | | | |
| MB | Mortgage-backed | | | +30.0 | | +30.0 | 0 | 0 | +30.0 |
| AR | Adjustable rate mortgage-backed. | | | | −20 | 0 | −20 | 0 | −20.0 |
| | Column Number | 1 | 2 | 3 | 4 | 5 (1+3) | 6 (2+4) | [3] 7 (Note 1) | [3] 8 (5+6) |

[1] The categories are designated in section 402.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in that category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same manner as all other instruments. A half year (.5) is always considered to be 6 months.

[2] Long financings are financings which provide securities to a broker or dealer; short financings are those which provide funds.

[3] Carry forward to Schedule C.

NOTE 1: The offset portion (Column 7) is the smaller of Columns 5 and 6.

SCHEDULE C.—GOVERNMENTS OFFSET PORTION AND NET IMMEDIATE POSITION INTERIM HAIRCUTS CALCULATION

| | Maturity category [1] | Governments offset portion | | | Net immediate position | | |
|---|---|---|---|---|---|---|---|
| | | Amounts (+) | Factors | Haircuts (+) | Amounts (+/−) | Factors | Interim haircuts (+/−) |
| A | 0–44 days | $100 | None | 0.0000 | +$191 | None | 0.0000 |
| B | 45–134 days | 0 | 0.0002 | 0.0000 | +180 | 0.0012 | +0.02160 |

SCHEDULE C.—GOVERNMENTS OFFSET PORTION AND NET IMMEDIATE POSITION INTERIM HAIRCUTS CALCULATION—Continued

| Maturity category [1] | Governments offset portion | | | Net immediate position | | |
|---|---|---|---|---|---|---|
| | Amounts (+) | Factors | Haircuts (+) | Amounts (+/−) | Factors | Interim haircuts (+/−) |
| Total Governments offset portion haircut | | | $0.1305 | | | |
| Column number | 7 (Note 1) | 9 | [3] 10 (7 x 9) | 8 (Note 1) | 11 | [3] 12 (8 x 11) |

[1] The categories are designated in section 402.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in the category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same manner as all other instruments. A half year (.5) is always considered to be 6 months.

[2] Carry to Schedule A, line 2a.

[3] Carry forward to Schedule D (or Schedule E, if no forwards, futures, or options).

NOTE 1.—From Schedule B.

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| | Maturity category [1] | Net immediate position interim haircuts (+/−) | Gross interim haircuts: Futures and forward (+) | Gross interim haircuts: Futures and forward (−) | Gross interim haircuts: Options (+) | Gross interim haircuts: Options (−) | Aggregate interim haircuts (+) | Aggregate interim haircuts (−) | Futures and options offset portions [2] (+) | Residual position interim haircuts (+/−) |
|---|---|---|---|---|---|---|---|---|---|---|
| B | 45–134 days | +216.0 | | | | | | | | +216.0 |
| C | 135 days-9 months | −130.0 | +29.6 | | | −29.6 | +29.6 | −159.6 | 29.6 | −130.0 |
| D | 9–18 months | 0.0 | | | | | | | | 0.0 |
| E | 1.5–3.5 years 1.5–3 years | +716.1 | | | | | | | | +716.1 |
| F | 3.5–7.5 years (3–5.5 years) | −220.0 | | | +157.6 | | +157.6 | −220.0 | 157.6 | −62.4 |
| G | 7.5–15 years (5.5–9 years) | −990.0 | | | | | | | | −990.0 |
| H | 15–30 years (9–12 years) | +2,500.0 | | | +102.5 | | +2,602.5 | 0.0 | 0.0 | +2,602.5 |
| I | (12–21 years) | −3,487.5 | | | | | | | | −3,487.5 |
| J | (21 years and over) | 0.0 | | | | | | | | 0.0 |
| MB | Mortgage-backed | +990.0 | | −165.0 | | | +990.0 | −165.0 | 165.0 | +825.0 |
| AR | Adjustable rate mortgage-backed | −220.0 | | | | | | | | −220.0 |
| | Total Futures and Options Offset: Portion | | | | | | | | $352.2 | |
| | Factor | | | | | | | | X20% | |
| | Total Futures and Options Offset Haircut | | | | | | | | $70.44 | |
| | Column Number | 12 (Note 1) | 13 | 14 | 15 | 16 | 17 | 18 | 19 (Note 2) | [4] 20 (17+18) |

[1] The categories are designated in section 402.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in the category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same manner as all other instruments. A half year is always considered to be 6 months.

[2] The total futures and options haircut is calculated from the total of column 19.

[3] Carry to Schedule A, line 2b.

[4] Carry forward to Schedule E.

NOTE 1: From Schedule C.

NOTE 2: Column 19 is the smaller of columns 17 and 18.

SCHEDULE E.—CALCULATION OF HEDGING DISALLOWANCE HAIRCUTS WHEN NETTING HAIRCUTS ACROSS CATEGORIES [1]

[In thousands of dollars]

| | Maturity category [2] | Residual position interim haircuts (+/−) | 20% disallowance | | 30% disallowance | | 40% disallowance | | Hedging disallowance haircuts (+) | Qualified netting interim haircuts (+) |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | Hedging disallowance haircuts (+) | Net residual position interim haircuts (+/−) | Hedging disallowance haircuts (+) | Net residual position interim haircuts (+/−) | Hedging disallowance haircuts (+) | Net residual position interim haircuts (+/−) | | |
| B | 45–134 days | +216.0 | | | 0.0 | +88.0 | | | 0.0 | 88.0 |
| C | 135 days-9 months. | −130.0 | | | 39.0 | 0.0 | | | 39.0 | 0.0 |
| D | 9–18 months | 0.0 | | | | | | | 0.0 | 0.0 |
| E | 1.5–3.5 years (1.5–3 years). | +716.1 | 0.0 | +659.7 | 196.1 | 0.0 | | | 196.1 | 0.0 |
| F | 3.5–7.5 years (3–5.5 years). | −62.4 | 12.5 | −0.0 | | | | | 12.5 | 0.0 |
| G | 7.5–15 years (5.5–9 years). | −990.0 | | | 100.9 | 0.0 | | | 100.9 | 0.0 |
| H | 15–30 years (9–12 years). | +2,602.5 | 520.5 | 0.0 | | | | | 520.5 | 0.0 |
| I | (12–21 years) | −3,487.5 | 0.0 | −885.0 | | | | | 0.0 | 885.0 |
| J | (21 years and over). | 0.0 | | | | | | | 0.0 | 0.0 |
| MB | Mortgaged-backed. | +825.0 | | | 0.0 | +488.7 | | | 0.0 | 488.7 |
| AR | Adjustable rate mortgage-backed | −220.0 | | | | | | | 0.0 | 220.0 |
| | Total Hedging Disallowance Haircut. | | | | | | | | 869.9 | |
| | Residual Net Position Haircut | | | | | | | | | 1,879.7 |
| | Column Number | 20 (Note 1) | 21 | 22 (Note 2) | 23 | 24 (Note 2) | 25 | 26 (Note 2) | [3] 27 (Note 3) | [4] 28 |

[1] See section 402.2(f)(3) for category pair hedging disallowance haircut factors.
[2] The categories are designated in section 402.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in the category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same as all other instruments. A half year (.5) is always considered to be 6 months.
[3] Column 27 carries forward to Schedule A, line 2c.
[4] Column 28 total carries forward to Schedule A, line 2d.
NOTE 1: From Schedule D (or Schedule C, if no forwards, futures, or options).
NOTE 2: Net of two offsetting haircuts of paired maturity categories.
NOTE 3: For every entry in column 20 there should be an entry in either column 27 or 28 (but never both).

## Appendix B—Treasury Market Risk Haircut Factor Derivations

The three major sets of haircut factors used in calculation of the Treasury market risk haircut capture in three different ways the market risk of positions in most government securities. The derivations of these three sets of factors is discussed below.

*Net Position Haircuts Factors*

Net position haircuts, found at § 402.2(f)(2) of the temporary rule, measure the market risk to a dealer with a net (long or short) position in U.S. Government and agency securities (including zero-coupon and mortgage-backed securities) and other high quality money market instruments. Securities are grouped into categories defined by their remaining term to maturity and each category is assigned a net position haircut factor based on the price risk of benchmark securities within the category. To account for risk, a dollar estimate of potential losses is computed by applying the net position haircut factor to the dollar size of the net position in the securities in a category.

Categories B, C, D, and G bracket a benchmark "on the run" security corresponding to a regularly issued Treasury security. Category H uses the 30-year bond as the benchmark since the Treasury no longer issues a 20-year bond at its regular auctions. Categories E and F contain more than one "on the run" security. For Category E the average of the 2- and 3-year securities is used as the benchmark security. For Category F the 5-year note is used as the benchmark since it more closely aligns with the midpoint of the category.

Net position haircuts for Treasury categories B through H were derived using weekly (Tuesday-to-Tuesday) Treasury yield curve data for each of the calendar years 1982 through 1986. The annual average price for each security was calculated using the average coupon (the weighted average coupon of the "on the run" securities for the year)

BEST COPY AVAILABLE

and the average yield (the average of Tuesday yields for the year). To measure price volatility for the haircuts, the price for each benchmark was recomputed using the average yield plus 2.5 times the standard deviation of the year's weekly changes in yields.[1] The percentage change in price represents the haircut factor. The final haircut factors were based on 1986 data, but these figures were checked against the factors of previous years in order to take into account a wider range of possible market conditions.

The same yield-to-price procedure was used to calculate haircuts for the two zero-coupon categories as was used for Treasuries. The yields for the zero-coupon benchmark securities were theoretical zero-coupon yields derived from the Treasury constant maturity yield curve.

The net position haircut for fixed-rate mortgage-backed securities was derived by correlating price movements of mortgage-backed securities with those of Treasuries. In the interest of simplicity, only one fixed-rate haircut was established, even though mortgage-backed securities trade differently depending on how close they are to par. The haircut was set for fixed-rate mortgage-backed securities trading at or close to par. In 1984, 1985, and 1986 the highest R-squares (squared correlation coefficients) between GNMA, FHLMC, and FNMA fixed-rate mortgaged-backed securities and Treasuries were in the seven- to ten-year maturity range. Thus the haircut for fixed-rate mortgage-backed securities was set equal to that of Category G.

The net position haircuts for adjustable-rate mortgage-backed securities were set using the same method as for fixed-rate securities. Correlations of price movements for Treasuries and adjustable-rate mortgage-backed securities were the highest in 1986 for the maturities in Category E. Thus the haircut for the AR category was set equal to that of Category E.

*Offset Haircut Factors*

Since only a long and a short position in the same security will exactly offset each other in terms of price movements, the net position haircut factors, which are applied only to the net position within a category, do not measure all the risk of the positions in that category.

[1] The standard deviations of the week-to-week changes in the yields for each benchmark security are used as the basic measure of yield volatility. Assuming a normal distribution, a range of plus or minus 2.5 standard deviations of the changes in yields will encompass approximately 99 percent of the week-to-week changes that might occur.

The offset haircut factors reflect the risk inherent in a hedge between any two securities within a category and the range of price volatility that can reasonably be expected within a category. The factors, which are found at § 402.2(f)(2) of the temporary rule, were based on the correlations (R-squared) between weekly yield changes in the benchmark and endpoint securities of the maturity categories using data from 1982 through 1986. The weekly yield changes in the "endpoint securities" are the changes in each Tuesday's constant maturity yields for the maturities corresponding to the endpoints of the categories.

Each benchmark to endpoint correlation was subtracted from one and converted to percentage terms to create a "disallowance factor," measuring lack of correlation between the two parts. Based on these figures a percentage disallowance was determined for each category and multiplied by the corresponding net position haircut factor to obtain the offset haircut factor.

*Hedging Disallowance Haircut Factors*

Hedging across maturity classes can reduce total risk. As the distance between maturity classes increases, however, the risk of unexpected variations in prices associated with the variability of the yield curve also increases. Reduction of total haircuts for hedging is permitted only if yield changes in the two categories are sufficiently well correlated. Even when hedging between two categories is permitted, the haircut on a net long position in one maturity category is not permitted to offset one for one the haircut for a net short position in another category. The hedging disallowance haircut factor determines the percent of the offset that is not permitted. The factors, which are found at § 402.2(f)(3) of the temporary rule, were derived from the correlations (R-squared) between weekly yield changes in the benchmark securities of the maturity categories using data from 1982 through 1986.

To compute the factors, the amount by which the movements in yields in one category do not correspond to movements in another category was determined. This non-correspondence factor for each pair of categories was found by subtracting the correlation factor from one and converting it to percentage form. Another ten percent was added to reflect the imperfections inherent in any hedge. The results were grouped into four classes according to the percent of the hedge, or offset, being disallowed: 20, 30, and 40 percent and no offset permitted. Hedging of the haircuts in any two categories is only allowed if the correlation between the category benchmarks is at least 65 to 70 percent (the 40 percent disallowance level).

**List of Subjects in 17 CFR Chapter IV**

Accounting, Accountants, Banks, banking, Brokers, Credit unions, Dealers, Federal home loan banks, Government securities, Government securities brokers and dealers, Investments, National banks, Savings and loan associations, Securities.

For the reasons set out in the preamble, Chapter IV of Title 17, *Code of Federal Regulations*, is added as set forth below.

**CHAPTER IV—DEPARTMENT OF THE TREASURY**

**Subchapter A—Regulations Under Section 15C of the Securities Exchange Act of 1934**

Part
400—Rules of General Application
401—Exemptions
402—Financial Responsibility
403—Protection of Customer Securities and Balances
404—Recordkeeping and Preservation of Records
405—Reports and Audit
449—Forms, Section 15C of the Securities Exchange Act of 1934

**Subchapter B—Regulations Under Title II of the Government Securities Act of 1986**

450—Custodial Holdings of Government Securities by Depository Institutions

**Subchapter A—Regulations Under Section 15C of the Securities Exchange Act of 1934**

**PART 400—RULES OF GENERAL APPLICATION**

Sec.
400.1 Scope of regulations.
400.2 Office responsible for regulations; filing of requests for exemptions, for interpretations, and of other materials.
400.3 Definitions.
400.4 Information concerning associated persons of financial institutions that are government securities brokers or dealers.
400.5 Amendments to application for registration and to notice of status as a government securities broker or dealer.
400.6 Notice of withdrawal from business as a government securities broker or dealer by a financial institution.

Authority: Sec. 101, Pub. L. 99–571, 100 Stat. 3209 (15 U.S.C. 78o–5).

**§ 400.1 Scope of regulations.**

(a) Title I of the Government Securities Act of 1986 (Pub. L. 99–571, 100 Stat. 3208) amends the Securities Exchange Act of 1934 (48 Stat. 881–905; 15 U.S.C. Chapter 2B) ("Act") by adding section 15C, authorizing the Secretary of the Treasury to promulgate regulations

BEST COPY AVAILABLE

concerning the financial responsibility, protection of customer securities and balances, recordkeeping and reporting of brokers and dealers in government securities. Those regulations constitute subchapter A of this chapter. Unless otherwise explicitly provided, all regulations in this subchapter apply to all government securities brokers or dealers, including registered brokers or dealers and financial institutions.

(b) Section 15C(a)(1)(A) of the Act (15 U.S.C. 78o–5(a)(1)(A)) requires all government securities brokers and government securities dealers, except those who are brokers or dealers registered pursuant to section 15 or section 15B of the Act or financial institutions, to register with the Securities and Exchange Commission ("Commission"). Regulations concerning registration are at § 240.15Ca2–1 *et seq.* of this title. The Commission is responsible for the interpretation of the definitions of government securities broker and government securities dealer and of the regulations at § 240.15Ca2–1 *et seq.*

(c) Section 15C(a)(1)(B)(i) of the Act (15 U.S.C. 78o–5(a)(1)(B)(i)) requires all government securities brokers or dealers that are also registered brokers or dealers to notify the Commission of their status as government securities brokers or dealers. Regulations concerning notice are at § 240.15Ca1–1 of this title.

(d) Section 15C(a)(1)(B)(i) of the Act also requires all government securities brokers or dealers that are financial institutions to notify the appropriate regulatory agency, as defined in section 3(a)(34)(G) of the Act (15 U.S.C. 78c(a)(34)(G)), of their status as government securities brokers or dealers. The form of notice, Form G–FIN, is at § 449.1 of this chapter. Forms are available from the appropriate regulatory agency.

**§ 400.2 Office responsible for regulations; filing of requests for exemptions, for interpretations and of other materials.**

(a) *Office responsible.* The regulations in this chapter are promulgated by the Assistant Secretary (Domestic Finance) pursuant to a delegation of authority from the Secretary of the Treasury. The office responsible for implementation of the regulations, including interpretations and action on requests for exemption, classification or modification, is the Office of the Deputy Assistant Secretary (Federal Finance).

(b)(1) *Exemptions and classifications.* Section 15C(a)(4) of the Act (15 U.S.C. 78o–5(a)(4)) authorizes the Secretary to exempt any government securities broker or dealer or class thereof, conditionally or unconditionally, from the requirements of registration or regulations promulgated under section 15C. In addition, section 15C(b)(3) of the Act (15 U.S.C. 78o–5(b)(3)) provides for classification, by the Secretary, of government securities brokers or dealers and authorizes the whole or partial exemption of classes from rules under section 15C or the application of different standards to different classes.

(2) *Interpretations.* Although the appropriate regulatory agencies, as defined in § 400.3, and the self-regulatory organizations, as defined in section 3(a)(26) of the Act (15 U.S.C. 78c(a)(26)), have enforcement responsibility under section 15C of the Act, Treasury is responsible for interpretation and amendment of the regulations under this chapter (with the exception of Forms G–FIN and G–FINW, §§ 449.1 and 449.2 of this chapter, which are the responsibility of the Board of Governors of the Federal Reserve System).

(c) *Requests for interpretations, exemptions, classifications.* (1) Interpretations under section 15C(b) of the Act (15 U.S.C. 78o–5(b)) and related sections and Treasury regulations thereunder may be provided, at the discretion of the Department, to firms or individuals actually or potentially affected by the Act or regulations, or to their representatives.

(2) Exemptions and classifications under sections 15C(a), (b) and (d) of the Act (15 U.S.C. 78o–5(a), (b), and (d)) and related sections and Treasury regulations thereunder may be provided at the discretion of the Department and after consultation with the SEC and the Board, to firms or individuals actually or potentially affected by the Act or regulations, or to their representatives.

(3) All requests for exemptions and classifications, and all requests for binding interpretations, shall be in writing, and shall conform to the following procedures.

(i) The names of the company or companies and all other persons involved shall be stated. Letters pertaining to unnamed companies or persons or hypothetical situations will not be answered.

(ii) The letter must contain a concise but complete statement of all material facts, a complete and accurate description of the entire transaction if the request is transactional (even though a request may apply to only a portion of a transaction), and a concise and unambiguous statement of the request, including precise statutory and regulatory citations.

(iii) The letter should indicate why the writer believes a problem exists or interpretation is needed, the writer's opinion on the matter, and the basis for such opinion.

(iv) If the writer requests confidential treatment of all or a portion of the request or response, this request and the basis therefor shall be included in a separate letter submitted at the same time as the request letter. If confidential treatment of a portion of a letter is requested, a copy of the letter with the portions for which such treatment is requested blocked out shall also be submitted.

(v) An original and two copies of each request letter shall be submitted to the Deputy Assistant Secretary (Federal Finance), Room 2334, Main Treasury Building, 1500 Pennsylvania Avenue, NW., Washington, DC 20220. The letter shall indicate in the upper right hand corner the particular sections of the Act and of the regulations at issue.

(4) A written response by the Department to a request filed as stated in paragraph (c)(3) of this section shall be binding, with respect to the requester, on the Department, but shall cease to be binding if the facts are not as stated in the request or, prospectively, if the Department issues a superseding interpretation. The Department understands that the appropriate regulatory agencies and self-regulatory organizations will give appropriate deference to binding interpretations of the Department. The Department also expects the SEC staff to reflect such interpretations in responding, pursuant to the established procedures of the Commission, to no-action requests concerning rules the SEC enforces.

(5) The Department may decline to issue an interpretation for any reason and, in particular, may require that a requester make inquiry of its appropriate regulatory agency, the Commission or designated examining authority before the Department responds to a request.

(6) The Department will also provide informal oral and written advice, but such advice is not binding on the Department or on any other agency or organization.

(7) (i) Except as provided in paragraph (c)(7)(ii) of this section, every letter or other written communication requesting the Department to provide interpretive legal advice under the Act or to grant, deny or modify an exemption, classification or modification of regulations, together with any written response thereto, shall be made available upon request for inspection and copying by any person 30 days after the response has been sent or given to the person requesting it.

(ii) Any person submitting a letter or communication may also submit therewith a request that it be accorded confidential treatment for a specified period of time, not exceeding 90 days after the expiration of such 30 days, together with a statement setting forth the considerations upon which the request for such treatment is made. If the Department determines that the request for confidential treatment should be denied, the requester will be given 30 days to withdraw the request.

(d) *Effect of Commission interpretations.* Interpretations of the Commission and its staff (including no-action positions) and of the designated examining authorities, of any Commission regulation expressly adopted by reference in these regulations shall be of the same effect as if the regulation being interpreted were solely the Commission's regulation. However, in the event the Treasury has issued a formal interpretation on the subject, the Treasury understands that the Commission will give that interpretation appropriate deference, particularly with respect to both subsequent no-action positions and the continued validity of prior no-action positions.

**§ 400.3 Definitions.**

Unless otherwise explicitly provided, in this subchapter and for the purposes of these regulations:

(a) "Act" means the Securities Exchange Act of 1934 (48 Stat. 881, 15 U.S.C. chapter 2B, as amended);

(b) "Appropriate regulatory agency" has the meaning set out in section 3(a)(34)(G) of the Act (15 U.S.C. 78c(a)(34)(G)), except that the appropriate regulatory agency for an entity insured by the Federal Savings and Loan Insurance Corporation is in all cases the Federal Home Loan Bank Board, and, with respect to a financial institution for which an appropriate regulatory agency is not explicitly designated, the appropriate regulatory agency is the SEC;

(c) "Associated person" means a person other than a person whose functions are solely clerical or ministerial:

(1) Directly engaged in any of the following activities in either a supervisory or non-supervisory capacity:

(i) Underwriting, trading or sales of government securities;

(ii) Financial advisory or consultant services for issuers in connection with the issuance of government securities;

(iii) Research or investment advice, other than general economic information or advice, with respect to government securities in connection with the activities described in paragraphs (c)(1)(i) and (c)(1)(ii) of this section;

(iv) Activities other than those specifically mentioned which involve communication, directly or indirectly, with public investors in government securities in connection with the activities described in paragraphs (c)(1)(i) and (c)(1)(ii) of this section; or

(2) Directly engaged in the following activities in a supervisory capacity:

(i) Processing and clearance activities with respect to government securities;

(ii) Maintenance of records involving any of the activities described in paragraph (c)(1);

*provided, however,*

(3) That in the case of a financial institution,

(i) Persons who function solely in a fiduciary capacity shall not be considered "associated persons";

(ii) Persons whose sole government securities activities are, without exercising any investment discretion and solely at the direction of customers, to receive and/or transmit customer orders to purchase or sell government securities, but who do not give investment advice or receive transaction-based compensation shall not be considered "associated persons"; and

(iii) Directors and senior officers of the financial institution who may from time to time set broad policy guidelines affecting the financial institution as a whole that are not directly related to the conduct of the financial institution's government securities business are not considered to be "directly engaged" in the activities described in this paragraph (c);

(d) "Board" means the Board of Governors of the Federal Reserve System;

(e) "Branch or agency of a foreign bank" means a Federal branch or Federal agency of a foreign bank or a State branch or State agency of a foreign bank as such terms are used in the International Banking Act of 1978, Pub. L. 95–369, 92 Stat. 607;

(f) "CFTC" means the Commodity Futures Trading Commission;

(g) "Commission" or "SEC" means the Securities and Exchange Commission;

(h) "Designated examining authority" and "Examining Authority" mean (1) in the case of a registered government securities broker or dealer that belongs to only one self-regulatory organization, such self-regulatory organization, and (2) in the case of a registered government securities broker or dealer that belongs to more than one self-regulatory organization, the self-regulatory organization designated by the Commission pursuant to section 17(d) of the Act (15 U.S.C. 78q(d)) as the entity with responsibility for examining such registered government securities broker or dealer;

(i) "Fiduciary capacity" includes trustee, executor, administrator, registrar, transfer agent, guardian, assignee, receiver, managing agent, and any other similar capacity involving the sole or shared exercise of discretion by a financial institution having fiduciary powers that is supervised by a federal or state financial institution regulatory agency;

(j) "Financial institution" has the meaning set out in section 3(a)(46) of the Act (15 U.S.C. 78c(a)(46)), and such term explicitly does not include a subsidiary or affiliate of an institution described in such section;

(k) "Government securities broker" has the meaning set out in section 3(a)(43) of the Act (15 U.S.C. 78c(a)(43)), and explicitly includes not only registered government securities brokers, but also registered brokers and financial institutions;

(l) "Government securities dealer" has the meaning set out in section 3(a)(44) of the Act (15 U.S.C. 78c(a)(44)), and explicitly includes not only registered government securities dealers, but also registered dealers and financial institutions;

(m) "Government securities" has the meaning set out in section 3(a)(42) of the Act (15 U.S.C. 78c(a)(42));

(n) "Registered broker or dealer" means a broker or dealer registered pursuant to section 15 or section 15B of the Act (15 U.S.C. 78o, 78o–4));

(o) "Registered government securities broker or dealer" means a government securities broker or dealer registered pursuant to section 15C(a)(1)(A) of the Act (15 U.S.C. 78o–5(a)(1)(A));

(p) "Secretary" means the Secretary of the Treasury; and

(q) "Treasury" or "Department" means the Department of the Treasury, including in particular the Bureau of the Public Debt.

**§ 400.4 Information concerning associated persons of financial institutions that are government securities brokers or dealers.**

(a) Every associated person of a financial institution that is a government securities broker or dealer that is not exempt pursuant to Part 401 of this chapter shall file with such financial institution a completed Form G–FIN–4 (§ 449.4 of this chapter) unless such person has on file with such financial institution a completed and current Form U–4 (promulgated by a self-

regulatory organization) or Form MSD–4 (as required for associated persons of bank municipal securities dealers).

(b) To the extent any information furnished by an associated person pursuant to paragraph (a) of this section (including information on a Form U–4 or Form MSD–4) is or becomes materially inaccurate or incomplete, such associated person shall promptly furnish in writing to such financial institution, in a form acceptable to the appropriate regulatory agency for such financial institution, a statement correcting such information.

(c) For the purpose of verifying the information furnished by an associated person pursuant to paragraph (a) of this section, every government securities broker or dealer that is a financial institution shall make inquiry of all other employers of such associated person during the immediately preceding three years concerning the accuracy and completeness of such information.

(d) Every government securities broker or dealer that is a financial institution not exempt from this section pursuant to Part 401 of this chapter shall:

(1) Promptly obtain and, within 10 days thereafter, file with the appropriate regulatory agency, in a form acceptable to such appropriate regulatory agency, the information required by paragraphs (a) and (b) of this section; and

(2) File with the appropriate regulatory agency within 30 days after the termination of the status of an individual as an associated person a Form G–FIN–5 (§ 449.4 of this chapter), unless

(i) The financial institution is required to and has filed a Form U–5 or Form MSD–5 with respect to such person; or

(ii) The financial institution notifies the appropriate regulatory agency that the individual will remain in the financial institution's employment and the financial institution will continue to update the information about such individual as provided in paragraph (b) of this section and will file a Form G–FIN–5 within 30 days after the termination of such individual's employment with the financial institution.

(e) Every notice and form filed pursuant to this section shall constitute a "report" within the meaning of sections 15, 15C and 32(a) of the Act (15 U.S.C. 78o, 78o–5, 78ff(a)).

(Approved by the Office of Management and Budget under control number 1505–0100)

### § 400.5 Amendments to application for registration and to notice of status as a government securities broker or dealer.

(a) (1) If the information contained in any application for registration as a government securities broker or dealer (other than the statements required by § 240.15Ca2–2 of this title) or in any amendment thereto, becomes inaccurate for any reason, the registered government securities broker or dealer shall file within 30 days thereafter an amendment on Form BD (§ 249.501 of this title) correcting such information, in accordance with the instructions provided therein.

(2) If the information contained in any notice of status as a government securities broker or dealer filed by a registered broker or dealer, or in any amendment thereto, becomes inaccurate for any reason, the registered broker or dealer shall file within 30 days an amendment on Form BD (§ 249.501 of this title) correcting such information, in accordance with the instructions provided therein.

(b) If the information contained in any notice of status as a government securities broker or dealer filed by a financial institution, or any amendment thereto, becomes inaccurate for any reason, the financial institution shall file within 30 days an amendment on Form G–FIN (§ 449.1 of this chapter) correcting such information, in accordance with the instructions provided therein.

(c) Every amendment filed pursuant to this section shall constitute a "report" within the meaning of sections 15, 15C and 32(a) of the Act (15 U.S.C. 78o, 78o–5, 78ff(a)).

(Approved by the Office of Management and Budget under control number 1505–0100)

### § 400.6 Notice of withdrawal from business as a government securities broker or dealer by a financial institution.

(a) Whenever a financial institution that is a government securities broker or dealer that is not exempt from the notice requirements of § 400.5 pursuant to Part 401 of this chapter, ceases to act as a government securities broker or dealer, it shall file with the appropriate regulatory agency notice of such cessation on Form G–FINW (§ 449.2 of this chapter) in accordance with the instructions contained therein.

(b) Except as provided in paragraph (c) of this section, a notice that a financial institution has ceased to act as a government securities broker or dealer shall become effective for all purposes on the 60th day after the filing thereof with the appropriate regulatory agency or within such shorter period of time as the appropriate regulatory agency determines.

(c) If the notice described in paragraph (a) of this section is filed with the appropriate regulatory agency any time after the date of the issuance of a notice or order by the appropriate regulatory agency instituting proceedings pursuant to section 15C(c)(2)(A) of the Act (15 U.S.C. 78o–5(c)(2)(A)) to censure, suspend, limit, or bar from acting as a government securities broker or government securities dealer the entity filing such notice, or if the appropriate regulatory agency has instituted any action against the entity filing such notice pursuant to section 15C(2)(B) of the Act (15 U.S.C. 78o–5(c)(2)(B)), the notice shall become effective pursuant to paragraph (b) of this section at such time and upon such terms and conditions as the appropriate regulatory agency deems necessary or appropriate in the public interest for the protection of investors.

(d) Every notice filed pursuant to this section shall constitute a "report" within the meaning of sections 15, 15C and 32(a) of the Act (15 U.S.C. 78o, 78o–5, 78ff(a)).

(Approved by the Office of Management and Budget under control number 1505–0100)

## PART 401—EXEMPTIONS

Sec.

401.1 Exemption for organizations handling transactions in United States Savings Bonds.
401.2 Exemption for depository institutions that submit tenders for the account of customers for purchase on original issue of United States Treasury securities.
401.3 Exemption for financial institutions that are engaged in limited government securities brokerage activities.
401.4 Exemption for financial institutions engaged in limited government securities dealer activities.
401.5 Exemption for corporate credit unions transacting limited government securities business with other credit unions.
401.6 Exemption for branches and agencies of foreign banks that deal solely with non-United States citizens resident offshore.
401.7 Temporary exemption for certain government securities brokers and dealers terminating business on or before October 31, 1987.
401.8 Temporary exemption for government securities brokers and dealers that are futures commission merchants registered with the CFTC.

Authority: Sec. 101, Pub. L. 99–571, 100 Stat. 3209 (15 U.S.C. 78o–5(a)(4)).

**§ 401.1 Exemption for organizations handling transactions in United States Savings Bonds.**

An organization that handles United States Savings Bond transactions, including a qualified issuing or paying agent or an organization that accommodates customers or employees by forwarding requested transactions to qualified issuing or paying agents or the Treasury and whose transactions in government securities are limited to these transactions and such other activities that are exempted by the regulations under this subchapter, shall be exempt from the provisions of section 15C (a), (b) and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations of this subchapter. For the purposes of this section, the term "United States Savings Bond" means any savings-type security offered by the Treasury, including all series of United States Savings Bonds, United States Savings Notes and United States Savings Stamps.

**§ 401.2 Exemption for depository institutions that submit tenders for the account of customers for purchase on original issue of United States Treasury securities.**

(a) Subject to the requirements of paragraph (b) of this section, a depository institution that submits tenders or subscriptions for purchase on original issue of United States Treasury securities for the account of customers on a fully disclosed basis, whose transactions in government securities are limited to such transactions and such other activities as have been exempted by regulation under this subchapter shall be exempt from the provisions of section 15C (a), (b) and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations of this subchapter.

(b) A depository institution that relies on the exemption contained in paragraph (a) of this section is required to comply with the regulations of Part 450 of this chapter concerning custodial holdings of government securities.

(c) For the purposes of this section, "depository institution" has the meaning stated in clauses (i) through (vi) of section 19(b)(1)(A) of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A) (i) through (vi)) and also includes a foreign bank, an agency or branch of a foreign bank and a commercial lending company owned or controlled by a foreign bank (as such terms are used in the International Banking Act of 1978, Pub. L. 95–369, 92 Stat. 607).

**§ 401.3 Exemption for financial institutions that are engaged in limited government securities brokerage activities.**

(a)(1) Subject to the requirements of paragraph (b) of this section, a financial institution shall be exempt from the provisions of sections 15C (a), (b), and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations of this subchapter, unless it acts as a government securities broker by:

(i) Holding itself out as a government securities broker or interdealer broker; or

(ii) Actively soliciting purchases or sales of government securities on an agency basis;

(2) Notwithstanding the provisions of paragraph (a)(1) of this section, a financial institution shall not be regarded as acting as a government securities broker within the meaning of this section if it:

(i) Effects fewer than 500 government securities brokerage transactions (other than transactions described in § 401.1 or § 401.2) per year; or

(ii) Effects all such transactions (other than transactions described in § 401.1 or § 401.2) pursuant to a contractual or other arrangement with one or more government securities brokers or dealers each of which has registered or filed notice pursuant to section 15C(a)(1) of the Act (15 U.S.C. 78o–5(a)(1)) (each referred to as the "transacting government securities broker or dealer") under which the transacting government securities broker or dealer will offer securities services on or off the premises of the financial institution, provided that:

(A) The transacting government securities broker or dealer is clearly identified to customers as the person performing the securities services;

(B) Financial institution employees perform only clerical and ministerial or order-taking functions in connection with government securities transactions unless such employees are associated persons (as defined in § 400.3(c) of this chapter) or registered representatives of the transacting government securities broker or dealer;

(C) Financial institution employees do not receive compensation for government securities activities other than clerical or ministerial functions unless such employees are associated persons (as defined in § 400.3(c) of this chapter) or registered representatives of the transacting government securities broker or dealer; and

(D) Such services are provided on a fully disclosed basis by the transacting government securities broker or dealer, i.e., the transacting government securities broker or dealer receives and maintains all required information concerning each customer, its trading and account.

(b) A financial institution that relies on the exemption contained in paragraph (a) of this section is required to comply with the regulations of Part 450 of this chapter concerning custodial holdings of government securities for customers.

(c) For the purposes of this section,

(1) "Financial institution" includes an insured credit union, as defined in 12 U.S.C. 1752(7); but

(2) "Financial institution" does not include a branch or agency of a foreign bank.

**§ 401.4 Exemption for financial institutions engaged in limited government securities dealer activities.**

(a) Subject to the requirements of paragraph (b) of this section, a financial institution shall be exempt from the provisions of sections 15C (a), (b), and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations of this subchapter if its government securities dealer activities are limited to one or more of the following activities:

(1) Sales or purchases in a fiduciary capacity;

(2) The sale and subsequent repurchase and the purchase and subsequent resale of government securities pursuant to a repurchase or reverse repurchase agreement; and

(3) Such other activities as have been exempted by regulation under this subchapter.

(b) A financial institution that relies on the exemption contained in paragraph (a) of this section is required to comply with:

(1) The regulations of Part 450 of this chapter concerning custodial holdings of government securities for customers; and

(2) Section 403.5(d) concerning certain repurchase transactions with customers.

(c) For the purposes of this section,

(1) "Financial institution" includes an insured credit union, as defined in 12 U.S.C. 1752(7); but

(2) "Financial institution" does not include a branch or agency of a foreign bank.

**§ 401.5 Exemption for corporate credit unions transacting limited government securities business with other credit unions.**

(a)(1) Subject to the requirements of paragraph (b) of this section, a corporate credit union shall be exempt from the provisions of section 15C (a), (b) and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations thereunder if its government securities dealer activities are limited to the sale and subsequent repurchase and the purchase and subsequent resale, each pursuant to a repurchase or reverse repurchase agreement, of government securities to

other credit unions and such other activities as have been exempted by regulation under this part.

(2) For the purposes of this section, "corporate credit union" means a credit union whose membership consists primarily of other credit unions and that is (i) a Federal credit union as defined in 12 U.S.C. 1752(1), (ii) an insured credit union as defined in 12 U.S.C. 1752(7), or (iii) a member of the National Credit Union Administration Central Liquidity Facility.

(b) A credit union that relies on the exemption contained in paragraph (a) of this section is required to comply with:

(1) The regulations of Part 450 of this chapter concerning custodial holdings of government securities; and

(2) Section 405.3(d) concerning certain repurchase transactions with customers.

**§ 401.6 Exemption for branches and agencies of foreign banks that deal solely with non-United States citizens resident offshore.**

(a) Subject to the requirements of paragraph (b) of this section, a branch or agency of a foreign bank shall be exempt from the provisions of section 15C (a), (b), and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations of this subchapter, if all the customers with or on behalf of whom it engages in government securities transactions are limited to foreign governments, agencies of foreign governments and other persons and entities who are not citizens of the United States and who reside or, in the case of a corporation, partnership or other entity, have their principal place of business, outside of the United States.

(b) A branch or agency that relies on the exemption contained in paragraph (a) of this section is required to comply with the regulations of Part 450 of this chapter concerning custodial holdings of government securities.

**§ 401.7 Temporary exemption for certain government securities brokers and dealers terminating business on or before October 31, 1987.**

During the period ending October 31, 1987, a government securities broker or dealer shall be exempt from the provisions of section 15C (a), (b), and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations of this subchapter if:

(a) Its government securities broker or dealer activities are limited to the performance of contractual obligations entered into prior to July 25, 1987;

(b) It is the subsidiary or affiliate of a government securities broker or dealer that has registered or given notice pursuant to section 15C(a)(1) of the Act (15 U.S.C. 78o–5(a)(1)); and

(c) It ceases all government securities broker or dealer activities on or before October 31, 1987.

**§ 401.8 Temporary exemption for government securities brokers and dealers that are futures commission merchants registered with the CFTC.**

During the period ending October 31, 1987, a government securities broker or dealer that is a futures commission merchant shall be exempt from the provisions of section 15C (a), (b), and (d) of the Act (15 U.S.C. 78o–5 (a), (b), (d)) and the regulations of this subchapter if:

(a) It is registered with the Commodity Futures Trading Commission under § 4f of the Commodity Exchange Act (7 U.S.C. 6f) and the regulations thereunder; and

(b) It is not currently the subject of any disciplinary action by any Federal or State entity regulating persons dealing in securities or commodities.

## PART 402—FINANCIAL RESPONSIBILITY

Sec.

402.1 Application of part to registered brokers and dealers and financial institutions; effective date.
402.2 Capital requirements for registered government securities brokers and dealers.
402.2a Appendix A—Calculation of market risk haircut for purposes of § 402.2(g)(2).
402.2b [Reserved]
402.2c Appendix C—Consolidated calculation of liquid capital and total haircuts for certain subsidiaries and affiliates.
402.2d Appendix D—Modification of § 240.15c3–1d of this title, relating to satisfactory subordination agreements, for purposes of § 402.2.

Authority: Sec. 101, Pub. L. 99–571, 100 Stat. 3209 (15 U.S.C. 78o–5(b)(1)(A), (b)(2)).

**§ 402.1 Application of part to registered brokers and dealers and financial institutions; effective date.**

(a) *Application of part.* This part applies to all government securities brokers and dealers, except as otherwise provided herein.

(b) *Registered brokers or dealers.* This part does not apply to a registered broker or dealer that is subject to § 240.15c3–1 of this title (SEC Rule 15c3–1).

(c) *Financial institutions.* This part does not apply to a government securities broker or dealer that is a financial institution and that is:

(1) Subject to the rules and regulations of its appropriate regulatory agency concerning capital requirements, or

(2) A branch or agency of a foreign bank subject to regulation, supervision, and examination by State or Federal authorities having regulatory or supervisory authority over commercial bank and trust companies.

(d) *Futures commission merchants.* A futures commission merchant subject to § 1.17 of this title that is a government securities broker or dealer but is not a registered broker or dealer shall not be subject to the limitations of this Part 402 but rather to the capital requirement of § 1.17 or § 240.15c3–1 of this title, whichever is greater.

(e) *Government securities interdealer broker.* (1) A government securities interdealer broker, as defined in paragraph (e)(2) of this section, may, with the prior written consent of the Secretary, elect not to be subject to the limitations of this Part 402 but rather to be subject to the requirements of § 240.15c3–1 of this title (SEC Rule 15c3–1) except paragraph (c)(2)(ix) thereof, and paragraphs (e) (3), (4), (5), (6), and (7) of this section by filing such election in writing with its designated examining authority. A government securities interdealer broker may not revoke such election without the written consent of its designated examining authority.

(2)(i) "Government securities interdealer broker" means an entity engaged exclusively in business as a broker effecting transactions in government securities, on a fully disclosed or partially disclosed basis, for counterparties that are government securities brokers or dealers who have registered or given notice pursuant to section 15C(a)(1) of the Act (15 U.S.C. 78o–5(a)(1)), and that promptly transmits all funds and delivers all securities received in connection with its activities as a government securities interdealer broker and does not otherwise hold funds or securities for or owe money or securities to its counterparties and, except as provided in paragraph (e)(2)(ii) of this section, does not have or maintain any government securities in its proprietary or other accounts. For the purpose of this paragraph (e)(2)(i), "partially disclosed basis" means that the counterparties, if not aware of the exact identity of each other, have the right to obtain such information, or are aware and have consented to the identity of the specific group of entities from which the other counterparty is chosen.

(ii) A government securities interdealer broker may have or maintain government securities in its proprietary or other accounts only as a result of:

(A) Engaging in overnight reverse repurchase or securities borrowed transactions solely for the purpose of facilitating the process of clearing government securities transactions;

(B) Engaging in overnight repurchase or securities loaned transactions solely for the purpose of reducing its financing expense in connection with the clearance of government securities transactions;

(C) Subordinated loans subject to satisfactory subordination agreements pursuant to § 240.15c3–1(d) of this title;

(D) Collateral or depository requirements of a clearing corporation or association with which it participates in the clearance of government securities transactions; or

(E) The investment of its excess cash. The maturities of any government securities held or maintained under paragraphs (e)(2)(ii) (C), (D), or (E) of this section may not exceed one year.

(3) In order to qualify to operate under this paragraph (e), a government securities interdealer broker shall at all times have and maintain net capital, as defined in § 240.15c3–1(c)(2) of this title with the modifications of this paragraph (e), of not less that $1,000,000.

(4) For purposes of this paragraph (e), a government securities interdealer broker need not deduct net pair-off receivables and money differences outstanding no more than one business day and give-up receivables outstanding no more than 30 days from the billing date, which shall be no later than the last day of the month in which they arise, as otherwise would be required under § 240.15c3–1(c)(2)(iv)(B) of this title.

(5) For purposes of this paragraph (e), a government securities interdealer broker shall deduct from net worth ¼ of 1 percent of the contract value of each government securities failed-to-deliver contract which is outstanding 5 business days or longer. Such deduction shall be increased by any excess of the contract price of the failed-to-deliver contract over the market value of the underlying security.

(6) For purposes of this paragraph (e), a government securities interdealer broker may exclude from its aggregate indebtedness computation indebtedness adequately collateralized by government securities outstanding for not more than one business day and offset by government securities failed to deliver of the same issue and quantity. In no event may a government securities interdealer broker exclude any overnight bank loan attributable to the same government securities failed-to deliver contract for more than one business day. A government securities interdealer broker need not deduct from net worth the amount by which the market value of securities failed to receive outstanding longer than thirty (30) calendar days exceeds the contract value of those failed to receive as required by § 240.15c3–1(c)(2)(iv)(E) of this title.

(7)(i) For purposes of this paragraph (e), a government securities interdealer broker shall deduct from net worth 5 percent of its net credit exposure to each counterparty.

(ii) *Net exposure.* For purposes of this paragraph (e), net exposure shall equal:

(A) The sum of the dollar amount of funds, debt instruments, other securities, and other inventory at risk, in the first instance, to the government securities interdealer broker in the event of the counterparty's default,

(B) Reduced, but not to less than zero, by the sum of:

(*1*) The dollar amount of funds, debt instruments, other securities, and other inventory at risk, in the first instance, to the counterparty in the event of the government securities interdealer broker's default;

(*2*) The deductions taken from net worth for unsecured receivables, repurchase and reverse repurchase deficits, aged fails to deliver, and aged fails to receive arising from transactions with the counterparty;

(*3*) Demand deposits in the case where the counterparty is a commercial bank;

(*4*) Custodial holdings of securities in the case where the counterparty is a clearing bank or clearing broker of the government securities interdealer broker; and

(*5*) Exposure to a counterparty due to holding marketable instruments subject to market risk haircuts under Appendix A to this section (§ 402.2a) for which the counterparty is the obligor.

(8) On the application of the government securities interdealer broker, the designated examining authority may extend the periods of time in this paragraph (e) if it determines that the extension is warranted because of exceptional circumstances and that the government securities interdealer broker is acting in good faith.

(f) *Effective Date.* This part shall be effective July 25, 1987, *Provided however*, that until the last business day in October 1987, registered government securities brokers and dealers need not comply with § 402.2(a), (b), and (c) as long as:

(1) A registered government securities broker or dealer that acts solely as an introducing broker within the meaning of § 240.15c3–1(a)(2) of this title has and maintains liquid capital, as defined in § 402.2(d), in an amount of not less than $5,000; and

(2) Any other registered government securities broker or dealer has and maintains liquid capital, as defined in § 402.2(d), in an amount of not less than $50,000.

**§ 402.2 Capital requirements for registered government securities brokers and dealers.**

(a) *General rule.* No government securities broker or dealer shall permit its liquid capital to be below an amount equal to 120 percent of total haircuts as defined in paragraph (g) of this section.

(b) *Minimum liquid capital.* Notwithstanding the provisions of paragraph (a) of this section, a government securities broker or dealer shall have and maintain liquid capital in an amount not less than $25,000, after deducting total haircuts as defined in paragraph (g) of this section.

(c) *Minimum liquid capital for introducing brokers.* Notwithstanding the provisions of paragraphs (a) and (b) of this section, a government securities broker or dealer that acts solely as an introducing broker within the meaning of § 240.15c3–1(a)(2) of this title, shall maintain liquid capital in an amount not less than $5,000, after deducting total haircuts as defined in paragraph (g) of this section.

(d) *Liquid capital.* "Liquid capital" means net capital as defined in § 240.15c3–1(c)(2) of this title with the following modifications:

(1) The percentages used to calculate the deductions for failed to deliver contracts required by § 240.15c3–1(c)(2)(ix) of this title when the underlying instrument is a Treasury market risk instrument as defined in paragraph (e) of this section are the appropriate net position haircut factors specified in paragraph (f)(2) of this section;

(2) The percentages used to calculated deductions required by § 240.15c3–1(c)(2)(iv)(B) of this title for securities that are Treasury market risk instruments are the appropriate net position haircut factors specified in paragraph (f)(2) of this section;

(3) The deductions from net worth required by § 240.15c3–1 (c)(2)(vi) and (c)(2)(viii) of this title and the adjustments to net worth set forth in § 240.15c3–1a and § 240.15c3–1b of this title (Appendices A and B to SEC Rule 15c3–1) are omitted;

(4) Net pair-off receivables and money differences outstanding no more than one business day and give-up receivables outstanding no more than 30 days from the billing date, which shall be no later than the last day of the month in which they arise, need not be deducted as otherwise would be

required under § 240.15c3–1(c)(2)(iv)(B) of this title; and

(5) In determining net worth, all long and short positions in unlisted options that are Treasury market risk instruments shall be evaluated in the manner set forth in § 240.15c3–1(c)(2)(i)(B)(*1*) and not in the manner set forth in § 240.15c3–1(c)(2)(i)(B)(*2*) of this title.

(e) *Treasury market risk instruments.* (1) For purposes of this part, the term "Treasury market risk instrument" means the following dollar-denominated securities, debt instruments, and derivative instruments:

(i) Government securities, except equity securities and those mortgage-backed securities described in paragraph (e)(2) of this section;

(ii) Zero-coupon receipts or certificates based on marketable Treasury notes or bonds;

(iii) Certificates of deposit of no more than one year to maturity;

(iv) Bankers acceptances;

(v) Commercial paper of no more than one year to maturity rated in one of the three highest categories by at least two nationally recognized statistical rating organizations;

(vi) Futures, forwards, and options on Treasury market risk instruments described in paragraphs (e)(1) (i) through (v) of this section or on time deposits whose changes in yield are closely correlated with the Treasury market risk instruments described in paragraph (e)(1)(iii) of this section, settled on a cash or delivery basis; and

(vii) Options on those futures contracts described in paragraph (e)(1)(vi) of this section, settled on a cash or delivery basis.

(2) "Treasury market risk instrument" does not include mortgage-backed securities that do not pass through to each security holder on a pro rata basis a distribution based on the monthly payments and prepayments of principal and interest on the underlying pool of mortgage collateral less fees and expenses.

(f)(1) *Haircut categories.* For purposes of this part, the applicable catgories within which non-zero-coupon and zero-coupon Treasury market risk instruments are classified are:

| Category | Term or type for non-zero-coupon instruments | Term for zero-coupon instruments |
|---|---|---|
| A | Less than 45 days | Less than 45 days. |
| B | At least 45 days but less than 135 days | At least 45 days but less than 135 days. |
| C | At least 135 days but less than 9 months | At least 135 days but less than 9 months. |
| D | At least 9 months but less than 1 year, 6 months | At least 9 months but less than 1 year, 6 months. |
| E | At least 1 year, 6 months but less than 3 years, 6 months | At least 1 year, 6 months but less than 3 years. |
| F | At least 3 years but less than 7 years, 6 months | At least 3 years, 6 months but less than 5 years, 6 months. |
| G | At least 7 years, 6 months but less than 15 years | At least 5 years, 6 months but less than 9 years. |
| H | 15 years and over | At least 9 years, but less than 12 years. |
| I | | At least 12 years but less than 21 years. |
| J | | 21 years and over. |
| MB | All fixed rate mortgage-backed securities that are Treasury market risk instruments. | |
| AR | All adjustable rate mortgage-backed securities that are Treasury market risk instruments. | |

(2) *Haircut factors.* For purposes of this part, the applicable net position and offset haircut factors to be used in the calculation of the Treasury market risk haircut are as follows:

| Category | Haircut factors | |
|---|---|---|
| | Net position haircuts (percent) | Offsets (percent) |
| A | (1) | (1) |
| B | 0.12 | 0.02 |
| C | 0.20 | 0.03 |
| D | 0.45 | 0.07 |
| E | 1.10 | 0.22 |
| F | 2.20 | 0.44 |
| G | 3.30 | 0.50 |
| H | 5.00 | 1.00 |
| I | 7.75 | 1.55 |
| J | 11.25 | 3.38 |
| MB | 3.30 | 0.66 |
| AR | 1.10 | 0.22 |

(3) *Category pair hedging disallowance haircut factors.* For purposes of this part, the applicable category pair hedging disallowance haircut factors to be used in the calculation of the Treasury market risk haircut are as follows:

| Category | Percent disallowed | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | C | D | E | F | G | H | I | J | MB |
| B | 30 | 40 | | | | | | | |
| C | | 20 | 30 | | | | | | |
| D | | | 20 | 30 | 40 | | | | |
| E | | | | 20 | 30 | 40 | | | |
| F | | | | | 20 | 30 | 40 | | 30 |
| G | | | | | | 20 | 30 | | 30 |
| H | | | | | | | 20 | 40 | 40 |
| I | | | | | | | | 40 | |

(g) *Total haircuts.* "Total haircuts" equals the sum of the credit risk haircut and the market risk haircut.

(1) *Credit risk haircut.* The "credit risk haircut" equals the sum of the total counterparty exposure haircut, the total concentration of credit haircut and the credit volatility haircut.

(i) *Net credit exposure.* For purposes of this part, net credit exposure shall equal:

(A) The sum of the dollar amount of funds, debt instruments, other securities, and other inventory at risk to the government securities broker or dealer in the event of the counterparty's default and the market value of purchased unlisted options written by the counterparty that are Treasury market risk instruments,

(B) Reduced, but not to less than zero, by the sum of:

(1) The dollar amount of funds, debt instruments, other securities, and other inventory at risk to the counterparty in the event of the government securities broker's or dealer's default and the market value of unlisted options written by the government securities broker or dealer and held by the counterparty that are Treasury market-risk instruments;

(2) The deductions taken from net worth for unsecured receivables, repurchase and reverse repurchase agreement deficits, aged fails to deliver, and aged fails to receive arising from transactions with the counterparty;

(3) Demand deposits in the case where the counterparty is a commercial bank;

(4) Custodial holdings of securities in the case where the counterparty is a clearing bank or clearing broker of the government securities broker or dealer; and

(5) Exposure to a counterparty due to holding marketable instruments subject to market risk haircuts under Appendix A to this section (§ 402.2a) for which the counterparty is the obligor.

(ii) *Total counterparty exposure haircut.* The "total counterparty exposure haircut" equals the sum of the counterparty exposure haircuts taken for all counterparties of the government securities broker or dealer. The "counterparty exposure haircut" equals the product of a counterparty exposure haircut factor of 5 percent and the net credit exposure to a single counterparty not in excess of 15 percent of the government securities broker's or dealer's liquid capital.

(iii) *Total concentration of credit haircut.* The "total concentration of credit haircut" equals the sum of the concentration of credit haircuts taken for all counterparties of the government securities broker or dealer. The "concentration of credit haircut" equals the product of a concentration of credit haircut factor of 25 percent and the amount by which the net credit exposure to a single counterparty is in excess of 15 percent of the government securities broker's or dealer's liquid capital.

(iv) *Credit volatility haircut.* The "credit volatility haircut" equals the product of a credit volatility haircut factor of 0.15 percent and the dollar amount of the larger of the gross long position or gross short position in those Treasury market risk instruments described in paragraphs (e)(1) (iii), (iv) and (v) of this section that have a term to maturity greater than 45 days, including futures, forwards and options thereon, settled on a cash or delivery basis.

(2) *Market risk haircut.* The "market risk haircut" equals the sum of the Treasury market risk haircut and the other securities haircut, calculated in accordance with the provisions of Appendix A of this section, § 402.2a.

(h) *Debt-equity requirements.* No government securities broker or dealer shall permit the total of outstanding principal amounts of its satisfactory subordination agreements as defined in § 240.15c3–1d of this title (Appendix D to SEC Rule 15c3–1) modified as provided in Appendix D to this section, § 402.2d, to exceed the allowable levels set forth in § 240.15c3–1(d) of this title.

(i) *Limitation on withdrawal of equity capital.* No equity capital of the government securities broker or dealer or a subsidiary or affiliate consolidated pursuant to Appendix C to this section, § 402.2c, may be withdrawn by action of a stockholder or partner, or by redemption or purchase of shares of stock by any of the consolidated entities or through the payment of dividends or any similar distribution, nor may any unsecured advance or loan be made to a stockholder, partner, sole proprietor or employee if, after giving effect thereto and to any other such withdrawals, advances or loans and any Payments of Payment Obligations (as defined in § 240.15c3–1d of this title, Appendix D to SEC Rule 15c3–1, modified as provided in Appendix D to this section, § 402.2d) under satisfactory subordination agreements which are scheduled to occur within six months following such withdrawal, advance or loan, either:

(1) The ratio of liquid capital to total haircuts, determined as provided in § 402.2, would be less than 150 percent; or

(2) Liquid capital minus total haircuts would be less than 120 percent of the minimum capital required by § 402.2(b) or § 402.2(c) as applicable; or

(3) In the case of any government securities broker or dealer included in such consolidation, the total outstanding principal amounts of satisfactory subordination agreements of the government securities broker or dealer (other than such agreements which qualify as equity under § 240.15c3–1(d) of this title) would exceed 70% of the debt-equity total as defined in such § 240.15c3–1(d).

The term equity capital includes capital contributions by partners, par or stated value of capital stock, paid-in capital in excess of par, retained earnings or other capital accounts. The term equity capital does not include securities accounts of partners and balances in limited partners' capital accounts in excess of their stated capital contributions. This provision shall not preclude a government securities broker or dealer from making required tax payments or preclude the payment to partners of reasonable compensation.

(j) *Modification of appendices to § 240.15c3–1 of this title.* For purposes of this section, Appendix C to this section (§ 402.2c) is substituted for Appendix C to Rule 15c3–1 (§ 240.15c3–1c of this title), and Appendix D to Rule 15c3–1 (§ 240.15c3–1d of this title), relating to Satisfactory Subordination Agreements, is modified as provided in Appendix D to this section (§ 402.2d).

### § 402.2a Appendix A—Calculation of market risk haircut for purposes of § 402.2(g)(2).

The market risk haircut is the sum of the Treasury market risk haircut and the other securities haircut, calculated as follows.

(a) *Treasury market risk haircut.* The "Treasury market risk haircut" equals the sum of the total governments offset portion haircut, the total futures and options offset haircut, the total hedging disallowance haircut, and the residual net position haircut, calculated with respect to financings and positions in Treasury market risk instruments, except to the extent that a permissible election is made pursuant to paragraph (b)(1) of this section to include qualified positions in the calculation of the other securities haircut.

(1) *Total governments offset portion haircut.* The "total governments offset portion haircut" equals the sum of the governments offset portion haircuts calculated for each category in § 402.2(f)(1). The "governments offset portion haircuts" equal, for each category in § 402.2(f)(1), the product of the offset haircut factor for that category set out in § 402.2(f)(2) and the smaller of the absolute values of the gross long immediate position or gross short immediate position for that category. Schedules B and C in paragraph (c) of this Appendix can be used to make this calculation.

(i)(A) The "gross long immediate position" for purposes of this part equals, for each category except categories MB and AR in § 402.2(f)(1), the sum of the market values of each long immediate position in Treasury market risk instruments with a term to maturity (or, in the case of a floating rate note, the time to the next scheduled interest rate adjustment or the term to maturity, whichever is less) corresponding to such category, the contract values of each reverse repurchase agreement with a term to maturity or time to the next scheduled

interest rate adjustment, whichever is less, corresponding to that category, and the values of the cash collateral of each security borrowing with a term to maturity or time to next scheduled interest rate adjustment, whichever is less, corresponding to such category.

(B) In the case of category MB, the "gross long immediate position" equals the sum of the market values of all long immediate positions in fixed rate mortgage-backed securities which are Treasury market risk instruments.

(C) In the case of category AR, the "gross long immediate position" equals the sum of the market values of all long immediate positions in adjustable rate mortgage-backed securities which are Treasury market risk instruments.

(ii)(A) The "gross short immediate position" for purposes of this section equals, for each category except categories MB and AR in § 402.2(f)(1), the sum of the market values of each short immediate position in Treasury market risk instruments with a term to maturity (or, in the case of a floating rate note, the time to the next scheduled interest rate adjustment or the term to maturity, whichever is less) corresponding to such category, and the values of funds received from each financing transaction (including repurchase agreements, securities lending secured by cash collateral, and bank loans, but excluding subordinated debt which meets the requirements of § 240.15c3–1d of this title modified as provided in § 402.2d) with a term to maturity or time to the next scheduled interest rate adjustment, whichever is less, corresponding to that category.

(B) In the case of category MB, the "gross short immediate position" equals the sum of the market values of all short immediate positions in fixed rate mortgage-backed securities which are Treasury market risk instruments.

(C) In the case of category AR, the "gross short immediate position" equals the sum of the market values of all short immediate positions in adjustable rate mortgage-backed securities which are Treasury market risk instruments.

(iii) The term "long immediate position" in a Treasury market risk instrument means, for purposes of this part:

(A) The net long position in a Treasury market risk instrument as of the trade date, except when the settlement date, in the case of a Treasury market risk instrument except a mortgage-backed security, is scheduled more than five business days in the future, and, in the case of a mortgage-backed security, more than thirty calendar days in the future;

(B) The net long when-issued position in a marketable U.S. Treasury security between announcement and issue date; and

(C) The net long when-issued position in a government agency or a government sponsored agency debt security between release date and issue date.

(iv) The term "short immediate position" on a Treasury market risk instrument means, for purposes of this part:

(A) The net short position in a Treasury market risk instrument as of the trade date, except when the settlement date, in the case of a Treasury market risk instrument except a mortgage-backed security, is scheduled more than five business days in the future, and, in the case of a mortgage-backed security, more than thirty calendar days in the future;

(B) The net short when-issued position in a marketable U.S. Treasury security between announcement and issue date; and

(C) The net short when-issued position in a government agency or a government sponsored agency debt security between release date and issue date.

(2) *Net immediate position interim haircut.* The "net immediate position interim haircut" equals, for each category in § 402.2(f)(1), the product of the net position haircut factor for that category and the sum of the gross long immediate position and the gross short immediate position for that category. For purposes of this part, a gross long immediate position shall be a positive number and a gross short immediate position shall be a negative number. Schedules B and C in paragraph (c) of this appendix can be used to make this calculation.

(3) *Total futures and options offset haircut.* The "total futures and options offset haircut" equals the sum of the futures and options offset haircuts calculated for each category in § 402.2(f)(1). The "futures and options offset haircut" equals, for each category in § 402.2(f)(1), the product of a futures and options offset factor of 20 percent and the smaller of the absolute values of the positive and negative aggregate interim haircuts for that category. Schedule D in paragraph (c) of this appendix can be used to make this calculation.

(i) *Positive aggregate interim haircut.* The "positive aggregate interim haircut" equals, for each category in § 402.2(f)(1), the sum of the positive net immediate position interim haircut (see paragraph (a)(2) of this appendix), the gross long futures and forward interim haircut, and the positive gross options interim haircut for that category. Schedule D in paragraph (c) of this appendix can be used to make this calculation.

(A) *Gross long futures and forward interim haircut.* The "gross long futures and forward interim haircut" equals, for each category in § 402.2(f)(1), the sum of the interim haircuts on each long futures position and long forward position placed, in the case of a futures or forward contract on Treasury market risk instruments except mortgage-backed securities, in the category corresponding to the sum of the term to maturity of the contract and the term to maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, the category corresponding to the type of Treasury market risk mortgage-backed security.

(*1*) For purposes of this part, the "interim haircut on each long futures position and each long forward position" is the product of the net position haircut factor for the category corresponding to, in the case of a futures or forward contract on Treasury market risk instruments except mortgage-backed securities, the maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, the type, of Treasury market risk mortgage-backed security and the value of the long futures position or long forward position evaluated at the current market price for such contract.

(*2*) For purposes of this part, the gross long futures and forward interim haircut shall be a positive number.

(B) *Positive gross options interim haircut.* The "positive gross options interim haircut" equals, for each category in § 402.2(f)(1), the sum of the interim haircuts on each purchased call and sold put placed in the category in which the underlying instrument would be placed.

(*1*) For purposes of this part, the "interim haircut on each purchased call and sold put" equals the lesser of the market value of the option or, (*i*) in the case of an option on a cash instrument, the product of the net position haircut factor for the category to which the underlying cash instrument corresponds and the market value of the underlying cash instrument or, (*i* ) in the case of an option on a futures contract, the interim haircut on the underlying futures contract.

(*2*) For purposes of this part, the positive gross options interim haircut is a positive number.

(ii) *Negative aggregate interim haircut.* The "negative aggregate interim haircut" equals, for each category in § 402.2(f)(1), the sum of the negative net immediate position interim haircut (see paragraph (a)(2) of this appendix), the gross short futures and forward interim haircut, and the negative gross options interim haircut for that category. Schedule D in paragraph (c) of this appendix can be used to make this calculation.

(A) *Gross short futures and forward interim haircut.* The "gross short futures and forward interim haircut" equals, for each category in § 402.2(f)(1), the sum of the interim haircuts on each short futures position and short forward position placed, in the case of a futures or forward contract on Treasury market risk instruments except mortgage-backed securities, in the category corresponding to the sum of the term to maturity of the contract and the term to maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, in the category corresponding to the type of Treasury market risk mortgage-backed security.

(*1*) For purposes of this part, the "interim haircut on each short futures position and each short forward position" is the product of the net position haircut factor for the category corresponding to, in the case of a futures or forward contract on Treasury market risk instruments except mortgage-backed securities, the maturity of the underlying instrument at the time of the maturity of the contract or, in the case of a futures or forward contract on Treasury market risk mortgage-backed securities, the type of Treasury market risk mortgage-backed security and the value of the short futures position or short forward position evaluated at the current market price for such contract.

(*2*) For purposes of this part, the gross short futures and forward interim haircut is a negative number.

(B) *Negative gross options interim haircut.* The "negative gross options interim haircut" equals, for each category in § 402.2(f)(1), the sum of the interim haircuts on each sold call and purchased put placed in the category in which the underlying instrument would be placed.

(*1*) For purposes of this part, the "interim haircut on each sold call and purchased put" equals the lesser of the market value of the option or, (*i*) in the case of an option on a cash instrument, the product of the net position haircut factor for the category to which the underlying cash instrument corresponds and the market value of the underlying cash instrument or, (*ii*) in the case of an option on a futures contract, the interim haircut on the underlying futures contract.

(*2*) For purposes of this part, the negative gross options interim haircut is a negative number.

(4) *Total hedging disallowance haircut.* The "total hedging disallowance haircut" equals the sum of the hedging disallowance haircuts calculated pursuant to each netting of qualified netting interim haircuts. The "hedging disallowance haircut" equals the absolute value of the product of the applicable category pair hedging disallowance haircut factor specified in § 402.2(f)(3) and the smaller in absolute value of any two qualified netting interim haircuts, netted in accordance with the provisions of this paragraph. Schedule E in paragraph (c) of this appendix can be used to make this calculation.

(i) *Qualified netting interim haircut.* The term "qualified netting interim haircut" means a residual position interim haircut or a net residual position interim haircut.

(A) *Residual position interim haircut.* The "residual position interim haircut" equals, for each category in § 402.2(f)(1), the sum of the positive aggregate interim haircut and the negative aggregate interim haircut corresponding to the category, calculated in accordance with the provisions of paragraph (a)(3) of this appendix.

(B)(*1*) *Net residual position interim haircut.* The "net residual position interim haircut" equals, for any two categories between which netting is permitted, the sum of (*i*) the residual position interim haircuts calculated for those categories, in the case of the category of the larger in absolute value of the two residual position interim haircuts being netted, and (*ii*) zero, in the case of the category of the smaller in absolute value of the two residual position interim haircuts being netted.

(*2*) For the purposes of this paragraph (a)(4), netting is permitted only between categories for which a category pair hedging disallowance haircut factor has been specified in paragraph § 402.2(f)(3).

(ii) Net residual position interim haircuts shall be substituted for the residual position interim haircuts in the respective categories in which they have been placed and shall be considered as if they were residual position interim haircuts. New net residual position interim haircuts may continue to be calculated until for each category pair for which netting is permitted at least one of the two qualified netting interim haircuts is zero or both qualified netting interim haircuts are of the same sign.

(5) *Residual net position haircut.* The "residual net position haircut" equals the sum of the absolute values of all qualified netting interim haircuts remaining in each category after the completion of the calculation of permissible nettings described in paragraph (a)(4) of this section. Schedule E in paragraph (c) of this appendix can be used to make this calculation.

(b) *Other securities haircut.* The "other securities haircut" equals the sum of all deductions specified in § 240.15c3–1 (c)(2)(vi) and (c)(2)(viii) of this title and §§ 240.15c3–1a and 240.15c3–1b of this title for long and short positions in securities, futures contracts, forward contracts, options, and other inventory which are not Treasury market risk instruments as defined in § 402.2(e).

(1) A registered government securities broker or dealer may elect to exclude from its calculation of the Treasury market risk haircut and include in its calculation of the other securities haircut long and short positions in Treasury market risk instruments if such positions form part of a hedge against long and short positions in securities, futures contracts, forward contracts, or options which are not Treasury market risk instruments. The market value of each position or portion of a position in Treasury market risk instruments excluded from the calculation of the Treasury market risk haircut and included in the calculation of the other securities haircut may not exceed the market value of the position which it offsets as part of a hedge.

(2) For purposes of this paragraph (b), a gross long or short position in Treasury market risk instruments shall be considered part of a hedge if the inclusion of such position in the calculation of the other securities haircut would serve to reduce said haircut.

(c) *Schedules.* This paragraph sets forth schedules which may be used by government securities brokers or dealers in the calculation of total haircuts as required by this Part 402. The appropriate regulatory agency or designated examining authority may specify other substantially similar forms required to be used by government securities brokers or dealers in the calculation of such haircuts.

### SCHEDULE A.—LIQUID CAPITAL REQUIREMENT SUMMARY COMPUTATION

[In thousands of dollars]

| | |
|---|---|
| 1. Liquid capital [1] | |
| 2. Haircuts on security and financing positions including contractual commitments: | |
| a. Total governments offset portion haircut (Schedule C) | |
| b. Total futures and options offset haircut (Schedule D) | |
| c. Total hedging disallowance haircut (Schedule E) | |

### SCHEDULE A.—LIQUID CAPITAL REQUIREMENT SUMMARY COMPUTATION—Continued

[In thousands of dollars]

| | |
|---|---|
| d. Residual net position haircut (Schedule E) | |
| e. Other securities haircut (use SEC factors) | |
| 3. Haircuts on credit exposure: | |
| a. Total counterparty exposure haircut | |
| b. Total exposure concentration haircut | |

### SCHEDULE A.—LIQUID CAPITAL REQUIREMENT SUMMARY COMPUTATION—Continued

[In thousands of dollars]

| | |
|---|---|
| c. Credit volatility haircut | |
| 4. Total haircuts (sum of lines 2 a through e, 3 a, b, and c) | |
| 5. Capital-to-risk ratio (line 1 divided by line 4) | |

[1] Identical to the amount reported on line 3640 of the Report on Finances and Operations of Government Securities Brokers and Dealers, Form G-405.

### SCHEDULE B.—CALCULATION OF NET IMMEDIATE POSITIONS IN SECURITIES AND FINANCINGS

| | Maturity category [1] | Financings | | Securities positions | | Total securities and financing positions | | Offset portions | Net immediate positions | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Long [2] | Short [2] | Long | Short | | | | | |
| | | (+) | (−) | (+) | (−) | (+) | (−) | (+) | (+/−) | |
| A | 0–44 days | | | | | | | | | A |
| B | 45–134 days | | | | | | | | | B |
| C | 135 days-9 months | | | | | | | | | C |
| D | 9–18 months | | | | | | | | | D |
| E | 1.5–3.5 years (1.5–3 years) | | | | | | | | | E |
| F | 3.5–7.5 years (3–5.5 years) | | | | | | | | | F |
| G | 7.5–15 years (5.5–9 years) | | | | | | | | | G |
| H | 15–30 years (9–12 years) | | | | | | | | | H |
| I | (12–21 years) | | | | | | | | | I |
| J | (21 years and over) | | | | | | | | | J |
| MB | Mortgage-backed | | | | | | | | | MB |
| AR | Adjustable rate mortgage-backed. | | | | | | | | | AR |
| | Column Number | 1 | 2 | 3 | 4 | 5 | 6 (1+3) | 7# (2+4) | 8# (Note 1) | (5+6) |

#Carry forward to Schedule C.

Note 1: The offset portion (Column 7) is the smaller of Columns 5 and 6.

[1] The categories are designated in section 402.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in that category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same manner as all other instruments. A half year (.5) is always considered to be 6 months.

[2] Long financings are financings which provide securities to a broker or dealer; short financings are those which provide funds.

### SCHEDULE C.—GOVERNMENTS OFFSET PORTION AND NET IMMEDIATE POSITION INTERIM HAIRCUTS CALCULATION

| | Maturity category [1] | Governments offset portion | | | Net immediate position | | |
|---|---|---|---|---|---|---|---|
| | | Dollar amounts | Factors | Haircuts | Dollar amounts | Factors | Interim haircuts |
| | | (+) | | (+) | (+/−) | | (+/−) |
| A | 0–44 days | | None | | | None | |
| B | 45–134 days | | 0.0002 | | | 0.0012 | |
| C | 135 days-9 months | | .0003 | | | .0020 | |
| D | 9–18 months | | .0007 | | | .0045 | |
| E | 1.5–3.5 years (1.5–3 years) | | .0022 | | | .0110 | |
| F | 3.5–7.5 years (3–5.5 years) | | .0044 | | | .0220 | |
| G | 7.5–15 years (5.5–9 years) | | .0050 | | | .0330 | |
| H | 15–30 years (19–12 years) | | .0100 | | | .0500 | |
| I | (12–21 years) | | .0155 | | | .0775 | |
| J | (21 years and over) | | .0338 | | | .1125 | |
| MB | Mortgage-backed | | .0066 | | | .0330 | |
| AR | Adjustable rate mortgage-backed | | .0022 | | | .0110 | |
| | Total Governments Offset Portion Haircut | | | | | .0110 | |

| | Maturity category[2] | Government offset portion | | | Net immediate position | | |
|---|---|---|---|---|---|---|---|
| | | Dollar amounts (+) | Factors | Haircuts (+) | Dollar amounts (+/−) | Factors | Interim haircuts (+/−) |
| | Column Number | 7 | 9 | 10# | 8 | 11 | 12=8 |
| | | (Note 1) | | (7x9) | (Note 1) | | (8x11) |

# Carry to Schedule A, line 2a.
## Carry forward to Schedule D (or Schedule E, if no forwards, futures, or options).
NOTE 1: From Schedule B.
[2] The categories are designated in section 402.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in the category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same manner as all other instruments. A half year (.5) is always considered to be 6 months.

## SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS

[In thousands of dollars]

| | Maturity category [1] | Net immediate position interim haircuts (+/−) | Gross interim haircuts: Futures and forward (+) | Futures and forward (−) | Options (+) | Options (−) | Aggregate interim haircuts (+) | Aggregate interim haircuts (−) | Futures and options offset portions [2] (+) | Residual position interim haircuts (+/−) | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| B | 45–134 days. | | | | | | | | | | B |
| C | 135 days–9 months. | | | | | | | | | | C |
| D | 9–18 months. | | | | | | | | | | D |
| E | 1.5–3.5 years (1.5–3 years). | | | | | | | | | | E |
| F | 3.5–7.5 years (3–5.5 years). | | | | | | | | | | F |
| G | 7.5–15 years (5.5–9 years). | | | | | | | | | | G |
| H | 15–20 years (9–12 years). | | | | | | | | | | H |
| I | (12–21 years). | | | | | | | | | | I |
| J | (21 years and over). | | | | | | | | | | J |

SCHEDULE D.—CONSOLIDATION OF NET IMMEDIATE POSITION INTERIM HAIRCUTS WITH GROSS FUTURES AND OPTIONS INTERIM HAIRCUTS—Continued

[In thousands of dollars]

| | Maturity category [1] | Net immediate position interim haircuts | Gross interim haircuts | | | | Aggregate interim haircuts | | Futures and options offset portions [2] | Residual position interim haircuts | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Futures and forward | | Options | | | | | | |

| AR | Adjustable rate mortgage-backed. | | | | | | | | | | AR |
| | Total Futures and Options Offset Portion. | | | | | | | | $ | | |
| | Factor | | | | | | | | ×20% | | |
| | Total Futures and Options Offset Haircut. | | | | | | | | $ # | | |
| | Column Number. | 12 (Note 1) | 13 | 14 | 15 | 16 | 17 | 18 | 19 (Note 2) | 20## (17+18) | |

# Carry to Schedule A, line 2b.
## Carry forward to Schedule E.
Note 1: From Schedule C.
Note 2: Column 19 is the smaller of columns 17 and 18.

[1] The categories are designated in section 401.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in the category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same manner as all other instruments. A half year is always considered to be 6 months.

[2] The total futures and options haircut is calculated from the total of column 19.

SCHEDULE E—CALCULATION OF HEDGING DISALLOWANCE HAIRCUTS WHEN NETTING HAIRCUTS ACROSS CATEGORIES [1]

[In thousands of dollars]

| | Maturity category [2] | Residual position interim haircuts | 20 percent disallowance | | 30 percent disallowance | | 40 percent disallowance | | Hedging disallowance haircuts | Qualified netting interim haircuts | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | (+/−) | Hedging disallowance haircuts (+) | Net residental position interim haircuts (+/−) | Hedging disallowance haircuts (+) | Net residual position interim haircuts (+/−) | Hedging disallowance haircuts (+) | Net Residual position interim haircuts (+/−) | (+) | (+) | |
| B | 45–134 days. | | | | | | | | | | B |
| C | 135 days–9 months. | | | | | | | | | | C |
| D | 9–18 months. | | | | | | | | | | D |
| E | 1.5–3.5 years (1.5–3 years). | | | | | | | | | | E |
| F | 3.5–7.5 years (3–5.5 years). | | | | | | | | | | F |
| G | 7.5–15 years (5.5–9 years). | | | | | | | | | | G |
| H | 15–30 years (9–12 years). | | | | | | | | | | H |
| I | (12–21 years). | | | | | | | | | | I |
| J | (21 years and over). | | | | | | | | | | J |
| MB | Mortgage-backed. | | | | | | | | | | MB |
| AR | Adjustable rate mortgage-backed. | | | | | | | | | | AR |
| | Total Hedging Disallowance Haircut. | | | | | | | | | | |
| | Residual Net Position Haircut. | | | | | | | | | | |

#Column 27 carries forward to Schedule A, line 2c.

##Column 28 total carries forward to Schedule A, line 2d.

Note 1: From Schedule D (or Schedule C, if no forwards, futures, or options).

Note 2: Net of two offsetting haircuts of paired maturity categories.

Note 3: For every entry in column 20 there should be an entry in either column 27 or 28 (but never both).

[1] See Section 402.2(f)(3) for category pair hedging disallowance haircut factors.

[2] The categories are designated in section 402.2(f)(1). A category contains all securities with maturities greater than or equal to the lower of the designated maturities, but less than the higher. Maturity designations in parentheses refer to maturities of zero-coupon instruments to be placed in the category. In categories A, B, C, and D, zero-coupon instruments are to be treated in the same manner as all other instruments. A half year (.5) is always considered to be 6 months.

**Instructions to Schedules A through E**

Schedules A through E may be used by government securities brokers or dealers subject to 17 CFR Part 402 to determine the firm's capital-to-risk ratio. Section 402.2 provides that a government securities broker or dealer must meet the applicable minimum dollar liquid capital requirement and that the firm's ratio of liquid capital to risk (total haircuts) must be at least 1.2:1; liquid capital must exceed risk by at least 20 percent. Total haircuts is the risk measure used in the ratio; it is made up of measures of market risk and measures of credit risk. The market risk of a government securities broker's or dealer's positions is accounted for through the Treasury market risk haircut and the other securities haircut. Credit risk is accounted for in the counterparty exposure, concentration of credit, and credit volatility haircuts and in the computation of liquid capital through the various deductions and charges.

Only positions in Treasury market risk instruments and financings may be used in the calculation of the Treasury market risk haircut. Treasury market risk instruments and financings are described in 17 CFR 402.2 and in the instructions to the schedule where they are to be first entered. All other types of financial instruments are to be included in the calculation of the other securities haircut. Calculation of the other securities haircut is based on the SEC's Rule 15c3–1 (17 CFR 240.15c3–3).

Treasury market risk instruments may be excluded from the calculation of the Treasury market risk haircut if they are included as part of a hedge against long and short positions in securities, futures contracts, forward contracts, or options that are not Treasury market risk instruments in the calculation of the other securities haircut. The market value of the Treasury market risk instruments excluded may not exceed the market value of the position(s) against which they are being hedged. The result of this transfer of the Treasury market risk instruments must be a reduction in the other securities haircut.

The categories for classifying Treasury market risk instruments are designated in 17 CFR 402.2(f)(1). The categories, which are designated by a maturity range, contain all securities with remaining terms to maturity greater than or equal to the lower end of the range but less than the higher. A half year is always considered to be 6 months. In categories A through D, zero-coupon instruments are to be treated in the same manner as all other instruments. In categories E through J, the maturity designations in parentheses give the maturities of the zero-coupon instruments to be placed in that category. All mortgage-backed securities that are Treasury market risk instruments are to be placed in category MB or category AR, depending on whether they are backed by conventional or adjustable-rate mortgages.

All haircuts may be calculated to the nearest hundred dollars, unless such rounding would materially affect the liquid capital calculation.

Appendix A to the Preamble published with the temporary regulations for 17 CFR Part 402 (52 FR ———, May 26, 1987) contains an example of the capital calculation. It may also be used as an aid in completing these schedules.

*Schedule A—Liquid Capital Requirement Summary Computation*

Schedule A is used to determine the capital-to-risk ratio by comparing liquid capital to total haircuts. Schedule A will be the last schedule completed as many of the haircuts entered on Schedule A are calculated on Schedules B through E.

Line 1—Enter liquid capital, which is identical to the amount reported on line 3640 of the Report on Finances and Operations of Government Securities Brokers and Dealers, Form G–405.

Line 2—Haircuts on "Security and Financing Positions" including contractual commitments:

a. Enter the Total Governments Offset Portion Haircut from column 10 of Schedule C.

b. Enter the Total Futures and Options Offset Haircut from column 19 of Schedule D.

c. Enter the Total Hedging Disallowance Haircut as calculated in Schedule E, column 27.

d. Enter the Residual Net Position Haircut as given in column 28 of Schedule E.

e. Enter the other securities haircut as determined by applying the SEC haircut factors to securities, futures contracts, forward contracts, options and other inventory that are not Treasury market risk instruments as defined in 17 CFR 402.2(e) or financings used in the calculation of the Treasury market risk haircut. The other securities haircut is the sum of all applicable deductions as specified in 17 CFR 240.15c3–1(c)(2)(vi) and (c)(2)(viii) and in 17 CFR 240.15c3–1a and 240.15c3–1b. Any position(s) in Treasury market risk instruments that have been excluded from the calculation of the Treasury market risk haircut because they are part of a hedge with these other instruments are to be included in the calculation of this haircut.

Line 3—Haircuts on credit exposure:

a. Enter the total counterparty exposure haircut which is the sum of the counterparty exposure haircut with each counterparty. A counterparty exposure haircut is equal to 5 percent of the net credit exposure to a single counterparty which is not in excess of 15 percent of the government securities broker's or dealer's liquid capital. If the net credit exposure to a counterparty does exceed 15 percent of liquid capital, the excess will be used in calculating the total concentration of credit haircut on line 3b.

Net credit exposure equals the difference between the government securities broker's or dealer's exposure to a single counterparty and that counterparty's exposure to the government securities broker or dealer. The government securities broker's or dealer's exposure to a counterparty is equal to the sum of the dollar amount of funds, debt instruments, other securities, and other inventory at risk to the government securities broker or dealer in the event of the counterparty's default and the market value of purchased unlisted options that are Treasury market risk instruments and were written by the counterparty. It does not include, however, (1) the deduction taken from net worth for unsecured receivables, repurchase and reverse repurchase agreement deficits, aged fails to deliver, and aged fails to receive arising from transactions with the counterparty, (2) demand deposits in the case where the counterparty is a commercial bank, (3) custodial holdings of securities in the case where the counterparty is a clearing bank or clearing broker of the government securities broker or dealer; or (4) exposure to the counterparty due to holding marketable instruments for which the counterparty is the obligor.

The counterparty's exposure to the government securities broker or dealer equals the dollar amount of funds, debt instruments, other securities, and other inventory at risk to the counterparty in the event of the government security broker's or dealer's default and any unlisted options written by the government securities broker or dealer and held by the counterparty.

b. Enter the total concentration of credit haircut which is the sum of all concentration of credit haircuts applied in cases where the net credit exposure (as defined above) to a single counterparty is in excess of 15 percent of the government securities broker's or dealer's liquid capital. The

concentration of credit haircut is 25 percent of the amount of net credit exposure in excess of 15 percent of the government securities broker's or dealer's liquid capital.

c. Enter the credit volatility haircut which equals a factor of 0.15 percent applied to the larger of the gross long or gross short immediate position in money market instruments qualifying as Treasury market risk instruments which mature in more than 45 days, and in futures, forwards and options on these instruments that are settled on a cash or delivery basis. Money market instruments qualifying as Treasury market risk instruments are (1) certificates of deposit with no more than one year to maturity, (2) bankers acceptances, and (3) commercial paper which has no more than one year to maturity and is rated in one of the three highest categories by at least two nationally recognized statistical rating organizations.

Line 4—Enter total haircuts which is the sum of lines 2 a through e, and 3 a, b, and c.

Line 5—Enter the capital-to-risk ratio which is found by dividing line 1, "Liquid capital," by line 4, "Total haircuts." The capital-to-risk ratio must be at least equal to 1.2:1.

*Schedule B—Calculation of Net Immediate Position in Securities and Financings*

Schedule B is used to calculate the net immediate position in and offset portion of securities and financings. The results are then carried over to Schedule C for initial haircut calculations. Futures, forwards and options which are Treasury market risk instruments are to be entered on Schedule D.

Positions in and financings on debt instruments other than mortgage-backed or adjustable rate mortgage-backed securities should be place in the category corresponding to their remaining term to maturity. In the case of a floating rate note, however, the note should be placed in the category corresponding to the time to the next scheduled interest rate adjustment or remaining term to maturity, whichever is less.

Column 1—Under "Financings-Long" report in the appropriate category the contract value of reverse repurchase agreements and the value(s) of cash collateral on security borrowings. Financings so reported should be placed in the category corresponding to the remaining term to maturity or time to the next scheduled interest rate adjustment, whichever is less.

Column 2—Under "Financings-Short" report in the appropriate category as a negative number the values of funds received from financing transactions. Include repurchase agreements, securities lending secured by cash collateral, and bank loans, but exclude subordinated debt which meets the requirements of 17 CFR 240.15c3–1d as modified by 17 CFR 402.2d. Financings so reported should be placed in the category corresponding to the remaining term to maturity or time to the next scheduled interest rate adjustment, whichever is less.

Columns 3 and 4—Report in the appropriate column by maturity or type of mortgage-backed security under "Securities Positions" the sum of the market values of immediate positions in Treasury market risk instruments. The net position in each individual Treasury market risk instrument is to be appropriately reported as a long (+) or short (−) position in summation with all other positions of the same category and type (long/short). Short positions are assigned a negative value. Treasury market risk instruments are defined in 17 CFR 402.2(e). Those to be reported in Schedule B are:

(1) Government securities as defined in 17 CFR 400.3(j) except equity securities and mortgage-backed securities which do not pass through to the security holder on a pro rata basis a distribution based on the monthly payments and prepayments of principal and interest on the underlying pool of mortgage collateral less fees and expenses;

(2) Zero-coupon receipts or certificates based on marketable Treasury notes or bonds;

(3) Certificates of deposit of no more than one year to maturity;

(4) Bankers acceptances; and

(5) Commercial paper of no more than one year to maturity rated in one of the three highest categories by at least two nationally recognized statistical rating organizations.

Report all positions as of the trade date. If the settlement date is scheduled for more than five business days in the future (or, in the case of a mortgage-backed security, more than thirty calendar days in the future), then report the position as a forward contract on Schedule D. Also, under "Securities Positions" in the appropriate column and category, report any when-issued position in a marketable Treasury security between announcement and issue date and any when-issued position in a government agency or a government sponsored agency debt security between release date and issue date.

Exclude positions in Treasury market risk instruments which form part of a hedge against long and short positions in securities, futures contracts, forward contracts, or options that are not Treasury market risk instruments and are to be included in the calculation of the other securities haircut. A position in a Treasury market risk instrument may only be included in the calculation of the other securities haircut to the extent that its market value does not exceed the market value of the position which it offsets as part of a hedge and the inclusion of the Treasury market risk instruments reduces the other securities haircut.

Column 5—Under "Total Securities and Financing Positions (+)" report in the appropriate category the sum of the long financings (column 1) and long securities positions (column 3).

Column 6—Under "Total Securities and Financing Positions (−)" report in the appropriate category the sum of the short financings (column 2) and short securities positions (column 4).

Column 7—Under "Offset Portions" report in the appropriate category the lesser of the absolute values of the positive (column 5) or negative (column 6) total securities and financing positions.

Column 8—Under "Net Immediate Positions" report in the appropriate category the sum, or net value, of the positive (column 5) and negative (column 6) total securities and financing positions.

Columns 7, "Offset Portions," and 8, "Net Immediate Positions," are to be carried to Schedule C.

*Schedule C—Governments Offset Portion and Net Immediate Position Interim Haircuts Calculation*

Schedule C is used to calculate the total governments offset portion haircut and net immediate position interim haircuts by applying offset and net position haircut factors to the offset portions and net immediate positions and offset portions in Treasury market risk instruments and financings. The total governments offset portion haircut is then carried to Schedule A, and the net immediate position interim haircuts are carried to Schedule D or E.

Column 7—Transfer to column 7, "Governments Offset Portion-$ Amounts," column seven from Schedule B, "Offset Portions."

Column 9—These are the governments offset portion haircut factors given at 17 CFR 402.2(f)(2). They may be updated from time to time.

Column 10—Under "Governments Offset Portion-Haircuts" report in the appropriate category the product of the corresponding values in column 7, "$ Amounts," and in column 9, "Factors."

To determine the total governments offset portion haircut, sum the values under "Governments Offset Portion-Haircuts" in column 10, and enter this number in the appropriate space. Carry this value to Schedule A, line 2a, converting from millions to thousands of dollars.

Column 8—Transfer to column 8, "Net Immediate Positions-$ Amounts," column eight from Schedule B, "Net Immediate Positions."

Column 11—These are the net immediate position haircut factors given at 17 CFR 402.2(f)(2). They may be updated from time to time.

Column 12—Under "Net Immediate Positions-Interim Haircuts" place in the appropriate category the product of the corresponding values in column 8, "$ Amounts," and in column 11, "Factors." A haircut on a short position remains negative.

Carry column 12 to Schedule D, or, if there are no futures or options positions, to Schedule E.

*Schedule D—Consolidation of Net Immediate Position Interim Haircuts with Gross Futures and Options Interim Haircuts*

Schedule D is used to enter haircuts on futures, forwards and options positions and to calculate the total futures and options offset haircut and the residual position interim haircuts as needed for Schedules A and E respectively. If there are no futures and options positions, it is not necessary to fill out Schedule D.

Report as a forward contract any position for which the time between trade date and settlement date is more than five business days (30 calendar days for a mortgage-backed security). Any when-issued position in a marketable Treasury security established between announcement and issue date and any when-issued position in a government agency or a government sponsored agency debt security established between release date and issue date is reported in the appropriate category on Schedule B under "Securities Positions."

Column 12—Transfer to column 12, "Net Immediate Position Interim Haircuts," column 12 from Schedule C, "Net Immediate Positions-Interim Haircuts," converting from millions to thousands of dollars.

Columns 13 and 14—Under "Gross Interim Haircuts—Futures and Forward" enter in the appropriate category the sum of the interim haircuts on the futures or forward positions belonging to that category. The interim haircut on a futures or forward position equals the product of the value of the position evaluated at the current market price for such contract and the net position haircut factor that corresponds to either the term to maturity of the underlying instrument or, for mortgage-backed securities, the type of security. The term to maturity of the underlying instrument is the term to maturity of the deliverable security at the time of the maturity of the futures or forward contract. The haircut on a futures or forward position on a non-mortgaged-backed instrument is to be entered in the category corresponding to the sum of the remaining time to maturity of the futures or forward contract and the maturity of the underlying instrument. Haircuts on futures and forwards on mortgage-backed securities are to be entered in the appropriate mortgage-backed securities category. The interim haircuts on long futures and forwards are positive (column 13), and on short futures and forwards, negative (column 14).

Columns 15 and 16—Under "Gross Interim Haircuts—Options" enter, in the category in which the instrument directly underlying the contract would be entered, the lesser of (1) the market value of the option or (2) the net immediate position interim haircut on the underlying cash instrument or gross futures interim haircut on the underlying futures contract. Note that in the case of an option on a futures contract the category in which the option contract is to be entered is the sum of the remaining time to maturity of the futures or forward contract and the maturity of the instrument underlying the futures or forward contract. The haircut factor used to determine the gross futures interim haircut is that factor corresponding to the term to maturity of the deliverable security at the time of the maturity of the futures or forward contract. Gross option haircuts on purchased calls and sold puts are positive, those on sold calls and purchased puts are negative.

Column 17—Under "Aggregate Interim Haircuts (+)" enter in the appropriate category, the sum of any positive net immediate position interim haircut (column 12) and the positive gross option (column 15) and gross futures and forward (column 13) interim haircuts for that category.

Column 18—Under "Aggregate Interim Haircuts (−)" enter in the appropriate category, the sum of any negative net immediate position interim haircut (column 12) and the negative gross option (column 16) and gross futures and forward (column 14) interim haircuts for that category.

Column 19—Under "Futures and Options Offset Portions" enter, in the appropriate category, the lesser of the absolute values of the positive and negative aggregate interim haircuts (columns 17 and 18) for that category.

The total futures and options offset portion is the sum of the values in column 19 under "Futures and Options Offset Portions."

The total futures and options offset haircut is the total futures and options offset portion multiplied by a factor of 20 percent and is carried to line 2b, Schedule A.

Column 20—Enter in the appropriate category under "Residual Position Interim Haircuts" the sum, or net value, of the positive and negative aggregate interim haircuts. Carry this to column 20 on Schedule E.

*Schedule E—Calculation of Hedging Disallowance Haircuts when Netting Haircuts Across Categories*

Schedule E is used to calculate the hedging disallowance and residual net position haircuts which are then carried to Schedule A. The purpose of Schedule E is to hedge positions in different categories in order to reduce total haircuts. Netting the residual position interim haircuts reflects the risk reduction inherent in hedges between positions in different categories where the price volatility is reasonably well correlated.

Section 402.2(f)(3) of the rule specifies the hedging disallowance haircut factors for the category pairs. Netting of residual position interim haircuts is permitted only between any two categories for which a hedging disallowance haircut factor is specified. Hedging disallowance haircuts are similar to offset haircuts in that they are applied to the smaller of the two residual position interim haircuts and represent the portion of the hedge being "disallowed." A hedging disallowance is determined each time two residual position interim haircuts are netted.

Column 20—Transfer from column 20, "Residual Position Interim Haircuts," from Schedule D. If there are no futures or options positions, transfer instead column 12, "Net Immediate Positions-Interim Haircuts," from Schedule C.

Column 21—Use the matrix at 17 CFR 402.2(f)(3) to determine the categories from which the residual position interim haircuts can be paired at the 20 percent level. For each pair multiply the smaller of the absolute values of the two residual position interim haircuts by the hedging disallowance haircut factor of 20 percent, and, in the category of the smaller, enter the resulting hedging disallowance haircut.

Column 22—For each pair being netted at this level, enter under "Net Residual Position Interim Haircuts" (1) the sum, or net value, of the two residual position interim haircuts (and/or net residual position interim haircuts) in the category of the larger (in absolute value) of the two interim haircuts that were netted, and (2) a zero in the category of the smaller.

These net residual position interim haircuts replace the residual position interim haircuts (or net residual position interim haircuts) from which they were derived. Net residual position interim haircuts can in turn be used in any other allowable netting exactly as residual position interim haircuts would be. If further netting of that category at the same level is permissible and possible, it will be necessary to replace the net residual position interim haircut involved with a new (and smaller) net residual position interim haircut in column 22.

Since the net residual position interim haircut in any category containing a hedging disallowance haircut is zero, further netting with any such category is impossible.

After all possible netting has been completed for category pairs with a 20 percent hedging disallowance haircut factor, move on to column 23.

Column 23—Use the matrix at 17 CFR 402.2(f)(3) to determine the categories from which the residual position interim haircuts and/or net residual position interim haircuts can be paired at the 30 percent level. In each category, the newest (and smallest) net residual position interim haircut determined by netting at the 20 percent level replaces the old value and must be used in hedging in that category at higher levels. For each pair being netted, multiply the smaller of the absolute values of the two (net) residual position interim haircuts by the hedging disallowance haircut factor of 30 percent, and in the category of the smaller, enter the resulting hedging disallowance haircut.

Column 24—For each pair being netted at this level, enter under "Net Residual Position Interim Haircuts" (1) the sum, or net value, of the two residual position interim haircuts and/or net residual position interim haircuts in the category of the larger (in absolute value) of the two interim haircuts that were netted, and (2) a zero in the category of the smaller.

Once again, these net residual position interim haircuts replace the residual position interim haircuts (or net residual position interim haircuts) from which they were derived. Net residual position interim haircuts can in turn be used in any other allowable netting exactly as residual position interim haircuts would be. If further netting of that category at the same level is permissible and possible, it will be necessary to replace the net residual position interim haircut involved with a new (and smaller) net residual position interim haircut.

After all possible netting has been completed for category pairs with a 30 percent hedging disallowance haircut factor, continue to column 25.

Column 25—Use the matrix at 17 CFR 402.2(f)(3) to determine the categories from which the residual position interim haircuts and/or net residual position interim haircuts can be paired at the 40 percent level. In each category, any new net residual position interim haircut determined by netting at the 20 or 30 percent level replaces the old value and must be used in hedging with that category at the 40 percent level. For each pair being netted, multiply the smaller of the absolute values of the two (net) residual position interim haircuts by the hedging disallowance haircut factor of 40 percent and, in the category of the smaller, enter the resulting hedging disallowance haircut.

Column 26—For each pair being netted at this level, enter under "Net Residual Position Interim Haircuts" (1) the sum, or net value, of the two (net) residual position interim haircuts in the category of the larger (in absolute value) of the two interim haircuts that were netted, and (2) a zero in the category of the smaller. If further netting of that category at the same level is permissible and possible, it will be necessary to replace the net residual position interim haircut involved with a new (and smaller) net residual position interim haircut.

Column 27—When all possible (net) residual position interim haircuts have been netted, enter under "Hedging Disallowance Haircuts" all hedging disallowance haircuts calculated in the netting procedures, each in its appropriate category.

Enter under "Total Hedging Disallowance Haircut" the sum of all the hedging disallowance haircuts entered in column 27. Carry to Schedule A, line 2c.

Column 28—Under "Qualified Netting Interim Haircuts" enter in the appropriate category the absolute value of the haircut given under "Net Residual Position Interim Haircut" at the highest hedging disallowance factor for that category (columns 26, 24, or 22). This value will also be the smallest of the net residual position interim haircuts in that category. If the position in a given category was not used in hedging then enter the absolute value of the residual position interim haircut from column 20.

Sum the qualified netting interim haircuts, enter this value under "Residual Net Position Haircut," and carry to Schedule A, line 2d.

**§ 402.2b [Reserved]**

**§ 402.2c Appendix C—Consolidated computations of liquid capital and total haircuts for certain subsidiaries and affiliates.**

(a) *Flow through capital benefits.* (1) Every government securities broker or dealer subject to the liquid capital requirement of this section shall, in computing its liquid capital, include the assets and liabilities of any subsidiary or affiliate for which it guarantees, endorses, or assumes directly or indirectly the obligations or liabilities and shall, in computing its total haircuts, include the total haircuts of such subsidiary or affiliate computed in accordance with the provisions of this Part 402.

(2) A government securities broker or dealer may, in computing its liquid capital, include the assets and liabilities of subsidiaries or affiliates for which it does not guarantee, endorse or assume directly or indirectly the obligations or liabilities and for which an opinion of counsel is obtained as provided in paragraph (b) of this appendix. Any government securities broker or dealer which includes the assets and liabilities of such subsidiaries or affiliates shall, in computing its total haircuts, include the total haircuts of such subsidiaries or affiliates computed in accordance with the provisions of this Part 402.

(b) *Required counsel opinion.* Inclusion of assets, liabilities and total haircuts of any subsidiary or affiliate in the capital computation of a parent government securities broker or dealer shall be permitted with respect to any subsidiaries or affiliates which are majority owned or controlled by the parent government securities broker or dealer and for which the parent government securities broker or dealer can demonstrate to the satisfaction of the Commission, through the Designated Examining Authority, by an opinion of counsel that net asset values, or the portion thereof related to the parent government securities broker's or dealer's ownership interest in the subsidiary or affiliate, may be caused by the parent government securities broker or dealer or an appointed trustee to be distributed to the parent government securities broker or dealer within 30 calendar days. Such opinion shall also set forth the actions necessary to cause such a distribution to be made, identify

the parties having the authority to take such actions, identify and describe the rights of other parties or classes of parties, including but not limited to customers, general creditors, subordinated lenders, minority shareholder employees, litigants and governmental or regulatory authorities, who may delay or prevent such a distribution and such other assurances as the Commission or the Designated Examining Authority by rule or interpretation may require. Such opinion shall be current and periodically renewed in connection with the parent government securities broker's or dealer's annual audit pursuant to § 240.17a–5 of this title, as made applicable to government securities brokers or dealers by § 405.2 of this chapter, or upon any material change in circumstances.

(c) *Principles of inclusion.* The following minimum and non-exclusive requirements shall govern the inclusion of assets, liabilities, and total haircuts of a subsidiary or affiliate in the computation of total liquid capital and total haircuts of a government securities broker or dealer pursuant to this Part 402:

(1) The total liquid capital of the government securities broker or dealer shall be reduced by the estimated amount of any taxes reasonably anticipated to be incurred upon distribution of the assets of the subsidiary or affiliate.

(2) Liabilities of a consolidated subsidiary or affiliate which are subordinated to the claims of present and future creditors pursuant to a satisfactory subordination agreement that does not also extend to the claims of present or future creditors of the parent government securities broker or dealer and all consolidated subsidiaries shall be subtracted from the parent government securities broker's or dealer's liquid capital.

(3) Subordinated liabilities of a consolidated subsidiary or affiliate which are consolidated in accordance with paragraph (a)(2) of this section may not be prepaid, repaid or accelerated if any of the entities included in such consolidation would otherwise be unable to comply with the provision of § 240.15c3–1d of this title, as modified by Appendix D of this part, § 402.2d.

(4) Each government securities broker or dealer included within the consolidation shall at all times be in compliance with the liquid capital or net capital requirement to which it is subject.

**§ 402.2d Appendix D—Modification of § 240.15c3–1d of this title, relating to satisfactory subordination agreements, for purposes of § 402.2.**

Section 240.15c3–1d of this title shall apply to government securities brokers and dealers subject to the requirements of § 402.2 with the following modifications.

(a) References to "broker or dealer" include government securities brokers and dealers.

(b) References to "17 CFR 240.15c3–1" mean § 402.2.

(c) Section 240.15c3–1d(a)(2)(iii) is modified to read as follows:

"(iii) The term "Collateral Value" of any securities pledged to secure a secured demand note shall mean the market value of such securities after giving effect to the haircuts specified in § 402.2a of this title."

(d) References to "17 CFR 240.15c3–1d" mean that section as modified by this section.

(e) Section 240.15c3–1d(b)(6)(iii) is modified to read as follows:

"(iii) The secured demand note agreement may also provide that, in lieu of the procedures specified in the provisions required by paragraph (b)(6)(ii) of this section, the lender, with the prior written consent of the government securities broker or dealer and the Examining Authority for such broker or dealer, may reduce the unpaid principal amount of the secured demand note. After giving effect to such reduction, the liquid capital, as defined in § 402.2(d) of this title, of the government securities broker or dealer may not be less than 150% of the government securities broker's or dealer's total haircuts, as defined in § 402.2(g) of this title. No single secured demand note shall be permitted to be reduced by more than 15% of its original principal amount and after such reduction no excess collateral may be withdrawn. No Examining Authority shall consent to a reduction of the principal amount of a secured demand note if, after giving effect to such reduction, liquid capital after deducting total haircuts would be less than 120% of the minimum dollar amount required by § 402.2(b) or § 402.2(c) of this title as applicable."

(f) Section 240.15c3–1d(b)(7) is modified to read as follows:

"(7) A government securities broker or dealer at its option but not at the option of the lender may, if the subordination agreement so provides, make a Payment of all or any portion of the Payment Obligation thereunder prior to the scheduled maturity date of such Payment Obligation (hereinafter referred to as a "Prepayment"), but in no event may any Prepayment be made before the expiration of one year from the date such subordination agreement became effective. This restriction shall not apply to temporary subordination agreements which comply with the provisions of paragraph (c)(5) of this Appendix D. No Prepayment shall be made if, after giving effect thereto (and to all Payments of Payment Obligations under any other subordinated agreements then outstanding the maturities or accelerated maturities of which are scheduled to fall due within six months after the date such Prepayment is to occur pursuant to this provision or on or prior to the date on which the Payment Obligation in respect of such Prepayment is scheduled to mature disregarding this provision, whichever date is earlier) without reference to any projected profit or loss of the government securities broker or dealer, the liquid capital, as defined in § 402.2(d) of this title, of the government securities broker or dealer would be less than 150% of the government securities broker's or dealer's total haircuts, as defined in § 402.2(g) of this title. Notwithstanding the above, no Prepayment shall occur without the prior written approval of the Examining Authority for such government securities broker or dealer."

(g) Section 240.15c3–1d(b)(8) is modified to read as follows:

"(i) The Payment Obligation of the government securities broker or dealer in respect of any subordination agreement shall be suspended and shall not mature if, after giving effect to Payment of such Payment Obligation (and to all Payments of Payment Obligations of such broker or dealer under any other subordination agreement(s) then outstanding which are scheduled to mature on or before such Payment Obligation), either the liquid capital, as defined in § 402.2(d) of this title, of the government securities broker or dealer would be less than 150% of the government securities broker's or dealer's total haircuts, as defined in § 402.2(g) of this title, or the government securities broker's or dealer's liquid capital after deducting total haircuts would be less than 120% of the minimum dollar amount required by § 402.2(b) or § 402.2(c) of this title, as applicable. The subordination agreement may provide that if the Payment Obligation of the government securities broker or dealer thereunder does not mature and is suspended as a result of the requirement of this paragraph (b)(8) for a period of

not less than six months, the government securities broker or dealer shall thereupon commence the rapid and orderly liquidation of its business but the right of the lender to receive Payment, together with accrued interest or compensation, shall remain subordinate as required by the provisions of 17 CFR 240.15c3-1 and 240.15c3-1d."

(h) Section 240.15c3-1d(b)(10)(ii)(B) is modified to read as follows:

"(B) The liquid capital, as defined in § 402.2(d) of this title, of the government securities broker or dealer being less than 120% of total haircuts, as defined in § 402.2(g) of this title, throughout a period of 15 consecutive business days, commencing on the day the broker or dealer first determines and notifies the Examining Authority for the government securities broker or dealer, or the Examining Authority or the Commission first determines and notifies the government securities broker or dealer of such fact;".

(i) Section 240.15c3-1d(c)(2) is modified to read as follows:

"(2) *Notice of Maturity or Accelerated Maturity.* Every government securities broker or dealer shall immediately notify the Examining Authority for such broker or dealer if, after giving effect to all Payments of Payment Obligations under subordination agreements then outstanding which are then due or mature within the following six months without reference to any projected profit or loss of the broker or dealer, the liquid capital, as defined in § 402.2(d) of this title, of such government securities broker or dealer, would be less than 150% of total haircuts, as defined in § 402.2(g) of this title."

(j) Section 240.15c3-1d(c)(5)(i) is modified to read as follows:

"(i) For the purpose of enabling a government securities broker or dealer to participate as an underwriter of securities or other extraordinary activities in compliance with the capital requirements of § 402.2 of this title, a government securities broker or dealer shall be permitted, on no more than three occasions in any 12 month period, to enter into a subordination agreement on a temporary basis which has a stated term of no more than 45 days from the date such subordination agreement became effective. This temporary relief shall not apply to a government securities broker or dealer if, at such time, it is subject to any of the reporting provisions of § 405.3 of this title, irrespective of its compliance with such provisions or if immediately prior to entering into such subordination agreement, the liquid capital, as defined in § 402.2(d) of this title, of such broker or dealer would be less than 150% of total haircuts, as defined in § 402.2(g) of this title, or the amount of its then outstanding subordination agreements exceeds the limits specified in § 240.15c3-1(d). Such temporary subordination agreement shall be subject to all other provisions of this Appendix D."

(k) Section 240.15c3-1d(c)(5)(ii)(A) is modified to read as follows:

"(A) After giving effect thereto (and to all Payments of Payment Obligations under any other subordinated agreements then outstanding the maturity or accelerated maturities of which are scheduled to fall due within six months after the date such prepayment is to occur pursuant to this provision or on or prior to the date on which the Payment Obligation in respect of such prepayment is scheduled to mature disregarding this provision, whichever date is earlier) without reference to any projected profit or loss of the government securities broker or dealer, the liquid capital, as defined in § 402.2(d) of this title, of such broker or dealer, would be less than 180% of total haircuts, as defined in § 402.2(g) of this title."

## PART 403—PROTECTION OF CUSTOMER SECURITIES AND BALANCES

Sec.
403.1 Application of part to registered brokers and dealers.
403.2 Hypothecation of customer securities.
403.3 Use of customers' free credit balances.
403.4 Customer protection—reserves and custody of securities.
403.5 Custody of securities held by financial institutions that are government securities brokers or dealers.
403.6 Compliance with part by futures commission merchants.
403.7 Effective dates.

**Authority:** Sec. 101, Pub. L. 99-571, 100 Stat. 3209 (15 U.S.C. 78o-5 (b)(1)(A), (b)(2)).

### § 403.1 Application of part to registered brokers and dealers.

With respect to their activities in government securities, compliance by registered brokers or dealers with § 240.8c-1 of this title (SEC Rule 8c-1), as modified by § 403.2 (a), (b) and (c), with § 240.15c2-1 of this title (SEC Rule 15c2-1), with § 240.15c3-2 of this title (SEC Rule 15c3-2) as modified by § 403.3, and with § 240.15c3-3 of this title (SEC Rule 15c3-3) as modified by § 403.4 (a) through (i) constitutes compliance with this part.

### § 403.2 Hypothecation of customer securities.

Every registered government securities broker or dealer shall comply with the requirements of § 240.8c-1 of this title concerning hypothecation of customer securities with the following modifications:

(a) In § 240.8c-1(a), the words "no government securities broker or dealer" shall be substituted for the words "no member of a national securities exchange, and no broker or dealer who transacts a business in securities through the medium of such member."

(b) Section 240.8c-1(d) is modified to read as follows:

"(d) *Exemption for clearing liens.* The provisions of paragraphs (a)(2), (a)(3) and (f) of this section shall not apply to any lien or claim of a clearing bank, or the clearing corporation (or similar department or association) of a national securities exchange or a registered national securities association, for a loan made to acquire the securities subject to said lien and to be repaid on the same calendar day, which loan is incidental to the clearing of transactions in securities or loans through such bank, corporation, department or association: *Provided, however,* that for the purpose of paragraph (a)(3) of this section, 'aggregate indebtedness of all customers in respect of securities carried for their accounts' shall not include indebtedness in respect of any securities subject to any lien or claim exempted by this paragraph."

(c) References to "member, broker or dealer" mean "government securities broker or dealer."

### § 403.3 Use of customers' free credit balances.

Every registered government securities broker or dealer shall comply with the requirement of § 240.15c3-2 of this title concerning the use of customer free credit balances. For purposes of this section, all references to "broker or dealer" in § 240.15c3-2 shall include government securities brokers and dealers.

### § 403.4 Customer protection—reserves and custody of securities.

Every registered government securities broker or dealer shall comply with the requirements of §§ 240.15c3-3 and 240.15c3-3a of this title (SEC Rule 15c3-3 and Exhibit A thereto), with the following modifications:

(a) References to "broker or dealer" include government securities brokers and dealers.

(b) "Fully paid securities," as defined in § 240.15c3-3(a)(3) of this title,

BEST COPY AVAILABLE

includes all securities held by a government securities broker or a government securities dealer for the account of a customer who has made full payment for such securities.

(c) "Margin securities," as defined in § 240.15c3–3(a)(4) of this title, includes any securities for which a customer has not made full payment and for which the customer has received an extension of credit by a government securities broker or government securities dealer for a portion of the purchase price.

(d) "Excess margin securities," as defined in § 240.15c3–3(a)(5) of this title, includes margin securities carried for the account of a customer having a market value in excess of 140 percent of the total of the debit balances in the customer's account or accounts with the broker or dealer.

(e) For purposes of this section, § 240.15c3–3(b) of this title shall include a new paragraph (4) as follows:

"(4)(i) Notwithstanding paragraph (k)(2)(i) of this section, a broker or dealer that retains custody of securities that are the subject of a repurchase agreement between the broker or dealer and a person other than another broker or dealer that is registered pursuant to section 15, 15B or 15C(a)(1)(A) of the Act (15 U.S.C. 78o, 78o–4, 78o–5(a)(1)(A)) or that has filed notice of its status as a government securities broker or dealer pursuant to section 15C(a)(1)(B) of the Act (15 U.S.C. 78o–5(a)(1)(B)) shall:

"(A) Obtain the repurchase agreement in writing;

"(B) Confirm in writing the specific securities that are the subject of a repurchase transaction pursuant to such agreement at the end of the trading day on which the transaction is initiated and at the end of any other day during which other securities are substituted if the substitution results in a change to issuer, maturity date or coupon rate as specified in the previous confirmation;

"(C)(*1*)For registered brokers and dealers, advise the counterparty that the Securities Investor Protection Corporation has taken the position that the provisions of the Securities Investor Protection Act of 1970 do not protect the counterparty with respect to the repurchase agreement;

(*2*) For registered government securities brokers and dealers, advise the counterparty that the Securities Investor Protection Act of 1970 will not provide protection to the counterparty with respect to the repurchase agreement.

"(D) Maintain possession or control of securities that are the subject of the agreement.

"(ii) For purposes of this paragraph (4), securities are in the broker's or dealer's control only if they are in the control of the broker or dealer within the meaning of § 240.15c3–3(c)(1), (c)(5), (c)(6), or § 403.4(f) of this title.

"(iii) A broker or dealer shall not be in violation of the requirement to maintain possession or control pursuant to paragraph (b)(4)(i)(D) during the trading day if:

"(A) In the written repurchase agreement, the counterparty grants the broker or dealer the right to substitute other securities for those subject to the agreement;

"(B) In the case of a repurchase transaction with a contract price of less than $1,000,000, the broker or dealer additionally has obtained, on any trading day on which a substitution is to occur, the prior consent of the counterparty, orally or in writing, to such substitutions and has kept a record of each such consent obtained, including the identities of the individuals requesting and agreeing to such consent; and

"(C) In all cases, the provision in the written repurchase agreement governing the right, if any, to substitute is immediately preceded by the following disclosure statement, which must be prominently displayed:

**'Required Disclosure**

**The [seller] is not permitted to substitute other securities for those subject to this agreement and therefore must keep the [buyer's] securities segregated at all times, unless in this agreement the [buyer] grants the [seller] the right to substitute other securities. If the [buyer] grants the right to substitute, this means that the [buyer's] securities will likely be commingled with the [seller's] own securities during the trading day. In the case of a repurchase transaction of less than $1,000,000, the [seller] is not permitted to substitute securities unless it has additionally obtained the [buyer's] prior consent to substitution on each trading day on which the [seller] wishes to make substitution. Regardless of the amount of the transaction, the [buyer] is advised that, during any trading day that the [buyer's] securities are commingled with the [seller's] securities, they will be subject to liens granted by the [seller] to its clearing bank and may be used by the [seller] for deliveries on other securities transactions. Whenever the securities are commingled, the [seller's] ability to resegregate substitute securities for the [buyer] will be subject to the [seller's] ability to satisfy the clearing lien or to obtain substitute securities.'**

"(iv) A confirmation issued in accordance with paragraph (b)(4)(i)(B) of this section shall specify the issuer, maturity date, coupon rate and market value of the security and shall further identify a CUSIP or GNMA pool number, as appropriate, unless other records of the broker or dealer issuing such confirmation identify the specific security in which the counterparty has an interest."

(f)(1) Securities under the control of a broker or dealer, as described in § 240.15c3–3(c) of this title, shall include securities maintained by a broker or dealer in an account at a depository institution, as defined in section 19(b)(A)(i) through (vi) of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A) (i) through (vi)), which depository institution has a book–entry securities account at a Federal Reserve Bank through which it provides clearing services ("clearing bank"), provided the securities are maintained in a Segregated Account of the government securities broker or dealer. For purposes of these paragraphs (f)(1) and (g) of this section, a Segregated Account is an account (other than a clearing account) of the government securities broker or dealer maintained on the books of a clearing bank pursuant to a written clearing agreement with such clearing bank which provides that:

(i) Such account is established for the purpose of segregating securities of counterparties or customers of such broker or dealer from proprietary securities of the broker or dealer;

(ii) The broker or dealer is entitled to direct the disposition of the securities; and

(iii) The clearing bank does not have, and will not assert, any claim or lien against such securities nor will the clearing bank grant any third party, including any Federal Reserve Bank, any interest in such securities so long as they are maintained in the segregated account.

(2) For purposes of this section, § 240.15c3–3(c)(2) of this title is redesignated as paragraph (c)(2)(i) and new paragraph (c)(2)(ii) is added to read as follows:

"(ii) are carried for the account of any customer by a government securities broker or dealer in an account designated exclusively for customers of the government securities broker or dealer with a registered broker or dealer or another registered government securities broker or dealer (the "carrying broker or dealer") in compliance with instructions of the registered government securities broker or dealer to the carrying broker or dealer that the securities are to be maintained free of any charge, lien or claim of any kind in favor of the carrying broker or dealer or any persons claiming through such carrying broker or dealer; or"

(g) In addition to the notification required by § 240.15c3–3(i) of this title, whenever any government securities broker or dealer instructs its clearing bank to place securities in a Segregated Account (as defined in paragraph (f)(1) of this section), and the clearing bank refuses to do so by the end of that day, the broker or dealer shall, in accordance with § 240.17a–11(f) of this title, give telegraphic notice of the notification by the clearing bank within 24 hours and within 48 hours of the telegraphic notice, file a report stating what steps are being taken to correct the situation.

(h) For purposes of this section, § 240.15c3–3(f) of this title is modified to read as follows:

"(1) *Delivery or disposition of securities.* Nothing stated in this section shall be construed as affecting the absolute right of a customer of a government securities broker or dealer, unless otherwise agreed in writing, in the normal course of business operations following demand made on the broker or dealer, to receive the physical delivery of certificates if the securities are issued in certificated form, or to direct a transfer of or otherwise to exercise control over any securities if they are:

"(1) Fully-paid securities to which the customer is entitled;

"(2) Margin securities upon full payment by such customer to the broker or dealer of the customer's indebtedness to the broker or dealer; or

"(3) Excess margin securities not reasonably required to collateralize such customer's indebtedness to the broker or dealer."

(i) For purposes of this section, § 240.15c3–3(m) shall apply to government securities, notwithstanding the May 9, 1973, order of the Commission (38 FR 12103) suspending such applicability, except that:

(1) In the case of mortgage-backed securities the words "ten business days" shall be replaced by the words "thirty calendar days"; and

(2) "An order to execute a sale of securities which the seller does not own" shall mean that the customer placing the sell order has identified the sale as a short sale to the broker or dealer.

(j) Except with respect to a government securities interdealer broker subject to the financial responsibility requirements of § 402.1(e) and a government securities broker or dealer that is a futures commission merchant registered with the CFTC, § 240.15c3–3(e)(3) is modified for purposes of this section to read as follows:

"(3) Computations necessary to determine the amount required to be deposited as specified in paragraph (e)(1) of this section shall be made weekly, as of the close of the last business day of the week, and the deposit so computed shall be made no later than 1 hour after the opening of banking business on the second following business day; provided, however, a government securities broker or dealer registered pursuant to section 15C(a)(1)(A) of the Act (15 U.S.C. 78o–5(a)(1)(A)) which has a ratio of liquid capital to total haircuts (calculated in accordance with Part 402 of this chapter) of 1.8 or greater and which carries aggregate customer funds (as defined in paragraph (a)(10) of this section), as computed at the last required computation pursuant to this section, not exceeding $1 million, may in the alternative make the computation monthly, as of the close of the last business day of the month, and, in such event, shall deposit not less than 105 percent of the amount so computed no later than 1 hour after the opening of banking business on the second following business day. If a registered government securities broker or dealer, computing on a monthly basis, has, at the time of any required computation, a ratio of liquid capital to total haircuts of less than 1.8, such broker or dealer shall thereafter compute weekly as aforesaid until four successive weekly computations are made, none of which were made at a time when its ratio of liquid capital to total haircuts was less than 1.8. Computations in addition to the computation required in this paragraph (3), may be made as of the close of any other business day, and the deposits so computed shall be made no later than 1 hour after the opening of banking business on the second following business day. The registered government securities broker or dealer shall make and maintain a record of each such computation made pursuant to this paragraph (3) or otherwise and preserve such record in accordance with § 240.17a–4."

(k) Except with respect to a government securities interdealer broker subject to the financial responsibility requirements of § 402.1(e) and a government securities broker or dealer that is a futures commission merchant registered with the CFTC, Note E(5) of § 240.15c3–3a of this title is modified for purposes of this section to read as follows:

"(5) Debit balances in margin accounts (other than omnibus accounts) shall be reduced by the amount by which any single customer's debit balance exceeds 25% (to the extent such amount is greater than $50,000) of the government securities broker's or dealer's liquid capital unless such broker or dealer can demonstrate that the debit balance is directly related to credit items in the Reserve Formula. Related accounts (e.g., the separate accounts of an individual, accounts under common control or subject to cross guarantees) shall be deemed to be a single customer's accounts for purposes of this provision."

**§ 403.5 Custody of securities held by financial institutions that are government securities brokers or dealers.**

(a) A government securities broker or dealer that is a financial institution shall:

(1) Comply with Part 450 with respect to all government securities held for the account of customers of the financial institution in its capacity as a fiduciary or custodian (unless otherwise exempt pursuant to § 450.3); and

(2) Comply with Part 450 and with paragraphs (c) and (d) of this section with respect to all fully paid and excess margin government securities held for customers of the financial institution in its capacity as government securities broker or dealer, and government securities that are the subject of a repurchase agreement between the financial institution and certain counterparties as described in paragraph (d) of this section.

(b) A financial institution shall not be in violation of the possession or control requirements of paragraphs (c) and (d) of this section if, solely as the result of normal business operations, temporary lags occur between the time when a security is first required to be in the financial institution's possession or control and the time when it is actually placed in possession or control, provided that the financial institution takes timely steps in good faith to establish prompt possession or control. In the event that a financial institution has accepted funds from a customer for the purchase of securities and the financial institution does not initiate the purchase of the specified securities by the close of the next business day after receipt of such customer's funds, the financial institution shall immediately deposit or redeposit the funds in an account belonging to such customer and send the customer notice of such deposit or redeposit.

(c)(1) On each business day a financial institution shall determine the quantity and issue of such securities, if any, that are required to be but are not in the financial institution's possession

or control. As appropriate to bring such securities into possession or control, the financial institution shall promptly:

(i) Obtain the release of any lien, charge, or other encumbrance against such securities,

(ii) Obtain the return of any securities loaned;

(iii) Obtain possession or control of securities failed to receive for more than 30 days, or in the case of mortgage-backed securities, more than 45 days;

(iv) Buy in securities as necessary to the extent any shortage of securities in possession or control cannot be resolved by any of the above procedures.

(2) The financial institution shall prepare and maintain a current and detailed description of the procedures and internal controls that it utilizes to comply with the possession or control requirements of this paragraph (c), which shall be made available upon request to its appropriate regulatory agency.

(3) Nothing stated in this section shall be construed as affecting the absolute right of a customer of a government securities broker or dealer, unless otherwise agreed in writing, in the normal course of business operations following demand made on the broker or dealer, to receive the physical delivery of certificates if the securities are issued in certificated form, or to direct a transfer of or otherwise to exercise control over any securities if they are:

(i) Fully-paid securities to which the customer is entitled;

(ii) Margin securities upon full payment by such customer to the broker or dealer of the customer's indebtedness to the broker or dealer; or

(iii) Excess margin securities not reasonably required to collateralize such customer's indebtedness to the broker or dealer.

(d)(1) A financial institution that retains custody of securities that are the subject of a repurchase agreement between the financial institution and a counterparty other than another broker or dealer that is registered pursuant to sections 15, 15B or 15C(a)(1)(A) of the Act (15 U.S.C. 78o, 78o–4, 78o–5(a)(1)(A)) or that has filed notice of its status as a government securities broker or dealer pursuant to section 15C(a)(1)(B) of the Act (15 U.S.C. 78o–5(a)(1)(B)), and that retains the right to substitute other securities for the securities that are the subject of such repurchase agreement, shall:

(i) Obtain the repurchase agreement in writing;

(ii) Confirm in writing the specific securities that are the subject of a repurchase transaction pursuant to such agreement at the end of the day of initiation of the transaction and at the end of any other day during which other securities are substituted if the substitution results in a change to issuer, maturity date or coupon rate specified in the previous confirmation;

(iii) Advise the counterparty in the repurchase agreement that the funds held by the financial institution pursuant to a repurchase transaction are not a deposit and therefore are not insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation, as applicable;

(iv) Include in the written repurchase agreement the provision by which the financial institution retains the right to substitute securities and further provide that, in the case of a repurchase transaction with a contract price of less than $1,000,000, the financial institution additionally will obtain, orally or in writing, on any trading day on which a substitution is to occur, the prior consent of the counterparty to such substitution, and will keep a record of each such consent obtained, including the identities of the individuals requesting and agreeing to such substitution; and

(v) Include in the written repurchase agreement the following disclosure statement, which must be prominently displayed in the written repurchase agreement immediately preceding the provision governing the right to substitution:

**Required Disclosure**

The [seller] is not permitted to substitute other securities for those subject to this agreement and therefore must keep the [buyer's] securities segregated at all times, unless in this agreement the [buyer] grants the [seller] the right to substitute other securities. If the [buyer] grants the right to substitute, this means that the [buyer's] securities will likely be commingled with the [seller's] own securities during the trading day.

However, in the case of a repurchase transaction of less than $1,000,000, the [seller] is not permitted to substitute securities unless it has additionally obtained the [buyer's] prior consent to substitution on each trading day on which the [seller] wishes to make substitution. Regardless of the amount of the transaction, the [buyer] is advised that, during any trading day that the [buyer's] securities are commingled with the [seller's] securities, they may be subject to liens granted by the [seller] to third parties and may be used by the [seller] for deliveries on other securities transactions. Whenever the securities are commingled, the [seller's] ability to resegregate substitute securities for the [buyer] will be subject to the [seller's] ability to satisfy any lien or to obtain substitute securities.

(vi) Maintain possession or control of securities that are the subject of the agreement in accordance with § 450.4(a) and (b) of this chapter, except when exercising its right of substitution in accordance with the provisions of the agreement and paragraph (d)(1)(iv) of this section.

(2) A confirmation issued in accordance with paragraph (d)(1) of this section shall specify the issuer, maturity date, coupon rate and market value of the security and shall further identify a CUSIP or GNMA pool number, as appropriate, unless other records of the broker or dealer issuing such confirmation to identify the specific security in which the counterparty has an interest.

(e)(1) A government securities broker or dealer that is a branch or agency of a foreign bank shall keep on deposit with an insured bank (as that term is defined in 12 U.S.C. 1813(h)) an amount equal to the amount that would be required to be set aside pursuant to § 240.15c3–3(e)(1) of this title with respect to government securities of customers of such branch or agency. The amount required to be deposited pursuant to this § 403.5(e)(1) may be reduced by the amount of assets pledged or deposited by the branch or agency pursuant to regulations promulgated by a Federal or State banking regulatory agency that are attributable to liabilities to customers which are included both in the calculation of the required pledge or deposit of assets and in the calculation of the amount to be set aside pursuant to § 240.15c3–3(e)(1) of this title.

(2) The amount deposited in accordance with this section shall be pledged to the appropriate regulatory agency of the branch or agency making the deposit for the exclusive benefit of the customers to whom the credit balances are owed.

(3) For purposes of making the calculation pursuant to § 240.15c3–3(e)(1) of this title, the terms "free credit balances" and "other credit balances" shall include only liabilities of the branch or agency to customers that arise from transactions in government securities for or with such customers or that represent principal, interest or other proceeds of such securities.

(f)(1) For purposes of this section, the terms "fully paid securities," "margin securities," and "excess margin securities" shall have the meanings described in § 403.4(b), (c) and (d).

(2) For purposes of this section, the term "customer" shall include any person from whom or on whose behalf a financial institution that is a government securities broker or dealer has received

or acquired or holds securities for the account of that person or funds resulting from transactions in securities for or with such person or that represent principal, interest, or other proceeds of such securities. The term shall not include a broker or dealer that is registered pursuant to sections 15, 15B or 15C(a)(1)(A) of the Act (15 U.S.C. 78o, 78o–4, 78o–5(a)(1)(A)) or that has filed notice of its status as a government securities broker or dealer pursuant to section 15C(a)(1)(B) of the Act (15 U.S.C. 78o–5(a)(1)(B)) except with respect to securities maintained by such broker or dealer in a Segregated Account as defined in § 403.4(f)(1) and with respect to securities otherwise identified by such broker or dealer as customer securities for purposes of maintaining possession or control of such securities as required by this part.

**§ 403.6 Compliance with part by futures commission merchants.**

A government securities broker or dealer that is also a futures commission merchant registered with the CFTC shall comply with the provisions of this Part with respect to all customer funds and securities except those that are incidental to the broker's or dealer's futures-related business, as defined in § 240.3a43–1(b) of this title. For purposes of the preceding sentence, the term "customer" shall have the meaning set forth in § 240.15c3–3(a)(1) of this title.

**§ 403.7 Effective dates.**

(a) *General.* Except as provided in paragraphs (b) and (c), this Part shall be effective on the last business day in October 1987.

(b) *Confirmations.* The requirements of § 403.4(e) and § 403.5(d) to provide confirmations of substitution of securities subject to a repurchase agreement shall be effective July 25, 1987.

(c) *Written repurchase agreements.* In the case of existing customers as of July 25, 1987, the requirement to obtain a repurchase agreement in writing that contains the provisions required by § 403.4(e) or § 403.5(d) shall be effective January 31, 1988, provided the disclosures described in such sections of the temporary regulations are furnished to such customers by July 25, 1987. In the case of new customers after July 25, 1987, the requirements of §§ 403.4(e) and 403.5(d) to obtain a repurchase agreement in writing shall be effective on October 31, 1987, provided that during the period starting July 26, 1987 and ending October 31, 1987, the disclosures described in such sections of the temporary regulations are furnished to such customers before the first hold-in-custody repurchase transaction with such customers. For purposes of providing the disclosures to counterparties prior to October 31, 1987, the initial sentence of the required disclosure language of §§ 403.4(e) and 403.5(d) may be modified as follows if a written agreement is not in place:

"The [seller] is not permitted to substitute securities for those subject to a repurchase transaction and therefore must keep the buyer's securities segregated at all times, unless the [buyer] grants the [seller] the right to substitute other securities."

## PART 404—RECORDKEEPING AND PRESERVATION OF RECORDS

Sec.

404.1 Application of part to registered brokers and dealers.

404.2 Records to be made and kept current by registered government securities brokers and dealers; records of non-resident registered government securities brokers and dealers.

404.3 Records to be preserved by registered government securities brokers and dealers.

404.4 Records to be made and preserved by government securities brokers and dealers that are financial institutions.

404.5 Securities counts by registered government securities brokers and dealers.

**Authority:** Sec. 101, Pub. L. 99–571, 100 Stat. 3209 (15 U.S.C. 78o–5 (b)(1)(B), (b)(1)(C), (b)(2)).

**§ 404.1 Application of part to registered brokers and dealers.**

Compliance by a registered broker or dealer with:

(a) Section 240.17a–3 of this title, pertaining to records to be made, modified as provided in § 404.2(a) (3), (4) and (5);

(b) Section 240.17a–4 of this title, pertaining to preservation of records;

(c) Section 240.17a–13 of this title, pertaining to quarterly securities counts, modified as provided in § 404.5(b); and

(d) Section 240.17a–7 of this title, pertaining to records of non-resident brokers or dealers,

shall constitute compliance with this part.

**§ 404.2 Records to be made and kept current by registered government securities brokers and dealers; records of non-resident registered government securities brokers and dealers.**

(a) Every registered government securities broker or dealer shall comply with the requirements of § 240.17a–3 of this title (SEC Rule 17a–3), with the following modifications:

(1) References to "broker or dealer" and "broker or dealer registered pursuant to section 15 of the Act" include registered government securities brokers or dealers.

(2) References to §§ 240.17a–3, .17a–4, .17a–5, and .17a–13 mean such sections as modified by this part and Part 405 of this chapter.

(3) Section 240.17a–3(a)(4) is revised by adding paragraph (a)(4)(vii) to read as follows:

"(vii) Repurchase and reverse repurchase agreements."

(4) Section 240.17a–3(a)(5) is modified to read as follows:

"(5) A securities record or ledger reflecting separately for each security as of the clearance dates all "long" or "short" positions (including securities in safekeeping and securities that are the subjects of repurchase or reverse repurchase agreements) carried by such member, broker, or dealer for his account or for the account of his customers or partners or others and showing the location of all securities long and the offsetting position to all securities short, including long security count differences and short security count differences classified by the date of the physical count and verification in which they were discovered, and in all cases the name or designation of the account in which each position is carried."

(5) Section 240.17a–3(a)(8) is modified to read as follows:

"(8) Copies of confirmations of all purchases and sales of securities, including all repurchase and reverse repurchase agreements, and copies of notices of all other debits and credits for securities, cash and other items for the account of customers and partners of such member, broker or dealer."

(6) (i) Except in the case of a government securities interdealer broker who is subject to the financial responsibility rules of § 402.1(c) of this chapter and a government securities broker or dealer that is a futures commission merchant registered with the CFTC, § 240.17a–3(a)(11) is modified to read as follows:

"(11) A record of the proof of money balances of all ledger accounts in the form of trial balances, and a record of the computation of liquid capital and total haircuts, as of the trial date, determined as provided in § 402.2 of this title; *Provided however,* that such computation need not be made by any registered government securities broker or dealer unconditionally exempt from Part 402 of this title by § 402.1(f) of this title. Such trial balances and

computations shall be prepared currently at least once a month."

(ii) For a government securities interdealer broker who is subject to the financial responsibility rules of § 402.1(e) of this chapter, references to § 240.15c3-1 include modifications contained in § 402.1(e) of this chapter.

(7) Paragraph 240.17a-3(b)(1) is modified to read as follows:

"(1) This section shall not be deemed to require a government securities broker or dealer registered pursuant to section 15C(a)(1)(A) of the Act (15 U.S.C. 78o-5(a)(1)(A)) to make or keep such records of transactions cleared for such government securities broker or dealer as are customarily made and kept by a clearing broker or dealer pursuant to the requirements of §§ 240.17a-3 and 240.17a-4: *Provided*, That the clearing broker or dealer has and maintains net capital of not less than $25,000 (or, in the case of a clearing broker or dealer that is a registered government securities broker or dealer, liquid capital less total haircuts, determined as provided in § 402.2 of this title, of not less than $25,000) and is otherwise in compliance with § 240.15c3-1, § 402.2 of this title, or the capital rules of the exchange of which such clearing broker or dealer is a member if the members of such exchange are exempt from § 240.15c3-1 by paragraph (b)(2) of this part."

(8) The undertaking in § 240.17a-3(b)(2) is modified to read as follows:

"The undersigned hereby undertakes to maintain and preserve on behalf of [registered government securities broker or dealer] the books and records required to be maintained by [registered government securities broker or dealer] pursuant to 17 CFR 404.2 and 404.3 and Rules 17a-3 and 17a-4 under the Securities Exchange Act of 1934 and to permit examination of such books and records at any time or from time to time during business hours by examiners or other representatives of the Securities and Exchange Commission, and to furnish to said Commission at its principal office in Washington, DC, or at any regional office of said Commission specified in a demand made by or on behalf of said Commission for copies of books and records, true, correct, complete, and current copies of any or all, or any part, of such books and records. This undertaking shall be binding upon the undersigned, and the successors and assigns of the undersigned."

(9) Section 240.17a-3(c) is modified to read as follows:

"(c) This section shall not be deemed to require a government securities broker or dealer to make or keep such records as are required by paragraph (a) reflecting the sale and redemption of United States Savings Bonds, United States Savings Notes and United States Savings Stamps."

(b) (1) Every non-resident government securities broker or dealer registered or applying for registration pursuant to section 15C of the Act shall comply with § 240.17a-7 of this title, *Provided That* in such section references to "broker or dealer" shall include government securities brokers or dealers.

(2) The term "non-resident government securities broker or dealer" means

(i) In the case of an individual, one who resides in or has his principal place of business in any place not subject to the jurisdiction of the United States;

(ii) In the case of a corporation, one incorporated in or having its principal place of business in any place not subject to the jurisdiction of the United States; and

(iii) In the case of a partnership or other unincorporated organization or association, one having its principal place of business in any place not subject to the jurisdiction of the United States.

(Approved by the Office of Management and Budget under control number 1505-0020)

**§ 404.3 Records to be preserved by registered government securities brokers and dealers.**

(a) Every registered government securities broker or dealer, except a government securities interdealer broker subject to the financial responsibility rules of § 402.1(e) and a government securities broker or dealer that is also a futures commission merchant registered with the CFTC, shall comply with the requirements of § 240.17a-4 of this title (SEC Rule 17a-4), with the following modifications:

(1) References to "broker or dealer" and "broker and dealer" include registered government securities brokers or dealers.

(2) References to §§ 240.17a-3, 240.17a-4, and 240.17a-5 mean such sections as modified by this part and Part 405 of this chapter.

(3) References to § 240.15c3-1, relating to net capital, and "Computation for Net Capital" thereunder mean § 402.2 of this chapter and the computation of the ratio of liquid capital to total haircuts required thereunder.

(4) References to § 240.15c3-3, relating to possession or control of customer securities and balances, mean § 403.4 of this chapter.

(5) References to Form X-17A-5 mean Form G-405 (§ 449.5 of this chapter).

(6) The computation described in § 240.17a-4(b)(8)(x) is not required.

(b) A government securities interdealer broker subject to the financial responsibility rules of § 402.1(e) and a government securities broker or dealer that is also a futures commission merchant registered with the CFTC, shall comply with the requirements of § 240.17a-4 of this title (SEC Rule 17a-4), with the following modifications:

(1) References to "broker or dealer" and "broker and dealer" include registered government securities brokers or dealers.

(2) References to §§ 240.17a-3, 240.17a-4, and 240.17a-5 mean such sections as modified by this part and Part 405 of this chapter.

(3) With respect to a government securities interdealer broker subject to the financial responsibility rules of § 402.1(e) of this chapter, references to § 240.15c3-1, relating to net capital, and "Computation for Net Capital" thereunder include the modifications contained in § 402.1(e) of this chapter.

(4) References to § 240.15c3-3, relating to possession or control of customer securities and balances, mean § 403.4 of this chapter.

(Approved by the Office of Management and Budget under Control No. 1505-0100)

**§ 404.4 Records to be made and preserved by government securities brokers and dealers that are financial institutions.**

(a) *Records to be made and kept.* Every financial institution that is a government securities broker or dealer and that is not exempt from this part pursuant to Part 401 of this chapter shall comply with the requirements of §§ 404.2 and 404.3 unless such financial institution:

(1) Is subject to 12 CFR Part 12 (relating to national banks), 12 CFR Part 208 (relating to state member banks of the Federal Reserve System) or 12 CFR Part 344 (relating to state banks that are not members of the Federal Reserve System), or is a United States branch or agency of a foreign bank and complies with 12 CFR Part 12 (for federally licensed branches and agencies of foreign banks) or 12 CFR Part 208 (for uninsured state-licensed branches and agencies of foreign banks) or 12 CFR Part 344 (for insured state licensed branches and agencies of foreign banks). *Provided However*, that the records required to be made and kept by those regulations shall be made or kept without regard to the exemptions for

transactions in U.S. government or federal agency obligations provided in 12 CFR 12.2(a), 12 CFR 208.8(k)(6)(i), and 12 CFR 344.7(a); and

(2) Makes and keeps current:

(i)(A) A securities record or ledger reflecting separately for each government security as of the settlement dates all "long" or "short" positions (including government securities that are the subjects of repurchase or reverse repurchase agreements) carried by such financial institution for its own account or for the account of its customers or others (except securities held in a fiduciary capacity) and showing the location of all government securities long and the offsetting position to all government securities short, including long security count differences and short security count differences classified by the date of the physical count and verification in which they were discovered, and in all cases the name or designation of the account in which each position is carried;

(B) A complete and current Form G–FIN–4 (§ 449.3 of this chapter) or Form U–4 (promulgated by a self-regulatory organization) or Form MSD–4 (as required for associated persons of bank municipal securities dealers) for each associated person as defined in § 400.3(c) of this chapter;

(C) A Form G–FIN–5 (§ 449.4 of this chapter) or Form U–5 (promulgated by a self-regulatory organization) or Form MSD–5 (as required for associated persons of bank municipal securities dealers) for each associated person whose association has been terminated as provided in § 400.4(d)(2) of this chapter; and

(D) A complete and current Form G–FIN (§ 449.1 of this chapter) and, if applicable, a Form G–FINW (§ 449.2 of this chapter).

(ii) For purposes of paragraph (a)(2)(i)(A) of this section, "safekeeping" may be shown as a location of any securities long as long as the financial institution complies with the requirements of Part 450 of this chapter with respect to such securities.

(b) *Preservation of records.* (1) The records required by paragraph (a)(2)(i)(A) of this section shall be preserved for not less than six years, the first two years in an easily accessible place.

(2) The records required by paragraphs (a)(2)(i)(B) and (C) of this section shall be preserved for at least three years after the person who is the subject of the record has terminated his employment and any other association with the government securities broker or dealer function of the financial institution.

(3) The records required by paragraph (a)(2)(i)(D) of this section shall be preserved for at least three years after the financial institution has notified the appropriate regulatory agency that it has ceased to function as a government securities broker or dealer.

(c) *Effective date.* This section shall be effective on July 25, 1987, *except that* until October 31, 1987, a financial institution government securities broker or dealer is not required to make and keep current the securities position record required by paragraph (a)(2)(i)(A) of this section.

(Approved by the Office of Management and Budget under control number 1505–0100)

### § 404.5 Securities counts by registered government securities brokers and dealers.

Every registered government securities broker or dealer shall comply with the requirements of § 240.17a–13 of this title (Commission Rule 17a–13), with the following modifications:

(a) References to "broker or dealer" and "broker and dealer" include registered government securities brokers or dealers.

(b) Sections 240.17a–13(b) (1), (2), and (3) are modified to read as follows:

"(1) Physically examine and count all securities held, including securities that are the subject of repurchase or reverse repurchase agreements;

"(2) Account for all securities in transfer, in transit, pledged, loaned, borrowed, deposited, failed to receive, failed to deliver, subject to repurchase or reverse repurchase agreements or otherwise subject to his control or direction but not in his physical possession by examination and comparison of the supporting detail records with the appropriate ledger control accounts;

"(3) Verify all securities in transfer, in transit, pledged, loaned, borrowed, deposited, failed to receive, failed to deliver, subject to repurchase or reverse repurchase agreements or otherwise subject to his control or direction but not in his physical possession, where such securities have been in said status for longer than thirty days;".

(Approved by the Office of Management and Budget under control number 1505–0100)

## PART 405—REPORTS AND AUDIT

Sec.

405.1 Application of part to registered brokers and dealers and to financial institutions; transition rule.

405.2 Reports to be made by registered government securities brokers and dealers.

405.3 Supplemental current financial and operational reports to be made by certain registered government securities brokers and dealers.

405.4 Financial recordkeeping and reporting of currency and foreign transactions by registered government securities brokers and dealers.

Authority: Sec. 101, Pub. L. 99–571, 100 Stat. 3209 (15 U.S.C. 78o–5(b)(1)(B), (b)(1)(C), (b)(2)).

### § 405.1 Application of part to registered brokers and dealers and to financial institutions; transition rule.

(a) Compliance by registered brokers or dealers with §§ 240.17a–5, 240.17a–8, and 240.17a–11 of this title (Commission Rules 17a–5, 17a–8 and 17a–11) constitutes compliance with this part.

(b) A government securities broker or dealer that is a financial institution and is subject to financial reporting rules of its appropriate regulatory agency is exempt from the provisions of §§ 405.2 and 405.3.

(c) This part shall be effective July 25, 1987, *Provided however,*

(1) That registered government securities brokers or dealers shall first be required to file the reports required by § 240.17a–5(a), by virtue of § 405.2, for the month and the quarter during which they were first required to comply with Part 402 of this chapter; but that

(2) For any quarter ending prior to the quarter during which they were first required to comply with Part 402 of this chapter, registered government securities brokers or dealers shall file with the designated examining authority for such registered broker or dealer, within 17 business days after the close of the quarter, an unaudited balance sheet (with appropriate notes) for such quarter, prepared in accordance with generally accepted accounting principles.

### § 405.2 Reports to be made by registered government securities brokers and dealers.

(a) Every registered government securities broker or dealer, except a government securities interdealer broker subject to the financial responsibility requirements of § 402.1(e) of this chapter and a government securities broker or dealer that is also a futures commission merchant registered with the CFTC, shall comply with the requirements of § 240.17a–5 of this title (SEC Rule 17a–5), with the following modifications:

(1) References to "broker or dealer" include registered government securities brokers and dealers.

(2) References to "rules of the Commission" or words of similar import

include, where appropriate, the regulations contained in this subchapter.

(3) References to Form X–17A–5 mean Form G–405 (§ 449.5 of this chapter).

(4) For the purposes of § 240.17a–5(a)(4) of this title, the Commission may, on the terms and conditions stated in that subparagraph, declare effective a plan with respect to Form G–405, in which case, that plan shall be treated the same as a plan approved with respect to Form X–17A–5.

(5) References to "net capital" mean "liquid capital" as defined in § 402.2(d) of this chapter.

(6) References to § 240.15c3–1, relating to net capital, mean § 402.2 of this chapter.

(7) Section 240.17a–5(c)(2)(ii) is modified to read as follows:

"(ii) A footnote containing a statement of the registered government securities broker's or dealer's liquid capital, total haircuts, and ratio of liquid capital to total haircuts, determined in accordance with § 402.2 of this title. Such statement shall include summary financial statements of subsidiaries consolidated pursuant to Appendix C of § 240.15c3–1 modified as provided in § 402.2c of this title, where material, and the effect thereof on the liquid capital, total haircuts and ratio of liquid capital to total haircuts of the registered government securities broker or dealer."

(8) References to § 240.15c3–3 and the exhibits thereto, relating to possession or control of customer securities and reserve requirements, mean § 403.4 of this chapter.

(9) The reference to § 240.15b1–2 of this title, relating to financial statements to be filed upon registration, means § 240.15Ca2–2.

(10) The supplemental report described in § 240.17a–5(e)(4) of this title, concerning the Securities Investor Protection Act, is not required.

(11) The statement described in § 240.17a–5(f)(2) of this title shall be headed "Notice Pursuant to § 405.2," and shall be filed within 30 days following the effective date of registration as a government securities broker or dealer.

(12) References in § 240.17a–5(h)(2) of this title to § 240.17a–11 mean § 405.3 of this chapter.

(b) A government securities interdealer broker subject to the financial responsibility requirements of § 402.1(e) of this chapter shall comply with the requirements of § 240.17a–5 of this title (SEC Rule 17a–5), with the following modifications:

(1) References to "broker or dealer" include central market government securities brokers;

(2) References to "rules of the Commission" or words of similar import include, where appropriate, the regulations contained in this subchapter.

(3) References to "net capital" mean net capital calculated as provided in § 401.1(e) of this chapter.

(4) References to § 240.15c3–1, relating to net capital, include the modifications contained in § 401.1(e) of this chapter.

(5) References to § 240.15c3–3 and the exhibits thereto, relating to possession or control of customer securities and reserve requirements, mean § 403.4 of this chapter.

(6) The reference to § 240.15b1–2 of this title, relating to financial statements to be filed upon registration, means § 140.15Ca2–2.

(7) The supplemental report described in § 240.17a–5(e)(4) of this title, concerning the Securities Investor Protection Act, is not required.

(8) The statement described in § 240.17a–5(f)(2) of this title shall be headed "Notice Pursuant to § 405.2" and shall be filed within 30 days following the effective date of registration as a government securities broker.

(9) References in § 240.17a–5(h)(2) of this title to § 240.17a–11 mean § 405.3(b) of this chapter.

(c) A government securities broker or dealer that is also a futures commission merchant registered with the CFTC shall comply with the requirements of § 240.17a–5 of this title (SEC Rule 17a–5), with the following modifications:

(1) References to "broker or dealer" include registered government securities brokers and dealers.

(2) References to "rules of the Commission" or words of similar import include, where appropriate, the regulations contained in this subchapter.

(3) References to § 240.15c3–3 and the exhibits thereto, relating to possession or control of customer securities and reserve requirements, mean § 403.4 of this chapter.

(4) The reference to § 240.15b1–2 of this title, relating to financial statements to be filed upon registration, means § 240.15Ca2–2.

(5) The supplemental report described in § 240.17a–5(e)(4) of this title, concerning the Securities Investor Protection Act, is not required.

(6) The statement described in § 240.17a–5(f)(2) of this title shall be headed "Notice Pursuant to § 405.2," and shall be filed within 30 days following the effective date of registration as a government securities broker or dealer.

(7) References in § 240.17a–5(h)(2) of this title to § 240.17a–11 mean § 405.3 of this chapter.

(Approved by the Office of Management and Budget under Control number 1505–0100)

**§ 405.2 Supplemental current financial and operational reports to be made by certain registered government securities brokers and dealers.**

(a) Every registered government securities broker or dealer, other than a government securities interdealer broker that is subject to the financial responsibility requirements of § 402.1(e) and a government securities broker or dealer that is also a futures commission merchant registered with the CFTC, shall comply with the requirements of § 240.17a–11 of this title (SEC Rule 17a–11), with the following modifications:

(1) References to "broker or dealer" include registered government securities brokers and dealers.

(2) References to § 240.15c3–1, relating to net capital, mean § 402.2 of this chapter.

(3) References to "net capital" mean "liquid capital" as defined in § 402.2 of this chapter.

(4) References to § 240.15c3–1d, relating to subordination agreements, mean that section as modified by § 402.2d of this chapter.

(5) References to Form X–17A–5 mean Form G–405 (§ 449.5 of this chapter).

(6) References to § 240.17a–5, relating to reports and audit, mean § 405.2 of this chapter.

(7) Section 240.17a–11(b)(1), for the purposes of this section, is modified to read as follows:

"(1) If a computation made by a registered government securities broker or dealer pursuant to the requirements of § 402.2 of this title shows, at any point during the month, that his liquid capital is less than 150 percent of total haircuts, determined in accordance with § 402.2 of this title, such person shall file a report on Part II or Part IIA of Form G–405 (§ 449.5 of this title) as determined in accordance with the standards set forth in § 240.17a–5(a)(2) (ii) and (iii), within 15 calendar days after the end of each month thereafter until 3 successive months shall have elapsed during which liquid capital does not fall below 150 percent of total haircuts."

(8) References to § 240.17a–3, relating to records, mean § 404.2 of this chapter.

(b) A government securities interdealer broker that is subject to the financial responsibility requirements of § 402.1(e) of this chapter shall comply with the requirements of § 240.17a–11 of this title (SEC Rule 17a–11), with the following modifications:

(1) References to "broker or dealer" include government securities interdealer brokers;

(2) References to § 240.15c3–1, relating to net capital, include the modifications contained in § 401.1(e) of this chapter.

(3) References to "net capital" mean net capital calculated as provided in § 401.1(e) of this chapter.

(4) References to § 240.17a–5, relating to reports and audit, mean § 405.2(b) of this chapter.

(5) References to § 240.17a–3, relating to records, mean § 404.2 of this chapter.

(c) A government securities broker or dealer that is also a futures commission merchant registered with the CFTC shall comply with the requirements of § 240.17a–11 of this title (SEC Rule 17a–11), with the following modifications:

(1) References to "broker or dealer" include government securities brokers and dealers.

(2) References to § 240.15c3–1, relating to net capital, mean either § 240.15c3–1 or § 1.17 of this title, depending on which computation results in the higher net capital requirement.

(3) References to "net capital" mean the higher of net capital calculated under § 240.15c3–1 or § 1.17 of this title.

(4) References to § 240.17a–5, relating to reports and audit, mean § 405.2 of this chapter.

(5) A new paragraph § 240.17a–5(b)(5) is added, to read as follows:

"(5) If a computation made by a government securities broker or dealer that is not a registered broker or dealer but that is also a futures commission merchant registered with the Commodity Futures Trading Commission shows that:

(i) The adjusted net capital of such entity is less than the greater of:

(A) 150 percent of the appropriate minimum dollar amount required by § 1.17(a)(1)(i);

(B) 6 percent of the following amount: The customer funds required to be segregated pursuant to section 4d(2) of the Commodity Exchange Act and § 1.17 of this title, less the market value of commodity options purchased by option customers on or subject to the rules of a contract market, *Provided,* however, the deduction for each option customer shall be limited to the amount of customer funds in such option customer's account; or

(ii) At any point during the month, aggregate indebtedness is in excess of 1200 percent of net capital or total net capital is less than 120 percent of the minimum net capital required,

then such person shall file a report on Part II or Part IIA of Form X–17A–5 (§ 249.617 of this chapter) as determined in accordance with the standards set forth in § 240.17a–5(a)(2) (ii) and (iii), within 15 calendar days after the end of each month thereafter until three successive months have elapsed during which none of the conditions described in this paragraph (b)(5) shall have occurred."

(Approved by the Office of Management and Budget under Control number 1505–0100)

**§ 405.4 Financial recordkeeping and reporting of currency and foreign transactions by registered government securities brokers and dealers.**

Every registered government securities broker or dealer who is subject to the requirements of the Currency and Foreign Transactions Reporting Act of 1970 shall comply with the reporting, recordkeeping and record retention requirements of 31 CFR Part 103. Where 31 CFR Part 103 and § 404.3 of this chapter require the same records to be preserved for different periods of time, such records or reports shall be preserved for the longer period of time.

## PART 449—FORMS, SECTION 15C OF THE SECURITIES EXCHANGE ACT OF 1934

Sec.

449.1 Form G–FIN, notification by financial institutions of status as government securities broker or dealer pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934.

449.2 Form G–FINW, notification by financial institutions of cessation of status as government securities broker or dealer pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934 and § 400.6 of this chapter.

449.3 Form G–FIN–4, notification by persons associated with financial institutions that are government securities brokers and dealers pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934 and § 400.4 of this chapter.

449.4 Form G–FIN–5, notification of termination of association with a financial institution that is a government securities broker or dealer pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934 and § 400.4 of this chapter.

449.5 Form G–405, information required of registered government securities brokers and dealers pursuant to section 15C of the Securities Exchange Act of 1934 and §§ 405.2 and 405.4 of this chapter.

Authority: Sec. 101, Pub. L. 99–571, 100 Stat. 3208 (15 U.S.C. 78o–5 (a), (b)(1)(B), (b)(2)).

**§ 449.1 Form G–FIN, notification by financial institutions of status as Government securities broker or dealer pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934.**

This form is to be used by financial institutions that are government securities brokers and dealers not exempt under Part 401 of this chapter to notify their appropriate regulatory agency of their status. The form is promulgated by the Board of Governors of the Federal Reserve System and is available from the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board and the SEC.

**§ 449.2 Form G–FINW, notification by financial institutions of cessation of status as Government securities broker or dealer pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934 and § 400.6 of this chapter.**

This form is to be used by financial institutions that are government securities brokers or dealers to notify their appropriate regulatory agency that they have ceased to function as a government securities broker or dealer. The form is promulgated by the Board of Governors of the Federal Reserve System and is available from the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board and the SEC.

**§ 449.3 Form G–FIN–4, notification by persons associated with financial institutions that are government securities brokers and dealers pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934 and § 400.4 of this chapter.**

This form is to be used by associated persons of financial institutions that are government securities brokers or dealers to provide certain information to the financial institution and the appropriate regulatory agency concerning employment, residence, and statutory disqualification. The form is promulgated by the Department of the Treasury and is available from the Board of Governors of the Federal Reserve System, the Comptroller of the Currency, the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board and the SEC.

**§ 449.4 Form G–FIN–5, notification of termination of association with a financial institution that is a government securities broker or dealer pursuant to section 15C(a)(1)(B)(i) of the Securities Exchange Act of 1934 and § 400.4 of this chapter.**

This form is to be used by financial institutions that are government securities brokers or dealers to notify the appropriate regulatory agency of the fact that an associated person is no longer associated with the government securities broker or dealer function of the financial institution. The form is promulgated by the Department of the Treasury and is available from the Board of Governors of the Federal Reserve System, the Comptroller of the

Currency, the Federal Deposit Insurance Corporation, the Federal Home Loan Bank Board and the SEC.

**§ 449.5 Form G-405, information required of registered government securities brokers and dealers pursuant to section 15C of the Securities Exchange Act of 1934 and §§ 405.2 and 405.4 of this chapter.**

This form is to be used by registered government securities brokers and dealers to make the monthly, quarterly and annual financial reports required by Part 405 of this chapter. The form is promulgated by the Department of the Treasury and is available from the SEC and the designated examining authorities.

**Subchapter B—Rules and Regulations Under Title II of the Government Securities Act of 1986**

## PART 450—CUSTODIAL HOLDINGS OF GOVERNMENT SECURITIES BY DEPOSITORY INSTITUTIONS

Sec.

450.1 Scope of regulations; office responsible.
450.2 Definitions.
450.3 Exemption for holdings subject to fiduciary standards.
450.4 Custodial holdings of government securities.
450.5 Effective date.

**Authority:** Sec. 101, Pub. L. 99-571, 100 Stat. 3208 (15 U.S.C. 78o-5(b)(1)(A), (b)(2), (b)(3)(B)); sec. 201, Pub. L. 99-571, 100 Stat. 3222-23 (31 U.S.C. 3121, 9110).

**§ 450.1 Scope of regulations; office responsible.**

(a) This part applies to depository institutions that hold government securities as fiduciary, custodian, or otherwise for the account of a customer, and that are not government securities brokers or dealers, as defined in sections 3(a)(43) and 3(a)(44) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(43)-(44)). Depository institutions exempt under Part 401 of this chapter from the requirements of Subchapter A of this chapter must comply with this part. Certain depository institutions that are government securities brokers or dealers must also comply with this part, as well as with additional requirements set forth in § 403.5.

(b) The regulations in this subchapter are promulgated by the Assistant Secretary (Domestic Finance) pursuant to a delegation of authority from the Secretary of the Treasury. The office responsible for the regulations is the Office of the Deputy Assistant Secretary (Federal Finance).

**§ 450.2 Definitions.**

For purposes of this subchapter:

(a) "Appropriate regulatory agency" has the meaning set out in section 3(a)(34)(G) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(34)(G)), except that the appropriate regulatory agency for—

(1) An institution insured by the Federal Savings and Loan Insurance Corporation is the Federal Home Loan Bank Board;

(2) A federal credit union as defined in 12 U.S.C. 1752(1) and an insured credit union as defined in 12 U.S.C. 1752(7) is the National Credit Union Administration; and

(3) Any depository institution for whom an appropriate regulatory agency is not explicitly specified by either section 3(a)(34)(G) or this paragraph, is the SEC;

(b) "Customer" includes, but is not limited to, the counterparty to a transaction pursuant to a repurchase agreement for whom the depository institution retains possession of the security sold subject to repurchase, but does not include a broker or dealer that is registered pursuant to sections 15, 15B or 15C(a)(1)(A) of the Act (15 U.S.C. 78o, 78o-4, 78o-5(a)(1)(A)) or that has filed notice of its status as a government securities broker or dealer pursuant to section 15C(a)(1)(B) of the Act (15 U.S.C. 78o-5(a)(1)(B)) except as provided in § 450.4.

(c) "Depository institution" has the meaning stated in clauses (i) through (vi) of section 19(b)(1)(A) of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A) (i) through (vi)) and also includes a foreign bank, an agency or branch of a foreign bank and a commercial lending company owned or controlled by a foreign bank (as such terms are defined in the International Banking Act of 1978, Pub. L. 95-369, 92 Stat. 607);

(d) "Fiduciary capacity" includes trustee, executor, administrator, registrar, transfer agent, guardian, assignee, receiver, managing agent, and any other similar capacity involving the sole or shared exercise of discretion by a depository institution having fiduciary powers that is supervised by a Federal or State financial institution regulatory agency; and

(e) "Government securities" means those obligations described in subparagraphs (A), (B), or (C) of section 3(a)(42) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(42) (A) through (C)).

**§ 450.3 Exemption for holdings subject to fiduciary standards.**

(a) The Secretary has determined that the rules and standards of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System and the Federal Deposit Insurance Corporation governing the holding of government securities in a fiduciary capacity by depository institutions subject thereto are adequate. Accordingly, such depository institutions are exempt from this part with respect to their holdings of government securities in a fiduciary capacity and their holdings of government securities in a custodial capacity, *Provided* that

(1) Such institution has adopted policies and procedures that would apply to such custodial all the requirements imposed by its appropriate regulatory agency that are applicable to government securities held in a fiduciary capacity, and

(2) Such custodial holdings are subject to examination by the appropriate regulatory agency for compliance with such fiduciary requirements.

(b) The Secretary expects that each appropriate regulatory agency will notify the Department if it materially revises its rules and standards governing the holding of government securities in a fiduciary capacity.

**§ 450.4 Custodial holdings of government securities.**

Depository institutions that are subject to this part shall observe the following requirements with respect to their holdings of government securities for customer accounts:

(a)(1) Except as otherwise provided in this section, a depository institution shall maintain possession or control of all government securities held for the account of customers by segregating such securities from the assets of the depository institution and keeping them free of any lien, charge or claim of any third party granted or created by such depository institution.

(2)(i) Where customer securities are maintained by a depository institution at another depository institution, including but not limited to a correspondent bank or a trust company ("custodian institution"), the depository institution shall be in compliance with paragraph (a)(1) of this section if:

(A) The depository institution notifies the custodian institution that such securities are customer securities;

(B) The custodian institution maintains such securities in an account that is designated for customers of the depository institution and that does not contain proprietary securities of the depository institution; and

(C) The depository institution instructs the custodian institution to maintain such securities free of any lien, charge, or claim of any kind in favor of

such custodian institution or any persons claiming through it.

(ii) To the extent that a custodian institution holds securities that have been identified as customer securities by a depository institution in accordance with paragraph (a)(2)(i) of this section, the custodian institution shall treat such securities as customer securities separate from any other securities held for the account of the depository institution.

(3) Where customer securities are maintained by a depository institution at a Federal Reserve Bank, the depository institution shall be in compliance with paragraph (a)(1) of this section provided that any lien, charge or other claim of such Federal Reserve Bank or any person claiming through it against securities (other than proprietary securities of the depository institution) expressly excludes securities that, pursuant to this Part 450, the depository institution is required to keep free of all liens, charges, or other claims.

(4)(i) To the extent that a depository institution holds securities that have been identified to such depository institution as customer securities by a government securities broker or dealer, or that the government securities broker or dealer has instructed the depository institution to place in a segregated account, in accordance with Part 403 of Subchapter A of this chapter, the depository institution shall treat such securities as customer securities separate from any other securities held for the account of the government securities broker or dealer and shall comply with all of the provisions of this section with respect to such customer securities, except as provided in paragraph (a)(4)(ii) of this section.

(ii) A clearing bank that provides clearing services for a government securities broker or dealer and that maintains a segregated account as described in § 403.4 of this chapter shall not be required to transfer securities to such account upon the instruction of the broker or dealer for whom such account is maintained if the clearing bank determines as of the close of business that such securities continue to be required as collateral for an extension of clearing credit to such dealer. Whenever a clearing bank does not segregate securities upon the instruction of such broker or dealer, it shall send a notification to the appropriate regulatory agency of the broker or dealer for whom such account is maintained. Such securities shall thereafter be segregated pursuant to the instruction of the broker or dealer as soon as they are no longer required by the clearing bank as collateral for the extension of clearing credit.

(5) A depository institution that is subject to Part 403 is not required to maintain possession or control of margin securities as that term is defined in § 403.5(f)(1).

(6) Notwithstanding the requirement of paragraph (a)(1) of this section to maintain possession or control of customer securities, a depository may lend such securities to a third party pursuant to the written agreement of the customer, if such loan of securities is carried out in full compliance with supervisory guidelines of its appropriate regulatory agency that expressly govern securities lending practices.

(b) Records of government securities held for customers shall be kept separate and distinct from other records of the depository institution. Such records shall:

(1) Provide a system for identifying each customer, and each government security (or the amount of each issue of a government security issued in book-entry form) held for the customer;

(2) Describe the customer's interest in the government security;

(3) Indicate all receipts and deliveries of government securities and all receipts and disbursements of cash by the depository institution in connection with such securities;

(4) Include a copy of the safekeeping receipt or a confirmation issued for each government security held; and

(5) Provide an adequate basis for audit of such information.

(c) Counts of government securities held for customers in both definitive and book-entry form shall be conducted at least annually and such counts shall be reconciled with customer account records.

(1) Counts of book-entry securities and of definitive securities held outside the possession of the depository institution shall be made by reconciliation of the records of the depository institution with those of any depository, depository institution, or Federal Reserve Bank on whose books the depository institution has securities accounts.

(2) The depository institution conducting the count shall also verify any such securities in transfer, in transit, pledged, loaned, borrowed, deposited, failed to receive, failed to deliver, subject to repurchase or reverse repurchase agreements or otherwise subject to the depository institution's control or direction that are not in its physical possession, where the securities have been in such status for longer than thirty days.

(3) The dates and results of such counts and reconciliations shall be documented with differences noted in a security count difference account not later than seven business days after the date of each required count and verification as provided in this paragraph (c).

(d) For purposes of this section, a depository institution shall treat a government securities broker or dealer as a customer with respect to securities maintained by such government securities broker or dealer in a Segregated Account as defined in § 403.4(f)(1) of this chapter and with respect to securities otherwise identified to the depository institution as customer securities for purposes of maintaining possession or control of such securities as required by Part 403 of this chapter. The recordkeeping requirements of paragraph (b) of this section require the depository institution to treat such securities as customer securities separate from any other securities held for the account of the government securities broker or dealer, but do not require the depository institution to keep records identifying individual customers of the government securities broker or dealer.

(Approved by the Office of Management and Budget under Control number 1505-0100)

**§ 450.5 Effective date.**

This Part shall be effective October 31, 1987.

Dated: May 19, 1987.

Part III

# Federal Reserve System

## Financial Institutions Acting as Government Securities Dealers; Adoption of Forms; Notice

## FEDERAL RESERVE SYSTEM

[Docket No. R-0586]

### Financial Institutions Acting as Government Securities Brokers or Government Securities Dealers; Adoption of Forms

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Notice of adoption of forms.

**SUMMARY:** Under section 15C(a)(1)(B) of the Securities Exchange Act of 1934, 15 U.S.C. 78o–5(a)(1)(B), as amended by the Government Securities Act of 1986 (Pub. L. 99–571), all financial institutions that act as government securities brokers or government securities dealers must notify their designated Federal supervisory agencies of their broker/dealer activities, unless exempted from the notice requirement by Treasury Department regulation. The Board of Governors has the responsibility for establishing the form for this notice, as well as the form of the notice to be filed by financial institutions that are no longer acting as government securities brokers or government securities dealers. The proposed forms were published for comment on February 25, 1987, 52 FR 5724. After a review of comments, the Board has adopted Form G–FIN (notification by financial institution of status as government securities broker or dealer) and Form G–FINW (notification by financial institution of termination of status as government securities broker or dealer), substantially as proposed.

This action constitutes final approval under the Paperwork Reduction Act (Chapter 35 of 44 U.S.C.) and OMB regulations on Controlling Paperwork Burdens on the Public (5 CFR Part 1320).

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Robert S. Plotkin, Assistant Director (202–452–2782), or Susan S. Meyers, Senior Securities Regulation Analyst (202–452–2781), Division of Banking Supervision and Regulation; or, for the hearing impaired *only:* Telecommunications Device for the Deaf (202–452–3544), Earnestine Hill or Dorothea Thompson, Board of Governors of the Federal Reserve System. Federal Reserve Paperwork Clearance Officer: Nancy Steele, Division of Research and Statistics (202–452–3822).

**SUPPLEMENTARY INFORMATION:** The Board has adopted forms G–FIN and G–FINW as the vehicles for financial institutions to submit the notices of status as government securities brokers and government securities dealers required by the Government Securities Act of 1986, 15 U.S.C. 78o–5(a)(1)(B). The Board proposed these forms for comment on February 25, 1987, FR 5724. All six comments received (four from Federal Reserve Banks, two from commercial banks) generally supported the proposed forms. One bank saw no need to file an amendment to Form G–FIN because such amendment would merely duplicate the filings made on Forms G–FIN–4 or G–FIN–5. Amended G–FINs, however, are required by Treasury Department regulations, and the Form G–FIN is a public document while Forms G–FIN–4 and G–FIN–5 are not.

All financial institutions (generally Federal and state chartered commercial banks, foreign banks, savings banks, and savings and loan associations, but not credit unions) that act or cease to act as government securities brokers or government securities dealers are required by section 78o–5(a)(1)(B) to file these notices with their appropriate regulatory agencies unless exempted from the notice requirement by Treasury Department rule. Financial institutions that are currently acting as government securities brokers or government securities dealers and not otherwise exempt must file a notice on Form G–FIN by July 25, 1987. Financial institutions that intend to begin engaging in these activities after that date must file a notice prior to commencement of these operations. Financial institutions acting as government securities brokers or government securities dealers that cease engaging in these activities must file a notice on Form G–FINW with their appropriate regulatory agencies.

In general, the appropriate regulatory agency for national banks is the Comptroller of the Currency; for State member banks, the Board of Governors of the Federal Reserve System; for insured non-member State banks, the Federal Deposit Insurance Corporation; for federally insured savings and loans associations, the Federal Home Loan Bank Board; and for non-federally isured financial institutions, the Securities and Exchange Commission. A foreign bank should refer to section 3(a)(34) of the Securities Exchange Act (15) U.S.C. 78c(a)(34)) as amended by section 102 of the Government Securities Act to determine its appropriate regulatory agency.

The Board estimates that for the first year, approximately 350 financial institutions will be required to file Form G–FIN and that the paperwork burden for each institution will not be greater than an average of one hour. Thus for all financial institutions, the total burden associated with these forms is estimated at 350 hours. The Board estimates that approximately 50 state member banks will be required to file such forms; thus the total burden added to the Board's information collection budget is an estimated 50 hours. The Board does not anticipate any institutions that will be filing Form G–FIN will cease to act as government securities brokers or dealers during the next year, thus the Board estimates that there will be no paperwork burden associated with Form G–FINW for this time.

In a related action the Treasury Department has adopted temporary rules under the Government Securities Act, that, among other things, establish exemptions from the notice requirement for certain classes of financial institutions. (See 17 CFR Part 401.) In addition, the Treasury Department has adopted a rule requiring the filing of an amendment to the notice if any information contained therein becomes inaccurate. (See 17 CFR 400.5(b).)

Reference to the Forms G–FIN and G–FINW will be at 17 CFR 449.1 and 449.2.

Board of Governors of the Federal Reserve System, May 21, 1987.

William W. Wiles,

*Secretary of the Board.*

## LIST OF PUBLIC LAWS

**Last List May 26, 1987**

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

**H.R. 1941/Pub. L. 100-42**

To repeal and amend certain sections of the Powerplant and Industrial Fuel Use Act of 1978. (May 21, 1987; 101 Stat. 310; 5 pages) Price: $1.00

| Subscription (mailed as issued) | 185.00 | 1986 |
| Subscription (mailed as issued) | 185.00 | 1987 |
| Individual copies | 3.75 | 1987 |

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] No amendments to this volume were promulgated during the period Apr. 1, 1980 to March 31, 1986. The CFR volume issued as of Apr. 1, 1980, should be retained.

[3] No amendments to this volume were promulgated during the period July 1, 1984 to June 30, 1986. The CFR volume issued as of July 1, 1984, should be retained.

[4] No amendments to this volume were promulgated during the period July 1, 1985 to June 30, 1986. The CFR volume issued as of July 1, 1985 should be retained.

[5] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[6] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[7] No amendments to this volume were promulgated during the period Oct. 1, 1985 to Sept. 30, 1986. The CFR volume issued as of Oct. 1, 1985 should be retained.

## CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily Federal Register as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, DC 20402. Charge orders (VISA, MasterCard, CHOICE, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

Briefings on How To Use the Federal Register—
For information on briefings in Washington, DC, Chicago, IL, and Boston, MA, see announcement on the inside cover of this issue.

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

## THE FEDERAL REGISTER

## WHAT IT IS AND HOW TO USE IT

**FOR:** Any person who uses the Federal Register and Code of Federal Regulations.

**WHO:** The Office of the Federal Register.

**WHAT:** Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

**WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

### WASHINGTON, DC

**WHEN:** June 9, at 9 a.m.
**WHERE:** Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
**RESERVATIONS:** Gertrude E. Belton, 202-523-5237

### CHICAGO, IL

**WHEN:** July 8, at 9 a.m.
**WHERE:** Room 204A, Everett McKinley Dirksen Federal Building, 219 S. Dearborn Street, Chicago, IL.
**RESERVATIONS:** Call the Chicago Federal Information Center, 312-353-0339.

### BOSTON, MA

**WHEN:** July 15, at 9 a.m.
**WHERE:** Main Auditorium, Federal Building, 10 Causeway Street, Boston, MA.
**RESERVATIONS:** Call the Boston Federal Information Center, 617-565-8129

# Rules and Regulations

Federal Register
Vol. 52, No. 101
Wednesday, May 27, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF AGRICULTURE

### Agricultural Stabilization and Conservation Service

### 7 CFR Part 701

### Conservation and Environmental Programs

**AGENCY:** Agricultural Stabilization and Conservation Service (ASCS), USDA.

**ACTION:** Final rule.

**SUMMARY:** The purpose of this final rule is to amend the regulations governing the Conservation and Environmental Programs found at 7 CFR Part 701, Subpart—Agricultural Conservation Program, to change the maximum amount which a person participating in an Agricultural Conservation Program (ACP) long-term agreement (LTA) may earn in any year. The annual cost-share payment limitation under an LTA has been $3500. However, the Agriculture, Rural Development, and Related Agencies Appropriations Act, 1987, as included in Pub. L. 99–500 and Pub. L. 99–591, increases the existing payment limitation for LTA's. The new maximum amount of cost-share assistance which may be received by a person who has entered into a long-term agreement under the ACP shall not exceed the annual payment limitation multiplied by the number of years of the LTA.

**EFFECTIVE DATE:** May 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** James R. McMullen, Director, Conservation and Environmental Protection Division, ASCS, USDA, P.O Box 2415, Washington, DC 20013, telephone 202–447–6221.

**SUPPLEMENTARY INFORMATION:** Information collection requirements contained in this regulation (7 CFR Part 701) have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Number 0560–0012.

This final rule has been reviewed for compliance with Executive Order 12291 and Departmental Regulation No. 1521–1 and has been classified as "not major." It has been determined that these program provisions will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or (3) cause significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this rule applies are: Title—Agricultural Conservation Program (ACP), Number 10.063; as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this final rule since the Agricultural Stabilization and Conservation Service (ASCS) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

This program/activity is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR Part 3015, Subpart V, published at 48 FR 29115 (June 24, 1983).

The ACP is authorized generally by Sections 7–17 of the Soil Conservation and Domestic Allotment Act of 1936, as amended (16 U.S.C. 590g *et seq.*) The program provides financial incentives and technical assistance to encourage agricultural producers to voluntarily perform enduring soil and water conservation and pollution abatement measures, including practices or programs which are deemed essential to maintain soil productivity, prevent soil depletion, or prevent increased cost of production.

The Secretary of Agriculture is authorized to enter into annual or long-term agreements (LTA's) under the ACP with eligible owners and operators to carry out enduring soil and water conservation and pollution abatement measures. LTA's as defined by current regulations are contracts of 3 to 10 years under which farmers and ranchers agree to complete needed conservation practices in accordance with a conservation plan of operations developed in cooperation with the Soil and Water Conservation District and approved by the Secretary.

In return for such agreement by the landowner or operator, the Secretary agrees to share the cost of carrying out those conservation practices set forth in the contract.

Funding for ACP cost-share assistance including funding for LTA's, is made available through the annual appropriations for agencies of the Department of Agriculture. In the past appropriation acts have limited the maximum amount of cost-share assistance which a person may receive under ACP to $3,500 per year. However, the Agriculture, Rural Development, and Related Agencies Appropriation Act, 1987, as included in Pub. L. 99–500 and Pub. L. 99–591, in making appropriations for fiscal year 1987 for this program, provides for an exception to this limitation where a participant has a long-term agreement, in which case the the total payment shall not exceed the annual payment limitation of $3,500 multiplied by the number of years of the agreement. This regulation amends the program provisions in 7 CFR 701.23 to provide for this exception and makes several changes in the language for the purpose of clarification. Since the substantive change made by this amendment merely increases the cost-share assistance which may be made available under this program, it has been determined that no further public rulemaking is required. Accordingly, the provisions of this regulation shall become effective upon publication in the Federal Register.

### List of Subjects in 7 CFR Part 701

Disaster assistance, Forests and forest products, Grant programs, Natural resources, Rural areas, Soil conservation, Water resources, Wildlife.

Final Rule

**PART 701—CONSERVATION AND ENVIRONMENTAL PROGRAMS**

Accordingly, 7 CFR Part 701, Subpart—Agricultural Conservation Program, is amended as follows:

1. The authority citation for Part 701 is revised to read as follows:

**Authority:** Pub. L. 74–76, secs. 5, 7–15, 16(a), 16(f), 16A, 17, 49 Stat. 163, as amended (16 U.S.C. 590d, 590g–590o, 590p(a), 590q); Pub. L. 95–28, secs. 1001–1008, 97 Stat. 341 (16 U.S.C. 1501–1510); Pub. L. 95–313, secs. 4, 8(a), 10, 92 Stat. 365 (16 U.S.C. 1510, 1606, 2101–2111); Pub. L. 95–334, secs. 401–405, 92 Stat. 429 (16 U.S.C. 2201–2205); Pub. L. 99–500 and Pub. L. 99–591.

2. Section 701.23 is revised to read as follows:

**§ 701.23 Maximum cost-share limitation.**

For each program year the total amount which may be received by any person under this subpart for approved practices shall not exceed $3,500 except that (a) the total amount received for approved practices, including those carried out under pooling agreements, shall not exceed $10,000 and (b) the total amount received under an ACP long-term agreement (LTA) shall not exceed the annual payment limitation ($3,500) multiplied by the number of years of the LTA.

Signed at Washington, DC, on May 20, 1987.

**Milton J. Hertz,**

*Administrator, Agricultural Stabilization and Conservation Service.*

**Agricultural Marketing Service**

**7 CFR Part 905**

**Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Relaxation of Minimum Grade and Size Requirements of Florida Oranges and Grapefruit**

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Interim rule with request for comments.

**SUMMARY:** This rule relaxes the minimum external grade requirements for shipments of domestice, export, and imported white and pink seedless grapefruit from Improved No. 2 to U.S. No. 2 Russet and relaxes the minimum size requirement for domestic and imported white seedless grapefruit from size 48 (3⁹⁄₁₆ inches) to size 56 (3⁵⁄₁₆ inches). In addition, the minimum size requirement for domestic shipments of Temple oranges is relaxed from size 125 (2⁹⁄₁₆ inches) to size 163 (2¹⁄₁₆ inches). This rule also relaxes the minimum external grade requirements for domestic shipments of Valencia oranges from U.S. No. 1 to U.S. No. 1 Golden. These relaxations in the grade and size requirements for Florida citrus recognize the grade and size composition of the remaining available citrus crop and the current and prospective demand conditions for this fruit. Grapefruit import regulation 6 is applicable to white and pink seedless grapefruit imported into the United States, and is required under § 8e of the Act.

**DATES:** Seedless grapefruit and Temple orange relaxations are effective for the period May 21, 1987 through August 22, 1987; and the Valencia orange relaxation is effective for the period July 1, 1987, through September 27, 1987. Comments which are received by June 26, 1987 will be considered prior to issuance of the final rule.

**ADDRESSES:** Comments should be sent to: Docket Clerk, F&V, AMS, Room 2085–S, U.S. Department of Agriculture, Washington, DC 20250–1400. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. Comments should reference the date and page number of this issue of the Federal Register.

**FOR FURTHER INFORMATION CONTACT:** James M. Scanlon, Acting Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250–1400; telephone: (202) 475–3914.

**SUPPLEMENTARY INFORMATION:** This rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (the Act, 7 U.S.C. 601–674), and rules promulgated thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statues have small entity orientation and compatibility.

There are an estimated 100 handlers of Florida oranges, grapefruit, tangerines, and tangelos subject to regulation under the marketing order for these citrus fruits grown in Florida, and an estimated 26 importers who import grapefruit into the United States. There are approximately 15,000 producers of these citrus fruits in Florida. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $100,000, and agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of the handlers, importers, and producers may be classified as small entities.

The Administrator of Agricultural Marketing Service has considered the economic impact on small entities. This rule relaxes the minimum grade and size requirements for Florida oranges and grapefruit grown in the production area in Florida shipped to the fresh domestic and export markets and the minimum grade and size requirements for grapefruit imported into the United States. The relaxation of these requirements will help ensure that such requirements do unduly restrict the available supply of such fruit, and should make additional supplies of fruit available to consumers. The relaxation of such requirements is only for the remainder of the 1986–87 shipping seasons for these fruits. The resumption of tighter requirements for 1987–88 season shipments is based upon the maturity, size, quality, and flavor characteristics of these fruits early in the shipping season.

Some Florida orange and grapefruit shipments are exempt from the minimum grade and size requirements effective under the marketing order. Handlers may ship up to 15 standard packed cartons (12 bushels) of fruit per day under a minimum quantity exemption provision. Also, handlers may ship up to 2 standard packed cartons of fruit per day in gift packages which are individually addressed and not for resale, under the current exemption provisions. Fruit shipped for animal feed is also exempt under specific conditions. In addition, fruit shipped to commercial processors for conversion into canned or frozen products or into a beverage base are not subject to the handling requirements.

The Department's view is the impact of the relaxed handling requirements upon producers, handlers, and importers

would be beneficial, and that this action should improve returns to orange and grapefruit producers. The application of minimum grade and size requirements to Florida oranges, grapefruit, tangerines, and tangelos, and to imported grapefruit over the past several years has helped to assure that only fruit of acceptable quality and size are shipped to fresh markets.

This rule is issued under the Marketing Agreement and Order No. 905 (7 CFR Part 905), both as amended, regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. The agreement and order are effective under the Act. This action was unanimously recommended by the Citrus Administrative Committee at its May 8, 1987, meeting. The committee works with USDA in administering the marketing agreement and order program.

The handling regulation for Florida citrus fruit covered under this maketing order is specified in § 905.306 Florida Orange, Grapefruit, Tangerine, and Tangelo Regulation 6 (46 FR 60170), December 8, 1981). This regulation was issued on a continuing basis subject to modification, suspension, or termination upon recommendation by the committee and approval by the Secretary. Section 905.306(a) provides that no handler shall ship between the production area and any point outside thereof, in the continental United States, Canada, or Mexico, specified varieties of oranges, grapefruit, tangerines and tangelos unless such varieties meet the minimum grade and size requirements prescribed in Table I. Section 905.306(b) provides that no handler shall ship fruit to any destination outside the continental United States, other than Canada or Mexico, unless the specified varieties meet the requirements prescribed in Table II.

The committee meets prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for Florida oranges, grapefruit, tangerines, and tangelos. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department reviews committee recommendations and information submitted by the committee and other available information, and determines whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy in the Act.

The minimum grade and size requirements, specified herein, reflect the committee's and the Department's appraisal of the need to relax the minimum grade and size requirements applicable to domestic, export, and import shipments of seedless grapefruit; the minimum grade requirements applicable to the domestic shipments of Valencia oranges; and the minimum size requirements applicable to domestic shipments to Temple oranges. This rule recognizes current and prospective supply and demand for such fruit and is necessary to permit handlers to ship the remaining supply of marketable fruit to meet market needs. As of May 4, 1987, less than five percent of the seedless grapefruit and Temple orange crops remains available for sale, and it is projected that only a small portion of the Valencia orange crop will remain on July 1, 1987, the effective date of the grade change for that commodity. No problems with fruit quality, maturity, and size are expected in the marketplace because of the relaxations.

This rule temporarily relaxes the minimum external grade requirement for domestic, export, and import shipments of white and pink seedless grapefruit from Improved No. 2 to U.S. No. 2 Russet while the minimum internal requirement remains U.S. No. 1, and the minimum size requirement for domestic and import shipments of white seedless grapefruit from size 48 (3⁹⁄₁₆ inches in diameter) to size 56 (3⁹⁄₁₆ inches in diameter). Also, the minimum size requirement for domestic shipments of Temple oranges is relaxed from size 125 (2¹³⁄₁₆ inches in diameter) to size 163 (2¹⁄₁₆ inches in diameter). The relaxations for grapefruit and Temple oranges are to remain in effect through August 23, 1987, by which time this season's shipments will be finished. In addition, this rule lowers the minimum external grade requirements for domestic shipments of Valencia oranges from U.S. No. 1 to U.S. No. 1 Golden while the minimum internal grade requirement will remain U.S. No. 1 during the period from July 1, 1987, through September 27, 1987. The effective dates for the relaxed requirements for Valencia oranges recognize the late shipping season for this fruit, and the presence of late-bloom fruit which will mature late in the season.

Section 8e of the Act (7 U.S.C. 608e–1) provides that whenever specified commodities, including grapefruit, are regulated under a Federal marketing order, imports of that commodity are prohibited unless they meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity. Since this action relaxes the minimum grade and size requirements for domestically produced seedless grapefruit, this change would also be applicable to imported seedless grapefruit.

Grapefruit import requirements are specified in § 944.106 (7 CFR Part 944) which requires that the various varieties of imported grapefruit meet the same grade and size requirements as those specified for Florida grapefruit in Table 1 of paragraph (a) in § 905.306. An exemption provision in the grapefruit import regulation permits persons to import up to 10 standard packed 4/5 bushel cartons exempt from the import requirements.

After consideration of the information and recommendation submitted by the committee, and other available information, it is found that amendment of § 905.306 will tend to effectuate the declared policy of the Act.

Pursuant to U.S.C. 553, it is hereby found that it is impracticable, unnecessary, contrary to the public interest to give preliminary notice and to engage in public rulemaking procedure with respect to this action, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the Federal Register because: (1) This action relaxes handling requirements currently in effect for Florida grapefruit, Temple oranges, and Valencia oranges; (2) handlers of these fruits are aware of this action which was recommended by the committee at a public meeting, and they will need no additional time to comply with the requirements; (3) shipment of the 1986–87 season Florida orange and grapefruit crop is nearly finished; (4) the grapefruit import requirements are mandatory under section 8e of the Act; and (5) the rule provides a 30-day comment period, and any comments received will be considered prior to issuance of a final rule.

**List of Subjects in 7 CFR Part 905**

Marketing agreements and orders, Florida, Grapefruit, Oranges, Tangelos, Tangerines.

For the reasons set forth in the preamble, Part 905 is amended as follows:

**PART 905—[AMENDED]**

1. The authority citation for 7 CFR Part 905 continues to read as follows:

**Authority:** Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. The provisions of § 905.306 (46 FR 60170, December 8, 1981) are amended by revising the following entries in Table I of paragraph (a), applicable to domestic shipments, and Table II of

paragraph (b), applicable to export shipments, to read as follows:

**§ 905.306 Orange, Grapefruit, Tangerine, and Tangelo Regulation 6, Amendment 44.**

BILLING CODE 3410-02-M

---

**DEPARTMENT OF JUSTICE**

**Immigration and Naturalization Service**

**8 CFR Parts 101 and 341**

**[INS Number: 1014-87]**

**Application for Certificate of Citizenship, Form and Fee Cancellation**

**AGENCY:** Immigration and Naturalization Service, Justice.

**ACTION:** Final rule.

**SUMMARY:** This final rule amends Form N-400, Application to File Petition for Naturalization, instructions, and the fee schedule of the Immigration and Naturalization Service. The change will cancel Form N-604, Application for a Certificate of Citizenship (made on Form N-400), to be replaced by Form N-600, Application for Certificate of Citizenship.

**EFFECTIVE DATE:** Final rule effective June 26, 1987.

**FOR FURTHER INFORMATION CONTACT:** Thomas E. Cook, Senior Immigration Examiner, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-5016.

**SUPPLEMENTARY INFORMATION:** Service efforts in recent years have been aimed at streamlining benefit application procedures. The Form N-604 is currently used to apply for a certificate of citizenship in behalf of a child, and is submitted as part of the Form N-400, Application To File Petition for Naturalization. A child deriving citizenship through the naturalization of his or her parents is a citizen by law.

A certificate of citizenship is merely evidence of such citizenship. For example, the issuance of a United States passport would also be evidence of citizenship. If Form N-604 is not filed concurrently with the parent's Form N-400, a certificate will not be issued, and a Form N-600, Application for Certificate of Citizenship, must be filed in behalf of the child to obtain a Certificate of Citizenship.

To streamline processing, the N-604 procedure will be replaced with the filing of the N-600. The N-604 and N-600 are both applications for the same benefit and each require a $35.00 filing fee. One advantage to the public is that an interview is not required in conjunction with the adjudication of an N-600. In addition, the N-600 can be adjudicated at alternate Service locations to better utilize Service resources in reducing processing time. The advantage to the Service is that one form will be used to apply for a benefit where now two are allowed. The savings in interview time from N-600 cases that are remoted to alternate locations can be applied toward reducing other casework processing, thereby benefiting the Service and the public.

The rule change is being published as a final rule to coordinate with the publication of the revised Form N-400. In addition, the revision was approved by the Naturalization Automated Casework System (NACS) user group, which represents 18 Service officers and 87% of naturalization work Servicewide. Further, the Service has determined that notice and public comment regarding this final rule are unnecessary under 5 U.S.C. 553(d)(B). These changes will reduce unnecessary and duplicative reporting burdens.

In accordance with 5 U.S.C. 605(b), the Attorney General certifies that the rule does not have significant economic impact on a substantial number of small entities.

This rule is not a major rule within the meaning of section 1(b) of E.O. 12291.

**List of Subjects**

*8 CFR Part 103*

Administrative practice and

procedures, Archives and records, Authority delegation and records.

*8 CFR Part 341*

Citizenship, Naturalization.

Accordingly, Chapter I, Title 8 of the Code of Federal Regulations is amended as follows:

## PART 103—POWER AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS

1. The authority citation for part 103 continues to read as follows:

**Authority:** Secs. 103 and 501 of the Immigration and Nationality Act; 66 Stat. 173 and 290; 8 U.S.C. 1103; 31 U.S.C. 483a.

**§ 103.7 [Amended]**

2. In § 103.7, paragraph (b)(1) is amended as follows; Remove "Form N–604. For filing application for a certificate of citizenship (made on Form N–400) under section 341 of the Act—$35.00."

## PART 341—CERTIFICATE OF CITIZENSHIP

1. The authority citation of Part 341 continues to read as follows:

**Authority:** Secs. 103, 309, 332, 333, 337, 341, and 344 of the Immigration and Nationality Act; 66 Stat. 173, 236, 252, 254, 258, 263, 264, as amended; 8 U.S.C. 1103, 1409, 1443, 1444, 1448, 1452, 1455.

2. Section 341.1 is revised to read as follows:

**§ 341.1 Application.**

*Form N–600.* An application for a certificate of citizenship by or in behalf of a person who claims to have acquired United States citizenship under section 309(c) or to have acquired or derived United States citizenship as specified in section 341 of the Act shall be submitted on Form N–600 in accordance with the instructions thereon, accompanied by the fee specified in § 103.7(b)(1) of this chapter. The application shall be supported by documentary and other evidence essential to establish the claimed citizenship, such as birth, adoption, marriage, death, and divorce certificates.

(Approved by the Office of Management and Budget under control number 1115–0018)

Dated: May 18, 1987.

**Richard E. Norton,**

*Associate Commissioner, Examinations, Immigration and Naturalization Service.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

### 21 CFR Part 74

[Docket No. 85C–0283]

## Listing of Color Additives for Coloring Contact Lenses; D&C Violet No. 2

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the color additive regulations to provide for the safe use of D&C Violet No. 2 for coloring contact lenses. This action responds to a petition filed by Optacryl, Inc.

**DATES:** Effective June 29, 1987, except as to any provisions that may be stayed by the filing of proper objections; objections by June 26, 1987.

**ADDRESS:** Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Marvin D. Mack, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

**SUPPLEMENTARY INFORMATION:**

### I. Introduction

In a notice published in the **Federal Register** of July 12, 1985 (50 FR 28477), FDA announced that a color additive petition (CAP 5C0190) had been filed by Optacryl, Inc., 2890 South Tejon St., Englewood, CO 80110, proposing that Part 74 (21 CFR Part 74) be amended to provide for the safe use of D&C Violet No. 2 as a color additive in contact lenses. The petition was filed under section 706 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 376).

### II. Regulatory History

In the **Federal Register** of April 12, 1974 (39 FR 13286), in response to color additive petition 3C0106, FDA issued a final rule listing D&C Violet No. 2 for use in coloring polygalactin 910 synthetic absorbable surgical sutures, including sutures for ophthalmic use (21 CFR 74.1602). In the 1974 final rule, FDA also established specifications for D&C Violet No. 2, FDA is incorporating those specifications in the regulation (§ 74.3602 (21 CFR 74.3602)) that permanently lists this color additive for use in contact lenses.

In the **Federal Register** of November 19, 1976 (41 FR 51007), in response to color additive petition 3C0037, FDA issued a final rule permanently listing D&C Violet No. 2 for use in externally applied drugs and in cosmetics (21 CFR 74.1602 and 74.2602).

In the **Federal Register** of September 23, 1980 (45 FR 62978), in response to color additive petition 9C0142, FDA issued a final rule listing D&C Violet No. 2 for coloring polydioxanone synthetic absorbable sutures for use in general and ophthalmic surgery at a level not to exceed 0.3 percent by weight of the suture material (21 CFR 74.1602).

### III. Applicability of the Act

With the passage of the Medical Device Amendments of 1976 to the act (Pub. L. 94–295), Congress mandated the listing of color additives for use in medical devices where the color additive comes in direct contact with the body for a significant period of time (21 U.S.C. 376(a)). The use of the color additive presented in the petition now before the agency is subject to this listing requirement. The color additive is added to contact lenses in such a way that at least some of the additive will come in contact with the eye when the lenses are worn. In addition, the lenses are intended to be placed in the eye for several hours a day each day for 1 year or more. Thus, the color additive will be in direct contact with the body for a significant period of time. Consequently, the use of the color additive currently before the agency is subject to the statutory listing requirement.

### IV. The Color Additive

D&C Violet No. 2 is principally 1-hydroxy-4- [(4-methylphenyl)amino]-9, 10-anthracenedione (CAS Reg. No. 81–48–1). It is typically manufactured by either condensation of quinizarin with *p*-toluidine or by condensation of 1-hydroxy-4-halogenoanthraquinone with *p*-toluidine. Because no chemical reaction consumes all the starting materials and yields only the desired product, both the resulting reaction mixture and commercial product will contain residual amounts of the starting materials, including *p*-toluidine. This fact is significant because Weisburger, et al., have demonstrated that *p*-toluidine is a carcinogen in mice (Ref. 3).

Residual amounts of reactants, such as *p*-toluidine and other manufacturing aids, are commonly found among the impurities of many color additives. The presence of such impurities is not unique to color additives, however. Numerous impurities are present in all chemical

products, even in highly purified reagent grade chemicals.

**V. Analysis of Data**

*A. Safety of the Color Additive*

1. Legal Standard

Under section 706(b)(4) of the act, the so-called "general safety clause" for color additives, a color additive cannot be listed for a particular use unless the data presented to FDA establish that the color additive is safe for that use. Although what is meant by "safe" is not explained in the general safety clause, the legislative history of the Color Additive Amendments of 1960 (Pub. L. 86-618) makes clear that this word is to have the same meaning for color additives as for food additives.

"Safe" is defined in the legislative history of the Food Additives Amendment of 1958 as a "reasonable certainty that no harm will result from a proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstance." (S. Rept. 2422, 85th Cong., 2d Sess. 6 (1958).) This concept of safety is incorporated in FDA's color additive regulation (21 CFR 70.3(f)).

In addition, the anticancer or Delaney Clause of the Color Additive Amendments (section 706(b)(5)(B) of the act) provides that a noningested color additive shall be deemed unsafe and shall not be listed if, after tests that are appropriate for evaluating the safety of the additive for such use, it is found to cause cancer in man or animal.

2. Exposure to the Color Additive

FDA concludes from the data submitted and from other relevant information that the upper limit of exposure to D&C Violet No. 2 from its use in coloring contact lenses is 275 nanograms per day. The agency calculated this upper limit of exposure based on two factors. First, based on the information submitted by the petitioner, FDA estimated that the maximum use level of D&C Violet No. 2 is 50 micrograms per lens (Ref. 1). Second, the agency made two worst-case assumptions: (1) That a user will replace lenses tinted with D&C Violet No. 2 once each year with a new pair of lenses tinted with D&C Violet No. 2 at the maximum use level, and (2) that 100 percent of the color additive will migrate from these lenses into the eye over the 1-year period. Because these assumptions are worst case, exposure to D&C Violet No. 2 from its use for coloring contact lenses is likely to be far less than 275 nanograms per day.

3. Toxicology

When presented with a substantive whose use will result in the extremely low levels of exposure that the agency estimates will result from the use of D&C Violet No. 2 in contact lenses, FDA does not ordinarily consider chronic toxicity testing to be necessary to determine the safety of use (Ref. 2). FDA has not required such testing here, and no data have been submitted that show that this color additive is a carcinogen. Therefore, the Delaney Clause has no application to this proceeding.

FDA did require the petitioner to conduct an in vitro cytotoxicity test on D&C Violet No. 2 and primary ocular irritation studies in rabbits with saline and cottonseed oil extracts of the tinted lens material. These studies showed no ocular irritation from these extracts and no adverse effects in the in vitro cytotoxicity testing. The studies demonstrated that the no-effect level for D&C Violet No. 2 is 500 micrograms per milliliter.

To relate this no-effect concentration for D&C Violet No. 2 to the maximum concentration level in the eye that would result from the use of the color additive in contact lenses, the agency estimated that the daily exposure of the color additive in each eye (140 nanograms) will be diluted by the average daily volume of tears produced in each eye (1.66 milliliters). This concentration is equal to a maximum daily concentration of 0.0833 microgram of color additive per milliliter in the tear flow and eye area. This concentratioin is over 6,000 times less than the no-effect dose for D&C Violet No. 2 found in ocular irritation and in in vitro cytotoxicity tests.

*B. Carcinogenic Impurity*

1. p-Toluidine

Although D&C Violet No. 2 itself has not be shown to cause cancer, it does contain minor amounts of a carcinogenic impurity, *p*-toluidine. The carcinogenicity of *p*-toluidine was discussed in the agency's April 2, 1982, final rule permanently listing D&C Green No. 6 for use in externally applied drugs and cosmetics (47 FR 14138). As stated in that document, data reported by the National Cancer Institute demonstrated that *p*-toluidine was carcinogenic for male and female Charles River CD-1 (Ham/ICR derived) mice, causing an increased incidence of hepatomas (liver tumors) (Ref. 3).

In addition, the Center for Food Safety and Applied Nutrition's Cancer Assessment Committee reviewed this bioassay and other relevant data available in the literature and concluded that the findings of carcinogenicity were supported by this information on *p*-toluidine. FDA used data from the National Cancer Institute's study to estimate the lifetime risk of cancer from *p*-toluidine when D&C Violet No. 2 is used to color contact lenses.

2. Prior Action

In the past, FDA often refused to list a color additive that contained or was expected to contain minor amounts of a carcinogenic chemical, even if the additive as a whole had not been shown to cause cancer. The agency now believes, however, that scientific developments and experience with risk assessment procedures make it possible for FDA to approve the use of an additive that contains a carcinogenic chemical but that has not itself been shown to cause cancer.

In the preamble to the final rule permanently listing D&C Green No. 6, published in the Federal Register of April 2, 1982 (47 FR 14138), FDA explained the basis for approving the use of a color additive that had not been shown to cause cancer, even though it contains a carcinogenic impurity. Since that decision, FDA has listed, on the same basis, the uses of several other color additives that contain carcinogenic impurities, including the use of D&C Green No. 6 for coloring contact lenses (48 FR 13020; March 29, 1983), and the use of D&C Green No. 5 (47 FR 24278; June 4, 1982) and of D&C Red No. 6 and D&C Red No. 7 (47 FR 57661; December 28, 1982) for coloring drugs and cosmetics. (See also the advance notice of proposed rulemaking published in the Federal Register of April 2, 1982 (47 FR 14464).)

The agency now considers the Delaney anticancer clause to be applicable only when the color additive as a whole is found to cause cancer. An additive that has not been shown to cause cancer, but that contains a carcinogenic impurity, is properly evaluated under the general safety clause of the statute, using risk assessment procedures to determine whether there is a reasonable certainty that no harm will result from the proposed use of the additive.

The agency's position is supported by *Scott* v. *FDA*, 728 F.2d 322 (6th Cir. 1984). That case involved a challenge to FDA's decision to approve the use of D&C Green No. 5, which contains a carcinogenic chemical but has not itself been shown to cause cancer. Relying heavily on the reasoning in the agency's decision, the U.S. Court of Appeals for the Sixth Circuit rejected the challenge

to FDA's action and affirmed the listing regulation.

3. Risk Assessment

Using risk assessment procedures to estimate the upper limit lifetime risk presented by the use of D&C Violet No. 2, with its expected impurity, to color contact lenses, the agency has concluded that the color additive is safe under the proposed conditions of use. The risk evaluation consists of two parts:

(1) Estimation of exposure to *p*-toluidine from the use of D&C Violet No. 2 for coloring contact lenses, and (2) extrapolation of the risk from *p*-toluidine observed in the bioassay of that substance to the conditions of exposure in humans.

*A. Exposure*

As explained above, FDA estimates that the maximum level of exposure to D&C Violet No. 2 from its use in coloring contact lenses is 275 nanograms per day. Under the current specifications for D&C Violet No. 2, the level of *p*-toluidine in the color additive is not to exceed 0.2 percent. Thus, the maximum exposure to *p*-toluidine that will result from the daily use of contact lenses that are colored with D&C Violet No. 2 that complies with the applicable specifications is 0.55 nanogram per day.

*B. Risk Extrapolation*

FDA has estimated the risk from the *p*-toluidine impurity from use of D&C Violet No. 2 for coloring contact lenses by extrapolating from the risk observed at the level of exposure in the NCI-sponsored animal studies to the very low levels of estimated exposure for humans. In this extrapolation, the agency has used a quantitative risk assessment procedure (linear proportional model) similar to the methods used to examine the risk associated with the presence of minor carcinogenic impurities in D&C Green No. 6 and the other color additives mentioned above. This procedure is not likely to underestimate the actual risk from the very low doses. In fact, the estimate of the risk may be exaggerated because the extrapolation models used are designed to estimate the maximum risk consistent with the data. For this reason, the estimate can be used with confidence to determine to a reasonable certainty whether any harm will result from the use of this color additive.

Based on this risk assessment procedure and a worst case daily exposure estimate of 0.55 nanograms of *p*-toluidine, FDA estimates that the upper bound limit of individual lifetime risk from potential exposure to *p*-toluidine from the use of D&C Violet No. 2 is $4\times10^{-11}$ or one in 25 billion.

Because of numerous conservatisms in the exposure estimate, lifetime-averaged individual exposure to *p*-toluidine is expected to be substantially less than the estimated daily intake, and, therefore, the actual risk would be expected to be less than the calculated individual lifetime risk. Thus, the agency concludes that there is a reasonable certainty of no harm from the exposure to the *p*-toluidine that results from the use of D&C Violet No. 2 in contact lenses.

*C. Specifications*

Based upon the low level of exposure to *p*-toluidine that results under the current specifications for D&C Violet No. 2, the agency concludes that these specifications are adequate to assure the safe use of this color additive and to control the amount of *p*-toluidine that may exist as an impurity in the color additive when used in contact lenses.

The agency, therefore, concludes that it is not necessary to amend the current specifications for this color additive when it is used to color contact lenses.

VI. Conclusion

Based upon the available toxicity data, the small amount of the color additive added to the contact lens, the agency's exposure calculation, and the extremely low risk from the presence of the impurity, FDA finds that the color additive D&C Violet No. 2 is safe for use in contact lenses. FDA further concludes that the safety margin is sufficiently large that a limitation on the amount of the color additive that may be present in the lens is not required, beyond the limitation that only the amount necessary to accomplish the intended technical effect may be used. In addition, based upon the data it considered, the agency finds that D&C Violet No. 2 is suitable for use in coloring contact lenses.

In accordance with § 71.15(a) (21 CFR 71.15(a)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in § 71.15(b), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

VII. Environmental Assessment

The agency has previously considered the environmental effects of this rule as announced in the Notice of Filing for CAP 5C0190 (July 12, 1985, 50 FR 28477). No new information or comments have been received that would affect the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

VIII. References

The following information has been placed on display in the Dockets Management Branch (address above) and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

IX. Objections

Any person who will be adversely affected by this regulation may at any time on or before June 26, 1987, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday. FDA will publish notice of the objections that the agency has

received or lack thereof in the Federal Register.

List of Subjects in 21 CFR Part 74

Color additives, Cosmetics, Drugs, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 74 is amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 74 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055–1056 as amended, 74 Stat. 399–407 as amended (21 U.S.C. 371, 376); 21 CFR 5.10.

2. By adding new § 74.3602 to Subpart D, to read as follows:

§ 74.3602 D&C Violet No. 2.

(a) *Identity and specifications.* The color additive D&C Violet No. 2 shall conform in identity and specifications to the requirements of § 74.1602(a)(1) and (b).

(b) *Uses and restrictions.* (1) The color additive, D&C Violet No. 2, may be safely used for coloring contact lenses in amounts not to exceed the minimum reasonably required to accomplish the intended coloring effect.

(2) Authorization for this use shall not be construed as waiving any of the requirements of section 510(k), 515, and 520(g) of the Federal Food, Drug, and Cosmetic Act with respect to the contact lens in which the color additive is used.

(c) *Labeling.* The label of the color additive shall conform to the requirements of § 70.25 of this chapter.

(d) *Certification.* All batches of D&C Violet No. 2 shall be certified in accordance with regulations in Part 80 of this chapter.

Dated: May 15, 1987.

John M. Taylor,

*Associate Commissioner for Regulatory Affairs.*

BILLING CODE 4160–01–M

---

21 CFR Part 176

[Docket No. 80F–0396]

**Indirect Food Additives: Paper and Paperboard Components**

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations by providing for the use of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride as a preservative for latex and pigment slurries used as components of coatings for paper and paperboard when used in contact with food. This action responds to a petition filed by the Dow Chemical Co.

DATES: Effective May 27, 1987; objections by June 26, 1987.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary W. Lipien, Center for Food Safety and Applied Nutrition (HFT–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of October 24, 1980 (45 FR 70573), FDA announced that a petition (FAP 9B3440) had been filed by the Dow Chemical Co., Midland, MI 48640, proposing that § 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods* (21 CFR 176.170) be amended by revising the regulation for 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride to provide for its use as a preservative for latex and pigment slurries as components of coatings for paper and paperboard used in contact with food.

In this final rule, FDA is amending the food additive regulations by providing for the use of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride, at the specified levels as a preservative for latex and pigment slurries used as components of coatings for paper and paperboard in contact with food, without restriction on food types or conditions of use.

FDA reviewed the safety of both the additive and the starting materials used to manufacture the additive. Although 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride has not been found to cause cancer, it may contain minute amounts of methylene chloride as a byproduct of its production. This chemical has been shown to cause cancer in test animals. Residual amounts of reactants and manufacturing aids, such as methylene chloride, are commonly found as contaminants in chemical products, including food additives.

I. Determination of Safety

Under section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 348(c)(3)(A)), the so-called "general safety clause" of the statute, a food additive cannot be approved for a particular use unless a fair evaluation of the data available to FDA establishes that the additive is safe for that use. The concept of safety embodied in the Food Additives Amendment of 1958 is explained in the legislative history of the provision: "Safety requires proof of a reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstance." (H. Rept. 2284, 85th Cong., 2d Sess. 4 (1958).) This definition of safety has been incorporated into FDA's food additive regulations (21 CFR 170.3(i)). The anticancer or Delaney clause of the Food Additives Amendment of 1958 (section 409(c)(3)(A) of the act (21 U.S.C. 348(c)(3)(A))) provides further that no food additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal.

In the past, FDA has often refused to approve a use of an additive that contained or was suspected of containing even minor amounts of a carcinogenic chemical, even though the additive as a whole had not been shown to cause cancer. The agency now believes, however, that developments in scientific technology and experience with risk assessment procedures make it possible for FDA to establish the safety of additives that contain a carcinogenic chemical, but that have not themselves been shown to cause cancer.

In the preamble to the final rule permanently listing D&C Green No. 6 published in the Federal Register of April 2, 1982 (47 FR 14138), FDA explained the basis for approving the use of a color additive that had not been shown to cause cancer, even though it contains a carcinogenic constituent.

Since that decision, FDA has approved the use of other color additives and food additives on the same basis. FDA fully explained the scientific, legal, and policy underpinnings for these decisions in the advance notice of proposed rulemaking on a policy for regulating carcinogenic chemicals in food and color additives, published in the Federal Register of April 2, 1982 (47 FR 14464).

The agency now believes that the Delaney anticancer clause is applicable only when the food additive as a whole is found to cause cancer. An additive that has not been shown to cause cancer, but that contains a carcinogenic constituent, may properly be evaluated under the general safety clause of the statute using risk assessment procedures

to determine whether there is a reasonable certainty that no harm will result from the proposed use of the additive.

The agency's position is supported by *Scott v. FDA*, 728 F.2d 322 (6th Cir. 1984). That case involved a challenge to FDA's decision to approve the use of D&C Green No. 5, which contains a carcinogenic chemical but has itself not been shown to cause cancer. Relying heavily on the reasoning in the agency's decision to list this color additive, the U.S. Court of Appeals for the Sixth Circuit rejected the challenge to FDA's action and affirmed the listing regulation.

## II. Safety of Petitioned Use of the Additive

FDA estimates that the petitioned use of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride in paper and paperboard products that contact aqueous and fatty foods will result in extremely low levels of exposure to this additive. The agency has calculated an estimated daily intake of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride based on consideration such as the migration of the additive under the most severe intended use conditions and the probable concentration of the additive in the daily diet from food-contact articles that contain this substance. The estimated daily intake for the additive is 0.015 milligram per person per day, which is equivalent to 0.0025 milligram per kilogram per day for a 60 kilogram person.

FDA does not ordinarily consider chronic testing to be necessary to determine the safety of an additive whose use will result in such low exposure levels (Refs. 1 and 2) and has not required such testing in this case. However, the petitioned request was supported by two 90-day studies in the rat and dog. Neither study showed any adverse effects.

FDA has found 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride to be safe and effective for the intended use based upon the extremely low levels of exposure to this substance and upon its evaluation of the data furnished on this substance in the petition.

The available data revealed no adverse effects from 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride. However, this additive may contain methylene chloride, a substance that has been shown to cause cancer in test animals. The agency has tentatively concluded that methylene chloride is a carcinogen in a proposed rule published in the Federal Register of December 18, 1985 (50 FR 51551). The agency is currently reviewing the comments received on that proposal and will respond to them in a future Federal Register document. For the purposes of the current rulemaking, however, the agency is assuming, without deciding, that methylene chloride is a carcinogen in its evaluation of the safe use of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride.

This impurity may be present as a result of the manufacturing procedures used to produce the additive. Nonetheless, because 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride has not been shown to cause cancer, the anticancer clause does not apply to it.

FDA has evaluated the safety of this additive under the general safety clause, using risk assessment procedures to estimate the upper bound limit of risk presented by the carcinogenic chemical that may be present as an impurity in the additive. Based on this evaluation, the agency has concluded that the additive is safe under the proposed conditions of use.

The risk assessment procedures that FDA used in this evaluation are similar to the methods that it used to examine the risk associated with the presence of minor carcinogenic impurities in various other food and color additives that contain carcinogenic impurities (see, e.g., 49 FR 12018, 12019; April 2, 1984). This risk evaluation of the carcinogenic impurity methylene choloride has two aspects: (1) Assessment of the worst-case exposure to the impurity from the proposed use of the additive, and (2) extrapolation of the risk from methylene chloride observed in the National Toxicology Program (NTP) bioassay to the conditions of probable exposure to humans.

### *A. Methylene Chloride*

Based on the fraction of the daily diet that may be in contact with surfaces containing 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride, as well as the level of methylene chloride that may be present in the additive, FDA estimated the hypothetical worst-case exposure to methylene chloride from the petitioned use of the additive to be 0.2 microgram per person per day (Ref. 3). As discussed in the methylene chloride proposed rule published in the Federal Register of December 18, 1985 (50 FR 51555), the agency used data from an NTP-sponsored inhalation study on methylene chloride in mice (Ref. 4) to estimate the upper bound level of lifetime human risk from exposure to methylene chloride. The results of the bioassay on methylene chloride indicated that the material was carcinogenic for male and female mice under the conditions of the study. The test material caused an increased incidence of liver cell neoplasms and lung neoplasms in male and female mice.

The Center for Food Safety and Applied Nutrition's Cancer Assessment Committee reviewed this bioassay and other relevant data available in the literature and concluded that the findings of carcinogenicity were supported by this information on methylene chloride. The committee further concluded that an estimate of the upper bound level of lifetime human risk from potential exposure to methylene chloride stemming from the proposed use of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride could be calculated from the bioassay (Ref. 5). The agency used the female mouse data for risk assessment because the female gave a somewhat stronger response than the male.

Based on the worst-case exposure of 0.2 microgram per person per day, FDA estimates that the upper bound limit of individual lifetime risk from potential exposure to methylene chloride from the additive is $1.5 \times 10^{-9}$ or less than 1 in 666 million (Ref. 6). Because of numerous conservatisms in the exposure estimate, lifetime averaged individual exposure to methylene chloride is expected to be substantially less than the estimated daily intake, and therefore, the calculated upper bound risk would be expected to be less than $1.5 \times 10^{-9}$. Thus, the agency concludes that there is a reasonable certainty of no harm from exposure to methylene chloride that results from the use of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride.

### *B. Need for Specifications*

The agency has also considered whether a specification is necessary to control the amount of the methylene chloride impurity in the food additive. The agency finds that a specification is not necessary for the following reasons: (1) Because of the level at which methylene chloride is produced as a byproduct in the production of the additive, the agency would not expect this impurity to become a component of food at other than extremely small levels; and (2) the upper bound limit of lifetime risk from exposure to this impurity, even under worst-case assumptions, is very low, less than 1 in 666 million.

*C. Conclusion on Safety*

Regardless of the agency's decision on the 1985 proposed rule concerning methylene chloride, FDA finds that final action now can be taken on the use of 1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride containing minute amounts of methylene chloride.

FDA has evaluated the available toxicity data and the exposure calculation for the additive and has determined that the additive is safe for its proposed use.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has previously considered the environmental effects of this rule as announced in the Notice of Filing for FAP 9B3440 (October 24, 1980; 45 FR 70573). No new information or comments have been received that would affect the agency's previous determination that there is no significant impact on the human environment, and that an environmental impact statement is not required.

**References**

BILLING CODE 4160-01-M

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of the Assistant Secretary for Housing—Federal Housing Commissioner

### 24 CFR Part 882

[Docket No. R-87-1337; FR-2363]

### Section 8 Housing Assistance Payments Program—Existing Housing; Technical Amendment

**AGENCY:** Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

**ACTION:** Final rule; technical amendment.

**SUMMARY:** This rule corrects an erroneous cross reference in the text of 24 CFR Part 882—Section 8 Housing Assistance Payments Program—Existing Housing.

**DATE:** Effective June 10, 1987.

**FOR FURTHER INFORMATION CONTACT:** Grady J. Norris, Assistant General Counsel for Regulations, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755-7055. (This is not a toll-free number.)

**SUPPLEMENTARY INFORMATION:** Section 882.408(c)(1) contains an erroneous cross reference to "paragraph (a)(2)" which is supposed to refer to "paragraph (c)(2)". This final rule corrects the error.

This rule does not constitute a "major rule" as that term is defined in section

1(b) of Executive Order 12291 on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it does not (1) have an annual effect on the economy of $100 million or more; (2) cause major increase in costs or prices for consumers, individual industries, agencies, or geographic regions; or (3) competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on April 27, 1987, under Executive Order 12291 and the Regulatory Flexibility Act.

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule would not have a significant economic impact on a substantial number of small entities. The rule is technical and changes no program requirements.

**List of Subjects in 24 CFR Part 882**

Grant programs—housing and community development, Housing, Mobile homes, Rent subsidies, Low and moderate income housing.

Accordingly, 24 CFR Part 882 is amended as set forth below:

**PART 882—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—EXISTING HOUSING**

1. The authority citation for 24 CFR Part 882 continues to read as follows:

Authority: Sections 3, 5, and 8, United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c and 1437(f); section 7(d), Department of Housing and Urban Development Act, (42 U.S.C. 3535(d)).

2. Section 882.408 is amended by revising paragraph (c)(1) as follows:

**§ 882.408 Initial contract rents.**

* * * * *

(c) *Determination Initial Contract Rents.* (1) The initial Contract Rent and base rent for each unit must be computed in accordance with HUD requirements. These amounts may be determined in accordance with paragraph (c)(2), or in accordance with an alternative method prescribed by HUD. However, the initial Contract Rent may in no event be more than—

(i) The Moderate Rehabilitation Fair Market Rent or exception rent applicable to the unit on the date that the Agreement is executed, minus

(ii) Any applicable allowance for utilities and other services attributable to the unit.

* * * * *

Dated: May 20, 1987.

James E. Schoenberger,

*Acting General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.*

[FR Doc. 87-12022 Filed 5-26-87; 8:45 am]

BILLING CODE 4210-27-M

**DEPARTMENT OF TRANSPORTATION**

**Coast Guard**

**33 CFR Part 100**

**[CGD 05-87-27]**

**Special Local Regulations for Marine Events Norfolk/Portsmouth**

**AGENCY:** Coast Guard, DOT.

**ACTION:** Final rule.

**SUMMARY:** Permanent Special Regulations are adopted for marine events to be held on the Elizabeth River in the vicinity of the "Waterside" area of downtown Norfolk, Virginia, and the "Portside" area of downtown Portsmouth, Virginia. The area is the site of several large marine events each year, including Norfolk Harborfest, Portsmouth Seawall Festival, Independence Day Celebration, power boat races, and boat parades. These regulations govern vessel activities during those events. Notices of the precise dates and times that regulations are effective will be published in the Local Notice to Mariners and Federal Register. These special local regulations are considered necessary to control vessel traffic and provide safety of life and property on the navigable waters within the immediate vicinity of the event.

**EFFECTIVE DATE:** May 27, 1987. Compliance with this regulation will be required at different dates and times. The Commander, Fifth Coast Guard District publishes notices in the Local Notice to Mariners and Federal Register that announce the times and dates when the regulation is in effect.

**FOR FURTHER INFORMATION CONTACT:** Billy J. Stephenson, Chief, Boating Affairs Branch, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23705, (804) 398-6204.

**SUPPLEMENTARY INFORMATION:** The Coast Guard published a notice of proposed rule making in the Federal Register on March 3, 1986, (51 FR 7286) and supplemental notice of proposed rulemaking in Federal Register on November 6, 1986, (51 FR 40341). Interested persons were requested to submit comments. No comments were received on either the notice of proposed rulemaking or supplemental notice of proposed rulemaking.

**Drafting Information**

The drafters of this notice are Billy J. Stephenson, project officer, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, and Commander Robert J. Reining, project attorney, Fifth Coast Guard District Legal Office.

**Discussion of Proposed Regulation**

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulations and non-significant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). Its economic impact is expected to be minimal since, as in the past, closure of the waterway for any extended period is not anticipated and thus commercial traffic should not be severely disrupted at any given time. Comments received concerning past events indicate that commercial interests normally using the waterways can adapt to the minor restrictions they may encounter. Since the impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

**List of Subjects in 33 CFR Part 100**

Marine safety, Navigation (water).

**Final Regulations**

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations is amended as follows:

**PART 100—[AMENDED]**

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. Section 100.501 is added to read as follows:

**§ 100.501 Norfolk Harbor, Elizabeth River, Norfolk, Virginia and Portsmouth, Virginia.**

(a) *Definitions*—(1) *Regulated Area:* The waters of the Elizabeth River and its branches from shore to shore, bounded to the northwest by a line drawn across the Port Norfolk Reach section of the Elizabeth River between the northern corner of the landing at Hospital Point, Portsmouth, Virginia, latitude 36°50'51.0" North, longitude 76°18'09.0" West and the north corner of the City of Norfolk Mooring Pier at the foot of Brooks Avenue located at latitude 36°51'00.0" North, longitude

BEST COPY AVAILABLE

76°17'52.0" West; bounded on the southwest by a line drawn from the southern corner of the landing at Hospital Point, Portsmouth, Virginia, at latitude 36°50'50.0" North, longitude 76°18'10.0" West, to the northern end of the eastern most pier at the Tidewater Yacht Agency Marina, located at latitude 36°50'29.0" North, longitude 76°17'52.0" West; bounded to the south by a line drawn across the Lower Reach of the Southern Branch of the Elizabeth River, between the Portsmouth Lightship Museum located at the foot of London Boulevard, in Portsmouth, Virginia at latitude 36°50'10.0" North, longitude 76°17'47.0" West, and the northwest corner of the Norfolk Shipbuilding & Drydock, Berkley Plant, Pier No. 1, located at latitude 36°50'08.0" North, longitude 76°17'39.0" West; and to the southeast by the Berkley Bridge which crosses the Eastern Branch of the Elizabeth River between Berkley at latitude 36°50'08.0" North, longitude 76°17'39.0" West, and Norfolk at latitude 36°50'08.0" North, longitude 76°17'39.0" West.

(2) *Coast Guard Patrol Commander:* The Coast Guard Patrol Commander is a Coast Guard commissioned, warrant, or petty officer who has been designated by Commander, Coast Guard Group, Hampton Roads.

(b) *Special local regulations.* (1) Except for participants registered with the event sponsor and vessels that are moored to a pier, dock or shore, no person or vessel may enter or remain in the regulated area without permission of the Coast Guard Patrol Commander.

(2) The operator of any vessel in the regulated areas shall:

(i) Stop the vessel immediately when directed to do so by any Coast Guard commissioned, warrant or petty officer on board a vessel displaying a Coast Guard ensign; or

(ii) Proceed as directed by any Coast Guard commissioned, warrant or petty officer.

(3) Spectator vessels may anchor outside the regulated area specified in paragraph (a)(1) of this section, but may not block the channel.

(4) The Coast Guard Patrol Commander may stop the event to assist the transit of marine traffic through the regulated area.

(c) *Effective Period.* This regulation is effective at different times and dates throughout the year. The Commander, Fifth Coast Guard District publishes a notice in the Fifth Coast Guard District Local Notice to Mariners and in the Federal Register that announces the time and dates when the regulations are in effect.

Dated: May 15, 1987.

P.A. Welling,

*Captain, U.S. Coast Guard, Commander, Fifth Coast Guard District, Acting.*

33 CFR Part 183

[CGD 85-098]

## Boating Safety; Fuel System Standard

**AGENCY:** Coast Guard, DOT.

**ACTION:** Final rule.

**SUMMARY:** This rule amends the Fuel System Standard in Subpart J of Part 183 by requiring that gasoline fuel hose installed in new recreational boats be tested under SAE Standard J1527DEC85 instead of SAE Standard J30C. The increasing level of aromatics in gasoline and the use of alcohols in gasoline have raised safety questions over the permeation rates and longevity of hose meeting SAE Standard J30C. The purpose of these amendments is to specify four grades of fuel hose that are more resistant to alcohol permeation. Additional editorial changes to Subpart A of Part 183 reflect changes to the names and addresses of organizations whose standards are incorporated by reference in Part 183.

**DATES:** Effective November 23, 1987. The incorporation by reference of SAE Standard J1527DEC85 in Subpart J of Part 183 of Title 33, Code of Federal Regulations is approved by the Director of the Federal Register as of November 23, 1987.

**FOR FURTHER INFORMATION CONTACT:** Mr. Alston Colihan (202) 267-0961.

**SUPPLEMENTARY INFORMATION:** The Coast Guard published a notice of proposed rulemaking in the Federal Register on March 20, 1986 (51 FR 9689). Interested persons were invited to participate in this rulemaking by submitting relevant comments. All of the comments received were carefully considered. The National Boating Safety Advisory Council was consulted and its opinions and advice have been considered in the formulation of these amendments. The transcripts of the proceedings of the National Boating Safety Advisory Council at which this rule was discussed are available for examination in Room 4304, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC. The minutes of the meetings are available from the Executive Director, National Boating Safety Advisory Council, c/o Commandant (G-BBS), U.S. Coast Guard, Washington, DC 20593-0001.

### Drafting Information

The principal persons involved in drafting these amendments are Mr. Alston Colihan, Project Manager, Office of Boating, Public, and Consumer Affairs, and LT. Sandra Sylvester, Project Attorney, Office of the Chief Counsel.

### Discussion of Comments

Eighteen comments were received, primarily from boat manufacturers. Of these, twelve comments supported the proposed amendments.

Several comments questioned the validity of the use of American Society for Testing and Materials (ASTM) Reference Fuel "C" as a test fuel in SAE Standard J1527DEC85, since it does not contain any alcohol. Unfortunately, at the present time there is no alcohol blended test fuel which has been accepted as a consensus standard and it may be several years before this occurs. This reflects the wide diversity in the use of alcohol in gasoline. Not only do different refineries use different blends, but a given blend of gasoline may vary geographically and regionally. The Coast Guard is closely following efforts to develop a standard alcohol blend test fuel and will consider further rulemaking to adopt a suitable standard when one is developed.

Reference Fuel "C", used in the tests required by SAE Standard J1527DEC85, contains a higher percentage of toluene than the test fuels used in SAE Standard J30C (1977). Use of this fuel and stricter permeation standards results in a permeation rate six times better than that of hose meeting SAE Standard J30C. Data from a number of tests considered in conjunction with the development of SAE Standard J1527DEC85 indicates that ethanol blended fuels (gasohol) may cause permeation in marine hoses approximately double that of fuels not containing alcohol, and methanol blended fuels may increase permeation about two and one-half times. Therefore, with the alcohol-blended gasoline currently found at the retail level, fuel distribution lines meeting the permeation rates established by the rules, when tested under SAE Standard J1527DEC85, should be more than two and one-half times as resistant to permeation than hose meeting the requirements of SAE Standard J30.

Another comment asked why a mixture of regular gasoline and alcohol was not considered as a test fuel. The use of regular gasoline was considered and rejected because gasoline is not a standard product. The constituents in gasoline vary with manufacturer, geography and time of year. Reference fuel "C" is a standardized product

BEST COPY AVAILABLE

which can be duplicated by any laboratory.

One comment suggested elimination of UL Standard 1114 in the definition of "USCG Type A1" hose in Section 183.505, since the UL standard does not establish permeation rates similar to those in SAE J1527DEC85. The Coast Guard contacted Underwriters' Laboratories, Inc. (UL) regarding the questions raised in the comment. The newly revised version of UL 1114 uses the same reference fuel and permeation rates as SAE J1527DEC85.

Another comment stated that although SAE J1527DEC85 establishes maximum allowable amounts of fuel loss through a hose wall, specific physical property tests should also be established to measure the degradation of hose due to alcohol in the fuel, because split and deteriorated fuel fill lines and vent lines are a known cause of fires and explosions. This recommendation was not adopted. Physical property tests such as tensile strength, swelling and cold flexibility are indirect measures of the durability of a length of hose. These tests are included in SAE J1527DEC85 and UL 1114. The permeability test is also an indirect measure of the durability of hose. When fuel permeates through the hose wall, some of the hose material also leaches out, particularly plasticizers which contribute to the flexibility of the hose. Therefore, a reduction in the permeability of a hose will have a direct effect upon increasing the useful life of the hose. All fuel hose will deteriorate in time. The best corrective measure is periodic visual inspection of the hose.

One comment stated that the reference to "USCG Type A2" hose in paragraph 183.528(b) should be deleted since the paragraph refers to fuel stop valves in fuel line systems where class 2 hoses should not be used. The comment also stated that a similar problem exists in paragraph 183.532 with reference to the fire resistance of clips and straps on fuel line systems required to use Type A hose. This comment noted errors in the notice and is accepted.

Two comments urged the removal of the reference to "clips and straps" from paragraph 183.532(b), since the fuel lines requiring support in the paragraph are fire resistant. The comments noted that a fire is less severe in the lower portions of the engine room. Therefore, if the clips and straps supporting fire resistant fuel hoses are destroyed and the hoses fall lower in the engineroom, they will last longer. The Coast Guard agrees and these comments are also accepted.

Three comments disagreed with the proposal to require a lesser degree of resistance to permeation for hoses used for fill and vent lines, since these hoses have the greatest surface area and boat operators commonly overfill their fuel tanks.Therefore, according to the comments, both fill and vent hoses are subjected to extended periods of continuous contact with fuel. The Coast Guard does not agree with these comments. The Coast Guard believes the exposure to fuel loss by permeation through fill and vent hoses is significantly lower than the potential permeation through the fuel distribution hoses which are constantly full of fuel. Additionally, the level of permeation permitted for fuel and vent hoses under SAE J1527DE85 is significantly less than the permeation rate of SAE J30 hose previously permitted.

Several comments stated that there should be a mandatory requirement for boat builders to use the new hose as soon as it becomes available in production quantities. The Coast Guard has not adopted this recommendation. Federal statutes prohibit the Coast Guard from imposing a new requirement earlier than six months after publication of a final rule. In addition, the Coast Guard has issued an exemption allowing manufacturers to immediately begin using hose meeting SAE J1527DEC85, in lieu of hose meeting SAE J30C. Therefore, the Coast Guard considers a mandatory effective date of six months from the date of publication in the Federal Register an appropriate lead time for hose manufacturers to make production quantities of the new hose available to all builders.

Two comment suggested imposing a requirement for retrofitting existing boats with hoses meeting SAE J1527DEC85. Another comments suggested recommendations on the use of two hose clamps for those who install the new hose themselves. These recommendations were not adopted.The Coast Guard has used and will continue to use publicity and education to inform the public of the need for retrofitting older boats with new fuel hoses. In addition, the present regulations do not require double hose clamps for fuel distribution lines and vent lines and most existing fittings do not have room for double clamping.

Another comment stated that the amendment is generally beneficial, but that it should not apply to diesel fuel systems. The comment misconstrues these amendments, which only apply to new boats with gasoline engines, except those powered by outboards.

Another comment was concerned about damage to other components in the fuel system due to exposure to alcohol. The Coast Guard has evaluated this problem and decided that it is not as significant a hazard as damage to fuel hose caused by alcohol permeation and does not require further regulation at this time. The Coast Guard will continue to monitor the use of alcohol in fuels and will initiate further rulemaking if necessary.

One comment urged consideration of a Federal fuel pump labeling law making it mandatory to display the amount and type of alcohol present in gasoline sold at retail. The labeling of fuel pumps is not within the jurisdiction of the Coast Guard. Other Federal agencies are considering this issue.

One comment stated that under the proposed wording in paragraph 183.558(b)(2), Class 2 fuel hose with 300 grams of fuel loss per square meter could be used as fuel distribution lines, and that this obviously was not the Coast Guard's intent. This comment is accepted. The Coast Guard has changed Section 183.558 by separating the requirements for fuel distribution lines from the requirements for fill and vent lines.

One comment asked whether prices for the new hose will be controlled, considering the demand that may be expected. The Coast Guard has no authority to control prices for vessel components. In addition, there should not be any shortages or unreasonable prices after the effective date of the regulations, because most fuel hose suppliers are now producing the new hose.

## Regulatory Evaluation

These regulations are considered to be non-major under Executive Order No. 12291 and non-significant under the DOT Regulatory Policies and Procedures (44 FR 11034; Feb. 26, 1979). The economic impact of this proposal has been found to be minimal. It is estimated that the proposal to change the incoporation by reference in the Fuel Systems Standard from SAE Standard J30C to SAE Standard J1527DEC85 and the definitions for "USCG Type A" and "USGC Type B" fuel hose will result in an increased cost for fuel hose of approximately $.20 per foot. It is further estimated that 100,000 new boats will be affected annually by these amendments and that the average boat contains about 10 feet of fuel hose. Therefore, this rule will result in a total annual cost to the industry of $200,000 or approximately $2.00 per boat.

Since the impact of this final rule is expected to be minimal, the agency certifies that this rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 183

Marine safety, Incorporation by reference.

In consideration of the foregoing, Part 183 of Title 33, Code of Federal Regulations is amended as follows:

## PART 183—BOATS AND ASSOCIATED EQUIPMENT

1. The authority citation for part 183 continues to read as follows:

Authority: 46 U.S.C. 4302; 49 CFR 1.46.

2. Section 183.1 is revised to read as follows:

### § 183.1 Purpose and applicability.

This part prescribes standards and regulations for boats and associated equipment to which 46 U.S.C. Chapter 43 applies and to which certification requirements in Part 181 of this subchapter apply.

3. Part 183 is amended by adding a new § 183.5 to read as follows:

### § 183.5 Incorporation by reference.

(a) Certain materials are incorporated by reference into this part with the approval of the Director of the Federal Register. The Office of the Federal Register publishes a table, "Material Incorporated by Reference", which appears in the Finding Aids section of this volume. To enforce any edition other than the one listed in paragraph (b) of this section, notice of change must be published in the Federal Register and the material made available. All approved material is on file at the Office of the Federal Register, Washington, DC 20408, and at the United States Coast Guard Boating Safety Division, Washington, DC 20593-0001.

(b) The materials approved for incorporation by reference in this part are:

Air Movement and Control Association, 30 W. University Drive, Arlington Heights, IL 60004. AMCA 210-74: Laboratory Methods of Testing Fans for Ratings—1974

American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103. ASTM D-471: Rubber Property—Effect of Liquids—1979

ASTM D-1621: Compressive Properties of Rigid Cellular Plastics—1975

ASTM D-1622: Apparent Density of Rigid Cellular Plastics—1975

ASTM D-2842: Water Absorption of Rigid Cellular Plastics—1975

Institute of Electrical and Electronics Engineers, Inc., 445 Hoes Lane, Piscataway, NJ 08854. IEEE 45-1977: Cable Construction—1977

UL 1128: Marine Blowers—1977

### § 183.110 [Amended]

4. Section 183.110 is amended by removing the definition for "ASTM."

### § 183.402 [Amended]

5. Section 183.402 is amended by removing paragraphs (a), (d), (e), (g) and (i) and redesignating paragraphs (b), (c), (f) and (h) as paragraphs (a), (b), (c) and (d) respectively.

### § 183.505 [Amended]

6. Section 183.505 is amended by removing the definitions for "ASTM," "Military Specification," "SAE," "UL," "USCG Type A Hose" and "USCG Type B Hose."

7. In § 183.528, paragraph (b) is revised to read as follows:

### § 183.528 Fuel stop valves.

* * * * *

(b) If tested in accordance with the fire test under § 183.590, a fuel stop valve installed in a fuel line system requiring metallic fuel lines or "USCG Type A1" hose must not leak fuel.

8. In § 183.532, paragraph (b) is revised to read as follows:

### § 183.532 Clips, straps and hose clamps.

* * * * *

(b) If tested in accordance with the fire test under § 183.590, a hose clamp installed on a fuel line system requiring metallic fuel lines or "USCG Type A1" hose must not separate under a one pound tensile force.

9. Section 183.540 is revised to read as follows:

### § 183.540 Hoses: Standards and markings.

(a) "USCG Type A1" hose means hose that meets the performance requirements of:

(1) SAE Standard J1527DEC85, Class 1 and the fire test in § 183.590; or

(2) Underwriters' Laboratories, Inc. (UL) Standard 1114.

(b) "USCG Type A2" hose means hose that meets the performance requirements of SAE Standard J1527DEC85, Class 2 and the fire test in § 183.590;

(c) "USCG Type B1" hose means hose that meets the performance requirements of SAE Standard J1527DEC85, Class 1.

(d) "USCG Type B2" hose means hose that meets the performance requirements of SAE Standard J1527DEC85, Class 2.

Note.— SAE Class 1 hose has a permeation rating of 100 grams or less fuel loss per square meter of interior surface in 24 hours.

SAE Class 2 hose has a permeation rating of 300 grams or less fuel loss per square meter of interior surface in 24 hours.

(e) Each "USCG Type A1," "USCG Type A2," "USCG Type B1," and "USCG Type B2" hose must be identified by the manufacturer by a marking on the hose.

(f) Each marking must contain the following information in English:

(1) The statement "USCG TYPE (insert A1 or A2 or B1 or B2)."

(2) The year in which the hose was manufactured.

(3) The manufacturer's name or registered trademark.

(g) Each character must be block capital letters and numerals that are at least one eighth-inch high.

(h) Each marking must be permanent, legible, and on the outside of the hose at intervals of 12 inches or less.

10. In § 183.558, paragraphs (a) and (b) are revised to read as follows:

### § 183.558 Hoses and connections.

(a) Each hose used between the fuel pump and the carburetor must be "USCG Type A1" hose.

(b) Each hose used—

(1) For a vent line or fill line must be:

(i) "USCG Type A1" or "USCG Type A2"; or

(ii) "USCG Type B1" or "USCG Type B2" if no more than five ounces of fuel is discharged in 2½ minutes when:

(A) The hose is severed at the point where maximum drainage of fuel would occur,

(B) The boat is in its static floating position, and

(C) The fuel system is filled to the capacity market on the tank label under § 183.514(b)(3).

(2) From the fuel tank to the fuel inlet connection on the engine must be:

(i) "USCG Type A1"; or

(ii) "USCG Type B1" if no more than five ounces of fuel is discharged in 2½ minutes when:

(A) The hose is severed at the point where maximum drainage of fuel would occur,

(B) The boat is in its static floating position, and

(C) The fuel system is filled to the capacity marked on the tank label under § 183.514(b)(3).

* * * * * *

11. In § 183.568, the introductory text in paragraph (c) is revised to read as follows:

**§ 183.568 Anti-siphon protection.**

* * * * *

(c) Provided that the fuel tank top is below the level of the carburetor inlet, be metallic fuel lines meeting the construction requirements of § 183.538 or "USCG Type A1" hose, with one or two manual shutoff valves installed as follows:

* * * * *

12. In § 183.590, paragraph (a)(1) is revised to read as follows:

**§ 183.590 Fire test.**

(a) * * *

(1) Fuel stop valves, "USCG Type A1" or USCG Type A2" hoses and hose clamps are tested in a fire chamber.

* * * * *

**§ 183.605 [Amended]**

13. Section 183.605 is amended by removing the definitions for "AMCA," "ASTM" and "UL."

**§ 183.607 [Removed]**

14. Section 183.607 is removed.

Dated: April 15, 1987.

T.J. Matteson,

*Rear Admiral, U.S. Coast Guard, Chief, Office of Boating, Public and Consumer Affairs.*

[FR Doc. 87-11643 Filed 5-26-87; 8:45 am]

BILLING CODE 4910-14-M

---

## FEDERAL EMERGENCY MANAGEMENT AGENCY

### 44 CFR Part 64

[Docket No. FEMA 6765]

### Suspension of Community Eligibility, Connecticut et al.

**AGENCY:** Federal Emergency Management Agency, FEMA.

**ACTION:** Final rule.

**SUMMARY:** This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If FEMA receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the Federal Register.

**EFFECTIVE DATES:** The third date ("Susp.") listed in the third column.

**FOR FURTHER INFORMATION CONTACT:** Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646-2717, Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

**SUPPLEMENTARY INFORMATION:** The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022), prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001–4128) unless an appropriate public body shall have adopted adequate floodplain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the Federal Register. In the interim, if you wish to determine if a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

In addition, the Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Administrator finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6-month, 90-day and 30-day, notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, FEMA, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in Section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate floodplain management, thus placing itself in noncompliance of the Federal standards required for community participation. In each entry, a complete chronology of effective dates appears for each listed community.

**List of Subjects in 44 CFR Part 64**

Flood insurance—floodplains.

The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

## FOREIGN CLAIMS SETTLEMENT COMMISSION

**45 CFR Part 501**

**Revision of Agency Regulations; Correction**

**AGENCY:** Foreign Claims Settlement Commission of the United States.

**ACTION:** Revision of regulations; correction.

**SUMMARY:** This document corrects a paragraph in the revision of the regulations of the Foreign Claims Settlement Commission of the United States which was published on pages 17556 through 17574 of the Federal Register on May 11, 1987. The correction is needed to delete eight lines of text which were erroneously repeated. The paragraph in question appears as paragraph (a)(3) in § 501.5, entitled "Depositions" and printed at page 17560 (52 FR 17560).

**FOR FURTHER INFORMATION CONTACT:** David E. Bradley (202) 653-5883.

Accordingly, the Foreign Claims Settlement Commission of the United States is correcting 45 CFR 501.5(a)(3) to read as follows:

**§ 501.5 Depositions.**

* * * * *

(a) * * *

(3) The Commission or its representative shall, upon receipt of the application and a showing of good cause, make and cause to be served upon the parties an order which will specify the name of the witness whose deposition is to be taken, the time, the place, and where practicable the designation of the officer before whom the witness is to testify. Such officer may or may not be the one specified in the application. The order shall be served upon all parties at least 10 days prior to the date of the taking of the deposition.

* * * * *

Judith H. Lock,
*Administrative Officer.*

# Proposed Rules

Federal Register
Vol. 52, No. 101
Wednesday, May 27, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules; and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1951

## Servicing of Community Program Loans To Charge a Transfer Fee

**AGENCY:** Farmers Home Administration, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** The Farmers Home Administration (FmHA) proposes to amend the Agency's policies and procedures governing the establishment of a nonrefundable transfer fee for Community Program Loans, with payment at time of application submittal.

The proposed rule is necessary to comply with Public Law (Pub. L.) 97–258, and OMB Circulars A–25 and A–129, which require a fee to be charged when specialized benefits accrue to an individual rather than the general public. No procedures are currently in effect with respect to charging loan transfer fees for Community Program Loans. The Agency's proposal to assess transfer fees would help to offset administrative and contractual costs related to transfer of a Community Program loan.

**DATE:** Comments must be received on or before July 27, 1987.

**ADDRESS:** Submit written comments, in duplicate, to the Office of the Chief, Directives and Forms Managment Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address.

**FOR FURTHER INFORMATION CONTACT:** Carolyn C. Palmer, Loan Officer, Community Facilities Division, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, South Agriculture Building, Washington, DC 20250; telephone (202) 382–1503.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established in Departmental Regulation 1512–I which implements Executive Order 12291, and has been determined to be nonmajor since the annual effect on the economy is less than $100 million and there will be no increase in costs or prices for consumers, individual industries, organizations, governmental agencies or geogrpahic regions. There will be no significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environemntal Program". FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment and in accordance with the National Environmental Policy Act of 1969 Pub. L. 91–190, an Environmental Impact Statement is not required.

The Administrator, Farmers Home Administration, has determined that this action will not have a significant economic impact on a substantial number of small entities, because the action, while increasing costs to ineligible transferees in Community Programs, will not affect a significant number of small entities as defined by the Regulatory Flexibility Act (5 U.S.C. 001).

This change affects the following FmHA programs as listed in the Catalog of Federal Domestic Assistance:

Sec.
10.414 Resource, Conservation, and Development Loans.
10.418 Water and Waste Disposal Systems for Rural Communities.
10.419 Watershed and Flood Prevention Loans.
10.422 Business and Industry Loans.
10.423 Community Facilities Loans.

and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (7 CFR 3015, Subpart V, 48 FR 29112, June 24, 1983; 49 FR 22675, May 31, 1984; 50 FR 14088, April 10, 1985.)

### Discussion

*(1) Transfer Fee*

FmHA is authorized to make direct loans for the purpose of financing water and waste disposal and other essential community facilities providing essential service primarily to rural residents. It is the policy of FmHA to approve transferees who will continue the original purpose of the loan. If an eligible transferee is not available, an ineligible transferee will be considered as a method for servicing problem cases. Legislation authorizing FmHA loan programs gives the Secretary of Agriculture authority to impose transfer fees (user fees). Public Law 97–258 requires that transfer fees be charged for all loan programs for specialized services. In addition, the Office of Management and Budget (OMB) Circulars A–129 and A–25 require that a fee be assessed where specialized benefits accrue to an individual rather than the general public.

Under this proposed rule, a transfer fee for the processing of a transfer and assumption would be imposed upon each ineligible transferee. The proposed rule establishes a nonrefundable fee based on the Agency's staffing and other administrative cost related to processing a transfer and assumption to an ineligible transferee. The fee is established at $650 plus the cost of an appraisal, if this service must be contracted out. The fee is to be reviewed annually and adjusted accordingly. This fee is paid by the proposed ineligible transferee when the transfer proposal is submitted.

*(2) Transfer Fee Justification*

The transfer fee is intended to pay for those services provided by FmHA when processing a transfer and assumption to an ineligible transferee in Community Programs. In some cases, the State Director may elect to use persons from outside the Agency on a service contract basis. Whether the State Director uses personnel from the Agency or outside contractors to carry out the processing (or a portion of the processing, i.e., appraisals) of the transfer, the fee will

be paid at the time of submittal of the proposal and cannot be refunded. The additional fee for the appraisal will be collected as soon as a price is obtained.

Actual cost data for service contracts, i.e., appraisals, environmental assessments, etc., will be collected on all loans and an analysis will be made each year. Deviations of 10 percent between actual charges for contracting and our cost projections will result in a fee review and adjustments to the fee if FmHA determines it appropriate. The fee will be determined by the National Office and issued annually. Information regarding the fee can be obtained in any FmHA County, District or State Office.

Based on estimated hours to complete the processing of a transfer and assumption to an ineligible transferee, salaries, and other administrative expenses the current fee has been established as $650 plus the cost of an appraisal if this service is contracted. Estimated hours were taken from the FmHA Resource Management System. These estimates are current levels which are reviewed annually and modified as needed.

**List of Subjects in 7 CFR Part 1951**

Account servicing, Grant program—Housing and community development, Loan programs—Housing and community development, Reporting requirements, Rural areas.

Accordingly, FmHA proposes to amend Chapter XVIII, Title 7, Code of Federal Regulations as follows:

**PART 1951—SERVICING AND COLLECTIONS**

1. The authority citation for Part 1951 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

**Subpart E—Servicing of Community Program Loans and Grants**

2. Section 1951.203 is amended by adding paragraph (f) to read as follows:

**§ 1951.203 Definitions.**

* * * * *

(f) *Transfer fee.* A one-time nonrefundable application fee, charged to ineligible applicants for FmHA services rendered in the processing of a transfer and assumption.

3. Section 1951.210 is amended by redesignating paragraphs (c)(1), (c)(2), (c)(3) and (c)(4) as paragraphs (c)(2), (c)(3), (c)(4) and (c)(5), respectively; by redesignating paragraphs (d) introductory text and paragraphs (1)–(4), (d)(5) (d)(6), (e) and (f) as paragraphs (e) introductory text and paragraphs (1)–(4), (e)(6), (e)(7), (f) and (g), respectively; and by adding new paragraphs (c)(1), (d) and (e)(5) to read as follows:

**§ 1951.210 Transfer of security and assumption of loans.**

* * * * *

(c) * * *

(1) All transfers to ineligible applicants will include a one-time nonrefundable transfer fee. Transfer fees will be collected and payments applied in accordance with paragraph (d) of this section. * * *

(d) *Transfer fees.* Transfer fees for Community Program borrowers are a one-time nonrefundable cost to be collected at the time of application or proposal. (Revised)

(1) *Amount.* Community Program transfer fees will be a standard fee plus the cost of the appraisal if completed by other than FmHA personal. This fee will be established by the National Office and issued annually. Contact costs will be processed in accordance with FmHA Instruction 2024–P, Cost Payments.

(2) *Remittance.* This fee will be deposited into the Concentration Banking System. In those locations not participating in the Concentration Banking System, the fee will be submitted directly to the Finance Office. In either case, this fee will be identified as a tranfer fee using Form FmHA 451–2, Schedule of Remittance. This fee will be credited to the Rural Development Insurance Fund and should be included on the Daily Activity Report.

(3) *Waiver.* When the State Director determines waiving the transfer fee is in the best interest of the Government, the file will be submitted to the National Office with appropriate recommendations for the request.

(e) * * *

(5) The transfer fee is to be waived for a prospective transferee.

* * * * *

4. § 1951.210 newly redesignated paragraph (f)(13) is amended in the last sentence by changing the reference from "§ 1951.210 (d)(6)" to "1951.210(e)(7)."

**§ 1951.211 [Amended]**

5. Section 1951.211(c) introductory text is amended by changing the reference from "§ 1951.210(e)(1) through (14)" to "1951.210(f)(1) through (14)."

Dated: April 23, 1987.

**Vance L. Clark,**

*Administrator, Farmers Home Administration.*

[FR Doc. 87–12018 Filed 5–26–87; 8:45 am]

BILLING CODE 3410–07–M

**DEPARTMENT OF JUSTICE**

**Immigration and Naturalization Service**

**8 CFR Part 1**

**[INS Number: 87–1917]**

**Definitions, Applications, Petitions, Motions and Appeals for Benefits Under the Immigration and Nationality Act**

**AGENCY:** Immigration and Naturalization Service, Justice.

**ACTION:** Proposed rule.

**SUMMARY:** The Immigration and Naturalization Service ("the Service") entertains numerous applications, petitions, motions and appeals from individuals seeking benefits under the Immigration and Nationality Act ("the Act"), many of which require that the moving party take action within a certain number of days of a particular event. For example, an appeal from an adverse decision of this Service must be filed within fifteen days of the decision. Current regulations provide that when the final day of a period in which an action must be taken falls on a Sunday or legal holiday, the period shall run until the end of the next day which is not a Sunday or legal holiday. However, the current regulations do not make similar provisions for situations in which the final day falls on a Saturday, even though Service offices are generally not open for business on Saturdays and a moving party would not normally be able to take the required action on that day. The proposed rulemaking would extend the period for taking action until the end of the next business day when the final day falls on a Saturday.

**DATE:** Written comments must be submitted on or before June 26, 1987.

**ADDRESS:** Please submit comments in duplicate to the Director, Office of Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, NW., Room 2011, Washington, DC 20536.

**FOR FURTHER INFORMATION CONTACT:** Michael L. Shaul, Senior Immigration Examiner, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633–3946.

**SUPPLEMENTARY INFORMATION:** In administering the Immigration and Nationality Act ("the Act"), the Immigration and Naturalization Service ("the Service") may, in certain situations, place time restrictions on

individuals and organizations seeking to obtain benefits under the Act. These situations include (but are not limited to) the filing of an appeal from an adverse decision of the Service, the submission of a brief in a case involving an unusually complex or novel question of law or fact which is being certified to an appellate authority, and the filing of a petition for immigrant visa preference classification based upon a labor certification obtained in accordance with section 212(a)(14) of the Act. The period in which an action must be taken is normally expressed as a certain number of days.

The regulations at 8 CFR 1.1(h) currently state that when the final days of a period in which an action must be taken falls on a Sunday or legal holiday the moving party has until the end of the next day which is not a Sunday or legal holiday in which to take the required action. However, the regulation does not make similar provisions for situations in which the final day of a period falls on a Saturday.

The Board of Immigration Appeals has held that in cases being appealed to that body, an appellant shall be allowed to file his or her appeal on the next day which is not a Saturday, Sunday or legal holiday whenever the final day of the appeal period falls on a Saturday (*Matter of Escobar*, 18 I. & N. Dec. 412), since it found "no legitimate distinction between Saturdays, Sundays and legal holidays with regard to an alien's ability to perfect his appeal." In the interest of fairness to the public and uniformity in filing procedures, the Service proposes to revise the regulation to provide that if the last day of a filing period is a Saturday, Sunday or legal holiday, the period shall run until the next day which is not a Saturday, Sunday or legal holiday.

For purposes of clarity, the proposed rulemaking also specifies that this exclusion does not apply when the Service requires action by a specified date, such as requiring that an alien depart from the United States. This does not represent a change in existing practice.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule would not, if promulgated, have a significant adverse economic impact on a substantial number of small entities. This rule is not a major rule within the meaning of section 1(b) of E.O. 12291.

**List of Subjects in 8 CFR Part 1**

Administrative practice and procedure, Immigration.

**PART 1—[AMENDED]**

Accordingly, Chapter I of Title 8 Code of Federal Regulations is amended as follows:

1. The authority citation for Part 1 continues to read as follows:

Authority: Sec. 103, 66 Stat. 173; 8 U.S.C. 1103; 28 U.S.C. 509, 510; 5 U.S.C. 301.

2. In § 1.1 paragraph (h) is revised to read as follows:

**§ 1.1 Definitions.**

* * * * *

(h) The term "day" when computing the period of time for taking any action provided in this chapter including the taking of an appeal, shall include Saturdays, Sundays and legal holidays, except that when the last day of the period so computed falls on a Saturday, Sunday or a legal holiday, the period shall run until the end of the next day which is not a Saturday, a Sunday or a legal holiday. However, when the Service requires action on or before a specific date, as opposed to within a certain number of days, the fact that such specified date falls on a Saturday, Sunday or legal holiday shall have no effect.

* * * * *

Dated: May 15, 1987.

Richard E. Norton,

*Associate Commissioner, Examinations, Immigration and Naturalization Service.*

BILLING CODE 4410-10-M

## TENNESSEE VALLEY AUTHORITY

**18 CFR Part 1310**

**Administrative Cost Recovery**

**AGENCY:** Tennessee Valley Authority (TVA).

**ACTION:** Proposed rule.

**SUMMARY:** TVA proposes to amend its administrative cost recovery regulations by adding a provision for the collection of a $2 fee to accompany applications for quota deer hunt permits at TVA's Land Between The Lakes (LBL) in western Kentucky and Tennessee. The amendment is proposed under authority of the Tennessee Valley Authority Act of 1933, as amended, and Title V of the Independent Offices Appropriations Act of 1952 which authorize TVA to prescribe for certain services or things of value provided by TVA such charge as it determines to be fair and equitable.

**DATE:** Comments must be received by June 26, 1987.

**ADDRESS:** Comments should be sent to Tennessee Valley Authority, Office of the General Counsel, 400 West Summit Hill Drive, Knoxville, Tennessee 37902. All comments will be available for public examination during regular business hours at the following locations:

1. Knoxville-TVA Technical Library, Room EB A1, 400 West Summit Hill Drive, Knoxville, Tn. 37902
2. Chattanooga-TVA Technical Library, Room 100, 401 Chestnut Street, Chattanooga, Tn. 37401
3. Muscle Shoals-TVA Technical Library, A100 NFDC Building, Muscle Shoals, Al. 35660
4. Golden Pond-Land Between The Lakes, Administrative Office, Golden Pond, Ky. 42231

**FOR FURTHER INFORMATION CONTACT:** Elizabeth E. Thach, Director of Land Between The Lakes, Golden Pond, Kentucky 42231, (502) 924-5602.

**SUPPLEMENTARY INFORMATION:** Hunters at LBL must hold a State hunting permit for the State in which they are hunting (Kentucky or Tennessee), and a hunter use permit from TVA for which TVA charges a fee. Due to the quality of the hunting experience offered, LBL is a very popular deer hunting site. Because of the large number of people desiring to hunt deer at LBL, TVA must limit participation in the deer hunts by random selection of applicants for special quota deer hunt permits as part of an intensive managed hunting program. In order to participate in quota deer hunts, hunters must complete an application form which must be received by TVA by established deadlines. A drawing is conducted by computer and a quota hunt permit or rejection notice is mailed to the applicant.

The $2 application fee for LBL quota deer hunt permits will recover administrative costs associated with processing the forms, conducting the drawing, and notifying applicants of rejection or selection. Applications received after the deadline would not be processed and fees would be returned to the applicants. TVA has determined that this proposed rule will not be a "major" rule under Executive Order No. 12291 and will not have a significant economic impact on a substantial number of "small entities" as defined by the Regulatory Flexibility Act.

TVA has determined in accordance with section 5.2.27 of TVA's procedures implementing the National Environmental Policy Act (48 FR 10264) that the proposed rule is of a type that does not have a significant impact on the human environment. Accordingly, neither an environmental assessment

nor an environmental impact statement is required.

**List of Subjects in 18 CFR Part 1310**

Government property, Hunting, Land, Land sales.

For the reasons set forth in the preamble, TVA proposes to amend Title 18, Chapter XIII of the Code of Federal Regulations as follows:

## PART 1310—ADMINISTRATIVE COST RECOVERY

1. The authority citation for Part 1310 is revised to read as follows:

Authority: 16 U.S.C. 831–831dd; 31 U.S.C. 9701.

**§ 1310.2 [Amended]**

2. Section 1310.2 is amended by adding paragraph (c) to read as follows:

* * * * *

(c) *Quota deer hunt applications.* Quota deer hunt permit applications will be processed by TVA only if accompanied by the fee prescribed in paragraph (d) of § 1310.3 of this part.

**§ 1310.3 [Amended]**

3. In § 1310.3, paragraph (d) is redesignated as paragraph (e) and a new paragraph (d) is added to read as follows:

* * * * *

(d) *Quota deer hunt application fees.* A fee of $2 for each person must accompany the completed application form for a quota deer hunt permit. Applications will not be processed unless accompanied by the correct fee amount. No refunds will be made to unsuccessful applicants, except that fees received after the application due date will be refunded.

* * * * *

W. F. Willis,
*General Manager.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

### 21 CFR Part 880

[Docket No. 85N-0285]

### Medical Devices; Reclassification of the Infant Radiant Warmer

**AGENCY:** Food and Drug Administration.

**ACTION:** Notice of intent.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing its intent to initiate a proceeding to reclassify from class III (premarket approval) into class II (performance standards) the infant radiant warmer. The infant radiant warmer is a medical device intended to maintain an infant's body temperature by means of radiant heat. This action is being taken under the Medical Device Amendments of 1976.

**FOR FURTHER INFORMATION CONTACT:** Robert Gatling, Jr., Center for Devices and Radiological Health (HFZ–420), Food and Drug Administration, 8757 Georgia Avenue, Silver Spring, MD 20910, 301–427–7750.

**SUPPLEMENTARY INFORMATION:** In the Federal Register of January 15, 1986 (51 FR 1910), FDA proposed to require the filing of a premarket approval application or a notice of completion of a product development protocol for the infant radiant warmer device (21 CFR 880.5130). FDA also announced an opportunity for interested persons to request the agency to change the classification of the device based on new information. The actions were taken under the Medical Device Amendments of 1976 (Pub. L. 94–295) to the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 *et seq.*).

On January 30, 1986, the Health Industry Manufacturers Association (HIMA), Washington, DC., submitted to FDA under section 515(b) of the act (21 U.S.C. 360e(b)), a petition to reclassify the generic type of device infant radiant warmer (21 CFR 880.5130) from class III into class II. Based on the valid scientific evidence in the petition, FDA is initiating proceedings to reclassify the device following the procedures in 21 CFR 860.130 and 860.132 regarding reclassification of devices under section 513(e) of the act (21 U.S.C. 360c(e)). FDA referred the petition to the General Hospital and Personal Use Devices Panel (the Panel), one of FDA's advisory committees, for its recommendation on the change in classification recommended in the petition. During an open meeting of the Panel on May 21, 1986 (see the Federal Register of April 11, 1986; 51 FR 12570), the Panel considered the petition and recommended that the infant radiant warmer be reclassified from class III into class II and recommended that any change in classification not take effect until the effective date of a performance standard for the generic type of device established under section 514 of the act (21 U.S.C. 360d).

A copy of HIMA's petition and supporting exhibits, the transcript and the summary minutes of the Panel meeting, and the comments received on the petition are on file in the Dockets Management Branch under Docket No. 85N–0285 and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

Accordingly, under section 515(b) of the act and 21 CFR 860.132(a) of the regulations governing reclassification under section 515(b) of the act, FDA is announcing its intent to initiate a proceeding under section 513(e) of the act and 21 CFR 860.130 to change the classification of the infant radiant warmer device.

As followup to this notice, in the near future FDA will publish in the Federal Register a proposed rule to reclassify this device. In the proposal, FDA will set forth the Panel's recommendation, a summary of the reasons for the recommendation, a summary of the data upon which the recommendation is based, an identification of the risks to health (if any) presented by the device, and a discussion of whether class II provides the regulatory controls necessary to provide reasonable assurance of the safety and effectiveness of the device.

The proposed rule to reclassify this device issued under section 513(e) of the act and 21 CFR 860.130(c) will provide a period of time during which public comments may be submitted concerning the proposed reclassification. After reviewing any public comments, the Panel's recommendation, and other publicly available information, by order published in the Federal Register FDA will either deny the petition or reclassify the device. Furthermore, the agency will address the requirements of the Regulatory Flexibility Act, Executive Order 12291, and the National Environmental Policy Act when any proposed rule based on this notice of intent is published in the Federal Register.

Dated: May 20, 1987.

John M. Taylor,
*Associate Commissioner for Regulatory Affairs.*

## DEPARTMENT OF THE INTERIOR

### National Park Service

### 36 CFR Part 7

### Canyon de Chelly National Monument; Commercial Horse Operation Regulations

**AGENCY:** National Park Service, Interior.

**ACTION:** Proposed rule.

**SUMMARY:** In Canyon de Chelly National Mounment's enabling legislation the ownership of the surface and subsurface use of the land was retained by the Navajo Tribe, and preferential right to provide riding horses for visitors into the monument was granted to the Navajo Tribe. This preferential right was to be under regulations prescribed by the Secretary of the Interior. The proposed rulemaking would set down requirements for Navajo owned and operated commercial horse operations at Canyon de Chelly National Mounment. The action is needed because some of the current commercial horse operations are operating without liability insurance, allowing children to lead the horse tours, utilizing defective equipment and occasionally entering the canyons of the monument without the proper permit. Visitors who take the horse trips have been injured, some seriously. The purpose of this rulemaking is to prescribe requirements for the commercial horse operations to provide a safe and enjoyable experience for visitors seeking horseback trips into the monument.

**DATE:** Written comments will be accepted through June 26, 1987.

**ADDRESS:** Comments should be addressed to: Superintendent, Canyon de Chelly National Monument, P.O. Box 588, Chinle, Arizona 86503.

**FOR FURTHER INFORMATION CONTACT:** Reed Detring, Chief I & RM, Canyon de Chelly National Monument, P.O. Box 588, Chinle, Arizona 86503, Telephone: (602) 674-5436.

**SUPPLEMENTARY INFORMATION:**

## Background

The basis for this proposed regulation lies in Canyon de Chelly's enabling legislation (16 U.S.C. 445 *et seq.*) which provided that ownership of the surface and subsurface of the land comprising the movement was retained by the Navajo Tribe. In addition, the Navajo Tribe was granted a preferential right under regulations to be prescribed by the Secretary of the Interior, of furnishing riding animals for the use of visitors to the monument. These regulations were never promulgated.

As a result, commercial horse operations exist in the monument which do not provide adequately for visitor safety and resource protection. Problems arise from the use of small children to lead groups, the use of defective equipment which has resulted in visitor injuries, the lack of liability insurance and noncompliance with permit requirements for visitors entering the canyon.

The National Park Service is charged with the administration of Canyon de Chelly National Monument with regard to preserving and protecting ruins, and providing facilities required for the care and accommodations of visitors. The National Park Service is the focal point for visitor contact in the monument and during summer months there are frequent daily inquiries from visitors concerning the commercial horse operations. National Park Service personnel are placed in a position of being asked to recommend and provide information about commercial horse services operating within the monument without being able to set reasonable standards or exercise an appropriate level of management oversight for those operations.

In order to help provide visitors a safe and enjoyable means of seeing and enjoying the monument, the National Park Service is proposing to regulate the commercial horse operations that conduct business within the monument as follows:

1. A permit will be required of any person who provides riding animals as a service for the use of visitors within the monument boundaries.

2. In addition to establishing appropriate permit conditions that pertain to public safety and resource protection pursuant to the authority of National Park Service general regulations, the superintendent will also impose a requirement that a permittee obtain and maintain a reasonable amount of liability insurance coverage.

3. All monument visitors using the services of commercial horse operations will be required to remain with the operator's guides during the visitors' entire stay in the canyon and will be prohibited from entering any of the ruins in the monument.

4. In cooperation with local Navajo residents, the superintendent will designate persons to act as guides, may require a permit of those persons and may establish permit terms and conditions governing their activities.

This rulemaking also implements the statutory provision granting the Navajo Tribe the preferential right to furnish riding animals for the use of visitors to the monument. "Preferential right" is defined in paragraph (c) of the regulation to mean a right of first refusal, on a case-by-case basis, to provide riding animals for hire for the use of visitors to the monument; the right to meet the terms of responsive offers for a proposed permit to provide such services; and a preference in the award of that permit, if, thereafter, the offer is substantially equal to others received.

Paragraphs (a) and (b) of this rulemaking are minor revisions of existing special regulations that pertain to Canyon de Chelly National Monument. Editorial changes have been made to both paragraphs to clarify their intent, but no major substantive changes have been made. The existing requirement for visitors entering a canyon to be accompanied by a designated guide or a National Park Service employee is retained. The provisin that addresses the designation of guides has been revised to reflect the fact that designations are accomplished in cooperation with local Navajo residents and to emphasize the fact that the superintendent may require a permit and establish permit terms and conditions governing the activities of designated guides.

The National Park Service considers these regulations to be reasonable and in compliance with the intent of the monument's enabling legislation. These requirements are the minimum necessary to assure that commercial horse operations in the monument are conducted in a manner that provides adequately for public safety and enjoyment, protects the natural and cultural resources of the monument and protects the rights and privacy of tribal members living within the monument.

## Public Participation

The policy of the National Park Service is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit written comments regarding this proposed rule to the address noted at the beginning of this rulemaking.

## Drafting Information

The primary author of this rulemaking is Reed E. Detring of Canyon de Chelly National Monument.

## Paperwork Reduction Act

The information collection requirement contained in this rulemaking has been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1024-0026.

## Compliance With Other Laws

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 (February 19, 1981), 46 FR 13193, and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). All bonafide

operators now providing commercial horse operations will be allowed to continue their businesses under a permit and terms and conditions established in accordance with the criteria and procedures of 36 CFR 1.6.

The NPS has determined that this rulemaking will not have a significant effect on the quality of the human environment, health and safety because it is not expected to:

(a) Increase public use to the extent of compromising the nature and character of the area or causing physical damage to it;

(b) Introduce noncompatible uses which might compromise the nature and characteristics of the area, or cause physical damage to it;

(c) Conflict with adjacent ownerships or land uses; or

(d) Cause a nuisance to adjacent owners or occupants.

Based in this determination, this rulemaking is categorically excluded from the procedural requirements of the National Environmental Policy Act (NEPA) by Departmental regulations in 516 DM 6, (49 FR 21438). As such, neither an Environmental Assessment nor an Environmental Impact Statement has been prepared.

**List of Subjects in 36 CFR Part 7**

National parks, Reporting recordkeeping requirements.

In consideration of the foregoing, it is proposed to amend 36 CFR Chapter I as follows:

## PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

1. The authority citation for Part 7 continues to read as follows:

**Authority:** 16 U.S.C. 1, 3, 9a, 462(k); § 7.96 also issued under D.C. Code 8–137 (1981) and D.C. Code 40–721 (1981).

2. In § 7.18, by revising paragraphs (a) and (b) and adding new paragraphs (c) and (d) to read as follows:

**§ 7.18 Canyon de Chelly National Monument**

(a) Except for canyon residents or other Navajo tribal members, entering a canyon unless accompanied by a National Park Service employee or by a guide designated by the superintendent is prohibited. *Provided, however,* that the superintendent may designate, by making on a map that is available for public inspection in the office of the superintendent and at other convenient locations within the monument, canyons or portions thereof that may be visited or entered without being so accompanied.

(b) In cooperation with local Navajo residents, the superintendent designates persons authorized to act as guides. The superintendent may also require a permit and establish permit terms and conditions in accordance with the criteria and procedures of § 1.6 of this chapter to govern the activies of designated guides.

(c) *Commerical stock operations.* The Navajo Tribe is granted the preferential right to furnish riding animals for the use of visitors to the monument in accordance with the following conditions and requirements. For the purpose of this section, the term "preferential right" means a right of first refusal, on a case-by-case basis, to provide riding animals for hire for the use of visitors to the monument; the right to meet the terms of responsive offers for a proposed new permit to provide such services; and a preference in the award of that permit, if, thereafter, the offer is subetantially equal to others received.

(1) Providing riding animals such as horses or mules as a service for the use of visitors within the monument boundaries is prohibited except pursuant to the terms and conditions of a permit issued by the superintendent in accordance with the criteria and procedures of § 1.6 of this chapter.

(2) In addition to permit terms and conditions established under the authority of § 1.6 of this chapter, the superintendent may establish permit conditions pertaining to liability insurance coverage. Violating a term or condition of a permit is prohibited and may also result in the suspension or revocation of the permit by the superintendent.

(d) *Information collection.* The information collection requirements contained in this section have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*, and assigned clearance number 1024–0026. This information is being collected to provide information necessary for the superintendent to issue permits. This information will be used to grant administrative benefits. The obligation to respond is required to obtain a benefit.

Dated: April 17, 1987.

BILLING CODE 4310-70-M

## ENVIRONMENTAL PROTECTION AGENCY

**40 CFR Parts 264 and 265**

**[FRL–3297–4]**

**Hazardous Waste Management System: Minimum Technology Requirements**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Extension of the comment period.

**SUMMARY:** On April 17, 1987, USEPA published a notice of availability of information and request for comments (51 FR 12566). That notice discusses data characterizing and comparing the performance of compacted soil and composite bottom liners for hazardous waste landfills and surface impoundments. EPA also made available two draft guidance documents for design, construction, and operation of single and double liner and leachate collection systems. The purpose of today's notice is to extend the comment period on the April 17, 1987, notice by 30 days to give the public additional time to submit comments. We have received requests to extend the comment period because of the complexity of the background document on bottom liner performance in double-lined landfills and surface impoundments, and the need of the commenters to devote time to several other EPA proposed regulations with similar deadlines for public comment. We find the requests for a 30-day extention appropriate and, therefore, grant the extension.

**DATE:** The Agency will accept comments submitted on or before July 1, 1987.

**ADDRESS:** Comments should be addressed to the Docket Clerk at the following address: EPA RCRA Docket (WH–562), 401 M Street SW., Washington, DC 20460. One original and two copies should be sent and identified by regulatory docket reference code F–87–DLRN–FFFFF. The docket is open from 9:30 a.m. to 3:30 p.m., Monday through Friday, except for Federal Holidays. The public must make an appointment to review docket materials by calling Michelle Lee at (202) 475–9327.

**FOR FURTHER INFORMATION CONTACT:** Kenneth Skahn (202) 382–4654.

Dated: May 20, 1987.

**J.W. McGraw,**

*Acting Assistant Administrator for Solid Waste and Emergency Response.*

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Child Support Enforcement

45 CFR Part 306

Child Support Enforcement Program, Medical Support Enforcement

AGENCY: Office of Child Support Enforcement (OCSE), HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: OCSE is proposing to amend the Child Support Enforcement program regulations govening medical support enforcement. Current regulations require State child support enforcement (IV–D) agencies to perform certain medical support enforcement activities. This proposal would require State IV–D agencies to extend these activities to certain IV–D cases not embraced by the current regulations and would eliminate a restriction which applies to cooperative agreements between State IV–D and State Medicaid agencies. The IV–D agency would be required to develop criteria to identify existing child support cases which have a high potential for obtaining medical support, and to petition the court or administrative authority to modify support orders to include medical support for targeted cases even if no other modification is anticipated. In addition, the IV–D agency would be required to provide the custodial parent with information pertaining to the health insurance coverage obtained by the parent for the dependent child(ren). Further, this regulation would delete the condition that IV–D agencies may only secure health insurance coverage under a cooperative agreement when it will not reduce the absent parent's ability to pay child support. Finally, this regulation would delete current maintenance of effort requirements States must adhere to when entering into a cooperative agreement with the State Medicaid agency.

These activities will expand the number of children for whom private health insurance coverage is obtained by increasing the availability of third party resources to pay for medical care and will result in Medicaid cost savings to State and Federal governments. Federal funding under title IV–D of the Social Security Act would be available to State IV–D agencies for these required medical support activities.

DATE: Consideration will be given to written comments and suggestions received by July 27, 1987.

ADDRESS: Address comments to: Associate Deputy Director, Officer of Child Support Enforcement, Department of Health and Human Services, Mary Switzer Building, 330 C Street, SW., Room 2628, Washington, DC 20201. Comments will be available for public inspection Monday through Friday, 8:30 a.m. to 5 p.m. in the Department's office at the above address.

FOR FURTHER INFORMATION CONTACT: Mary Brogan, Policy Branch, OCSE (202) 245–1774.

SUPPLEMENTARY INFORMATION:

## Background

Section 16 of the Child Support Enforcement Amendments of 1984 (Pub. L. 98–378) amends section 452 of the Social Security Act (the Act). This statute requires the Secretary of HHS to issue regulations to require that State IV–D agencies petition for the inclusion of medical support as part of any child support order whenever health care coverage is available to the absent parent at reasonable cost. It also provides for improved information exchange between State IV–D and State Medicaid agencies. OCSE published implementing regulations on October 16, 1985 in the Federal Register (50 FR 41887). These regulations require the State IV–D agency to secure medical support information regarding the absent parent, to exchange information with the State Medicaid agency, to petition the court or administrative entity to include health insurance in new or modified support orders, whether or not it is currently available to the absent parent at reasonable cost and to take steps to enforce ordered health insurance coverage. The State IV–D agency may perform functions beyond the scope of the title IV–D program, including providing services on behalf of individuals who are not IV–D cases, by entering into cooperative agreements with the State Medicaid agency pursuant to 45 CFR Part 306, Subpart A.

In prior years little attention was paid to the ordering of health insurance coverage for the dependent child of an absent parent with the result that only a limited number of AFDC cases already adjudicated require the absent parent to obtain health insurance coverage. Current requirements to petition for medical support are applicable only to new cases or cases which require modification of existing orders for reasons other than medical support. After these regulations were published as a proposed rule, it became apparent that health insurance coverage for a substantial number of existing child support cases was not addressed. This proposal would expand the audience of the current requirement to include existing cases with child support orders which require modification only for purposes of medical support. Examples of situations in which petitions could be considered are: (1) Noncustodial parents leaving unemployment compensation rolls due to change in employment status. The new employer will, most likely, provide health benefits, (2) Noncustodial parents having wages withheld for child support. Those having wages withheld also should have jobs that provide health benefits, (3) Other indications that the noncustodial parent is employed by an organization likely to provide health benefits such as union membership, available wage information from State tax forms, etc., or (4) Situations in which comparisons with Medicaid data indicate that health benefits formerly provided without a court order have lapsed. The prudent use of State and Federal resources dictate that the IV–D Agency develop procedures to work closely with the State Medicaid Agency to give priority to cases in which there is a demonstrated need for medical support.

Enhancements to medical support enforcement activities have been initiated because of the belief that many absent parents have private health insurance or health insurance coverage available through employers, unions or other groups. Such coverage may be extended when available at reasonable cost to provide for dependents' medical expenses. These proposed regulations would benefit families by increasing the incidence of absent parents who obtain health insurance coverage for their dependent children and would result in cost savings to State and Federal governments by reducing Medicaid expenditures when such insurance is available to families who are eligible for AFDC or Medicaid services. This proposal is also responsive to the February 12, 1985 findings of the General Accounting Office's report to Congress, "Improved Efforts Needed to Relieve Medicaid From Paying for Services Covered by Private Insurers," which stressed that the Medicaid program should be relieved of health care costs if some other person is legally responsible to pay because Federal and State Medicaid costs (which totalled $38 billion in 1984) are reduced without affecting Medicaid services.

## Statutory Authority

These proposed regulations are published under the authority of sections 1102, 452(f) and 454(13) of the Act. Section 1102 authorizes the Secretary of HHS to publish regulations

not inconsistent with the Act which may be necessary to efficiently administer the Secretary's functions under the Act. We believe these regulations would be consistent with the Act, as section 462(b), which defines "child support" for purposes of certain garnishment proceedings to include "payments to provide for health care", has long been an integral section of title IV–D of the Act. In addition, section 452(f) of the Act requires the Secretary of HHS to issue regulations to require States to petition for the inclusion of medical support as part of any child support order whenever health care coverage is available to the absent parent at a reasonable cost. Further, under section 454(13) of the Act, States must comply with such requirements and standards as the Secretary of HHS determines to be necessary for the establishment of an effective title IV–D program.

**Regulatory Provisions**

The proposed regulation would clarify the definition of health insurance; require that IV–D agencies develop written criteria to identify cases with a high potential for obtaining medical support based on availability of insurance resources and State law requirements governing modification of support orders; require that IV–D agencies petition the court or administrative authority to modify existing orders of targeted cases for the inclusion of medical support; and require that IV–D agencies provide the custodial parent with health insurance policy information when the absent parent secures health insurance coverage for the dependent child(ren) under the order. In addition, this regulation would delete the condition that IV–D agencies may only secure health insurance coverage under a cooperative agreement when it will not reduce the absent parent's ability to pay child support and would delete current maintenance of effort requirements that State IV–D agencies must adhere to when entering into cooperative agreements with State Medicaid agencies.

Section 306.51(a) of current regulations states that, for purposes of this section, health insurance is considered reasonable in cost if it is employment-related or other group health insurance. This proposal would amend 45 CFR 306.51(a) by designating all that follows the phrase "For purposes of this section" as paragraph (1) and clarifying in the newly designated paragraph (1) that all employment-related or group health insurance is considered reasonable regardless of the service delivery mechanism. A new paragraph (2) would be added to clarify the definition of health insurance to include health maintenance organization (HMO) and preferred provider organization (PPO) coverage under which medical services are provided to the dependent child(ren) of an absent parent.

Current regulations at 45 CFR 306.51(b) require State IV–D agencies to petition the court or administrative authority to include health insurance in new or modified court or administrative orders. As previously stated, there is no specific requirement for State IV–D agencies to return to court to add medical support to existing orders. This proposal would amend 45 CFR 306.51(b) by redesignating the current contents of paragraphs (b) (3), (4), (5) and (6) as (b) (6), (7), (8) and (9) respectively and inserting new paragraphs (3), (4) and (5). The new paragraph (b)(3) would require all State IV–D agencies to develop written criteria to identify cases not included under paragraphs (b)(1) and (b)(2) with a high potential for obtaining medical support based on (i) evidence that health insurance may be available to the absent parent at a reasonable cost, and (ii) facts, as defined by State law, which are sufficient to warrant modification of the existing support order to include health insurance. States would set their own criteria with respect to the selection of cases for which they would return to court. This would enable States to respond to conditions and requirements of State law which may be unique to them. In developing such criteria State IV–D agencies are encouraged to consult with the State Medicaid agencies to develop procedures for determining Medicaid cases with potential for high future costs.

States would be required to base their criteria for case selection on the criteria listed at 45 CFR 306.51(b)(3) (i) and (ii) as provided above. When attempting to determine the availability of health insurance coverage under paragraph (b)(3)(i), States could focus on cases with income that is indicative of regular employment, such as cases with orders for wage withholding, and cases with assets which may be indicative of changed financial circumstances or substantial income. Similarly, States could examine the employment history of absent parents to identify union membership, new employment or other situations which may indicate the existence of health insurance resources. However, it should be noted that availability of insurance alone may not be a sufficient indicator that it would be cost effective to return a case to court for modification as the available insurance must cover the child's condition, e.g., coverage may exclude certain pre-existing conditions, or have geographic limitations which preclude the child's use of the services, e.g., a PPO which only provides services in the absent parent's metropolitan area. Paragraph (b)(3)(ii) would require States to base their criteria on circumstances which indicate a modification is warranted as defined by State law. This requirement was included because support orders are generally modified only in response to a significant change in the circumstances of the parties since the rendering of the original order. Likely candidates for modification actions may include cases which indicate a change in the medical needs of the child or changes in the financial circumstances of either parent. Attention should be given to cases where medical support would be of obvious benefit to the family. This would include cases where the child's health is affected by chronic or debilitating illnesses which require extensive, expensive health services. States would need to examine their own laws to determine what restrictions apply in the State with respect to seeking modification of an existing order to include health insurance.

The new paragraph (b)(4) would require State IV–D agencies to petition the court or administrative authority to modify support orders for targeted cases identified in paragraph (b)(3) of this section to include medical support in the form of health insurance coverage. States should make every effort to obtain appropriate information to present at the court or administrative hearing that substantiates the request for health insurance coverage. Such information might include a description of the health insurance available to the absent parent, including HMO's and PPO's, and why health insurance coverage would be beneficial for the children. Where appropriate, the IV–D agency should be prepared to address the medical history of the child and any special medical needs which are known to exist as well as any changes to the financial circumstances of either party. This type of information will provide decisionmakers with a better understanding of the value of medical support and assist in securing judicial or administrative decisions for medical support.

The new paragraph (b)(5) would require IV–D agencies to provide the custodial parent with health insurance policy information when the absent parent secures coverage for the

dependent child(ren). This would include any information available to the IV–D agency about the health insurance policy which would permit a claim to be filed or, in the case of HMO's and PPO's, services to be provided.

Current regulations at 45 CFR 306.10(g) provide that IV–D agencies may, under cooperative agreement, secure health insurance coverage through court or administrative order when it will not reduce the absent parent's ability to pay child support. This regulation would delete the condition that the health insurance may not affect the absent parent's ability to pay cash support payments. This change is being made because the best interests of the child should be the governing factor in considering the terms of a support order. Under certain circumstances, health insurance coverage may be of greater benefit to the child and custodial family than any possible reduction in cash support which may result from the inclusion of health insurance in the support order.

The proposed regulation would delete the maintenance of effort requirement at 45 CFR 306.40 which prohibits a decrease in title IV-D program activities, personnel and resources as a result of entering into cooperative agreements with a State Medicaid agency. Revising the regulations to delete this provision would permit States more flexibility in developing cooperative agreements which are best suited to the needs of the State and agencies involved. This change conforms to the Health Care Financing Administration's (HCFA's) regulations implementing section 2367 of Pub. L. 98–369, which provides States with greater flexibility in the administration of the third party liability program. In addition, the maintenance of effort requirement is no longer necessary as a result of the revised audit criteria published October 1, 1985 in the Federal Register (50 FR 40120). The audit regulations require OCSE to conduct an audit of State IV-D agencies at least once every three years to determine whether each State has an effective IV-D program. These regulations incorporate objective performance criteria which OCSE will use to determine program effectiveness.

These proposed regulations do not alter or replace other provisions at 45 CFR 306.51. It remains the responsibility of the State IV-D agency to take steps to enforce health insurance coverage as required by court or administrative order. Also, if a support order requires that specified amounts be paid for medical support, the IV-D agency may collect such amounts pursuant to 45 CFR 302.50 if the support has been assigned to the State under sections 402(a)(26) of the Act (AFDC cases) or 471(a)(17) of the Act (Foster Care cases) or the State has agreed to collect the support under section 454(6) of the Act (non-AFDC cases). The IV-D agency is not responsible for enforcing medical support of an unspecified nature, unless this is done under cooperative agreement with the State Medicaid agency.

As indicated above, Federal funding would be available to IV-D agencies for these required medical support activities. In addition, as savings accruing to State governments as a result of medical support efforts may be substantial, States may wish to examine the possibility of rewarding their IV-D agencies for aggressive medical support efforts with some portion of the non-Federal share of resultant savings. States could develop incentive formulas ot reward their IV-D agencies for successful medical support enforcement activities based on the savings derived by the States' Medicaid agencies.

### Paperwork Reduction Act

45 CFR 306.51(b)(3) and (b)(5) of this proposed rule contain information collection requirements. In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), we have submitted a copy of this proposed rule to OMB for its review of these information collection requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (Room 3208), Washington, DC 20503, ATTN: Desk Officer for HHS.

### Regulatory Impact Analysis

The Secretary has determined, in accordance with Executive Order 12291 that this rule does not constitute a "major" rule. A major rule is one that is likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Executive Order requires that, for major rules, we prepare a regulatory impact analysis which describes the potential benefits and costs of the rule, together with the potential benefits and costs of alternative approaches.

The rule will have little or no net economic effect, because it will not change substantially the total amount that will be spent on medical care for dependent children of absent parents. The effect here is not the level of medical coverage but rather who will finance it—parents, third-party payors, and ultimately, employers and employees who pay premiums, versus the Medicaid program and taxpayers. As total expenditures will remain about the same, this regulation only results in a redistribution of resources.

As the purpose of this proposed regulation is to provide enhancements of a limited nature to current medical support enforcement requirements, no effective alternatives to this approach were apparent. This proposal will merely expand the audience of current medical support enforcement requirements to include certain targeted cases as identified by the State.

Under the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), we are required to prepare a regulatory flexibility analysis for those rules which will have a significant economic impact on a substantial number of small entities. This proposed rule will not have a significant economic impact on a substantial number of small entities. Its principal impact is on State IV-D agencies (who will be required to expend minimal effort), and third party payors. This rule can be expected to result in incremental increases in third party payments, and will not have a significant economic impact. Therefore, a regulatory flexibility analysis is not required.

### List of Subjects in 45 CFR Part 306

Child welfare, Grant programs/social programs, Medicaid.

### PART 306—[AMENDED]

For the reasons set out in the preamble, 45 CFR Part 306 is proposed to be amended as follows:

1. The authority citation for Part 306 is revised to read as set forth below:

Authority: 42 U.S.C. 652, 654(19), 1302, 1396a(a)(25), 1396b(d)(2), 1396b(o), 1396b(p), and 1396k.

2. 45 CFR 306.10 is amended by revising paragraph (g) to read as follows:

**§ 306.10 Functions to be performed under a cooperative agreement.**

* * * * *

(g) Secure health insurance coverage through court or administrative order.

* * * * *

**§ 306.40 [Removed]**

3. 45 CFR 306.40 is removed.

4. 45 CFR 306.51 is amended by revising paragraph (a) to read as follows:

**§ 306.51 Securing and enforcing medical support obligations.**

(a) For purposes of this section:

(1) Health insurance is considered reasonable in cost if it is employment-related or other group health insurance, regardless of service delivery mechanism (e.g., fee-for-service, health maintenance organization or preferred provider organization).

(2) Health insurance includes health maintenance organization and preferred provider organization coverage under which medical services are provided to the dependent child(ren) of an absent parent.

* * * * *

5. 45 CFR 306.51 is amended by redesignating the current contents of paragraphs (b)(3), (4), (5) and (6) as (6), (7), (8) and (9) respectively and by inserting new paragraphs (b)(3), (4) and (5) as follows:

**§ 306.51 Securing and enforcing medical support obligations.**

* * * * *

(b) * * *

(3) Establish written criteria to identify cases not included under paragraphs (b)(1) and (b)(2) of this section where there is a high potential for obtaining medical support based on—

(i) Evidence that health insurance may be available to the absent parent at a reasonable cost, and

(ii) Facts, as defined by State law, which are sufficient to warrant modification of the existing support order to include health insurance coverage for a dependent child(ren).

(4) Petition the court or administrative authority to modify support orders for cases identified in paragraph (b)(3) of this section to include medical support in the form of health insurance coverage.

(5) Provide the custodial parent with information pertaining to the health insurance policy which has been secured for the dependent child(ren) pursuant to an order obtained under this section.

* * * * *

## FEDERAL COMMUNICATIONS COMMISSION

**47 CFR Part 22**

**[CC Docket 87-120; FCC 87-147]**

## Common Carrier Services; Flexible Allocation of Frequencies in the Public Land Mobile Service for Paging and Other Services

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Commission is requesting comments on proposed amendments to 47 CFR 22.501 paragraphs (b), (k), (g)(1), and (p)(1). The proposed changes would permit existing and future licensees of conventional two-way mobile frequencies to use their frequencies in any manner they choose. The proposal also seeks comments on whether the 470–512 MHz UHF–TV band currently shared by two-way mobile licensees in thirteen of the largest metropolitan statistical areas (MSAs) should be utilized differently. Finally, comments are requested on whether the nationwide paging frequencies should be opened to unlimited local paging by the network licensees.

**DATES:** Due date for comments on the proposals is July 2, 1987; reply comments are due July 30, 1987.

**ADDRESS:** Federal Communications Commission, Washington, DC 20554.

**FOR FURTHER INFORMATION CONTACT:** Susan E. Magnotti, Mobile Services Division, Common Carrier Bureau, (202) 632–6450.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission's Notice of Proposed Rulemaking, CC Docket 87–120, adopted April 23, 1987 and released May 14, 1987. The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

### Summary of Notice of Proposed Rulemaking

1. On July 15, 1986, the Commission issued a Public Notice (Mimeo No. 5785) interpreting § 22.501(b) of the Commission's Rules. The public notice, *inter alia*, stated "additional two-way channels will not be authorized where the required need showings almost exclusively detail one-way paging utilization." Several radio common carriers have petitioned for reconsideration on this point.[1] Their comments have led us to the tentative conclusion that a change in our rules is required regarding frequency allocation for both paging and two-way mobile use.

*Petitioners' Comments*

2. Telocator Network of America, Radio Common Carrier Division, (Telocator) filed a Petition for Reconsideration and a Supplement to its petition. Telocator argues that the *Public Notice* "ignores marketplace realities, [and] makes an erroneous assumption regarding spectrum use. . .". It argues that rather than limiting use of the paried frequencies to conventional two-way mobile use, the Commission should expand the possible uses of the channels. It maintains that radio common carriers should be free to use the base channel for one-way signalling, and the mobile channel would be available for much-needed control and repeater applications, as well as simplex mobile-to-mobile, alarm systems, and telemetry. Telocator adds that "[p]ermissible use of two-way channels should be broad enough so that the Commission need not hold a rulemaking every time vendors seek to respond to users' changing needs in the most effective way possible."

3. American Mobilephone, Inc. (American) also filed a petition for reconsideration of the same provision of the *Public Notice*. American notes that "[e]ven the most well-informed expert regulatory agency can only rougly estimate the form that public need and demand will take." It points out that if a carrier finds it is acquiring paging subscribers due to marketplace demand, it is not feasible for the carrier to seek a low-band or 900 MHz paging frequency, because existing paging customers on VHF or UHF frequencies cannot be transferred due to equipment incompatibility. American adds that

---

[1] Rather than granting or denying reconsideration of the *Public Notice*, which merely interprets existing rules, we find that the best approach is a reexamination of the underlying rules which proscribe frequency use.

"paging-only frequencies are not a viable alternative for a carrier that wants to be a full-service provider, because potential new two-way subscribers cannot be serviced." Finally, American states that cellular competition of overhwhelming conventional two-way mobile use. It points out that although its conventional two-way service is significantly less expensive than cellular service, "American's overall two-way market share in Birmingham is already quite small and getting smaller every day." [3]

4. Graphic Scanning Corporation (Graphic) filed informal comments in support of the Telocator petition. Graphic points out that public demand dictates the use to which it puts its two-way channels. It states that in Miami and Pittsburgh, its two-way channels are used predominately for mobile telephone service, but that in its other markets, two way channels mainly provide paging service. Graphic argues that "[i]n some cases the RCC simply cannot feasibly obtain dedicated paging channels on equipment incompatibility grounds or because vacant one-way channels (if any), are not as desirable as UHF or VHF two-way spectrum."

## Discussion

5. Because it is our continuing responsibility to accommodate the evolving demand of the marketplace, we are proposing to make the existing common carrier mobile frequency allocation more flexible and thus more able to respond to changes in market demand. Three blocks of frequency allocations are affected by this proposal. First, the 150 MHz and 450 MHz two-way paired channels, which are listed in § 22.501(b) of the Commission's Rules, are proposed to be available for either paired or unpaired use, subject to appropriate regulations to avoid interference. Second, we propose two alternatives for more efficient use of the 450–512 MHz allocation, currently available for two-way communications in thirteen urban areas.[5] See § 22.501(k). Finally, we request public comment on the proposal to reverse our earlier rulings and make the frequencies allocated for nationwide network paging available for local paging without limitations. See § 22.501(p) of the Commission's Rules.

6. *Section 22.501(b).* We propose to amend § 22.501(b) so that the paired frequencies currently available for two-way use may be used in an unpaired configuration. Comment is requested on two alternative licensing arrangements. Under one approach, we would continue licensing pairs of these frequencies to one party.[4] Licensees would be permitted, consistent with their interference obligations, to deploy their spectrum capacity as they wished. They would be free, for example, to offer one or two-way service, utilize a portion of their capacity for control and other point-to-point functions, or resell some or all of their capacity to others.

7. Under the second licensing arrangement we wish to consider, channels could be licensed separately. Three possible outcomes could exist under this plan. First, an applicant may be licensed for a frequency pair for conventional two-way service and/or separate uses for both the base and mobile channels; second, an applicant may be licensed only for the base channel to provide paging service, simplex mobile service, or other one-way communications services; third, an applicant may be licensed only for a mobile channel for control/repeater facilities, or to provide paging service or other one-way communications services upon a showing that no interferences will be caused to two-way adjacent or co-channel operations.

8. We request comments from parties concerning appropriate interference standards. We tentatively conclude that existing bandwidth, emissions, and height-power standards should remain in force. In addition, we propose that the Carey Report continue to be used as the measure of service area for base stations. For mobile channels interference standards may vary widely depending upon the uses to which the channels are put.[5] Furthermore, standards for determining and avoiding interference between fixed use and mobile use must be established. accordingly, technical proposals from parties are requested. We also request comment on whether any interference criteria should be permitted in cases where affected parties agree.

9. We also seek comment on whether need standards for additional frequencies to ensure that both the base and the mobile channels are efficiently utilized. If we elect to adopt such standards, an applicant holding licenses for two-way paired frequencies would be required to show that both channels are utilized. A vacant mobile channel, for example, would bar license of additional channels unless the licensee relinquished the unused channel.

10. In addition, we seek guidance on whether standards for priorities among competing proposals should be established. For example, Rural Radio or similar basic telephone fixed service may have priority over two-way mobile use; two-way mobile use may have priority over paging and simplex mobile, and paging use may have priority over control/repeater facilities. Parties' comments are requested both on the concept of priority and on what services should receive priority.

11. *Section 22.501(k).* The paired frequencies allocated for two-way shared use in thirteen large urban areas appear to be underutilized. The quarterly traffic loading studies, which are required to be filed by licensees by § 22.501(l)(10)(ii) of the Commission's Rules, indicate that only a a fraction of the full capacity of each urban area's allocation is being used. Furthermore, over half of the urban areas have not filed any traffic loading report, leading us to the conclusion that this allocation is not utilized at all in those areas. The petitioners' comments in this proceeding make it clear that with the expansion of cellular telephony, conventional two-way use declines. Accordingly, we believe a more efficient use of this allocation should be made. Comment is requested on two different ways of achieving this objective.

12. Assignments in the 470–512 MHz common carrier band are unique in that more than one party may be licensed to the same frequency in the same geographic area. It is conceivable that this non-exclusive licensing plan may be discouraging the use of these frequencies. Therefore, one of the proposals on which comment is requested would alter the present licensing arrangement and may possibly encourage licensees to use their assignments more efficiently. This could be effected by modifying the eligiblity criteria for these channels so that new licenses would be issued only to applicants that had received the explicit approval of the existing licensees. This proposal would also permit licensees on

[3] Through informal discussions with industry representatives, Commission staff has learned that in cities to which cellular is licensed, conventional two-way mobile subscribership has dropped dramatically.

[5] These urban areas, listed in § 22.501(k), are Boston, Chicago, Cleveland, New York-New Jersey, Dallas-Fort Worth, Detroit, Houston, Los Angeles, Miami, Philadelphia, Pittsburgh, San Francisco, and Washington, D.C. Each area has between 12 and 24 paired channels for shared use by all area radio common carriers to provide two-way communications services.

[4] We would consider instituting a notification procedure for existing two-way system licensees who wish to change their frequency use under this proposal.

[5] Under rules governing Private Radio spectrum, for example, licensees share channels used for paging and simplex mobile. Likewise, where it is not possible to avoid interference on a common carrier mobile channel, interested licensees and applicants may elect to share the channel if their proposed uses are compatible.

these frequencies to change their present sharing arrangement through either formal joint ventures, mergers, or straight buyouts. In addition to given licensees possible incentives, this proposal could provide for more efficient use of their channels by expanding the types of communications permitted in the same manner as proposed for the other two-way frequencies considered above. We propose to require that all facilities authorized under this, and the proceeding, option comply with the present interference criteria.

13. We also wish to consider formally reallocating some of these channels from two-way common carrier services to other purposes. Under this option, we would limit urban licensees to the number of paired frequencies which will permit 25 percent or less blocking probability under loading conditions indicated in the licensees' December, 1986 traffic loading report. This will sharply reduce the number of channels available for radio common carrier services. From 12 to 48 single channels, or 6 to 24 paired channels, would then be free for other uses. Thus, frequencies without an asterisk are available for other uses.) One possibility is that some channels could be licensed for control and repeater facilities. Another possibility is to reassign some or all of these frequencies to private land mobile radio services.[6] We propose that whatever facilities are licensed in the 470–512 MHz band, they comply with the same interference limitations as are currently applicable to two-way communications in this frequency band. See § 22.501(k)(2)–(5).

14. *Section 22.501(p)(1).* The nationwide network paging service was allocated three of the frequencies listed in § 22.501(p)(1) of the Commission's Rules. However, events taking place since the three frequencies were licensed in August, 1985 indicate that demand for this service may not have developed. One network paging licensee has filed for permission to offer local paging primarily on its network frequency, and another network licensee has allowed its construction permit to expire. It appears that, contrary to projections available to this Commission at the time the frequencies were allocated, there may be insufficient demand for network paging to justify setting aside frequencies for network-only paging. Accordingly, we request public comments on the possibility of allowing unrestricted local paging by the nationwide network licensees on their network frequencies. In addition, we propose that the third frequency, 931.8875 MHz, relinquished by one of the network licensees, be included in section 501(g(1) and be made available for multiple-address one-way signalling systems.[7] Parties are requested to comment on the relative public demand for frequencies under section 501(g)(1) and network paging frequencies.

## Regulatory Flexibility Act—Initial Analysis

15. *Reasons for action and objectives.* The proposed action will facilitate availability of frequencies for a wide variety of uses, without the need for the Commission to hold new rulemakings as technology and marketplace demand changes. At the same time, the proposed action is intended to ensure that all spectrum licensed to communications entities is in fact utilized to serve the public's communications needs.

16. *Legal basis.* The authority for this proposed rulemaking is contained in sections 1, 4(i), 301 and 303 of the Communications Act of 1934, as amended.

17. *Small entities affected and initial impact.* The proposed rules are intended to have a beneficial impact on small communications companies. They will have new opportunities to serve the public and flexibility to react to subscribers' needs.

18. *Reflect federal rules which overlap, duplicate or conflict with this action.* As discussed in this *Notice,* the proposed rules alter the Commission's existing rules with regard to the use of conventional mobile frequencies. Other than the specific rules changed, we are aware of no federal rule that conflicts with, duplicates, or overlaps the proposal made in this Notice.

19. *Reporting, record-keeping and compliance requirements.* None.

20. *Specific alternatives that could accomplish the same objective.* We have determined no specific alternatives that would allow an equal potential for flexible reaction by communications companies to serve public demand for communications services.

21. Comments on all aspects of the analysis and proposed rules of this Notice are encouraged. Interested persons are invited to submit comments in accordance with § 1.419 of the Commission's Rules, 45 CFR 1.419. Comments must be filed by July 2, 1987, and reply comments by July 30, 1987.

22. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a meeting is scheduled or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation on the day of oral presentaion. That written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its fact that the Secretary has been served and must also state by docket number the proceeding to which it relates. See 47 CFR 1.1231. All relevent and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

23. A copy of this Notice of Proposed Rulemaking shall be sent to the Chief, Counsel of Advocacy of the Small Business Administration.

Federal Communications Commission.

William J. Tricarico,

*Secretary.*

[FR Doc. 87–11740 Filed 5–26–87; 8:45 am]

BILLING CODE 6712–01–M

[6] The Commission recently proposed to reallocate certain UHF–TV channels to the private landmobile radio services in eight urban areas. *See Notice of Proposed Rulemaking,* Docket 85–172, 101 F.C.C. 2d [illegible] (1985).

[7] These frequencies are reserved for controlling wide-area paging systems. An applicant for a frequency under this subpart must show that it has at least four remote base stations which will be simultaneously broadcast with a common signalling message using the requested control frequency.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

[Docket No. 70662-7062]

## Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA issues this rule to propose modifications to the regulations implementing the Fishery Management Plan for Ocean Salmon Fisheries off Washington, Oregon, and California (FMP). Comments are invited. This action is necessary for enforcement purposes and to reconcile certain inconsistencies between Federal and State ocean salmon regulations, and Federal and international salmon and halibut regulations. It is intended to improve coordination among international, Federal, and State management jurisdictions and to strengthen enforcement of ocean salmon regulations.

DATE: Comments on this proposed rule are invited until June 25, 1987.

ADDRESS: Comments on this proposed rule may be submitted to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700, Seattle, WA 98115; or E. Charles Fullerton, Director, Southwest Region, 300 South Ferry Street, Terminal Island, CA 90731.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten, 206-538-6150; or E. Charles Fullerton, 213-514-6196.

SUPPLEMENTARY INFORMATION:

### Background

Under the Magnuson Fishery Conservation and Management Act (Magnuson Act), the FMP was prepared by the Pacific Fishery Management Council (Council), and was approved by the Secretary of Commerce (Secretary) on March 2, 1978. The FMP has been amended seven times and implementing regulations are codified at 50 CFR Part 661.

This action would change the Federal ocean salmon regulations to facilitate enforcement and resolve inconsistencies between Federal, State, and international regulations. The proposed regulatory changes were discussed and recommended to the Secretary by the Council at its September 1986 meeting. The proposed changes are described below:

*Issue 1—Processing inspection.* The Magnuson Act and the Federal salmon regulations make it unlawful to refuse to permit an authorized officer to board a fishing vessel subject to a person's control for purposes of conducting any search or inspection in connection with the enforcement of the Magnuson Act or its implementing regulations. The proposed rule would broaden this prohibition to clarify the authority of authorized officers to enter buildings, vehicles, piers, or dock facilities where salmon may be found by making it unlawful for a person in control to refuse such entry.

Under 16 U.S.C. 1861(b), authorized officers are empowered to conduct inspection of a fishing vessel in connection with enforcement of the Magnuson Act with or without a warrant, and to exercise any other lawful authority. The proposed provision is identical to one provision approved in *Lovgren v. Byrne*, 787 F. 2d 857 (3rd Cir. 1986), in which the court found that the regulatory provision was necessary for enforcement of the Magnuson Act, and that entry into dockside facilities by authorized officers without a warrant was reasonable under the Fourth Amendment. Broadening of the existing salmon regulations to include dock and transport areas also comports with the requirements of the Magnuson Act, does not unnecessarily intrude on reasonable privacy interests of those in industry, and furthers the strong Federal interest in protecting natural resources in U.S. waters. By adding a definition of "areas of custody," the scope of inspection is limited to only those times when and those places where salmon may be found.

*Issue 2—False statements.* 18 U.S.C. 1001 makes it a criminal offense punishable by a fine of up to $10,000 or five years' imprisonment, or both, to make false statements concerning any matter under the jurisdiction of any department or agency of the United States. Current Federal salmon regulations do not contain a similar provision although violators would be subject to Federal criminal prosecution under 18 U.S.C. 1001. Inclusion of such provision will promote effective enforcement of the ocean salmon regulations, and will make false statements subject to the civil penalty and forfeiture sections of the Magnuson Act, which in most cases are sufficient remedies for violations in lieu of criminal prosecution. The proposed rule would prohibit making any false, statement, oral or written, to an authorized officer about the taking, catching, harvesting, landing, purchase, sale, or transfer of salmon. Identical provisions appear in other regional fisheries regulations promulgated under the Magnuson Act.

*Issue 3—Gear inspection.* There have been numerous reported incidents of fishermen cutting or freeing their gear while fishing to prevent inspection by authoirzed officers. This is not specifically prohibited by the Federeal salmon regulations, although it is a violation of State laws. The proposed rule would make it unlawful to refuse to submit fishing gear under a person's control to inspection by an authroized officer or to interfere with or prevent, by any means, such as inspection. The rule is necessary to ensure that authorized officers have the ability to enforce terminal gear requirements such as barbless hooks.

*Issue 4—Pacific halibut (Hippoglossus stenolepis).* Regulations of the International Pacific Halibut Commission prohibit retention of Pacific halibut caught on troll gear when the commercial halibut season is closed, and also restrict recreational (sport) fishing for halibut, including halibut that may be taken in the course of recreational fishing for salmon. The current ocean salmon regulations do not reference the halibut regulations.

The proposed rule would clarify that it is unlawful to take and retain Pacific halibut except in accordance with regulations of the International Pacific Halibut Commission. Fishermen would be required to return to the water with the least possible injury any Pacific halibut which could not be retained lawfully.

*Issue 5—Undersized Salmon.* Federal regulations establish different minimum fish length restrictions for salmon caught in different management areas. Currently, there are no Federal prohibitions on fishing for salmon in one management area with salmon on board the fishing vessel which were caught in another management area and which are smaller than the size limit of the area being fished. State laws generally cover this situation, but without a similar Federal prohibition, fishermen may claim, when boarded at sea by an authorized officer, that any undersized fish on board were caught in a different area with a smaller size limit. The existing Federal salmon regulations therefore contain an enforcement loop hole which could make more difficult the enforcement of different minimum fish length restrictions for different areas. To correct this situation, the proposed rule would prohibit fishing for

salmon in an area when salmon of less than the legal minimum size limit for that area are aboard a vessel. Transit of an area with salmon of less than the legal minimum length restriction for that area aboard a vessel would be allowed.

*Classification*

The proposed rule in published under authority of section 305(g) of the Magnuson Act, as amended by Pub. L. 99–659. The Administrator, before publishing a final rule will take into account the data, views, and comments received during the comment period.

This action is not expected to alter the nature or intensity of environmental impacts which were addressed in the supplemental environemental impact statement (SEIS) prepared by the Council for the 1984 framework amendment to the FMP. A notice of availability of the SEIS was published on September 23, 1984; 49 FR 38355.

The Administrator of NOAA determined that this proposed rule is not a "major rule" requiring a regulatory impact analysis under Exective Order 12291.

The General Counsel of the Department of Commerce certified to the Small Business Administration that this proposed rule, if adopted, will not have a significant economic impact on a substantial number of small entities. This is because four of the five measures to be implemented are technical in nature, either clarifying the intent of existing regulations or making reference to regulations imposed by the International Pacific Halibut Commission. As a result, these measures are not expected to alter fishing practices or impose costs on the industry. The fifth measure, prohibiting fishing for salmon in one area when salmon of less than the legal size limit for that area are aboard a vessel, may impose a small but insignificant impact on fishermen. This measure may cause some fishermen to make an additional port of call to land fish before continuing a trip. However, this will only occur at the end of the season in one area when it overlaps with the beginning of the season in another area, thereby affecting only a small number of fishermen and imposing only a minor additional financial cost on the industry.

This rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

The Administrator determined that this rule does not directly affect the coastal zone of any State with an approved coastal zone management program.

**List of Subjects in 50 CFR Part 661**

Fisheries, Indians.

Authority: 16 U.S.C. 1801 *et seq.*
Dated: May 20, 1987.

James E. Douglas, Jr.,
*Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.*

**PART 661—[AMENDED]**

For the reasons set forth in the preamble, 50 CFR Part 661 is proposed to be amended as follows:

1. The authority citation for 50 CFR Part 661 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 661.2, a new paragraph (e) is added to read as follows:

**§ 661.2 Relation to other laws.**

* * * * *

(e) Any person fishing subject to this part who also engages in fishing for Pacific halibut should consult regulations of the International Pacific Halibut Commission at 50 CFR Part 301 for applicable requirements of that part.

3. In § 661.3, the definition of "areas of custody" is added in alphabetical order to read as follows:

**§ 661.3 Definitions.**

*Areas of custody* means any vessels, buildings, vehicles, piers, or dock facilities where salmon may be found.

* * * * *

4. Section 661.5 is amended by revising paragraph (b)(10) and adding new paragraphs (b)(17)–(20) to read as follows:

**§ 661.5 General restrictions.**

* * * * *

(b) * * *

(10) Refuse to permit an authorized officer to board a fishing vessel, or to enter areas of custody, subject to such person's control for purposes of conducting any search or inspection in connection with the enforcement of the Magnuson Act, this part, or any other regulation issued under the Magnuson Act.

* * * * *

(17) Make any false statement, oral or written, to an authorized officer concerning the taking, catching, harvesting, landing, purchase, sale, or transfer of any salmon.

(18) Refuse to submit fishing gear subject to such person's control to inspection by an authorized officer, or to interfere with or prevent, by any means, such an inspection.

(19) Take and retain Pacific halibut (*Hippoglossus stenolepis*) except in accordance with regulations of the International Pacific Halibut Commission at 50 CFR Part 301. Pacific halibut which cannot be retained lawfully must be returned to the water immediately and with the least possible injury.

(20) Fish for salmon in an area when salmon of less than the legal minimum length for that area are on board the fishing vessel, except that this provision does not prohibit transit of an area when salmon of less than the legal minimum length for that area are on board so long as no fishing is being conducted.

## DEPARTMENT OF AGRICULTURE

### Office of the Secretary

### State of Wyoming Abandoned Mined Land Reclamation Program; Determination of Primary Purpose of Program Payments and Benefits for Consideration as Excludable From Income

**AGENCY:** Office of the Secretary, USDA.

**ACTION:** Notice of determination.

**SUMMARY:** The Secretary of Agriculture has determined that certain payments made and benefits that result under the Wyoming Abandoned Mine Reclamation Program, as authorized by Wyoming Statutes 35–11–1201 through 35–11–1207, are made primarily for the purposes of conserving soil, protecting or restoring the environment, or providing a habitat for wildlife. This determination is in accordance with section 126(b) of the Internal Revenue Code of 1954, as amended by section 543 of the Revenue Act of 1978 and the Technical Corrections Act of 1979. The determination permits recipients of these payments and benefits to exclude them from gross income to the extent allowed by the Internal Revenue Service (IRS).

**FOR FURTHER INFORMATION CONTACT:** Administrator, Land Quality Division, Department of Environmental Quality, 122 West 25th Street, Cheyenne, Wyoming 82002, Phone: (307) 777–7756, or Director, Land Treatment Program Division, Soil Conservation Service, USDA, Post Office Box 2890, Washington, DC 20013, Phone: (202) 382–1870.

**SUPPLEMENTARY INFORMATION:** Section 126 of the Internal Revenue Code of 1954, as amended by the Revenue Act of 1978 and the Technical Corrections Act of 1979, 26 U.S.C. 126, provides that certain payments made to individuals under state conservation programs may be excluded from the recipient's gross income for federal income tax purposes if the Secretary of Agriculture determines that payments are made "primarily for the purpose of soil and water conservation, protecting or restoring the environment, improving forests, or providing a habitat for wildlife." The Secretary of Agriculture evaluates the state conservation program on the basis of criteria set forth in 7 CFR Part 14, and makes a "primary purpose" determination for the payments made under each program. Before there may be an exclusion, the Secretary of the Treasury must determine that the payments made to a person under these programs do not substantially increase the annual income derived from the property benefited by the payments.

The Wyoming Abandoned Mine Reclamation Program is authorized by Wyoming Statutes 35–11–1201 through 35–11–1207. It is funded through annual State appropriations and by grants from the Office of Surface Mining, U.S. Department of the Interior under Title IV of the Surface Mine Control and Reclamation Act. Funding for the program is from a special fee collected on coal production. It is the purpose of the Wyoming Abandoned Mine Land Program to:

1. Protect the public health, safety, and general welfare from adverse effects of past mining where no continuing reclamation responsibility exists.

2. Protect offsite environments from the adverse effects of past mining where no continuing reclamation responsibility exists.

3. Restore land and water resources previously and adversely affected by past mining activities, and to properly conserve and utilize water and land resources.

The Land Quality Division of the Wyoming Department of Environmental Quality administers the Wyoming Abandoned Mine Land Program. Eligible projects are identified and selected in accordance with the objectives described above. In most cases, the state must obtain the private property owner's consent to access in order for the state to conduct the reclamation work. Only where emergency situations exist can the state utilize its police powers for nonconsented entry. The state prepares reclamation plans to eliminate threats to public health and safety, and to repair degradation of lands and waters which result from abandoned mines. All construction work is obtained through competitive bidding. No cash payments are made to the landowner, unless the landowner is successful in competitively procuring the construction contract. Benefits accruing to landowners from the reclamation work may include reduced threats of life, reduced threats of property damage to urban and rural property owners, and increased land use capabilities for grazing and wildlife for rural properties. However, all work conducted is primarily for public health, safety, and general welfare reasons.

### Procedural Matters

The Department of Agriculture has classified this determination as "not major" in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1. The Secretary has determined that these program provisions will not result in an annual effect on the economy of $100 million or more; will not cause a major increase in cost to consumers, individuals, industries, government agencies, or geographic regions; and will not cause significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

A Wyoming Abandoned Mine Reclamation Program "Primary Purpose Determination for Federal Tax Purposes," Record of Decision, has been prepared and is available upon request from the Director, Land Treatment Program Division, Soil Conservation Service, United States Department of Agriculture, P.O. Box 2890, Washington, DC 20013; or the Administrator, Department of Environmental Quality, Land Quality Division, 122 West 25th Street, Cheyenne, Wyoming 82002.

### Determination

As required by section 126(b) of the Internal Revenue Code of 1954, as amended, I have examined the authorizing legislation, regulations, and operating procedures of the Wyoming Abandoned Mine Reclamation Program. In accordance with the criteria set out in 7 CFR Part 14, I have determined that payments made and benefits provided

BEST COPY AVAILABLE

under this program are for soil and water conservation, protecting or restoring the environment, or providing wildlife habitat. Excluded from this determination are payments made for the recovery of coal or any mineral which occurs incidental to, or in connection with, the funded reclamation activity; payments made as compensation for services performed; and payments received from the acquisition of lands or interests therein or from the sale of soil, minerals, or any other materials. Subject to further determination by the Secretary of the Treasury, this determination permits property owners to exclude from gross income, for federal income tax purposes, payments made and benefits resulting from the Wyoming Abandoned Mine Reclamation Program after February 22, 1983, except as excluded above.

Signed at Washington, DC, on May 19, 1987.

Richard E. Lyng,

*Secretary.*

## Farmers Home Administration

### Loan and Grant Programs: Security Interest Reporting Requirements

**AGENCY:** Farmers Home Administration, USDA.

**ACTION:** Notice.

**SUMMARY:** The Farmers Home Administration (FmHA) implements the provisions of section 6050J of the Internal Revenue Code of 1954, as added to the Code by section 148 of the Tax Reform Act of 1984 [98 Stat. 668]. Section 6050J provides that an information return must be made by any person who, in connection with a trade or business, lends money secured by property and who later acquires an interest in the property or has reason to know that the property has been abandoned. Section 6050J applies to any governmental unit that lends money secured by property.

**DATES:** Section 6050J of the Internal Revenue Code of 1954 as added to the Code by section 148 of the Tax Reform Act of 1984 was published in Volume 49, number 171 of the Federal Register on August 31, 1985, by the Internal Revenue Service (IRS). The regulation is effective for acquisitions and abandonments of property which occurred after December 31, 1984, with an initial reporting date of February 28, 1986. FmHA plans to report beginning February 28, 1988, for transactions which occurred after December 31, 1986.

**FOR FURTHER INFORMATION CONTACT:** Bob Nelson, Management Analyst, Financial and Management Analysis Staff, Farmers Home Administration, USDA, Room 5505, South Agriculture Building, 14th Street and Independence Avenue SW., Washington, DC 20250, telephone (202) 475-4705.

**SUPPLEMENTARY INFORMATION:** FmHA is developing internal agency procedures to comply with the provisions of the aforementioned IRS regulations as they relate to disposition of all of the security property by the borrower. FmHA will report to IRS, with copy to the borrower, all properties in which FmHA had a security interest that are acquired by FmHA or by a thrid party; all properties where the FmHA borrower has abandoned their interest in the security property; and where FmHA security property is sold for less than the full amount of the FmHA debt. The notification to IRS affects all FmHA loan programs.

The Catalog of Federal Domestic Assistance programs affected by this notice are:

| No. | Program title |
|---|---|
| 10.404 | Emergency Loans. |
| 10.405 | Farm Labor Housing Loans. |
| 10.406 | Farm Operating Loans. |
| 10.407 | Farm Ownership Loans. |
| 10.410 | Low Income Housing Loans (Section 502 Rural Housing Loans). |
| 10.411 | Rural Housing Site Loans (Section 523 and 524 Site Loans). |
| 10.415 | Rural Rental Housing Loans. |
| 10.418 | Soil and Water Loans (SW Loans). |
| 10.417 | Very Low-Income Housing Repair Loans. |
| 10.422 | Business and Industrial Loans. |
| 10.423 | Economic Emergency Loans. |

Dated: February 6, 1987.

Vance L. Clark,

*Administrator, Farmers Home Administration.*

## COMMISSION ON CIVIL RIGHTS

### Connecticut Advisory Committee; Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Connecticut Advisory Committee to the Commission will convene at 3:30 p.m. and adjourn at 6:30 p.m. on June 18, 1987 at the Hartford Public Library, Seminar Room, 500 Main Street, Hartford, Connecticut. The purpose of the meeting is to discuss the status of the agency, plan activities for the coming year and to collect information on Federal and State legislative proposals to gather data on incidents of ethnic intimidation and violence.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson James H. Stewart (203/486-3417) or John I. Binkley, Director of the Eastern Regional Division at (202/523-5264; TDD 202/376-8117.) Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commisson.

Dated at Washington, DC, May 15, 1987.

Susan J. Prado,

*Acting Staff Director.*

## DEPARTMENT OF COMMERCE

### Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of the Census.

Title: 1987 Special Urban Survey: Content Reinterview Questionnaire, Housing Content Reconciliation Record, Population Content Reconciliation Record.

Form Number: Agency DG-5, DG-5a, DG-5b, DG-31; OMB—NA.

Type of Request: New collection.

Burden: 6,420 respondents; 1,534 reporting hours.

Needs and Uses: The primary objective of this survey is to test alternate wording of race and Spanish origin items, as well as housing quality items, for consistency and validity. A 50 percent sample of mail return questionnaires from the two-panel initial mailout will be reinterviewed.

Affected Public: Individuals or households.

Frequency: One time.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Don Arbuckle, 395-7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-3271, Department of Commerce, Room H6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Don Arbuckle, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: May 18, 1987.

Edward Michals,

*Departmental Clearance Officer, Office of Management and Organization.*

BILLING CODE 3510-07-M

## International Trade Administration

[A-570-601]

## Tapered Roller Bearings From the People's Republic of China; Final Determination of Sales at Less Than Fair Value

**AGENCY:** International Trade Administration, Import Administration, Commerce.

**ACTION:** Notice.

**SUMMARY:** We have determined that tapered roller bearings from the People's Republic of China (PRC) are being, or are likely to be, sold in the United States at less than fair value. The U.S. International Trade Commission (ITC) will determine, within 45 days of publication of this notice, whether these imports are materially injuring, or are threatening material injury to a United States industry.

**EFFECTIVE DATE:** May 27, 1987.

**FOR FURTHER INFORMATION CONTACT:** Michael Ready or Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-2613 or 377-1769.

**SUPPLEMENTARY INFORMATION:**

### Final Determination

We have determined that tapered roller bearings from the PRC are being, or are likely to be, sold in the United States at less than fair value as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) (the Act). The weighted-average margin is .97 percent. No margins were found on exports by China National Machinery & Equipment Import & Export Corporation. Therefore, this exporter is excluded from this determination.

### Case History

We published a preliminary determination of sales at less than fair value on February 6, 1987 (52 FR 3833). Since then the following events have occurred:

On February 17, 1987, the respondent requested a postponement of the final determination. We granted this request and postponed the due date for the final determination until no later than May 20, 1987 (52 FR 8068, March 16, 1987).

As required by the Act, we afforded interested parties an opportunity to submit oral and written comments addressing the issues arising in this investigation. On April 30, 1987, we held a public hearing to allow parties to address the issues.

### Scope of Investigation

The products covered by this investigation are tapered roller bearings and parts thereof, currently classified in *Tariff Schedules of the United States* (TSUS) item numbers 680.30 and 680.39; flange, take up cartridge, and hanger units incorporating tapered roller bearings, currently classified in TSUS item 681.10; and tapered roller housings (except pillow blocks) incorporating tapered roller, with or without spindles, whether or not for automotive use, currently classified in TSUS item number 692.32 or elsewhere in the TSUS.

### Fair Value Comparisons

Because CMEC and Premier accounted for all sales of this merchandise from the PRC, we limited our investigation to them. To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States prices with the foreign market value. We investigated all sales of the subject merchandise for the period September 1, 1985, through August 31, 1986. We used a twelve-month period of investigation because the respondents had insufficient sales in the original six-month period of investigation.

### United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for sales by CMEC and Premier because the merchandise was sold to unrelated purchasers prior to its importation into the United States.

We calculated the purchase price for sales by CMEC based on the f.o.b. or c.i.f. price to unrelated purchasers. We made deductions, where applicable, for inland freight charges, ocean freight charges, and port charges. In accordance with the policy set forth in our final determination in the investigation of carbon steel wire rod from Poland (49 FR 29434, July 20, 1984), we based the deduction for inland freight and port charges on similar charges in a non-state-controlled-economy country.

We based the deduction for ocean freight charges on the weighted-average charge incurred by CMEC on shipments carried by non-state-owned steamship companies.

We calculated the purchase price for sales by Premier based on the f.o.b. or c.i.f. price to unrelated purchasers. We made deductions, where applicable, for brokerage and handling charges, ocean freight and marine insurance.

### Foreign Market Value

Petitioner alleged that the PRC is a state-controlled-economy country and that sales of the subject merchandise in that country do not permit a determination of foreign market value under section 773(a) of the Act. After an analysis of the PRC's economy, and consideration of the briefs submitted by the parties, we concluded that the PRC is a state-controlled-economy country for purposes of this investigation. Basic to our decision on this issue is the fact that the central government of the PRC controls the prices and levels of production of the bearing industry, as well as the internal pricing of the factors of production.

As a result, section 773(c) of the Act requires us to use prices or the constructed value of such or similar merchandise in a "state-controlled-economy" country. Our regulations establish a preference for foreign market value based upon sales prices. They further stipulate that, to the extent possible, we should determine sales prices on the basis of prices in a "non-state-controlled-economy" country at a stage of economic development comparable to the country with the state-controlled economy.

After an analysis of countries producing tapered roller bearings, we determined that India would be the most appropriate surrogate. We sent questionnaires requesting assistance in these investigations to six companies in India. We received a questionnaire response from one company in India, but we were unable to use this data as a basis of calculating foreign market value because the Government of India did not permit us to verify the submitted data.

Additionally, we could not use import prices from non-state-controlled-economy countries in this case because the applicable Department of Commerce statistics for the subject merchandise were based on categories that were too broad to make product-specific comparisons.

Therefore, as the best information otherwise available, we calculated constructed value based on the factors of production reported by the PRC producers. We used the best information available for valuing the factors of production. Where possible, best information available was obtained from publicly available information in India.

Raw material prices were based on Indian prices published by the Steel Authority of India adjusted for inflation using the wholesale price index for India published by the International Monetary Fund. Where necessary, prices for merchant quality steel were adjusted to prices for bearing quality steel by using a ratio calculated from data in the Trigger Price Mechanism (TPM) Manual.

The cost of labor was based on data published by the International Labor Organization (adjusted as above for inflation) concerning average earnings in India for workers in ISIC category 382 (Manufacture of Machinery, except electrical). We made an addition of 31 percent for employee fringe benefits based on publicly available information in India.

We based the amount added for factory overhead on publicly available data for the bearing industry in India.

We used the statutory minimum of 10 percent of the sum of material, fabrication costs, and overhead for general, sales and administrative expenses, and the statutory minimum of eight percent for profit.

We based the amount added for packing on data in the public version of the questionnaire response of a market-economy country tapered roller bearing producer involved in a current antidumping investigation.

With respect to sales by Premier, in accordance with section 773(f) of the Act, we based foreign market value on the prices at which Premier sold such or similar merchandise to third countries (Pakistan and Singapore), since there were no sales in the home market of Hong Kong of tapered roller bearings from the PRC. From these prices, we deducted, where applicable, charges for brokerage and handling, ocean freight and marine insurance. We made adjustments, where applicable, for differences in credit costs and for commissions Premier paid on certain sales to the United States.

We made currency conversions in accordance with § 353.56(a)(1) of the Commerce Regulations, using certified exchange rates as furnished by the Federal Reserve Bank of New York.

**Verification**

As provided in section 776(a) of the Act, we verified data used in making this determination by using verification procedures which included on-site inspection of manufacturers' facilities and examination of company records and selected original source documentation containing relevant information.

**Petitioner's Comments**

*Comment 1:* Petitioner argues that, in calculating constructed value for the preliminary determination, the Department undervalued factory overhead. The petitioner suggests that the amount added for factory overhead should equal at least 40 percent of total cost of manufacture, based upon the experience of several Japanese manufacturers, the petitioner in the United States, and the petitioner's subsidiary in Brazil.

*DOC Response:* We disagree. The Department has obtained, and used as the best information available, a factory overhead rate from a surrogate company in the bearing industry in India.

With regard to petitioner's request that we use the factory overhead experience of Japan and the United States as being representative of the PRC industry, the Department considers the factory overhead experience of a surrogate company in a comparable-economy country preferable to the alternatives offered by the petitioner.

We are required to select a comparable economy in which to value the factors of production information. The rationale behind selecting a comparable economy is that the experience of a producer in a comparable-economy country is reflective of the same degree of economic and industrial development as that of a producer in a comparable non-market-economy country. The United States and Japanese overhead ratios offered by the petitioner are for fully industrialized economies whose TRB producers use highly automated, state-of-th-art production equipment, in which factory overhead is high and direct labor low. The PRC production facilities use less automated and less sophisticated machinery and are much more labor intensive. In such instances, direct factory overhead would be lower and direct labor higher than for U.S. and Japanese TRB producers.

With regard to the petitioner's Brazilian subsidiary's factory overhead data, we note that the data was contained in a questionnaire response that was not received until one month after the Department's preliminary determination. It has been the Department's position that, in order to be considered in a final determination, a complete and full voluntary response must be received by the date of the preliminary determination. Furthermore, we do not consider Brazil and the PRC to be at comparable levels of economic development.

*Comment 2:* Petitioner argues that in calculating constructed value for the preliminary determination, the Department undervalued labor cost. Petitioner argues that the amount added for labor should be based on total labor cost to manufacturers, not just the earnings of workers.

*DOC Response:* We agree. See our discussion of labor costs in the foreign market value section of this notice.

*Comment 3:* Petitioner argues that, in calculating constructed value for the preliminary determination, the Department selected the wrong industry category in India as a source for labor earnings data.

*DOC Response:* We disagree. In calculating constructed value we determined the amount to be added for labor expenses on average earnings in India, in the industry category "Manufacture of machinery, except electrical." We believe this category most properly encompasses the manufacture of TRBs.

*Comment 4:* Petitioner argues that in calculating constructed value for the preliminary determination, the Department undervalued raw material cost.

*DOC Response:* For the preliminary determination we valued raw materials based on average import prices from Japan and Sweden to the United States. As noted above in the Foreign Market Value section of this notice, for the final determination we valued raw materials on prices in India drawn from publicly available data. We have made this change because we believe that using a comparable surrogate country's prices is preferable to using non-comparable countries' prices. These prices used for the final determination, which were calculated using methodology proposed by the petitioner, are somewhat higher than the prices used for the preliminary determination.

*Comment 5:* Petitioner argues that, in calculating constructed value, the Department should not make an adjustment for scrap unless it verifies that the PRC factory does in fact recover and sell scrap generated in the manufacturer of TRBs.

*DOC Response:* The Department verified that the PRC factory did in fact recover and sell or recycle scrap

generated. We therefore have made an adjustment for scrap in the calculation of constructed value.

*Comment 6:* Petitioner argues that foreign market value should be based on the data received from the Indian manufacturers, despite the fact that we were unable to verify the data in India. Petitioner suggests that we could verify the reasonableness of the Indian data by comparing Indian home market prices with the information available to the Department on TRB prices from other countries such as Brazil, Spain, Mexico, Argentina, and the United States.

*DOC Response:* We disagree. We do not believe that comparing Indian prices to prices in the five countries named by petitioner would satisfy the statutory requirement for verification.

*Comment 7:* Petitioner argues that the Department may not use the factors of production constructed value method provided for in § 353.8(c) of the Commerce regulations as the basis for foreign market value in this investigation.

Petitioner contends that § 353.8(a) and (b) of the Commerce regulations establishes a hierarchy for determining foreign market value in which prices and constructed value of such or similar merchandise take preference over the factors of production constructed value method under 353.8(c). The Department must first consider prices and constructed value of such or similar merchandise under 353(a) and (b) in the following order of preference: (1) A non-state-controlled-economy country at a stage of economic development comparable to the state-controlled-economy country from which the merchandise is exported; (2) a non-state-controlled-economy country not necessarily at a stage of economic development comparable to the state-controlled-economy country, other than the United States, suitably adjusted for known differences in costs of materials and labor; and (3) the United States. According to the petitioner, the Department must exhaust all of these established preferences before resorting to the factors of production approach.

*DOC Response:* We disagree. Petitioner's hierarchy of methods of calculating foreign market value, under which the factors of production constructed value approach would be a last resort, is based upon a misconception of 19 CFR 353.8 and applicable precedent. The Commerce regulation and past Departmental practice does establish a preference for the use of comparable economy sales prices and constructed value as the basis for foreign market value. However, it is not true, as petitioner claims, that under § 353.8(b) foreign market value based on sales prices or constructed value in a non-state-controlled-economy country not at a comparable stage of economic development are preferable to the factors of production constructed value approach under § 353.8(c).

Section 353.8(b)(1) of the regulations makes clear that the preference in favor of sales is tempered by the overriding preference for ascertaining foreign market value by reference to *comparable* non-state-controlled economies. *Chemical Products Corp.* v. *United States*, 12 CIT _____, Slip Op. 86-97 (September 26, 1988). The Department would arrive at § 353.8(b)(2) only after it has exhausted the pricing and constructed value options in comparable economies, i.e., under § 353.8 (a) and (c).

In this case, verified surrogate sales price and constructed value information was not available from TRB producers in any of the non-state-controlled-economy countries determined by the Department to be at stages of economic development comparable to that of the PRC. The Department sent surrogate questionnaires to six firms in these countries. As noted above, one company in India replied to our questionnaire, but the Indian Government would not allow us to verify the replying company's data. However, the Department was able to obtain, verify, and find values for the respondent's factors of production information. Therefore, factors of production constructed value methodology has been used for purposes of determining foreign market value with respect to the final determination in this investigation.

*Comment 8:* Petitioner argues that the DOC should use as the basis for calculating Premier's foreign market value the foreign market value calculated for sales by CMEC, plus CMEC's expenses incurred in selling to Premier, plus expenses incurred by Premier in reselling the merchandise.

*DOC Response:* We disagree. At the time of the sales to Premier, CMEC was unaware of the countries to which Premier intended to resell the merchandise. Therefore, foeign market value for Premier's sales to the United States is required to be calculated pursuant to section 773(f) of the Act.

**Respondent's Comments**

*Comment 1:* Respondent argues that, in the absence of verified data from a surrogate producer at a comparable level of economic development, foreign market value for CMEC should be based on constructed value using PRC factors of production.

*DOC Response:* We agree. See our response to petitioner's comment 7 above.

*Comment 2:* Respondent argues that, in calculating foreign market value for the preliminary determination, the Department overvalued raw material cost. Respondent suggests we should value certain of the raw materials based upon sales prices or offers of imported bearing steel in China.

*DOC Response:* We disagree. Sales prices submitted by the respondent pertain to sales made after the period of investigation.

*Comment 3:* Respondent argues that, in calculating constructed value, the Department should not base its addition for raw material costs solely on the price of bars (for producing cups and cones), but should also find values for bars (for producing rollers) and sheet (for producing cages).

*DOC Response:* We agree and have done so.

*Comment 4:* Respondent argues that the Department should publish separate dumping rates for CMEC and Premier rather than a single weighted-average rate.

*DOC Response:* We agree. These companies are not related. We found no evidence that CMEC knew the final destination of the products that Premier purchased. Therefore it is appropriate to calculate separate rates for the two companies.

*Comment 5:* Respondent argues that the calculations for Premier should be revised to incorporate corrected data developed as a result of the verification process.

*DOC Response:* We agree and have done so.

**Continuation of Suspension of Liquidation**

We are directing the United States Customs Service to continue to suspend liquidation of all entries of tapered roller bearings from the PRC, except entries of merchandise exported by CMEC directly to U.S. purchasers, that are entered, or withdrawn from warehouse, for consumption, on or after February 6, 1987, the date of publication of the preliminary determination in the Federal Register. The United States Customs Service shall continue to require a cash deposit or the posting of bond equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. The bond or cash deposit amounts established in our preliminary determination of February 6, 1987, remain in effect with respect to entries

or withdrawals made prior to the date of publication of this notice in the Federal Register. With respect to entries or withdrawals made on or after the date of publication of this notice, except entries of merchandise exported by CMEC, the bond or cash deposit amounts required are shown below. CMEC is not included in this determination since we have found no margins for this company.

| Manufacturer/producer/exporter | Weighted-average margin percentage |
|---|---|
| Premier Bearing & Equipment Ltd. | .57 |
| All Others | .57 |

**ITC Notification**

In accordance with section 735(d) of the Act, we will notify the ITC of our determination.

The ITC will make its determination whether these imports are materially injuring, or threatening to materially injure, a U.S. industry within 45 days of the publication of this notice. If the ITC determines that material injury or threat of material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that such injury does exist, we will issue an antidumping duty order directing Customs officers to assess an antidumping duty on tapered roller bearings from the PRC entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United states price.

The determination is being published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Paul Freedenberg,

*Assistant Secretary for Trade Administration.*

## National Oceanic and Atmospheric Administration

### South Atlantic Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The South Atlantic Fishery Management Council will convene a public meeting of the Swordfish Working Panel, May 26, 1987, at 1 p.m., at the South Atlantic Council's Office (address below). The Panel will discuss and decisions will be made regarding variable season closure (VSC); review of total landings by area; size frequency data by area; tuna landings; alternative starting dates and review of impacts; Committee Chairmen's recommendations on VSC starting dates for their Council area, and recommendations on plan amendment. The public meeting will adjourn on May 27 at noon.

For further information contact Robert K. Mahood, Executive Director, South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, SC 29407; telephone (803) 571-4300.

Dated: May 21, 1987.

Richard B. Roe,

*Director, Office of Fisheries Management, National Marine Fisheries Service.*

[FR Doc. 87-12037 Filed 5-26-87; 8:45 am]

BILLING CODE 3510-22-M

### Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Western Pacific Fishery Management Council and its Scientific and Statistical Committee (SSC) will convene separate public meetings, June 2-5, 1987, at the Pagoda Hotel, 1525 Rycroft Street, Honolulu, HI (telephone: 808-941-6611) as follows:

*Western Pacific Council*—On June 4, 1987, the Council will convene it 57th public meeting to discuss routine fisheries reports from Island and Federal Government representatives, as well as from private sector representatives on the Western Pacific Council. The Council will also hear a report on the recently signed tuna access agreement between the United States and the Pacific Island Nations; take up issues regarding a limited access proposal for the Northwestern Hawaiian Islands (NWHI) fishery for bottomfish, and decide remaining issues in order to move the limited entry proposal forward.

The Council will be briefed on the status of a plan amendment that would: (a) Authorize examination of limited access measures for controlling fishing for bottomfish in Guam and in American Samoa; (b) extend the due date for the annual report for the bottomfish and seamount groundfish fisheries of the Western Pacific Region from March 31 to June 30 of each year and (c) allow private vessels to conduct scientific research in the Exclusive Economic Zone under a charter agreement with the National Marine Fisheries Service; and be briefed on the status of the NWHI fishery for lobsters during 1986.

The Council will hear a report on the public's response to proposals to establish a minimum size for slipper lobster and to require escape vents on traps. Other related matters resulting from the May 18, 1987, public hearing will also be discussed.

On June 5 the Council will consider changing the "Hawaii Exploratory Area" quota for precious corals from 1,000 kilograms to 5,000 kilograms, and hear reports regarding the monitoring of various fisheries for each island area in the region. The Council will also make a recommendation regarding an application for an experimental permit for drift gillnet fishing for large pelagic species. A closed session (not open to the public) will also be convened to discuss personnel matters.

*SSC*—On June 2-3, 1987, the SSC will convene its 40th meeting and, with the exception of conducting a closed session to discuss personnel matters, the SSC's agenda will generally be the same as that of the Council.

[Modification No. 2 to Permit No. 514]

### Marine Mammals Modification of Permit; Dolphin Research Center (P538)

Notice is hereby given that pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), Public Display Permit No. 514 issued to Dolphin Research Center, P.O. Box 2875, Marathon Shores, Florida 33052, on August 2, 1985 (50 FR 32252), as modified on January 30, 1987 (52 FR 3842) is further modified in the following manner:

Section B.7 is deleted and replaced by:

"7. The authority to acquire the marine mammals herein shall extend from the date of issuance until December 31, 1989. The terms and conditions of this Permit shall remain in effect as long as one of the marine mammals taken hereunder is maintained in captivity under the authority and responsibility of the Permit Holder."

This modification becomes effective May 20, 1987.

Documents submitted in connection with the above modification are available for review in the following Offices:

Protected Species Division, National Marine Fisheries Service, 1825 Connecticut Avenue, NW., Room 805 Washington, DC.; and

Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

Dated: May 21, 1987.

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### Establishing Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

May 20, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 28, 1987. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, DC, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port or call (202) 566-6828. For information on embargoes and quota re-openings, please call (202) 377-3715. For information on categories on which consultations have been requested call (202) 377-3740.

### Background

On March 27, 1987, a notice was published in the Federal Register (52 FR 9908) which established import restraint limits for cotton diapers in Category 359-D, cotton shop towels in Category 369-S and man-made fiber suits in Category 644, produced or manufactured in the People's Republic of China and exported during the ninety-day period which began on February 27, 1987 and extends through May 27, 1987. The notice also stated that the Government of the People's Republic of China is obligated under the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated August 18, 1983, as amended, if no mutually satisfactory solution is reached on levels for these categories during consultations, to limit its imports during the twelve-month period immediately following the ninety-day period.

No solution has been reached in consultations on mutually satisfactory limits for these categories. The United States Government has decided, therefore, to control imports of cotton and man-made fiber textile products in Categories 359-D, 369-S and 644 during the twelve-month period which begins on May 28, 1987 and extends through May 27, 1988 at the designated levels.

The United States remains committed to finding a solution concerning these categories. Should such a solution be reached in consultations with the Government of the People's Republic of China, further notice will be published in the Federal Register.

In the event the limits established for the ninety-day period have been exceeded, such excess amounts, if allowed to enter, will be charged to the levels established for the designated twelve-month period.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 26788) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 20, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,

*Department of the Treasury, Washington, DC 20229*

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of August 19, 1983, as amended; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 28, 1987, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 359-D,[1] 369-S [2] and 644, produced or manufactured in the People's Republic of China and exported during the twelve-month period which begins on May 28, 1987 and extends through May 27, 1988, in excess of the following limits:

| Category | 12-mo restraint limit |
|---|---|
| 359-D | 1,074,436 pounds. |
| 369-S | 1,248,255 pounds. |
| 644 | 14,191 dozen. |

Textile products in Categories 359-D, 369-S and 644 which are in excess of the ninety-day levels previously established shall be subject to this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 26788) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

BILLING CODE 3510-DR-M

### Announcing an Import Level for Certain Man-Made Fiber Textile Products Produced or Manufactured in Japan

May 20, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 28, 1987. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs

[1] In Category 359, only TSUSA number 384.5214.

[2] In Category 369, only TSUSA number 366.2940.

port. For information on embargoes and quota re-openings, please call (202) 377–3715.

**Background**

A CITA directive dated April 10, 1987 (52 FR 12229) established import restraint limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in Japan and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 8, 1987 between the Governments of the United States and Japan, established, among other things, a group limit for man-made fiber yarn in Group III (Categories 600pt. through 602), produced or manufactured in Japan and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Accordingly, in the letter published below, the Chairman of the Committee for the Implementation Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of textile products in Group III in excess of the designated limit.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Anotated (1987).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

**Ronald I. Levin,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

May 20, 1987.

**Committee for the Implementation of Textile Agreements**

**Commissioner of Customs,**
*Department of the Treasury, Washington, DC 20229.*

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on April 10, 1987 by the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool and man-made fiber textile products, produced or manufactured in Japan and exported during the twelve-month period which began on January 1, 1987 and extends through December 31, 1987.

Effective on May 28, 1987 the directive of April 10, 1987 is amended to include an import limit for man-made fiber yarns in Group III (Categories 600pt.[1] through 602) at a level of 146,681,500 square yards equivalent.[2]

Textile products in Group III which have been exported to the United States prior to January 1, 1987 shall not be subject to this directive.

Textile products in Group III which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The Committee for the Implementation of textile Agreements had determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

**Ronald I. Levin,**

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

## Adjustment and Establishment of Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Thailand; Correction

May 20, 1987.

In the notice published in the Federal Register on April 22, 1987 (52 FR 13282), fifth paragraph, correct the first reference to "Group III" to read "Group II."

In the same paragraph, reference made to shift from Group III to Group II of 1,515,000 square yards equivalent should be deleted. In the letter to the Commissioner of Customs, correct the levels as follows:

| Category | Adjusted 12-mo limit |
|---|---|
| Group II: 200–299 and 600–659. | 72,140,065 square yards equivalent. |
| Group III: 410–459 | 3,030,000 square yards equivalent. |
| 448 | 10,500 dozen. |

[1] In Category 600, all TSUSA numbers except 310.5015.

[2] The limit has not been adjusted to account for any imports exported after December 31, 1986.

## Officials Authorized To Issue Certifications for Certain Textile Products From Haiti

May 20, 1987.

The Government of the Republic of Haiti has notified the United States Government under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 28 and 30, 1986 that five additional officials have been authorized to issue certifications for cotton, wool and man-made fiber textile products from Haiti.

A complete list of officials authorized by the Government of the Republic of Haiti to issue certifications is listed below:

Sanite L. Desir
Jean-Claude Decime
Demesmin Dorsainville
Pierre-Andre Guillaume
Charles-Antoine Jean
Dieuseul Lefevre
Frantz Elie
Pierre Donatien

The purpose of this notice is to advise the public of this change.

## Change in Officials Authorized To Issue Export Visas for Certain Cotton and Man-Made Fiber Textile Products From Turkey

May 20, 1987.

The Government of Turkey has notified the United States Government under the terms of the Bilateral Cotton and Man-Made Fiber Textile Agreements of October 18, 1985, as amended and extended, and July 30 and August 1, 1986 that Erhan Ozkebapci, Liason Officer, General Secretariat of Akdeniz Exporters' Unions, has replaced Yilmaz Daylan as the official authorized to issue export visas for cotton and man-made fiber textile products from Turkey. The following is a complete list of officials of the Government of Turkey who are currently authorized to issue export visas:

Tuncer Ogun
Attila Kucukkayalar
Sahap Ozdemir
Muzaffer Colpan

Mustafa Hasim Boyacioglu
Mahmet Sevim
Mumin Tasyurek
Guner Alptekin
Zubeyde Oguzcan
Erhan Gokebepci

The purpose of this notice is to advise the public of this change.

## GENERAL SERVICES ADMINISTRATION

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

### Federal Acquisition Regulation (FAR); Information Collection Under OMB Review

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection concerning payments.

ADDRESS: Send comments to Mr. Ed Springer, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Van Lierde, Office of Federal Acquisition and Regulatory Policy (202) 523–3781.

SUPPLEMENTARY INFORMATION:

a. Purpose

Firms performing under Federal contracts must provide adequate documentation to support requests for payment under these contracts. The documentation may range from a simple invoice to detailed cost data. The information is usually submitted once, at the end of the contract period or upon delivery of the supplies, but could be submitted more often depending on the payment schedule established under the contract.

b. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, *60,000;* responses per respondent, *120;* total annual responses, *9,600,000;* hours per response, *.025;* and total burden hours, *240,000.*

Obtaining Copies of Proposals

Requesters may obtain copies from General Services Administration, FAR Secretariat (VRS), Room 4041, Washington, DC 20405, telephone (202) 523–4755. Please cite OMB Control No. 9000–0070, Payments.

Dated: May 11, 1987.

Margaret A. Willis,

*FAR Secretariat.*

## DEPARTMENT OF DEFENSE

### Office of the Secretary

### Action; Public Information Collection Requirement Submitted to OMB for Review

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information:

(1) Type of submission;
(2) Title of Information Collection and applicable OMB Control Number and Form Number;
(3) Abstract statement of the need for and the uses to be made of the information collected;
(4) Type of Respondent;
(5) An estimate of the number of responses;
(6) An estimate of the total number of hours needed to provide the information;
(7) To whom comments regarding the information collection are to be forwarded; and
(8) The point of contact from whom a copy of the proposed information collection may be obtained.

This information collection is as follows:

(1) Revising an approved collection.
(2) "Parent Subsidiary Verification System," 0704–0236.
(3) The annual publication entitled "100 Companies Receiving the Largest Dollar Volume of Prime Contract Awards" provides total DoD awards reported during a fiscal year to a company and all of its subsidiaries. To ensure that the published data are accurate, a listing is sent to the companies likely to appear in this publication requesting information on their subsidiaries. The companies are not required to respond. This change is based on our FY 86 results which showed that we can get the same results with fewer companies surveyed.

(4) Business Firms.

(5) Current responses of 142, this is a reduction of 8 responses from 150.

(6) Current burden hours of 284, this is a reduction of 16 hours from 300 burden hours.

ADDRESSES: (7) Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Vitiello, DoD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone 202/746–0933.

FOR FURTHER INFORMATION CONTACT: (8) A copy of the information collection proposal may be obtained from Mr. Vitiello, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone 202/746–0933.

## Department of the Army

### Army Science Board, Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: 16–18 June 1987.

Time of Meeting: 0800–1700 hours each day.

Place: Carnegie-Mellon University, Pittsburgh, PA.

Agenda: The Army Science Board AD-Hoc Panel on Army Information Management Concepts and Architecture will meet for its report writing session. On the moring of the first day, the panel will review minutes and facts from previous briefings and discussions. During the afternoon of the first day and the following days the panel will be dedicated to outlining and drafting a written report for print. This meeting will be closed to the public in accordance with section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsecitons 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695–3039 or 695–7046.

Sandra F. Gearhart,

*Administrative Assistant Army Science Board.*

### Naval Research Advisory Committee; Closed Meeting

Notice was published May 11, 1987, at 52 FR 17626 that the Naval Research Advisory Committee Panel on the Navy's Role in the Air Defense Initiative will meet on May 27, 1987. The meeting location has been changed for the sessions scheduled from 10:00 a.m. through 12:00 Noon on May 27, 1987. The briefings scheduled during that time period will be held at the Office of Naval Research, 800 North Quincy Street, Arlington, Virginia. All other information in the previous notice remains effective.

Dated: May 20, 1987.

### Board of Advisors to the President, Naval War College, Newport, RI; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is given that the Board of Advisors to the President, Naval War College, will meet on June 4, 1987, in Room 210, Conolly Hall, Naval War College, Newport, Rhode Island. The meeting will commence at 8:30 a.m., and the purpose is to elicit the advice of the Board on educational doctrinal, and research policies and programs. The agenda will consist of presentations and discussions on the curriculum, programs and plans of the college, and is open to the public. For further information contact: Mrs. Mary Guimond, Executive Assistant to the Dean of Academics, Naval War College, Newport, Rhode Island 02841–5010. Telephone number (401) 841–3580.

Dated: May 20, 1987.

## DEPARTMENT OF ENERGY

### Economic Regulatory Administration

### Trigon Exploration Co., Inc.; et al.; Proposed Consent Order and Opportunity for Comments

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Notice of proposed consent order and opportunity for comments.

**SUMMARY:** The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces four proposed Consent Orders with Trigon Exploration Company, Inc. (Trigon) and Extex, Inc. for $348,774.60; Trigon and D. Bryan Ferguson for $144,311.60; Trigon and C. William Rogers for $144,311.59 and Trigon and Omni Drilling Partnership No. 1978-2 for $142,753.18 and provides an opportunity for public comments on the terms and conditions of the proposed Consent Order.

Comments By: June 26, 1987

**ADDRESS:** Send comments to Trigon Exploration Company, Inc., Comments, Office of the Solicitor, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

**FOR FURTHER INFORMATION CONTACT:** R. Suzanne Owens, Office of Solicitor (RG–43), Economic Regulatory Administration, 1000 Independence Avenue, SW., Washington, DC 20585. Copies of the proposed Consent Order may be obtained free of charge by writing or calling this office at (202) 586–2852.

**SUPPLEMENTARY INFORMATION:** On April 20, 1987, the ERA executed a proposed Consent Order with Trigon and Extex, Inc. and on April 21, 1987, the ERA executed proposed Consent Orders with Trigon and C. William Rogers, D. Bryan Ferguson, and Omni Drilling Partnership No. 1978–2. Under 10 CFR 205–199J(b), a proposed Consent Order which involves the sum of $500,000.00 or more, excluding interest and penalties, becomes effective no sooner than thirty (30) days after publication of a notice in the Federal Register requesting comments concerning the proposed Consent Order. Although none of the proposed Consent Orders exceed $500,000.00, ERA is exercising its discretion to publish notice of the proposed agreements because the sum total of the proposed Consent Orders exceed $5000,000.00 and all the agreements arise out of a single audit. Although ERA has signed and tentatively accepted the proposed Consent Orders, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Orders, or issue the Consent Orders as signed.

#### I. Background

During the period June 1979 through January 21, 1981, Trigon was the operator of the A.D. LeBlanc No. 1 Well located in the Tigre Lagoon Field, Vermillion Parish, Louisiana. As a result, Trigon was a "producer" of crude oil, as defined in 10 CFR 212.31 and was subject to the provisions of the mandatory Petroleum Price Regulations

located at 10 CFR Part 212, Subpart D. Entex Inc., C. William Rogers, D. Bryan Ferguson, and Omni Drilling Partnership No. 1978–2 were working interest owners in the A.D. LeBlanc No. 1 Well and were also subject to the price regulations codified in 10 CFR Part 22 and antecedent regulations.

The ERA conducted an audit of the sales of crude oil from A.D. LeBlanc property. This audit concluded that these sales were made at prices which exceeded the maximum lawful ceiling prices provided by Subpart D. On August 30, 1985 DOE issued a Proposed Remedial Order (PRO) to Trigon. The PRO alleged that Trigon caused overcharges in the amount of $624,298.81 during the period attributable to Trigon's improper classification of production from the A.D. LeBlanc No. 1 Well as "newly discovered crude oil." The PRO order Trigon to refund the overcharge amount, plus interest, to DOE for proper distribution. Trigon filed a Notice of Objection to the PRO on October 24, 1985. Trigon's Statement of Objections (S/O) to the PRO was filed on December 5, 1985.

In its S/O, Trigon contended that crude oil extracted from the A.D. LeBlanc No. 1 Well during well testing procedures in 1978 did not constitute "production" within the meaning of 10 CFR 212.79(b), and therefore, subsequent production from this well qualified as "newly discovered crude oil." Trigon also contended that because it was a contract operator, it could not be held liable for the full amount of the overcharges. Trigon further asserted that it was in distressed financial circumstances and should not be held liable for the full amount of overcharges.

Omni Exploration, Inc., the largest working interest owner in the A.D. LeBlanc No. 1 Well filed for relief under Chapter 11 of the Bankruptcy Code on February 28, 1983. On January 31, 1984, the United States Bankruptcy Court of the Eastern District of Pennsylvania, issued an Order confirming the firm's plan of reorganization thereby discharging any actual or contingent claims against Omni Exploration, Inc.

Based on an analysis of Trigon's arguments and financial condition, the entire record in this proceeding, and the bankruptcy of Omni Exploration, Inc., and in light of the expense to the government associated with any additonal litigation, ERA believes that a total payment of $680,150.96 is a satisfactory compromise of the issues raised in the audit. Under the circumstances of this proceeding ERA also concluded it was appropriate to enter into separate consent orders with working interest owners in the A.D. LeBlanc No. 1 Well to resolve violations attributable to their respective shares of crude oil produced from this well.

## II. The Consent Orders

The proposed Consent Orders have been entered into by DOE and four of the working interest owners in the A.D. LeBlanc No. 1 Well in order to resolve all civil and administrative disputes, claims, and causes of action by DOE against Trigon and these working interest owners arising from DOE's audit of Trigon's compliance with the federal petroleum price and allocation regulations during the period June 1979 through January 21, 1981. Although Trigon and the working interest owners contend that in all respects they correctly construed and complied with applicable regulations, they have entered into these proposed Consent Orders to avoid possible further expenses and disruption of business. DOE believes the proposed Consent Orders are in the public interest and provide a satisfactory resolution of the issues raised by the audit.

## III. Refunds

Under the terms of the Consent Orders, Entex Inc. is required to pay the sum of $248,744.40 on or before the date of execution of its Consent Order. D. Bryan Ferguson and C. William Rogers each agreed to pay the sum of $60,129.67 on or before the date of execution of their respective Consent Orders and $84,161.82 two years from the date of execution of their respective Consent Orders. Omni Drilling Partnership 1978–2 agreed to pay $59,480.49 on or before the date of execution of its Consent Order and $83,272.69 two years from the date of execution of its Consent Order. The refund amounts will be deposited in a suitable account for appropppriate distribution by DOE.

## IV. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of these proposed Consent Orders to the address given above. The ERA will consider all comments it receives by 4:30 P.M., local time, on the 30th day after the date of publication of this notice. Any information or data considered confidential by the person submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f)

Issued in Washington, DC, on this 19th day of May 1987.

Marshall Staunton,

*Acting Solicitor, Office of the Solicitor, Economic Regulatory Administration.*

BILLING CODE 6450-01-M

# Federal Energy Regulatory Commission

[Project Nos. 9099-001 et al.]

## Trans Mountain Construction Company, Inc., et al.; Surrender of Preliminary Permits

May 20, 1987.

Take notice that the following preliminary permits have been surrendered effective as described in Standard Paragraph I at the end of this notice.

### 1. Trans Mountain Construction Company

[Project No. 9099-001]

Take notice that Trans Mountain Construction Company, permittee for the proposed Peru Creek Project No. 9099 requested that its preliminary permit be terminated. The preliminary permit was issued on August 22, 1985, and would have expired on July 31, 1988. The project would have been located on Peru Creek in Summit County, Colorado.

The permittee filed the request on April 28, 1987.

### 2. Red Bluff Water Power Control District and Prodek, Inc.

[Project No. 9075-001]

Take notice that Red Bluff Water Power Control District and Prodek, Inc., exemptees for the proposed Red Bluff Water Power Hydroelectric Project No. 9075, have requested that their exemption be terminated. The exemption was issued on August 30, 1985. The project would have been located on the Pecos River, in Reeves and Loving Counties, Texas and in Eddy County, New Mexico. No construction has commenced at this project.

The exemptee filed the request on February 2, 1987.

### 3. Tuolumne Regional Water District, County of Tuolumne, and Tuolumne County Water District No. 1

[Project No. 9525-001]

Take notice that the Tuolumne Regional Water District, County of Tuolumne, and Tuolumne County Water District No. 1, permittee for the proposed Mill Creek Project No. 9525 requested that its preliminary permit be

terminated. The preliminary permit was issued on January 28, 1986, and would have expired on December 31, 1988. The project would have been located on the Mill and Cascade Creeks in Tuolumne County, California.

The permittee filed the request on April 20, 1987.

**4. Tuolumne Regional Water District, County of Tuolumne, and Tuolumne County Water District No. 1**

[Project No. 9527-001]

Take notice that the Tuolumne Regional Water District, County of Tuolumne, and Tuolumne County Water District No. 1, permittee for the proposed Cow Creek Project No. 9527 requested that its preliminary permit be terminated. The preliminary permit was issued on January 27, 1986, and would have expired on December 31, 1988. The project would have been located on the Cow Creek in Tuolumne County, California.

The permittee filed the request on April 20, 1987.

**Standard Paragraphs:**

I. The preliminary permit shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007 in which case the permit shall remain in effect through the first business day following that day. New Applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

**Kenneth F. Plumb,**

*Secretary.*

BILLING CODE 6717-01-M

---

[Docket Nos. CP87-313-000 et al.]

**Consolidated Gas Transmission Corp. et al.; Natural Gas Certificate Filings**

May 20, 1987.

Take notice that the following filings have been made with the Commission:

**1. Consolidated Gas Transmission Corporation**

[Docket No. CP87-313-000]

Take notice that on April 30, 1987, Consolidated Gas Transmission Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP87-313-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity for authorization to render natural gas storage service for PennEast Gas Services Company (PennEast) under Applicant's Rate Schedule GSS of its FERC Gas Tariff, Volume No. 1, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to render firm long-term storage service for PennEast, pursuant to the terms and conditions of Rate Schedule GSS of its FERC Gas Tariff, Volume No. 1, and a storage service agreement between Applicant and PennEast dated April 29, 1987, which is attached as Exhibit P to the application. Applicant proposes to render natural gas storage service on a firm basis with an annual storage capacity quantity of 10,000,000 dt equivalent of natural gas and a storage demand quantity of 100,000 dt equivalent of natural gas per day. Applicant proposes to provide the storage service for a primary term from April 1, 1988, the first day of the 1988 storage injection season, through March 31, 2011, and year-to-year thereafter.

Applicant proposes to render the storage service to PennEast under and in accordance with Applicant's Rate Schedule GSS of its FERC Gas Tariff, Volume No. 1, or any effective superseding rate schedule, as may be modified from time-to-time.

Applicant indicates that it would receive gas for PennEast's account to be injected into storage at the existing interconnection between Applicant's facilities and Taxas Eastern Transmission Corporation's (Texas Eastern) Measuring Station 931, referred to as the Leidy Connection and would deliver gas from storage for PennEast's account at the existing interconnection between Applicant's facilities and Texas Eastern's Measuring Station 082, referred to as the Oakford Connection. It is indicated that other receipt and delivery points may be used subject to the sole decision of Applicant and PennEast, respectively. Applicant states that it does not propose to construct or operate jurisdictional facilities by this application.

*Comment date:* June 3, 1988, in accordance with Standard Paragraph F at the end of this notice.

**2. Consolidated Gas Transmission Corporation**

[Docket No. CP87-314-000]

Take notice that on April 30, 1987, Consolidated Gas Transmission Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP87-314-000 an application pursuant to section 7(c) of the Natural Gas Act for a certification pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the development of additional underground natural gas storage capacity at its existing Greenlick and Sharon Storage Pools, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct and operate certain facilities and to increase the underground storage capacity in its existing Greenlick Storage Pool, located in Potter and Clinton Counties, Pennsylvania, and Sharon Storage Pool, located in Potter County, Pennsylvania.

Applicant proposes to drill ten new storage injection/withdrawal wells, and to construct storage gathering lines required to connect those wells into the existing pipeline system at Greenlick Storage Pool. Applicant also proposes to increase its existing storage capacity at Greenlick by 1,800 MMcf of top or working gas capacity.

Applicant states that the total storage capacity at Greenlick is currently 50,490 MMcf, of which 23,460 MMcf is injected base or cushion gas, and 27,030 MMcf is top gas, with an additional 3,570 MMcf of native gas remaining in the Pool. Applicant further states that, upon completion of the proposed facilities, as well as the non-jurisdictional dehydration facilities to be installed in 1988, the Greenlick Storage Pool would provide an additional 1,800 MMcf of top gas capacity, thereby increasing the pool's top gas capacity to 28,830 MMcf and the total storage capacity to 52,290 MMcf. Applicant indicates that the proposed facilities and increased capacity would increase Applicant's last-day withdrawal deliverability rate for Greenlick Storage Pool from its current level of 300,000 Mcf to 349,000 Mcf.

Applicant estimates that the proposed facilities at Greenlick Storage Pool would cost approximately $6,230,000, exclusive of filing fees. Applicant requests authorization to construct the proposed facilities in the spring and summer of 1988.

Applicant proposes, at the Sharon Storage Pool, to (a) install a 1,200 horsepower compressor facility and related equipment at the location of its former State Line Compressor Station, in Potter County, Pennsylvania; (b) to inject an additional 500 MMcf of base gas into the storage pool; (c) replace all the existing storage gathering lines in the pool, except Line No. 257-S, the main trunkline in the pool; and (d) recondition three existing storage wells. Applicant also proposes to increase the pool's top gas capacity by 1,700 MMcf.

Applicant states that the total storage capacity at Sharon is 2,300 MMcf, of

which 1,170 MMcf is injected base gas and 600 MMcf is top gas, with an additional 530 MMcf of native gas remaining in the pool. Applicant further states that upon completion of the proposed facilities, Applicant would inject an additional 500 MMcf of base gas, thus increasing the base gas level to 2,300 MMcf. It is submitted that the proposed facilities and the additional base gas would provide Applicant with an additional 1,700 MMcf of top gas capacity, thereby increasing the top gas level to 2,300 MMcf and the pool's total storage capacity to 4,500 MMcf. Applicant indicates that the proposed facilities and increased capacity would increase Applicant's last-day withdrawal deliverability rate for Sharon Storage Pool from its current level of 6,000 Mcf to 18,000 Mcf.

Applicant estimates that the proposed activities at Sharon Storage Pool would cost approximately $4,855,000, exclusive of filing fees. Applicant proposes to construct the facilities in the spring and summer of 1988.

Applicant states that the cost of the proposed facilities at Greenlick and Sharon Storage Pools would be financed from funds on hand and from funds to be obtained from Applicant's parent company, Consolidated Natural Gas Company.

Applicant submits that the additional storage capabilities would be utilized for Applicant's system-wide storage requirements and would in part provide Applicant with the capacity to render long-term firm storage service for PennEast Gas Services Company, as proposed in Docket No. CP87-313-000.

*Comment date:* June 3, 1987, in accordance with Standard Paragraph F at the end of this notice.

### 3. National Fuel Gas Supply Corporation

[Docket No. CP87-329-000]

Take notice that on April 30, 1987, as supplemented on May 11, 1987, National Fuel Gas Supply Corporation (Natural Fuel), Ten Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP87-329-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities to replace existing facilities. National Fuel also requests, pursuant to section 7(b) of the Natural Gas Act, permission and approval to abandon the deteriorated facilities which would be replaced. National Fuel's proposal are more fully set forth in the application which is on file with the Commission and open to public inspection.

National Fuel proposes to replace 13.4 miles of 12-inch bare steel pipeline, designated as Line M, in Victory, Rockland and Cranberry Townships, all in Venango County, Pennsylvania, with an equivalent length of 16-inch coated steel pipeline. National Fuel states that this is Phase II of a replacement program for the existing 12-inch bare steel line which was originally installed in 1944 and is a main line in National Fuel's system which carries gas from various interstate sources in Pennsylvania to local markets. It is asserted that the replacement of Line M is required due to the age of the bare pipeline and, further, to increase delivery capacity of the line allowing National Fuel to take greater advantage of its low-priced sources of supply. It is stated that the new replacement pipeline would be located approximately 20 feet from the existing pipeline, which would be abandoned in place.

National Fuel estimates the cost of the Line M replacement to be $3,561,914 which would be financed with internally generated funds and/or interim short-term bank loans.

*Comment date:* June 3, 1987, in accordance with Standard Paragraph F at the end of this notice.

### 4. Northern Natural Gas Company, Division of Enron Corp. Enron Gas Processing Company

[Docket No. CP88-5-002]

Take notice that on May 8, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern), and Enron Gas Processing Company (EGP), 2223 Dodge Street, Omaha, Nebraska 68102 (collectively referred to herein as Petitioners), filed in Docket No. CP88-5-002 a joint petition to amend the order issued December 11, 1987, as amended, pursuant to Section 7(c) of the Natural Gas Act to authorize the exchange of natural gas and waiver of certain reporting requirements, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners stated that by order issued December 11, 1987, as amended, Northern was authorized, *inter alia*, to transport and deliver for sale to EGP (formerly named Northern Gas Products Company) a maximum of 62,400 Mcf of natural gas per day for fuel and shrinkage incident to the extraction of ethane at EGP's extraction plant at Bushton, Kansas.

It is stated that pursuant to an agreement dated March 31, 1987, which supersedes the original agreement between Northern and EGP dated June 28, 1967, the Petitioners propose to permit EGP the option to deliver to Northern thermally equivalent volumes of natural gas to compensate for those volumes of natural gas retained and utilized by EGP in its ethane extraction operation for shrinkage, fuel and other incidental uses (exchange-in-kind volumes). Such exchange-in-kind volumes would be delivered to Northern by EGP, or its designee, at the tailgate of EGP's Bushton plant, or at other mutually agreeable, points on Northern's pipeline system, it is stated. It is further stated that to the extent EGP delivers exchange-in-kind volumes to Northern at any point on Northern's pipeline system other than the tailgate of the Bushton plant, then EGP would pay transportation to Northern from such points to the Bushton plant in accordance with Northern's applicable transportation tariff.

It is requested that EGP be granted a limited-jurisdiction certificate authorizing EGP to exchange such exchange-in-kind volumes in interstate commerce with Northern. It is further requested that the Commission find that EGP's Bushton plant and its otherwise nonjurisdictional activities would not become subject to the Commission's jurisdiction by virtue of the proposed exchange-in-kind between EGP and Northern. It is also requested that EGP be granted a waiver of any requirement to comply with the Commission's Uniform System of Accounts and any other reporting requirements which might otherwise be applicable to EGP by virtue of EGP's acceptance of the limited-jurisdiction certificate.

The Petitioners also state that any transportation of the proposed exchange-in-kind volumes by Northern to the Bushton plant would be accomplished pursuant to Northern's open access transportation Rate Schedules FT-1 and IT-1 as appropriate.

*Comment date:* June 3, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

### 5. Northern Natural Gas Company, Division of Enron Corp. Enron Gas Processing Company

[Docket No. CP61-132-000]

Take notice that on May 8, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern), and Enron Gas Processing Company (EGP), 2223 Dodge Street, Omaha, Nebraska 68102 (collectively referred to herein as Petitioners), filed in Docket No. CP61-132-000 a joint petition to amend the order issued December 28, 1962, in Docket No. CP61-132, pursuant to section 7(c) of the Natural Gas Act to

authorize, the exchange of natural gas and waiver of certain reporting requirements, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners stated that by order issued December 28, 1982, Northern was authorized, *inter alia,* to transport and deliver natural gas for sale to EGP (formerly named Northern Gas Products Company) for fuel and skrinkage incident to the extraction of certain hydrocarbons in its extraction plant at Bushton, Kansas.

It is stated that pursuant to an agreement dated April 1, 1987, which supersedes the original agreement between Northern and EGP dated October 28, 1980, the Petitioners proposed to permit EGP the option to deliver to Northern thermally equivalent volumes of natural gas to compensate for those volumes of natural gas retained and utilized by EGP for shrinkage, fuel and other incidental uses (exchange-in-kind volumes) within the hydrocarbon portion of the Bushton plant. Such exchange-in-kind volumes would be delivered to Northern by EGP, or its designee, at the tailgate of EGP's Bushton plant, or at other mutually agreeable, points on Northern's pipeline system, it is stated. It is further stated that to the extent EGP delivers exchange-in-kind volumes to Northern at any point on Northern's pipeline system other than the tailgate of the Bushton plant, then EGP would pay transportation to Northern from such points to the Bushton plant in accordance with Norther's applicable transportation tariff.

It is requested that EGP be granted a limited-jurisdiction certificate authorizing EGP to exchange such exchange-in-kind volumes in interstate commerce with Northern. It is further requested that the Commission find that EGP's Bushton plant and its otherwise nonjurisdictional activities would not become subject to the Commission's jurisdiction by virtue of the proposed exchange-in-kind between EGP and Northern. It is also requested that EGP be granted a waiver of any requirement to comply with the Commission's Uniform System of Accounts and any other reporting requirements which might otherwise be applicable to EGP by virtue of EGP's acceptance of the limited-jurisdiction certificate.

The Petitioners also state that any transportation of the proposed exchange-in-kind volumes by Northern to the Bushton plant would be accomplished pursuant to Northern's open access transportation Rate Schedules FT–1 and IT–1 as appropriate.

*Comment date:* June 3, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

**6. Northern Natural Gas Company, Division of Enron Corp.**

[Docket No. CP84–668–002]

Take notice that on April 30, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102 filed in Docket No. CP84–668–002 a joint petition to amend the order issued April 5, 1985, in Docket No. CP84–668–000 pursuant to section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas for Northwest Central Pipeline Company (Northwest Central) on an overrun basis in accordance with a December 18, 1986, gas amendatory agreement, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Northern states, that by Commission order issued on April 5, 1985, it is authorized to transport, on an interruptible basis, up to 100,000 Mcf of natural gas per day for the account of Northwest Central pursuant to the provisions of the gas transportation agreement (Original Agreement) dated May 29, 1984, between Northern and Northwest Central. It is stated that Northern accepts such volumes from Northwest Central at the two existing interconnections between Northern and Northwest Central located in Barton County, Kansas. Northern Transports the gas it receives from Northwest Central in Barton County, Kansas, and redelivers thermally equivalent volumes for Northwest Central's account to the suction side of Enron Gas Product's Bushton Extraction Plant located in Ellsworth County, Kansas, it is stated. After the gas (delivered by Northern for Northwest Central's account) is processed, Northwest Central causes the residue volumes to be delivered to Northern for transportation and redelivery to Northwest Central at another point of interconnection between the respective systems of Northern and Northwest Central in Barton County, Kansas, it is further stated.

Northern proposes herein to transport volumes in excess of 100,000 Mcf per day for Northwest Central's account on an interruptible, overrun basis pursuant to all the terms of the Original Agreement amended by Amendment No. 1 dated December 18, 1986, between the parties (Amendment). According to the terms of the Amendment, Northern proposes to provide an overrun transportation service for natural gas delivered by Northwest Central in Barton County, Kansas, that are in excess of the currently authorized transportation quantity of 100,000 Mcf per day. Northern proposes to charge Northwest Central a rate for overrun service which is equivalent to the maximum rate on file with the Commission under Northern's Rate Schedule IT–1, currently 3.7 cents per MMBtu per 100 miles of haul. The proposed rate for the overrun service is said to be equal to the commodity rate charge for the presently authorized transportation of the contract quantity of 100,000 Mcf per day. Such proposed rates, it is said, are subject to the outcome of Northern's pending rate proceeding in Docket No. RP85–206–000.

*Comment date:* June 3, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

**7. Northern Natural Gas Company Division of Enron Corp.**

[Docket No. CP87–324–000]

Take notice that on April 30, 1987, Northern Natural Gas Company, Division of Enron Corp. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP87–324–000 an application pursuant to section 7(c) of the Natural Gas Act, requesting authorization for the transportation of natural gas on an interruptible basis on behalf of Peoples Natural Gas Company, Division of Utilicorp United Inc. (Peoples), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern seeks authorization to transport up to 354,900 MMBtu of natural gas per day pursuant to a Gas Transportation Agreement dated April 2, 1987, as amended, April 29, 1987, from 15 existing points of receipt along Northern's system in the states of Kansas, Oklahoma, Texas and Iowa to 31 existing points of delivery to Peoples in the states of Nebraska, Iowa and Minnesota, as listed in attached Appendix. Northern proposes to charge Peoples rates based on 2.1 cents per 100 miles of haul for field zone transportation and 43.37 cents for transportation in the market zone which rates are equivalent to the effective rate under Northern's Rate Schedule IT–1. Northern states that it would also charge 1.52 cents per Mcf, adjusted for heating content, for the funding of the Gas Research Institute. Northern states that it proposes to provide the requested service for a primary term of two years and subsequent two-year terms upon

mutual agreement of Peoples and Northern no later than 120 days prior to the expiration of the primary term.

## 8. PennEast Gas Services Company Texas Eastern Transmission Corporation

[Docket No. CP87-312-000]

Take notice that on April 30, 1987, PennEast Gas Services Company (PennEast) and Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP87-312-000 a joint application pursuant to section 7(c) of the Natural Gas Act for a certificater of public convenience and necessity authorizing PennEast to provide long-term firm storage and firm transportation services, to develop and operate the North Summit Storage Pool, located in Fayette County, Pennsylvania, and to construct and operate pipeline facilities, and authorizing Texas Eastern to render a compression and metering service to PennEast, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that PennEast is a general partnership organized by Consolidated Gas Transmission Corporation (Consolidated) and Texas Eastern Gateway, Inc., an affiliate of Texas Eastern.

PennEast requests authorization to render a firm storage service pursuant to a new Rate Schedule PSS to the following customers (Buyers) in the quantities indicated below:

| Buyer | Maximum storage quantity (dt equivalent) | Maximum daily withdrawal quantity (dt per day equivalent) |
|---|---|---|
| *Phase III—Commencing April 1, 1988:* | Commencing 3/1/88 | Commencing 11/15/88 |
| Bristol & Warren Gas Company | 81,000 | 913 |
| The Brooklyn Union Gas Company | 1,500,000 | 15,000 |
| Central Hudson Gas & Electric Corp. | 400,000 | 4,000 |
| Colonial Gas Company | 206,790 | 2,067 |
| Long Island Lighting Company | 1,500,000 | 15,000 |
| Town of Middleborough, MA | 16,500 | 165 |
| New Jersey Natural Gas Company | 500,000 | 50,000 |
| Penn Fuel Gas, Inc. | 200,000 | 2,000 |
| The Pequot Gas Company | 12,000 | 125 |
| Providence Gas Company | 1,000,000 | 10,000 |
| Public Service Electric & Gas Company | 3,068,400 | 30,084 |
| South County Gas Company | 24,800 | 248 |
| Undesignated | 1,550,800 | 15,508 |
| Incremental total | 10,000,000 | 100,000 |
| *Phase III—Commencing April 1, 1989:* | Commencing 4/1/89 | Commencing 11/15/89 |
| Central Hudson Gas & Electric Corp. | 200,000 | 2,000 |
| Elizabethtown Gas Company | 1,000,000 | 10,000 |
| Long Island Lighting Company | 1,500,000 | 15,000 |
| Town of Middleborough, MA | 5,200 | 52 |
| New Jersey Natural Gas Company | 1,000,000 | 10,000 |
| Penn Fuel Gas, Inc. | 100,000 | 1,000 |
| Incremental Total | 3,805,200 | 38,052 |
| *Phase III—Commencing April 1, 1990:* | Commencing 4/1/90 | Commencing 11/15/90 |
| Consolidated Edison Company of New York, Inc. | 2,000,000 | 20,000 |
| Long Island Lighting Company | 2,000,000 | 20,000 |
| Town of Middleborough, MA | 5,200 | 52 |
| New Jersey Natural Gas Company | 2,000,000 | 20,000 |
| Penn Fuel Gas, Inc. | 100,000 | 1,000 |
| Incremental total | 6,105,200 | 61,052 |
| Aggregate total | 19,910,400 | 199,104 |

PennEast states that the Buyers have subscribed to the proposed PSS storage service by executing precedent agreements, attached as Exhibit I to the application. PennEast further states that the proposed storage service would commence on April 1, 1988, 1989, or 1990 (depending on when each Buyer elected to subscribe) and would continue for a primary term ending on March 31, 2011.

It is indicated that the proposed service would be based upon 10 Bcf of storage capacity to be developed by PennEast at the North Summit Storage Pool located in Fayette County, Pennsylvania, and in combination with the purchase by PennEast of 10 Bcf of storage service from Consolidated.

PennEast proposes on behalf of the subscribing Buyers to receive gas from the Buyers at the receipt points specified in the service agreement and inject such gas into PennEast's storage capacity, and withdraw gas from PennEast's

storage capacity and deliver such gas to Buyer at the delivery points specified in the service agreement. It is indicated that when capacity is available on PennEast's system for receipt from or for the account of Buyer of storage gas during each contract year, PennEast would receive from or for the account of Buyer quantities of gas and inject into storage for Buyer's account such quantities of gas less company use gas. Further, it is indicated that PennEast would withdraw from storage for Buyer, at Buyer's request, quantities of gas from Buyer's storage inventory up to Buyer's maximum daily withdrawal quantity (and such additional quantity as PennEast in its judgement is able to withdraw) and deliver to or for the account of Buyer such quantities less company use gas.

PennEast also proposes to render long-term firm transportation service for the Buyers in accordance with PennEast's firm transportation Rate Schedule T–1. PennEast proposes to transport on a daily basis natural gas up to the quantities indicated below:

| Buyer | Contract demand quantity (dt per day equivalent) |
|---|---|
| *Beginning November 15, 1988:* | |
| Bristol & Warren Gas Company | 788 |
| The Brooklyn Union Gas Company | 89,542 |
| Central Hudson Gas & Electric Corp | 8,909 |
| Colonial Gas Company | 2,004 |
| Long Island Lighting Company | 39,847 |
| Town of Middleborough, MA | 181 |
| New Jersey Natural Gas Company | 39,883 |
| Penn Fuel Gas, Inc | 1,923 |
| The Peguot Gas Company | 122 |
| Providence Gas Company | 9,684 |
| Public Service Electric & Gas Company | 129,164 |
| South County Gas Company | 240 |
| Undesignated | 15,034 |
| Incremental Total | 302,128 |
| *Beginning November 15, 1989:* | |
| Central Hudson Gas & Electric Corp | 1,911 |
| Elizabethtown Gas Company | 19,694 |
| Long Island Lighting Company | 14,436 |
| Town of Middleborough, MA | 90 |
| New Jersey Natural Gas Company | 9,699 |
| Penn Fuel Gas, Inc | 965 |
| Incremental Total | 46,705 |
| *Beginning November 15, 1990:* | |
| Consolidated Edison Company of New York, Inc | 18,454 |
| Long Island Lighting Company | 19,577 |
| Town of Middleborough, MA | 51 |
| New Jersey Natural Gas Company | 19,520 |
| Penn Fuel Gas, Inc | 965 |
| Incremental Total | 58,567 |
| Aggregate Total | 436,400 |

It is indicated that PennEast would render the jurisdictional long-term firm storage services by means of the storage capacity provided by the development of the new North Summit Storage Pool combined with storage capacity purchased from Consolidated and the facilities owned by Texas Eastern, the incremental pipeline facilities proposed in the Capacity Restoration Program in Docket No. CP87–92–001, and pipeline facilities proposed herein to be constructed by PennEast in conjunction with Texas Eastern's main transmission system.

PennEast proposes to develop the North Summit production pool for storage purposes, located in Fayette Country, Pennsylvania. PennEast proposes to construct and operate the following facilities in 1988 and 1989 at North Summit Storage Pool to enable it to render the proposed Phase II–1989 services:

Recondition twelve existing wells and drill eight new wells for storage injection/withdrawal purposes.

Construct 5.2 miles of 6, 8, 10, 12, 16, and 20-inch pipeline and related and appurtenant facilities to connect 12 storage injection/withdrawal wells.

North Summit Compressor Station—construct dehydration, piping, and M & R facilities and install 3,000 horsepower.

Construct 2.48 miles of 20-inch transmission pipeline to connect North Summit Compressor Station to the pipeline system of Texas Eastern in Fayette County, Pennsylvania.

Inject approximately 6 Bcf of base gas at North Summit Storage Pool.

PennEast proposes to construct and operate the following facilities in 1990 to complete the development of North Summit Storage Pool and enable it to render the proposed Phase III–1990 services:

Recondition and equip seven existing wells and drill one new well for observation purposes, and construct 1.6 mile of 6, 8, and 10-inch pipeline and related and appurtenant facilities to connect eight storage injection/withdrawal wells.

North Summit Compressor Station—install remaining 3,000 horsepower.

Inject approximately 4 Bcf of base gas at North Summit Storage Pool.

It is indicated that the North Summit Storage Pool would have a total capacity of 23 Bcf of gas consisting of 11.5 Bcf of base gas (1.5 Bcf of native reserves and 10 Bcf of injected base gas) and 11.5 Bcf of top gas capacity. It is further indicated that, upon total development, the storage pool would be designed to deliver 105 MMcf of gas per day at a top gas inventory of 11.5 Bcf, with a 6,600 HP compressor station and 20 active injection and withdrawal wells. PennEast states that it would utilize 10 Bcf of the pool's top gas capacity. PennEast further states that it would own the 1.5 Bcf of native reserves remaining in place at the pool. PennEast requests authorization to lease the 10 Bcf of natural gas which it would inject as base gas at the North Summit Pool from CNG Storage Service Company (CNG Storage), a new wholly-owned subsidiary to be created by Consolidated Natural Gas Company, Consolidated's parent company. PennEast submits that it and CNG storage would enter into a lease providing for this arrangment which would be filed in the near future.

It is indicated that the lease would have a primary term from the date of the first delivery of gas through March 31, 2011, and year-to-year thereafter. Further, it is indicated that PennEast would pay an initial rental fee of $.0333 per dt through December 31, 1995, with the monthly rental fee to range between $.0250 and $.0416 per dt for the remainder of the term, to be escalated by a factor tracking the prime commercial rate of interest. PennEast submits that the 10 Bcf of base gas would be delivered over two injection seasons, with 6 Bcf to be delivered in 1989 and 4 Bcf in 1990. PennEast states that it would assume all risk of loss of the base gas during the term of the lease and would have a right of first refusal to purchase the base gas upon termination of the lease. PennEast states that it would return an equivalent quantity of natural gas to CNG Storage over a three year period if PennEast does not purchase the gas.

It is submitted that PennEast's storage facilities would be constructed and operated by Consolidated pursuant to a Construction, Operation and Maintenance agreement between PennEast and Consolidated attached as Exhibit M to the application.

PennEast proposes to construct and operate the following pipeline facilities:

*Phase I—1988*

Convert four 1,100 HP reciprocating units to clean-burn operation at Texas Eastern's Station 28 (Lambertville) Hunterdon County, New Jersey.

Install measuring and regulating facilities at Texas Eastern's M & R Station 058, Richmond County, New York.

*Phase II—1989*

6.00 miles of 36-inch pipeline in conjunction with Texas Eastern's existing system in Montgomery County, Pennsylvania.

Install up to 8,000 clean-burn reciprocating horsepower at Texas Eastern's Station 28 (Lambertville) Hunterdon County, New Jersey.

Install up to 11,000 HP gas turbine/compressor at Station 22A (Bedford), Bedford County, Pennsylvania.

*Phase III—1990*

10.00 miles of 36-inch pipeline in conjunction with Texas Eastern's system in Montgomery County, Pennsylvania.

Install measuring and regulating facilities at Texas Eastern's M & R Station 068, Richmond County, New York.

PennEast states that its pipeline facilities would be constructed and operated by Texas Eastern pursuant to a Construction, Operation and Maintenance agreement between PennEast and Texas Eastern.

It is estimated that the total cost of the proposed storage and pipeline facilities would be $6,366,000 in 1988, $63,820,000 in 1989 and $26,343,000 in 1990 for a total of $96,529,000. It is further estimated that additional costs would be allocated from Docket No. CP87-92-001 in the amount of $39,269,800. PennEast states that it would finance the proposed facilities with a 75%/25% debt/equity structure.

PennEast states that Rate Schedule PSS provides for: (1) a monthly maximum daily withdrawal quantity (MDWQ) charge, (2) a monthly space charge, (3) commodity injection and withdrawal charges, and (4) an authorized overrun quantity charge. PennEast further states that, during periods April 1, 1989, to November 15, 1989, and April 1, 1990, to November 15, 1990, PennEast would charge only those customers who are increasing their maximum storage quantities an interim storage demand charge. It is indicated that the MDWQ, space, injection and withdrawal charges and authorized overrun quantity charge each incorporate, as an "as billed" component the similar charges billed to PennEast under Consolidated's Rate Schedule GSS. PennEast requests authorization to flow through all of Consolidated's storage charges under Rate Schedule GSS incurred by PennEast pursuant to the storage agreement between Consolidated and PennEast, attached in Exhibit H of the application. PennEast states that it is purchasing the GSS service directly from Consolidated, on behalf of PennEast's customers. PennEast also requests that the Commission waive §§ 154.38(d)(3) and 154.63 of the Regulations to permit the tracking of changes in Consolidated's storage charges in accordance with the provisions of PennEast's proposed Rate Schedule PSS.

PennEast proposes the rates shown in Exhibit P(4) of the application be accepted as initial rates for service under Rate Schedule PSS, T-1 and T-2 as of effective date of April 1, 1988, November 15, 1988, April 1, 1989, November 15, 1989, and April 1, 1990. PennEast also requests that the Commission, as part of the order granting a certificate of public convenience and necessity to PennEast; grant approval to adjust the PSS rates effective November 15, 1990, to reflect changes in actual costs and contractual quantities which result from the final phases of construction under the PSS program.

PennEast states that, in view of the lack of historical volumes for Rate Schedules T-1 and T-2, it has not designed rates for this service based upon allocated cost. PennEast submits that the lack of historical information regarding the potential use of the T-1 and T-2 service is sufficient good cause as to warrant the waiver of § 284.7(d)(2) for a limited term, provided appropriate refunds are made to the customers. Accordingly, PennEast proposes to renew its request filed in Docket No. CP87-4-000 for waiver by the Commission of the requirements of § 284.7(d)(2) for a limited term, but to condition such waiver to require PennEast to file no later than fifteen months from the commencement of Phase II of the SS-1 service as proposed in Docket No. CP87-92-000, as amended section 4(e), an initial rate filing utilizing a based period which shall be the first 12 months following the in-service date of Phase II of the SS-1 service.

Texas Eastern requests authorization to receive, measure, compress and deliver gas on behalf of PennEast as contemplated by the pro-forma gas Compression and Metering Service agreement between Texas Eastern and PennEast attached as Exhibit P(5), Schedule 3 of the application. It is indicated that Texas Eastern, as operator of the jointly owned facilities proposed in Docket No. CP87-92-001 and facilities proposed herein, would charge PennEast the incremental operation and maintenance expenses incurred by Texas Eastern. Texas Eastern requests that the rates shown in Exhibit P(5) of the application be accepted as initial rates for such compression and metering service as of the date indicated in the agreement. It is further indicated that this agreement would reflect a change in ownership originally set forth in Docket No. CP87-92-000, whereby PennEast was to make a contribution of aid of construction but Texas Eastern would own the facilities.

*Comment Date:* June 3, 1988, in accordance with Standard Paragraph F at the end of this notice.

**9 Tennessee Gas Pipeline Company**

[Docket No. CP88-245-001]

Take notice that on May 4, 1987, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP88-245-001 a petition to amend the order issued May 24, 1988, in Docket No. CP88-245, pursuant to Section 7(c) of the Natural Gas Act so as to authorize an extension in the contract underlying the existing transportation service, establish a new firm transportation quantity, and certain other modifications designed to increase the flexibility of the service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Tennessee states that it is authorized to transport up to 510,000 Mcf per day (Mcfd) on a firm basis for Trunkline Gas Company (Trunkline) from the Tennessee-Trunkline interconnection at Centerville, St. Mary Parish, Louisiana to a Tennessee-Trunkline interconnection at Kinder, Jefferson Davis Parish Louisiana. Tennessee further states that there is also an authorized alternate receipt point in St. Mary Parish Louisiana and an authorized alternate redelivery point in Vermilion Parish Louisiana. Tennessee explains that the transportation service is rendered pursuant to a June 18, 1986, gas transportation agreement which is on file with the Commission as Rate Schedule T-11 in Tennessee's FERC Gas Tariff. It is indicated that Tennessee's transportation service assists Trunkline in receiving into its main transmission system volumes of gas which Trunkline purchases in the eastern areas of offshore Louisiana and then subsequently transports to shore through its Terrebonne system.

Tennessee notes that the term of the underlying transportation agreement expires November 1, 1988, and that to assure continuation of the service, and to make certain modifications in the service, Trunkline and Tennessee have executed an amendment to the original agreement which is dated May 1, 1987. In accordance with the May 1, 1987 amendment Tennessee requests authority to:

(1) Extend the term of transportation service to and including October 31, 1997;

(2) Establish a firm transportation quantity (FTQ) equal to 522,750 dakatherms per day (dtd);

(3) Reduce the FTQ is accordance with Trunkline's option under the amended contract to convert a portion of firm service to interruptible service;

(4) Receive as part of the FTQ gas purchased by Trunkline as well as gas which Trunkline transports for third parties, and

(5) Provide interruptible service for Trunkline to the extent Trunkline exercises its option to convert firm transportation to interruptible transportation.

Tennessee asserts that no new facilities would be required to implement the amendment and that the receipt and delivery points would not change.

For any interruptible service which may be provided to Trunkline, Tennessee proposes to charge 7.79 cent per dt. In addition Tennessee proposes that Trunkline compensate it for fuel use and lost and unaccounted for by providing Tennessee each day with 0.5 percent of the volumes tendered for transportation. Provided that Trunkline withdraws its application pending in Docket No. CP86-426-000, Tennessee also proposes to delete its minimum quantity charge effective November 1, 1987.

*Comment Date:* June 3, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

**Transcontinental Gas Pipe Line Corporation**

[Docket No. CP86-597-001]

Take notice that on May 4, 1987, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP86-597-001 an amendment to its pending application filed in Docket No. CP86-597-000 pursuant to section 7(c) of the Natural Gas Act so as to reflect a change in the proposed facilities required to render the proposed firm transportation service for South Jersey Gas Company (South Jersey), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Transco States that, only julyb 1, 1987, it filed an application in Docket No. CP86-597-000 for authority to provide a firm transportation service of up to the dekatherm (dt) equivalent of 5,500 Mcf of natural gas per day and to construct and operate 1.25 miles of related pipeline loop facilities. Transco states that the recent withdrawal of the proposed Transylvania Gas Pipeline Company, Inc. proposal in Docket No. CP86-333-000 eliminated certain proposed facilities from Transco's Leidy Line which would have functioned in conjunction with the facilities proposed in the application in the instant proceeding. Accordingly, it is stated, Transco has determined that, in order to render the firm transportation service for South Jersey, it would be necessary to construct 0.9 miles of 30-inch pipeline loop in Luzerne County, Pennsylvania, in lieu of the facilities originally proposed in the application. It is stated that, in order to take advantage of economies of scale presently available with the expansion of the Leidy Line, the newly-proposed facilities are anticipated ultimately to operate in conjunction with the facilities proposed in Transco's recent SS-1 Storage Service application pending in Docket No. CP87-190-000.

*Comment Date:* June 3, 1987, in accordance with the first subpargraph of Standard Paragraph F at the end of this notice.

**Standard Paragraphs:**

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

*Secretary.*

BILLING CODE 6717-01-M

---

[Docket Nos. CP87-336-000 et al.]

**Mountain Fuel Resources, Inc., et al.; Natural Gas Certificate Filings**

May 19, 1987.

Take notice that the following filings have been made with the Commission:

**1. Mountain Fuel Resources, Inc.**

[Docket No. CP87-336-000]

Take notice that on May 4, 1987, Mountain Fuel Resources, Inc. (MFR), 79 South State Street, Salt Lake City, Utah 84111, filed in Docket No. CP87-336-000 a request pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to add a receipt point under the authorization issued to MFR in Docket No. CP82-491-000, for natural gas transported on behalf of Northwest Pipeline Corporation (Northwest) all as more fully set forth in the request which is on file with the Commission and open to public inspection.

MFR proposes to add the F. H. Ranch No. 1 well (R. H. Ranch) receipt point, located on its Main Line No. 68 in Garfield County, Colorado, as a receipt point under its Rate Schedule X-28, in order to continue the transportation of Natural Gas on behalf of Northwest in accordance with the transportation authorization granted to MFR in the Commission Order dated September 30, 1981, in Docket No. CP80-144-000. MFR states that MFR has transported natural gas from the R. H. Ranch receipt point since October 3, 1985, pursuant to an amendment dated August 6, 1985, to Gas Transportation and Exchange Agreement between MFR and Northwest dated July 3, 1980 (Agreement). MFR explains that the transportation of natural gas for Northwest from the R. H. Ranch receipt point has been provided on a "Grandfathered" basis since October 9, 1985, and would terminate on October 3, 1987.

Further, MFR states that during 1986, it transported and average of 121 Mcf of gas per day for Northwest from the R. H. Ranch receipt point and that the continued transportation of this small quantity of natural gas under its Rate Schedule X-28, which comprises the Agreement, would not cause MFR to

exceed the certificates maximum daily quality of 15,000 Mcf of gas per day.

*Comment date:* July 7, 1987, in accordance with Standard Paragraph G at the end of this notice.

**2. Columbia Gulf Transmission Company and Texas Eastern Transmission Corporation**

[Docket No. CP77-494-006]

Take notice that on April 24, 1987, Columbia Gulf Transmission Company (Columbia Gulf), P.O. Box 683, Houston Texas 77001, and Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77252 (Petitioners), filed in Docket No. CP77-494-006 a petition to amend the order issued November 2, 1977, in Docket No. CP77-494-000, as amended, pursuant to section 7(C) of the Natural Gas Act to authorize transportation of additional source of natural gas supplies, within authorized contract demand levels, for Texas Eastern; to authorize and additional point of receipt in St. Mary Parish, Louisiana; and to authorized the balancing of the gas transported on a thermal basis rather than a volumetric basis, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners state that by Commission order issued November 2, 1977, as amended, Columbia Gulf is authorized to transport a contract demand volume of up to 40,000 Mcf of natural gas per day produced in Eugene Island Blocks (EI) 333 and 256 and South Marsh Island Block 143 Platform B and 142 Platform A, offshore Louisiana. Petitioners states that the gas is made available to Columbia Gulf at the terminus of the Sea Robin Pipeline System near Erath, Vermilion Parish, Louisiana, and equivalent quantities are redelivered to Texas Eastern, less 0.5 percent for fuel and gas costs, at a point in St. Landry Parish, Louisiana, at which Texas Eastern's and Columbia Gulf's pipeline interconnect. It is stated that Texas Eastern has contracted for additional sources of gas from EI Blocks 337, 181, 182 and 313 Platform B, and East Cameron Block 336, offshore Louisiana, and from the Atchafalaya Bay Field Area, St. Mary Parish, Louisiana. Petitioners thus propose to include these volumes in the transportation arrangement.

The quantities from East Cameron Area Block 336, offshore Louisiana, are proposed to be transported pursuant to terms of and amendment to the June 16, 1977, transportation agreement between Columbia Gulf and Texas Eastern, dated July 22, 1982, as amended by amendatory letter dated November 19, 1984; the volumes from Eugene Island Blocks 337, 181, 182 and 313 Platform B, offshore Louisiana, proposed to be transported pursuant to the terms of an amendment to the agreement dated April 1, 1984; and volumes from the Atchafalaya Bay Filed Area, St. Mary Parish, Louisiana, proposed to be transported pursuant to the terms of an amendment to the agreement dated September 12, 1984. Petitioners further propose, pursuant to the amendment dated September 12, 1984, to add a point of receipt at the discharge side of Exxon Company U.S.A.'s Garden City Gas Processing Plant in St. Mary Parish, Louisiana, at which point the quantities from the Atchafalaya Bay filed Area will be delivered to Columbia Gulf by Monterey Pipeline Company for the account of Texas Eastern. Petitioners also propose, pursuant to the terms of the amendment dated April 1, 1984, to convert the balancing of quantities transported to thermal basis rather than a volumetric basis.

*Comment date:* June 2, 1987, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

**3. National Fuel Gas Supply Corporation**

[Docket No. CP87-330-000]

Take notice that on April 30, 1987, National Fuel Gas Supply Corporation (National), Ten Lafayette Square, Buffalo, New York 14203, filed in Docket No. CP87-330-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate sales tap facilities connecting its pipelines with those of its affiliate, National Fuel Gas Distribution Corporation (Distribution) under authorization issued in Docket No. CP83-4-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

National proposes to construct sales top to facilities in the towns of Edinboro, Erie County; Brookville, Jefferson County; Stoneboro, Mercer County; Sigel, Jefferson County; Vowinckel, Forest County; Waterford, Jefferson County; Lakewood, Jefferson County; Clarion, Allegany County; Norwich Township, McKean County; Wattsburg, Erie County; and Reynoldsville, Jefferson County, Pennsylvania, as feeds to Distribution in order to serve additional residential customers. National states that the proposed deliveries would have minimal impact on its peak and annual deliveries and entitlements of Distribution.

*Comment date:* July 7, 1987, in accordance with Standard Paragraph G at the end of this notice.

**4. Paiute Pipeline Company and Southwest Gas Corporation**

[Docket No. CP87-309-000]

Take notice that on April 28, 1987, Paiute Pipeline Company (Paiute) and Southwest Gas Corporation (Southwest), P.O. Box 15015, Las Vegas, Nevada 89114, jointly referred to as Applicants, filed in Docket No. CP87-309-000 a joint application pursuant to section 7 of the Natural Gas Act and Part 157 of the Commission's Regulations for (1) a certificate of public convenience and necessity authorizing the acquisition and operation by Paiute of facilities from Southwest and the transportation and sale of natural gas for resale in interstate commerce formerly performed by Southwest, (2) permission and approval for Southwest to abandon such facilities and service's and (3) a blanket certificate of public convenience and necessity authorizing the transportation of natural gas in interstate commerce by Paiute pursuant to Subpart G of Part 284 of the Commission's Regulations, all as more fully set forth in the application which is on file with the Commission.

Applicants state that, as part of a corporate restructuring, Southwest proposes to transfer, at the net depreciated book cost, to Paiute all of the jurisdictional natural gas facilities and properties now owned, leased, and operated by Southwest along its northern Nevada system. Paiute proposes to continue all jurisdictional sales and services now rendered by Southwest along its northern Nevada system, and to continue operation of the jurisdictional facilities to be required, in accordance with the terms of the existing certificates of public convenience and necessity issued to Southwest. Southwest would retrain all non-jurisdictional facilities and properties along its northern Nevada system, and continue to perform all non-jurisdictional services, pertaining to the local distribution of natural gas. Paiute proposes to initiate sales for resale of natural gas to Southwest Gas Corporation-Northern Nevada and Southwest Gas Corporation-Northern California. Southwest also requests permission and approval to abandon its previously certificated facilities, services, and operations along its northern Nevada system except for its Rate Schedule X-1 sale to El Paso Natural Gas Company.

In addition, Paiute requests that the Commission issue a blanket certificate

of public convenience and necessity authorizing Paiute to transport natural gas in interstate commerce in accordance with the Commission's Regulations promulgated in Order Nos. 436, *et al.* Paiute states that it would comply with the conditions set forth in Subpart A of Part 284 of the Commission's Regulations.

Paiute proposes to adopt Original Volume No. 1 of Southwest's presently effective FERC Gas Tariff, subject to modifications to conform the tariff with the proposed new transportation services and the Commission's Regulations adopted in Order Nos. 436, *et al.*, According to the application, service to existing jurisdictional customers of Southwest would continue to be billed at the rates and charges specified in the rate schedule of Southwest that are to be adopted by Paiute.

Applicants allege that the proposed corporate restructuring and the requested authorizations would promote rate making efficiency, lead to greater use of the system facilities by means of self-implementing, nondiscriminatory transportation services, enhance operational flexibility and efficiency, and enable Applicants to ensure adequate natural gas service at the lowest reasonable cost.

*Comment date:* June 2, 1987, in accordance with Standard Paragraph F at the end of this notice.

**5. Texas Gas Transmission Corporation and ANR Pipeline Company**

[Docket No. CP87-307-000]

Take notice that on April 27, 1987, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, and ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP87-307-000 a joint application pursuant to section 7(b) of the Natural Gas Act for authorization permitting and approving the abandonment of ANR's purchase of gas from Texas Gas under Texas Gas' Rate Schedule CD-3, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Gas and ANR state that Texas Gas was authorized to sell gas to ANR pursuant to a Commission order issued October 1, 1954 in Docket No. G-2311, *et al.* (13 F.P.C. 380) and that under the current service agreement, executed October 23, 1970, Texas Gas is authorized to sell up to 50,000 Mcf of natural gas per day to ANR at a point of interconnection near Slaughters, Kentucky. It is further stated that the primary term of the service agreement expires on October 31, 1987. It is indicated that pursuant to the agreement, ANR has provided written notice to Texas Gas that ANR is terminating the service agreement effective October 31, 1987. It is explained that neither Texas Gas nor ANR is seeking authorization to abandon any facilities. Texas Gas and ANR request that the Commission issue the abandonment authorization necessary to reflect the expiration of the sales contract between Texas Gas and ANR.

It is asserted that ANR's sales have declined dramatically in recent years and that deliverability on ANR's system far exceed current and projected future demands. Indicative of this situation, ANR and Texas Gas note that ANR purchased very small quantities of gas from Texas Gas in 1985, no gas in 1986, and anticipates no gas purchase from Texas Gas in 1987. ANR and Texas Gas assert that the requested abandonment would permit ANR to permanently discontinue purchasing gas it no longer requires and relieve it from associated demand charge and minimum bill obligations in excess of $7,000,000 per year.

*Comment date:* June 2, 1987, in accordance with Standard Paragraph F at the end of this notice.

**6. Williams Natural Gas Company**

[Docket No. CP-87-301-000]

Take notice that on April 22, 1987, Williams Natural Gas Company (Applicant), formerly Northwest Central Pipeline Corporation P.O. Box 3288 Tulsa, Oklahoma 74101, filed in Docket No. CP-87-301-000 an application pursuant to section 7(b) of the Natural Gas Act for an order permitting and approving the abandonment in place of the Matfield compressor station located in Chase County, Kansas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant seeks authority to abandon in place six obsolete 1000 horsepower horizontal compressor units and appurtenant facilities installed at the Matfield station in 1929 and 1930. Applicant states that due to declining volumes in the Pampa field, it is no longer economical or necessary to operate the Matfield station.

Applicant further states that the cost of the proposed abandonment would be approximately $16,000 with an estimated salvage value of $50,000.

*Comment date:* June 2, 1986, in accordance with Standard Paragraph F at the end of this notice.

**Standard Paragraphs:**

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for

[Docket Nos. ER87-433-000 et al.]

## Otter Tail Power Company et al.; Electric Rate and Corporate Regulation Filings

May 20, 1987.

Take notice that the following filings have been made with the Commission:

### 1. Otter Tail Power Company

[Docket No. ER87-433-000]

Take notice that Otter Tail Power Company (Otter Tail) of Fergus Falls, Minnesota, on May 15, 1987, tendered for filing Amendment No. 2 to the Agreement between Otter Tail and Cooperative Power Association.

Amendment No. 2 allows for amended loss figures, outlet facilities, points of input and additional system facilities.

Otter Tail requests that the amended agreement (Amendment No. 2 to FPC No. 154) be permitted to be effective as of October 21, 1986.

Copies of the filing were served upon Cooperative Power Association, 14615 Lone Oak Road, Eden Prairie, MN 55344.

*Comment Date:* June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

### 2. Public Service Company of New Mexico

[Docket No. ER87-360-000]

Take notice that on May 8, 1987, Public Service Company of New Mexico (PNM) tendered for filing a clarification of certain components of the compensation provided under Service Schedule G to the PNM-Plains Electric Generation and Transmission Cooperative Inc. (Plains) Master Interconnection Agreement.

A copy of the amended filing was served upon Plains.

*Comment Date:* June 3, 1987, in accordance with Standard Paragraph E at the end of this notice.

### 3. Consolidated Edison Company of New York, Inc.

[Docket No. ER87-434-000]

Take notice that on May 14, 1987, Consolidated Edison Company of New York, Inc. ("Con Edison") tendered for filing, as an initial rate schedule, an agreement to sell system energy to Baltimore Gas & Electric Company ("BG&E"). The agreement provides for an energy reservation charge of $3 per megawatthour and an energy charge based upon incremental costs of generation.

Con Edison requests waiver of the notice requirements of § 35.3 of the Commission's regulations so that the Rate Schedule can be made effective as of May 11, 1987.

Con Edison states that a copy of this filing has been served by mail upon BG&E.

*Comment Date:* June 3, 1987, in accordance with Standard Paragraph E at the end of this document.

**Standard Paragraphs:**

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests must be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. GP87-45-000]

## Anadarko Petroleum Corp. et al.; Complaint

In the matter of Anadarko Petroleum Corporation and Pan Eastern Exploration Company, Petitioners, v. Brent Ranch Operating, Inc., Canadian Commercial Bank, Houston, Pipe Line Company, Intratex Gas Company, Liquid Energy Corporation, Northern Natural Gas Company, and South Cen-Tex Gas Company, Respondents.

May 20, 1987.

Take notice that on April 23, 1987 Anadarko Petroleum Corporation (Anadarko) and Pan Eastern Exploration Company (Pan East) (jointly-petitioners) filed in Docket No. GP87-45-000 a complaint pursuant to Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18, CFR 385.206 (1986), sections 7(b) and 7(c) of the Natural Gas Act (NGA), 15 U.S.C. 717f(b) and 717(c), and sections 311 and 504 of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3371 and 3414.

The complaint concerns oil well drilled and operated by certain respondents in the West Panhandle Field, Gray County, Texas, where gas wells owned by petitioners are located.

Petitioners state that Respondents have been responsible for or have participated in an unlawful diversion of reserves belonging to petitioners, which were committed or dedicated to interstate commerce, in violation of section 7(b) of the NGA. Petitioners state that the gas has been sold, in most instances, in excess of the maximum lawful price under section 104 of the NGPA in violation of section 504(a)(1) of the NGPA. Petitioners state that certain Respondents may have unlawfully sold and transported such gas in violation of section 7 of the NGA and/or section 311 of the NGPA.

Petitioners request the Commission to order Respondents to desist from: (1) The unlawful diversion of Petitioners' gas; (2) the unlawful sale of Petitioners' gas in excess of the maximum lawful price; and (3) the unlawful transportation of such gas. Petitioners also request the Commission to order Respondents to return to Petitioners volumes of gas equivalent to those unlawfully diverted and transported.

Under the Rules 206(b) and 213(a), 18 CFR 385.206(b) and 385.213(a), Respondents must file an answer to Petitioner's complaint with the Commission unless otherwise ordered by the Commission. Under Rule 213(e), 18 CFR 385.213(e), any person failing to answer a complaint may be considered in default, and all relevant facts stated in such complaint may be deemed admitted. Respondents shall file their answers with the Commission not later than 15 days after publication of this notice in the Federal Register.

Any person desiring to be heard or to protest said filing should file a protest or a motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214, 18 CFR 385.211 and 385.214. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. SA87-44-000]

## Florida Gas Transmission Co.; Petition for Adjustment

May 20, 1987.

Take notice that on April 28, 1987, Florida Gas Transmission Company (FGT) filed with the Commission, pursuant to section 502(c) of the Natural Gas Policy Act, a petition for adjustment from the requirements of § 281.204(b) of the Commission's regulations. FGT requests (1) an adjustment of § 218.204(b)(2) of the Commission's regulations to allow FGT to file a triennial update of its priority 2 entitlements in place of the annual update currently required, and (2) authorization to permit FGT to submit its triennial update of its priority 2 entitlements on October 15, in lieu of the current September 15 deadline, with a designated effective date of November 15.

FGT claims that such relief is necessary to prevent special hardships and an unfair distribution of burdens because of the unnecessary work and expense the current requirements impose on FGT. Specifically, FGT states that the preparation of the annual update required by § 281.204(b)(2) involves substantial time and expense on the part of agricultural users of gas on FGT's system, FGT's customers, FGT and FGT's Data Verification Committee (DVC). FGT also claims that a triennial update would coincide with the DVC's triannual meetings to review the requirements of its customers.

Any person desiring to be heard or to protest this petition for adjustment should file a motion to intervene or protest in accordance with Rule 214 or 211 of the Commission's rules of practice and procedure. All motions to intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, within 15 days after publication of the notice in the **Federal Register**. All protests will be considered by the Commission but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with Rule 214. Copies of the petition filed in this proceeding are on file with the Commission and available for public inspection.

## ENVIRONMENTAL PROTECTION AGENCY

[OPP-100042; FRL-3294-8]

## Development Planning and Research Associates; Transfer of Data

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This is a notice to certain persons who have submitted information to EPA in connection with pesticide information requirements imposed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Development Planning and Research Associates (DPRA) has been awarded a contract to perform work for the EPA Office of Pesticide Programs, and will be provided access to certain information submitted to EPA under FIFRA and the FFDCA. Some of this information may have been claimed to be confidential business information (CBI) by submitters. This information will be transferred to DPRA as authorized by 40 CFR 2.307(h) and 2.306(h)(2), respectively. This action will enable DPRA to fulfill the obligations of the contract and serves to notify affected persons.

**DATE:** DPRA will be given access to this information no sooner than June 1, 1987.

**FOR FURTHER INFORMATION CONTACT:**

By mail: William C. Grosse, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Room 222, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-2613).

**SUPPLEMENTARY INFORMATION:** Under Contract No. 68-02-4272, DPRA will provide economic analysis of proposed regulatory options on various pesticide chemicals and the development of a data base for analysis of the benefits of pesticide usage. This contract involves no subcontractor.

The Office of Pesticide Programs has determined that access by DPRA to information on all pesticide chemicals is necessary to the performance of this contract.

Some of this information may be entitled to confidential treatment. The information has been submitted to EPA under sections 3, 6, and 7 of FIFRA and obtained under sections 408 and 409 of the FFDCA.

In accordance with the requirements of 40 CFR 2.307(h)(2), the contract with DPRA prohibits use of the information for any purpose other than purpose(s) specified in the contract; prohibits disclosure of the information in any form to a third party without prior written approval from the Agency or affected business; and requires that each official and employee of the contractor sign an agreement to protect the information from unauthorized release. In addition, DPRA is required to submit for EPA approval a security plan under which any CBI will be secured and protected against unauthorized release or compromise. No information will be provided to this contractor until the above requirements have been fully satisfied. Records of information provided to this contractor will be maintained by the Project Officer for this contract in the EPA Office of Pesticide Programs. All information supplied to DPRA by EPA for use in connection with this contract will be returned to EPA when DPRA has completed its work.

Dated: May 12, 1987.

## Life Systems, Inc.; Transfer of Data

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This is a notice to certain persons who have submitted information to EPA in connection with pesticide information requirements imposed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Life Systems, Inc. has been awarded a contract to perform work for the EPA Office of Toxic Substances, and will be provided access to certain information submitted to EPA under FIFRA and FFDCA. Some of this information may have been claimed to be confidential business information (CBI) by submitters. This information will be transferred to Life Systems, Inc. as authorized by 40 CFR 2.307(h) and 40 CFR 2.306(h)(2), respectively. This action will enable Life Systems, Inc. to fulfill the obligations of the contract and serves to notify affected persons.

**DATE:** Life Systems, Inc. will be given access to this information no sooner than June 1, 1987.

**FOR FURTHER INFORMATION CONTACT:**
By mail:
William C. Grosse, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.
Office location and telephone number: Rm. 222, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-2613).

**SUPPLEMENTARY INFORMATION:** Under Contract No. 68-02-4228, Life Systems, Inc., 24755 Highpoint Road, Cleveland, OH 44122, will provide technical support to EPA's Office of Toxic Substances by preparing assessments and developing toxicological profiles on chemicals listed in the April 17, 1987, **Federal Register** "Notice of the First Priority List of Hazardous Substances to be the Subject of Toxicological Profiles." This contract involves no subcontractors.

The Office of Toxic Substances and the Office of Pesticide Programs have jointly determined that the contract herein described involves work that is being conducted in connecton with FIFRA, in that pesticide chemicals will be the subject of certain evaluations to be made under this contract. These evaluations may be used in subsequent regulatory decisions under FIFRA.

Some of this information may be entitled to confidential treatment. The information has been submitted to EPA under sections 3, 6, and 7 of FIFRA and obtained under sections 408 and 409 of the FFDCA.

In accordance with the requirements of 40 CFR 2.307(h)(2), the contract with Life Systems, Inc. prohibits use of the information for any purpose other than purpose(s) specified in the contract; prohibits disclosure of the information in any form to a third party without prior written approval from the Agency or affected business; and requires that each official and employee of the contractor sign an agreement to protect the information from unauthorized release. In addition, Life Systems, Inc. is required to submit for EPA approval a security plan under which any CBI will be secured and protected against unauthorized release or compromise. No information will be provided to this contractor until the above requirements have been fully satisfied. Records of information provided to this contractor will be maintained by the Project Officer for this contract in the EPA Office of Toxic Substances. All information supplied to Life Systems, Inc. by EPA for use in connection with this contract will be returned to EPA when Life Systems, Inc. has completed its work.

Dated: May 12, 1987.

Douglas D. Campt,
*Director, Office of Pesticide Programs.*

## Research Triangle Institute, Inc.; Transfer of Data

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This is a notice to certain persons who have submitted information to EPA in connection with pesticide information requirements imposed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Research Triangle Institute, Inc. (RTI) has been awarded two contracts to perform work for the EPA Office of Pesticide Programs and the Office of Policy and Program Evaluation, and will be provided access to certain information submitted to EPA under FIFRA and FFDCA. Some of this information may have been claimed to be confidential business information (CBI) by submitters. This information will be transferred to RTI consistent with the requirements of 40 CFR 2.307(h) and 40 CFR 2.308(h)(2), respectively. This action will enable RTI to fulfill the obligations of the contract and serves to notify affected persons.

**DATE:** RTI will be given access to this information no sooner than June 1, 1987.

**FOR FURTHER INFORMATION CONTACT:** By mail: William C. Grosse, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 222, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-2613).

**SUPPLEMENTARY INFORMATION:** Under Contract No. 68-01-7033, RTI will identify the technical options and other relevant information available to the Agency on the disposal activities for the pesticides—Dinoseb, EDB, and 2,4,5-T/Silvex.

Under Contract No. 68-01-7350, RTI will maintain the Tolerance Assessment System, a computerized system that is designed to provide a comprehensive and dependable description of potential exposure to pesticides.

These contracts involve no subcontractors.

The Office of Policy and Program Evaluation and the Office of Pesticide Programs have jointly determined that access by RTI to information on certain pesticide chemicals submitted in connection with FIFRA, will be the subject of certain evaluations to be made under these contracts. These evaluations may be used in subsequent regulatory decisions under FIFRA.

Some of this information may be entitled to confidential treatment. The information has been submitted to EPA under sections 3, 6, and 7 of FIFRA and obtained under sections 408 and 409 of the FFDCA.

In accordance with the requirements of 40 CFR 2.307(h)(2), the contracts with RTI prohibit use of the information for any purpose other than purpose(s) specified in the contract(s); prohibit disclosure of the information in any form to a third party without prior written approval from the Agency or affected business; and require that each official and employee of the contractor sign an agreement to protect the information from unauthorized release. In addition, RTI is required to submit for EPA approval a security plan under which any CBI will be secured and protected against unauthorized release or compromise. No information will be provided to this contractor until the above requirements have been fully satisfied. Records of information provided to this contractor will be maintained by the Project Officer of each contract in the EPA Office of Pesticide Programs and the Office of Policy and Program Evaluation. All information supplied to RTI by EPA for use in connection with this contract will be returned to EPA when RTI has completed its work.

Dated: May 12, 1987.

## Certain Companies Applications to Register Pesticide Products

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice..

**SUMMARY:** This notice announces receipt of applications to register pesticide products containing active ingredients not included in any previously registered product pursuant to the provisions of section 3(c)(4) of the

Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

**DATE:** Comment by June 26, 1987.

**ADDRESS:** By mail submit comment identified by the document control number [OPP–30281] and the registration/file number, attention Product Manager (PM) named in each application at the following address: Information Services Section (TS–757C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, In person, bring comments to: Environmental Protection Agency, Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Registration Division (TS–767C), Attn: (Product Manager (PM) named in each registration), Office of Pesticide Programs 401 M St., SW., Washington, DC 20460.

In person: Contact the PM named in each registration at the following office location/telephone number:

| Product manager | Office location telephone No. | Address |
|---|---|---|
| PM 17—Arturo Castillon. | Rm. 207, CM#2, (703–557–2690). | EPA 1921 Jefferson Davis Hwy., Arlington, VA 22202. |
| PM 15—George LaRocca | Rm. 204, CM#2, (703–557–2400) | Do. |
| PM 32—Jeff Kempler | Rm. 711, CM#2, (703–557–2854) | Do. |

**SUPPLEMENTARY INFORMATION:** EPA received applications as follows to register pesticide products containing active ingredients not included in any previously registered product pursuant to the provisions of section 3(c)(4) of FIFRA. Notice of receipt of these applications does not imply a decision by the Agency on the applications.

**I. Products Containing an Active Ingredient Not Included in Any Previously Registered Product**

*1. File Symbol: 59625–E.* Applicant: Blizzard System, Inc., 208 S. Guadalupe, Redonda Beach , CA 90277. Product name: Liquid Nitrogen. Insecticide/Termiticide. Active ingredient: Liquid nitrogen 100%. Proposed classification/Use: General. For the control of drywood termites. (PM 17)

*2. File Symbol: 10182–REO.* Applicant: ICI Americas, Inc., Agricultural Chemical Div., Wilmington, DE 19897. Product name: PP 321 1E Insecticide. Insecticide. Active ingredient: (±)-Cyano-(3-phenoxyphenyl) (±)-cis-3-(Z-2-chloro-3,3,3-trifluoroprop-l-enyl)-2,2-dimethycyclopropanecarboxylate 13.1%. Proposed classification/Use: Restricted. For control of certain pests on greenhouse-grown ornamental trees and shrubs. For use in non-food areas of homes, food handling establishments, hospitals, restaurants, school, and nursing homes. (PM 15)

*3. File Symbol: 464–AEN.* Applicant: Dow Chemical Co., PO Box 1706, Midland, MI 48674. Product name: Antimicrobial DTEA, Technical. Disinfectant. Active ingredient: 2-(Decylthio)ethanamine 99.8%. Proposed classification/Use: None. For manufacturing use only. (PM 32)

*4. File Symbol: 464–ARO.* Applicant: Dow Chemical Co. Product name: Antimicrobial DTEA 15%. Disinfectant. Active ingredient: 2-(Decylthio)ethanamine, hydrochloride salt 15%. Proposed classification/Use: General. For the control of bacterial, fungal, and algal slimes in recirculating cooling water systems and auxiliary and waste water systems. (PM 32)

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register**. The procedure for requesting data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the Program Management and Support Division (PMSD) office at the address provided from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file, telephone the PMSD office (703–557–3262), to ensure that the file is available on the date of intended visit.

**Authority:** 7 U.S.C. 136.

[PP 1G2453/T541; FRL-3208-1]

## Mefluidide; Renewal of Temporary Tolerances

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has renewed temporary tolerances for residues of the plant growth regulator mefluidide in or on certain raw agricultural commodities.

**DATE:** These temporary tolerances expire March 1, 1988.

**FOR FURTHER INFORMATION CONTACT:**
By mail:

Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1800).

**SUPPLEMENTARY INFORMATION:** EPA issued a notice, which was published in the Federal Register of March 27, 1985 (50 FR 12077), stating that temporary tolerances had been renewed for residues of the plant growth regulator mefluidide (N-[2,4-Dimethyl-5-[[(trifluoromethyl)-sulfonyl]amino]phenyl]acetamide) in or on the raw agricultural commodities pasture grass and pasture grass hay at 10 parts per million (ppm); milk at 0.01 ppm; meat of cattle, sheep, goats, and horses at 0.01 ppm; fat of cattle, sheep, goats, and horses at 0.02 ppm; and meat byproducts of cattle, sheep, goats, and horses at 0.3 ppm.

These tolerances were renewed in response to pesticide petition PP 1G2453, submitted by 3M Company, Agricultural Products, 3M Center, Building 223-1N-05, St. Paul, MN 55144.

The company has requested a 1-year renewal of the temporary tolerances to permit the continued marketing of the above raw agricultural commodities when treated in accordance with the provisions of experimental use permit 7182-EUP-22, which is being renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95-396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that a renewal of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been renewed on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. 3M Company must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance, and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These tolerances expire March 1, 1988. Residues not in excess of this amount remaining in or on the above raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary

tolerances. These tolerances may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

**Authority:** 21 U.S.C. 346a(j).

Dated: May 13, 1987.

## Polyester of Carbomonocyclic Diacid and Alkylene Glycols Premanufacture Notice

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of November 13, 1983 (48 FR 21722). In the Federal Register of November 11, 1984, (49 FR 46066)(40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of one such PMN and provides the summary.

**DATES:** Close of Review Period: Y87–146—June 3, 1987.

**FOR FURTHER INFORMATION CONTACT:** Stephanie Roan, Premanufacture Notice Management Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–611, 401 M Street SW., Washington, DC 20460, (202) 382–3725.

**SUPPLEMENTARY INFORMATION:** The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemption received by EPA. The complete non-confidential document is available in the Public Reading Room NE–G004 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

**Y 87–146**

*Manufacturer.* Confidential.

*Chemical.* (G) Polyester of carbomonocyclic diacid and alkylene glycols.

*Use/Production.* (S) Industrial formed articles. Prod. range: Confidential.

Dated: May 15, 1987.

## California Department of Food and Agriculture Receipt of Application for an Emergency Exemption To Use Carbaryl; Solicitation of Public Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received a request for an emergency exemption from the California Department of Food and Agriculture (hereafter referred to as the "Applicant") to use the active ingredient carbaryl (CAS 63–25–2) to control filbert moths on 3,500 acres of pomegranates in California. This use of carbaryl has been authorized in three previous years and a complete application for registration of this use and/or a petition for tolerances for residues in or on pomegranates has not been submitted to the Agency, therefore, in accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this exemption.

**DATE:** Comments must be received on or before June 11, 1987.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP–180738" should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail:

Libby Pemberton, Registration Division (TS–767C), Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 716, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–1806).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any provisions of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption to permit the use of carbaryl, manufactured by Union Carbide Agricultural Products Company as Sevin, EPA Reg. No. 264–316, on pomegranates to control filbert moths. Information in accordance with 40 CFR Part 166 was submitted as part of this request.

According to the Applicant, while methomyl is available for use on pomegranates, use of methomyl over the past few years has shown that methomyl is not effective in controlling the filbert moth.

According to the Applicant, with the use of carbaryl the percentage of crop loss is expected to be approximately 5 percent. Without the use of carbaryl the percentage of crop loss due to the filbert moth and its larvae would range from 40 to 100 percent. A 40 percent loss would

amount to approximately $3 million for the 3,500 acres involved.

The Applicant plans to treat up to 3,500 acres using 35,000 pounds of product. A maximum to two applications will be made by aerial and ground application equipment. Applicants will not be made within 30 days of harvest.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of receipt of an application for a specific exemption proposing use of a pesticide which has been requested or granted in any 3 previous years and a complete application for registration of that use and/or a petition for tolerance for residues in or on the commodity has not been submitted to the Agency. Such notice provides for the opportunity for public comment on the application. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above. The comments must be received on or before June 11, 1987, and should bear the identifying notation "OPP-180738." All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, Crystal Mall No. 2, at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the California Department of Food and Agriculture.

Dated: May 15, 1987.

**Edwin F. Tinsworth,**

*Director, Registration Division, Office of Pesticide Programs.*

## Receipt of Applications for Emergency Exemptions From Virginia and Pennsylvania To Use Dinoseb; Solicitation of Public Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of receipt.

---

**SUMMARY:** EPA has received specific exemption requests from the Virginia Department of Agriculture and Consumer Services and the Pennsylvania Department of Agriculture (hereafter referred to as "Virginia," Pennsylvania," or "Applicants") to use dinoseb (CAS 88-85-7). Virginia proposes to use dinoseb on peas, cumcumbers, potatoes, snap beans and lima beans to control broadleaf weeds. Pennsylvania proposes to use dinoseb on peas, snap beans, and lima beans to control broadleaf weeds. EPA, in accordance with 40 CFR 166.24, is required to issue a notice of receipt and, time permitting, to solicit public comment before making the decision whether to grant the exemptions.

**DATE:** Comments must be received on or before June 11, 1987.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP-180737" should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), 87P-666 Office of Pesticide Programs, Environmental Protection Agency, 401 M. St. SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CRF Part 2. A copy of the comment that does not contain Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Donald R. Stubbs, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. Office location and telephone number: Rm. 716, Crystal Mall 2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-7700).

**SUPPLEMENTARY INFORMATION:**

### I. Background

Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136s), the Administrator may, at his discretion, exempt a State or Federal agency from any provision of FIFRA if he determines that emergency conditions exist which require such exemption. The applicable EPA regulations for emergency exemptions are set forth at 40 CFR Part 166.

The Department of Agriculture and Consumer Services for the state of Virginia, and the Department of Agriculture for the state of Pennsylvania by letters received April 27 and May 1, 1987, respectively, have requested the Administrator to issue specific exemptions for the use of dinoseb on peas, and snap beans, cucumbers, and potatoes in Virginia and peas, snap beans, and lima beans in Pennsylvania to control broadleaf weeds.

On October 7, 1986, EPA suspended all registrations of dinoseb products (51 FR 36634, October 14, 1986). The basis for the suspension of all dinoseb registration was significant risk of developmental toxicity and other adverse health effects to applicators and other populations exposed to dinoseb.

Subsequently four registrants submitted requests for an expedited suspension hearing on the question of whether or not sale, distribution, or use of dinoseb would pose an imminent hazard during the time required to conduct a cancellation hearing. These registrants withdrew their expedited hearing requests on the question of imminent hazard on October 30, 1986, resulting in the immediate entry, pursuant to the terms of the Agency's October 7 decision, of a final order suspending the registrations of their dinoseb products during the pendency of the cancellation hearing. The Applicant's specific exemption requests are therefore, subject to EPA's Subpart D regulations, 40 CFR 164.130 to 164.133, in addition to the regulations at 40 CFR Part 166 governing the issuance of exemptions under section 18. Subpart D provides that any application for an emergency exemption under section 18 for a pesticide use that has been suspended or cancelled shall be considered a petition for reconsideration of the prior suspension or cancellation order. The Administrator will determine that reconsideration is warranted if, among other things, he finds that the Applicant has presented substantial new evidence which may materially affect the prior suspension or cancellation order (40 CFR 164.131(c)). If the Administrator finds that the substantial new evidence test in 40 CFR 164.131 is met, the Subpart D rules require a formal hearing to determine whether a modification of the suspension or cancellation order is justified (40 CFR 164.131(c)).

Should the Administrator decide to lift the suspension of certain dinoseb registrations, the Agency would then

determine whether and under what terms and conditions dinoseb products might be used in accordance with the terms of the Administrator's order and 40 CFR Part 166.

**II. Emergency Condition**

The applicants state that there are a number of herbicides registered for use in peas, snap beans, lima beans, and potatoes. According to the Applicants, trifluralin (Treflan), pendimethalin (Prowl), and metolachlor (Dual) are mainly for control of annual grasses, and provide only fair to good control of a few broadleaf weeds. According to the Applicants, chloramben (Amiben) has a high water solubility which results in rapid leaching in coarse-textured soils low in organic matter, common in Virginia and Pennsylvania. Rapid leaching results in poor crop tolerance and short-term, erratic weed control. The Applicants state that bentazon (Basagran) controls only certain seedling broadleaf weeds and frequently causes crop injury which reduces yield and/or delays harvest. Harvest delays are not tolerable because planting is rigidly scheduled to stagger harvest.

According to the Applicants NCBP gives postemergence control of Canada thistle and controls or suppresses lambsquarters, pigweed, smartweed, sowthistle, fanweed, annual morningglory and nightshade. However, the Applicants point out that this compound is in the phenoxy family of herbicides, so some termporary twisting of some pea varieties may occur. In addition, spray drift has to be avoided as it may injure other broadleaf crops and ornamentals. The Applicants point out that use of MCPB at temperatures above 80° F can cause crop injury. They also states that MCPB works best early in the season when weed are small and application use parameters described limit its use in peas in Virginia and Pennsylvania.

EPTC (Eptam), labeled for use in snap beans and potatoes, and DCPA (Dacthal), labeled for use in snap beans, cucumbers and potatoes, are primarily for control of annual grasses and control few broadleaf weeds according to the Applicants.

According to Virginia, linuron (Lorox) and metribuzin (Lexone, Sencor) are registered on potatoes for broadleaf control. Linuron only controls a few broadleaf weeds and has little activity against mustard species and jimsonweed according to Virginia. Metribuzin controls most problem weeds except wild radish which is found in at least 33% of Virginia potato fields according to Virginia. In addition, Virginia points out that Metribuzin cannot be used on several sensitive potato varieties; these varieties make up 80% of Virginia potatoes.

According to the Applicants mechanical cultivation only controls weeds between the rows and weeds in the row can significantly reduce yields and result in fields that cannot be harvested. Cultivation cannot be done late in the season after the crop reaches a certain height, further limiting its effectiveness. According to the Applicants, mechanical cultivation cannot be used in peas because the rows are narrow.

Virginia claims that without the use of dinoseb, pea, lima bean, snap bean, and potato growers can expect at $4.93 million dollar loss. Pennsylvania claims that without the use of dinoseb, peas growers will lose $440,000, lima bean growers $85,500 and snap bean growers $669,600 in yield losses and an additional $100,000 in peas, $90,000 in snap beans, and $11,250 in lima beans due to increased herbicide costs. Total loss to pea, snap bean and lima bean growers without the use of dinoseb, according to Pennsylvania, is $1,396,350.

**III. Proposed Use**

Virginia requested emergency exemptions for use of dinoseb on peas, lima beans, snap beans, potatoes, and cucumbers between April and September 1987. Pennsylvania requested emergency exemption for use of dinoseb on peas, snap beans and lima beans between March 1 and June 1, 1987. The Applicants' proposed specific exemption programs involve use of the following dinoseb products: Basanite, Caldon, Chemox General, Chemox PE, Chemsect DNBP, Dinitro, Dinitro-3, Dinitro General, Dynamyte, Elgetrol 318, Gebutox, Hel-Fire, Kiloseb, Nitropone C, Permerge 3, Sinox General, Subitex, Unicrop DNBP, Vertac Dinitro Weed Killer 5, Vertac General Weed Killer, and Vertac Selective Weed Killer.

Virginia proposes to use a total of 58,000 pounds active ingredient on 22,000 acres of crops. The proposed uses involve use of 2,000 pounds active ingredient to treat 1,000 acres of peas, 2,000 pounds active ingredient to treat 500 acres of lima beans, 24,000 pounds of active ingredient to treat 8,000 acres of snap beans, 15,000 pounds of active ingredient to treat 5,000 acres of potatoes, and 15,000 pounds of active ingredient to treat 7,500 acres of cucumbers.

Dinoseb would be applied at a rate of 0.75 to 3 pounds active ingredient per acre to peas; 0.56 to 4.5 pounds active ingredient per acre to lima beans; 3 to 4.5 pound of active ingredient to snap beans; 3 pounds active ingredient to potatoes; and 1 to 3 pounds active ingredient to cucumbers. A maximum of 2 applications would be made; one preemergence and the other postemergence to peas and lima beans. A single preemergence application will be made to snap beans, potatoes and cucumbers.

Other restrictions to be imposed by the State of Virginia include: (1) Application by ground row crop sprayer; (2) use by persons certified by the State of Virginia in private or commercial categories; (3) no mixing/loading/application by females; (4) mixer/loader/applicator must wear tyvek suit and chemical resistant gloves; (5) do not mix with liquid fertilizers; (6) no aerial application; and (7) a 40-day pre-harvest interval would be observed.

Pennsylvania proposes to use a total of 56,295 pounds of active ingredient to treat 10,750 acres of crops. The proposed uses involve use of 25,500 pounds active ingredient to treat 4,000 acres of peas, 3,795 pounds active ingredient to treat 750 acres of lima beans, and 27,000 pounds of active ingredient to treat 6,000 acres of snap beans.

Dinoseb would be applied at a rate of 0.75 to 3 pounds active ingredient per acre to peas; 0.56 to 4.5 pounds active ingredients to snap beans. A maximum of 2 applications would be made; one preemergence and the other postemergence to peas and lima beans. A single preemergence application will be made to snap beans. Other restrictions to be imposed by the State of Pennsylvania include: (1) Dinoseb may only be sold to growers to green peas, snap beans, and lima beans in Pennsylvania in a quantity not to exceed that required to treat this acreage for those crops at the maximum application rates and that dealers must maintain records of sales to growers; (2) only certified applicators may apply dinoseb, other persons, even if they are operating under the direct supervision of a certified applicator, may not use dinoseb; (3) women of childbearing age, i.e., under the ge of 45, may not be involved in mixing, loading, or any aspect of dinoseb application; (4) a label warning which states: women of childbearing age may not use the product; all reasonable efforts should be made to minimize indirect exposures to women of child-bearing age; the product also poses risks to male reproduction; is acutely toxic and the product may be

applied only by certified applicators; (5) aerial spraying is prohibited; (6) mixing and loading of dinoseb is prohibited except from closed systems; (7) ground application is prohibited except by the "barrel sucker"/ground boom/tractor system; (8) mixer/loaders and applicators must wear chemical resistant disposal coveralls (Tyvek® suits), rubber boots, and chemically resistant gloves when mixing or loading dinoseb (Applicators or other personnel may remove such protective clothing immediately before entering the tractor cab to avoid cab contamination, but must carry an unused set of gloves and coveralls in their cabs, to be used in the event of spraying equipment malfunction and repair during application); (9) that dinoseb be applied to a maximum of 80 acres per day applicator; (10) ground application is prohibited when wind conditions exceed ten miles per hour; and (11) tractor cabs must be closed and equipped with positive pressure ventilation systems.

## IV. Notifications and Comment

This notice does not constitute a decision by the Agency on the applications submitted. The Agency's final decision on the specific exemption requests from Virginia and Pennsylvania will be based on whether or not there is sufficient new information to open Subpart D hearings and, if so, the outcome of the Subpart D hearings and compliance with the regulations governing section 18.

The regulations governing section 18 require publication of a notice in the Federal Register of receipt of an application that proposed any emergency use of a pesticide if such pesticide were the subject of a suspension notice under section 6(c) of FIFRA. The regulations also provide for the opportunty for public comment on the application (40 CFR 166.24).

Interested persons may submit written views on the applications for emergency exemption to the Program Management and Support Division at the address given above.

The Agency will review and consider all comments received during the comment period.

Dated: May 13, 1987.

**Edwin F. Tinsworth,**

BILLING CODE 6560-50-M

[OPP-180736; FRL-3226-2]

## Minnesota Department of Agriculture; Receipt of Application for Emergency Exemption To Use (±)-3-[4,5-Dihydro-4-Methyl-4-(1-Methylethyl)-5-Oxo-1-H-Imidazol-2-yl]-5-Ethyl-3-Pyridinecarboxylic Acid Solicitation of Public Comment

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has received a request for an emergency exemption from the Minnesota Department of Agriculture (hereafter referred to as the "Applicant") to use the active ingredient (±)-2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1-*H*-imidazol-2-yl]-5-ethyl-3-pyridinecarboxylic acid (Pursuit ™) to control Jerusalem artichoke on 25,000 acres of soybeans in Minnesota. Pursuit ™ contains an unregistered active ingredient and, therefore, in accordance with 40 CFR 166.24, EPA is soliciting comment before making the decision whether or not to grant this exemption.

**DATE:** Comments must be received on or before June 1, 1987.

**ADDRESS:** Three copies of written comments, bearing the identification notation "OPP-180736" should be submitted by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail:

Libby Pemberton, Registration Division (TS-767C), Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 236, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-1806).

**SUPPLEMENTARY INFORMATION:** Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any provisions of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption to permit the use of an unregistered herbicide, (±)-2-[4,5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1-*H*-imidazol-2-yl]-5-ethyl-3-pyridinecarboxylic acid (CAS 81335-77-5), manufactured as Pursuit ™, by American Cyanamid Company, on soybeans in Minnesota. Information in accordance with 40 CFR Part 166 was submitted as part of this request.

The Applicant indicates that Jerusalem artichoke poses a serious threat to the Minnesota soybean industry due to resultant reductions in yields. This weed, if not controlled produces numerous tubers which lie dormant over winter and produce plants the following spring. Only two herbicides (Paraquat and Roundup) are labelled for control of Jerusalem artichokes in Minnesota soybeans, according to the Applicant. Neither of these herbicides are satisfactory, according to the Applicant, due to required delays in planting or ineffective application techniques.

The Applicant indicates that without adequate control a 30 percent yield loss for soybeans due to this weed will result. This would amount to approximately $650,000. Producers are reporting that infestations are increasing, and weed scientists are concerned that the weed will become more widespread in the absence of effective control measures.

Pursuit ™ will be applied by ground postemergence to the crop at a rate of 0.06 pound active ingredient per acre.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 require publication of receipt of an application for a specific exemption proposing use of a new chemical (i.e., an active ingredient not contained in any currently registered pesticide). Such notice provides for the opportunity for public comment on the application.

An expedited comment period of 5 days is provided to facilitate decision making on the specific exemption in

time for the proposed use season (May 15 through June 30, 1987).

Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above. The comments must be received on or before June 1, 1987, and should bear the identifying notation "OPP–180736." All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, Crystal Mall No. 2, at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by the Minnesota Department of Agriculture.

Dated: May 11, 1987.

## FEDERAL MARITIME COMMISSION

[Docket No. 87–16]

### Halstead Industrial Products, Inc. v. Sea-Land Service, Inc.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Halstead Industrial Products, Inc. (Halstead) against Sea-Land Service, Inc. (Sea-Land) was served May 20, 1987. Halstead alleges that Sea-Land has violated section 10(b)(1), Shipping Act of 1984 (46 U.S.C. 1709) by its charging, demanding, collecting or receiving greater compensation for the transportation of certain commodities from New Orleans, LA to ports in the United Kingdom, than the rates that are shown in its applicable tariffs.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the presiding officer in this proceeding shall be issued by May 20, 1988, and the final decision of the Commission shall be issued by September 20, 1988.

Joseph C. Polking,

*Secretary.*

## FEDERAL RESERVE SYSTEM

### Formation of, Acquisition by, or Merger of Bank Holding Companies; Hemet Bancorp

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received no later than June 18, 1987.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Hemet Bancorp*, Hemet, California; to acquire 25 percent of the voting shares of Riverside National Bank, Riverside, California.

Board of Governors of the Federal Reserve System, May 20, 1987.

James McAfee,

*Associate Secretary of the Board.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Agency for Toxic Substances and Disease Registry; Availability of Funds for FY 1987 Cooperative Agreements To Support a Demonstration Program for State Health Departments To Conduct Health Assessments

#### Introduction

The Agency for Toxic Substances and Disease Registry (ATSDR) announces the availability of funds for Fiscal Year 1987 for Cooperative Agreements to build State capacity for dealing with

health issues related to hazardous substances in the environment. This will be accomplished through a demonstration program to determine whether or not it is feasible for States to conduct health assessments of hazardous waste sites. ATSDR will participate and assist States in determining sites to be investigated, design of appropriate protocols, training of personnel, analysis of data and dissemination of information. Application is being made for a Federal Catalog of Domestic Assistance number.

**Authorizing Legislation**

This program is authorized under section 104(d)(1) and section 104(i)(15) of Pub. L. 96–510, of Comprehensive Environmental Response, Compensation, and Liability Act of 1980 as amended; Executive Order 12580, "Superfund Implementation", section 2(i); and Title 31 U.S.C. 6305.

**Background**

Both the Superfund Amendments and Reauthorization Act of 1986 and the Resource Conservation and Recovery Act Amendments of 1984 mandate ATSDR to conduct a health assessment of hazardous wastes sites or RCRA facilities.

An ATSDR health assessment is the evaluation of data and information on the release of hazardous substances into the environment in order to: assess any current or future impact on public health, develop health advisories or other related recommendations, and identify studies or actions needed to evaluate and prevent human health effects. It is conducted by an ATSDR multidisciplinary team that typically consists of specialists in medicine, epidemiology, toxicology, public health and environmental engineering. The information evaluated normally consists of information about the site's background, its current status, environmental sampling data, toxicity estimates, pathways of possible human exposure, assessments of toxicant migration, and populations of persons at risk of exposure. The resulting analysis of the public health implications of the site and attendant health recommendations, which are based on professional judgment and weight of evidence, is provided to the agency that requested it, usually EPA, and is made available to the public. The annual number of requests for ATSDR health assessments continues to grow as sites are added to the EPA's National Priorities List.

State health departments have the principal responsibility within the State for the protection of public health through regulatory authority and the delivery of public health program services. As a result they have existing expertise in both disease surveillance and epidemiology. This expertise has developed over the tyears as a direct response to the problems they are charged with resolving. This expertise can and has been used to address health problems related to hazardous substances in the environment. Historically, there has been a long series of environment health problems requiring the response and cooperation of State health departments and Federal health agencies. In the hazardous waste area, pollution has the potential to threaten not only the health of the worker but that also of the general public. Improving response of these continuing events requires strengthening State capabiity in terms of technologic expertise, experienced staff, and uniform methodological approaches.

Therefore, the purpose of this cooperative agreement is to establish a three year demonstration project to determine whether or not it is feasible for State health departments to conduct health assessments in accordance with requirements specified in the Superfund Amendments and Reauthorization Act of 1986, Section 110. The objective is to use this approach to enhance State capacity to respond to health issues related to toxic substances in the environment. The effectiveness of this approach will be evaluated to determine if it should be continued beyond the initial three year period.

**Eligible Applicants**

Because the State health departments have the principal responsibility within each State for the protection of public health through regulatory authority and the delivery of public health services, the only eligible applicants are the official health agencies of States, including the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Federated State of Micronesia, the Republic of the Marshall Islands, the Republic of Palau, the Northern Mariana Islands and the American Samoa.

Applicants will be selected from two categories:

1. State health departments with experience in evaluating human exposures to toxic substances in the environment through multi-media exposure pathways and with existing professional staff capable of conducting health assessments.

2. States health departments with little or no experience in evaluating human exposures to toxic substances in the environment through multi-media exposure pathways or having limited professional staff, but who wish to expand or start a program.

**Availabilty of Funds**

A total of approximately $1,800,000 will be available in Fiscal Year 1987. It is anticipated that approximately six cooperative agreements will be funded. Individual project awards are expected to range from $200,000 to $300,000. At least two of these awards will be made to States with little or no existing program.

Is is expected that the cooperative agreements will be awarded on or about September 15, 1987, and will be funded for a 12-month budget period with a project period of three years.

Based upon the President's Fiscal Year 1988 Budget it is anticipated that approximately $2,000,000 will be available to continue the initial awards under this announcement and to award approximately four new awards.

**Review Requirements**

Applications are not subject to review as governed by Executive Order 12372, entitled, "Intergovernmental Review of Federal Programs".

**Where to Obtain Additional Information**

Further information on this project may be obtained from:

*Business*

Luther E. DeWeese, Grants Management Specialist, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road, Atlanta, GA 30305, Telephone 404–262–6575.

## Centers for Disease Control

### Cooperative Agreement for a Project To Study the Relationship of Infant Feeding Practices to Diarrheal Disease; Availability of Funds for FY 1987

The Centers for Disease Control announces the availability of funds in Fiscal Year 1987 for a cooperative

agreement to assist the Health Science Center, University of Texas, to study the relationship of infant feeding practices to diarrheal disease in Egypt. The Centers for Disease Control will collaborate in the formulation and evaluation of alternative approaches to studies of diarrheal diseases, including protocol development, review and on site assessment of progress and research activities, and assist in identification of resources and personnel necessary for project implementation. The Catalog of Federal Domestic Assistance Number is 13.283. This Program is authorized under section 307 of the Public Health Act (42 U.S.C. 24(a)) as amended.

Because of the unique previous experience of the Health Science Center, University of Texas in this project and stated desires of the Egyptian government and the joint U.S.-Egypt Working Group, assistance will be provided to that institution. This is not a formal request for applications and no other applications will be accepted. It is expected that approximately $350,000 will be available to support this project for 24 months. Application is not subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs.

Information may be obtained from Luther E. DeWeese, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, 255 East Paces Ferry Road NE., Room 321, Atlanta, Georgia 30305 telephone (404) 264-6750 or FTS 236-6758.

Dated: May 20, 1987.

Robert L. Foster,

*Acting Director, Office of Program Support, Centers for Disease Control.*

## Health Care Financing Administration

[HOA-011-N]

## Task Force on Long-Term Health Care Policies; Public Meeting

**AGENCY:** Health Care Financial Administration (HCFA), HHS.

**ACTION:** Notice of public meetings.

**SUMMARY:** In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), this notice announces two meetings of the Task Force on Long-Term Health Care Policies.

**DATES:** The first meeting to which this notice pertains will be held on June 11, 1987, from 8:30 a.m. to 5:00 p.m., and on June 12, 1987, from 8:30 a.m. to 1:00 p.m. E.D.T. The second meeting will be held on July 16, 1987, from 8:00 a.m. to 5:00 p.m., and on July 17, 1987, from 8:00 a.m. to 12:00 noon, E.D.T. The meetings will be open to the public.

**ADDRESSES:** The meeting in June will be held at the Twin Bridges Marriott, 333 Jefferson Davis Highway, Arlington, Virginia. The July meeting will be held at the Stouffer Concourse Hotel, 2399 Jefferson Davis Highway, Arlington, Virginia.

**FOR FURTHER INFORMATION CONTACT:** Dennis L. DeWitt, Executive Director, Task Force on Long-Term Health Care Policies, Room 4406, HHS North Building, 330 Independence Avenue, SW., Washington, DC 20201. (202) 245-0063.

**SUPPLEMENTARY INFORMATION:**

### Purpose

The Task Force on Long-Term Health Care Policies, established under section 9601 of the Consolidated Omnibus Budget Reconciliation Act of 1985, will evaluate current issues relating to private long-term care insurance. To ensure the evolution of sound private long-term care policies and to help foster consumer confidence in them, the Task Force will develop recommendations that can be used by State regulators, persons involved in the insurance industry, and consumers who may wish to purchase such policies.

The term "Long-term health care policy" means an insurance, or similar health benefits plan, that is designed for or marketed as providing (or making payment for) health care or related services (which may include home and community-based services), or both, over an extended period of time.

The Task Force on Long-Term Health Care Policies will report to the Secretary of Health and Human Services and to the Committee on Energy and Commerce of the House of Representatives, and the Committee on Labor and Human Resources concerning the development of insurance policies for long-term care that are privately marketed to individuals or groups. The Task Force will develop recommendations for long-term health care policies, including recommendations designed to: (1) Limit marketing and agent abuse for those policies; (2) assure the dissemination of information to consumers necessary to permit informed choice in purchasing the policies and to reduce the purchase of unnecessary or duplicative coverage; (3) assure that benefits provided under the policies are reasonable in relationship to premiums charged; and (4) promote the development and availability of long-term health care policies that meet these recommendations.

### Agenda

Agenda items for the June meeting will include Task Force discussion of employees and long-term care insurance, discussions of unresolved issues meriting Task Force consideration, and review of drafts of specific chapters of the Task Force final report.

Agenda items for the July meeting will include Task Force discussion of unresolved issues meriting Task Force discussion and review of drafts of specific chapters of the Task Force final report.

Agenda items are subject to change as priorities dictate.

(Sec. 10(a)(2) of Pub. L. 92-463, as amended (5 U.S.C. App. I, Sec. 1-15) and Sec. 9601 of Pub. L. 99-272 (42 U.S.C. 1395b note); 45 CFR Part 11))

Dated: May 21, 1987.

William L. Roper,

*Administrator, Health Care Financing Administration.*

## Public Health Service

### Statement of Organization, Functions, and Delegations of Authority; Alcohol, Drug Abuse, and Mental Health Administration

Part H, Chapter HM, Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA), of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (40 FR 36163-7, August 19, 1975, as amended by 47 FR 50361, November 5, 1982) is amended to reflect a reorganization of the National Institute on Alcohol Abuse and Alcoholism, ADAMHA. The reorganization accomplishes the following: (1) abolishes the Division of Extramural Research and the Division of Prevention and Research Dissemination; (2) establishes a Division of Basic Research and a Division of Clinical and Prevention Research; and (3) revises the functional statements for the Office of Scientific Affairs and the Division of Biometry and Epidemiology.

*Section HM-B, Organization and Functions,* is amended as follows:

(1) Delete the functional statement for the *Division of Extramural Research (HMCA)* and the *Division of Prevention and Research Dissemination (HMC2).*

(2) Add the following functional statements:

*Division of Basic Research (HMC3)*

(1) Plans, stimulates, develops, and supports programs of basic research on the multiple determinants and consequences of alcohol abuse and alcoholism, including biological, behavioral, biochemical, and neurological research; (2) collaborates with outside organizations in the conduct of basic studies related to alcohol abuse and alcoholism; (3) supports programs of training to increase the number and improve the competence and utilization of research scientists; (4) sponsors, develops, and participates in scientific conferences, meetings, and symposia to exchange information and to disseminate new knowledge; (5) prepares reports, summaries, and other materials concerned with various scientific aspects of alcohol abuse, and serves as a repository for special research materials; and (6) supports a full range of grants and contracts, including research centers.

*Division of Clinical and Prevention Research (HMC5)*

(1) Plans, stimulates, develops, and supports clinical programs on alcohol abuse and alcoholism which design and test the effectiveness of various prevention, early intervention, and treatment approaches; (2) collaborates with outside organizations in the conduct of studies related to prevention and treatment of alcohol abuse and alcoholism; (3) supports programs of training to increase the number and improve the competence and utilization of clinical and prevention research scientists; (4) sponsors, develops, and participates in scientific conferences, meetings, and symposia to exchange information and to disseminate new knowledge; (5) prepares reports, summaries, and other materials concerned with various clinical and prevention aspects of alcohol abuse and alcoholism, and serves as a repository for special research materials; and (6) supports a full range of grants and contracts, including research centers.

(3) Under *Office of Scientific Affairs (HMC16)*, delete the "and" before item 6, change the period at the end of a semi-colon, and add the following: "(7) collects, abstracts, stores, and disseminates program and scientific information on alcohol abuse and alcoholism; (8) prepares and disseminates the Alcohol and Health Report and other special reports in response to congressional, departmental, and programmatic needs for information; and (9) conducts conferences and workshops for the purpose of conveying up-to-date knowledge on alcoholism prevention, early intervention, treatment and rehabilitation to State and local governments, the private and voluntary sectors, and others engaged in alcohol-related work."

(4) Item (1) of the functional statement for the *Division of Biometry and Epidemiology (HMC4)* should be revised to begin: "Plans, develops, conducts, and supports . . . ". Also, change the period at the end of item (4) to a semicolon and add the following: "and (5) supports a full range of grants and contracts, including research centers."

Dated: May 18, 1987.

Robert E. Wisdom,

*Assistant Secretary for Health.*

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

### Office of Administration

[Docket No. N-87-1701]

### Submission of Proposed Information Collections to OMB

**AGENCY:** Office of Administration, HUD.

**ACTION:** Notices.

**SUMMARY:** The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

**ACTION:** Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: John Allison, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503

**FOR FURTHER INFORMATION CONTACT:** David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, telephone (202) 755-6050. this is not a toll-free number.

**SUPPLEMENTARY INFORMATION:** The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information (3) the description of the need for the information and its proposed use; (4) the agency form number, if aplicable; (5) what members of the public will be affected by the proposal; (6) how frequently information submissions will be required; (7) an estimate of the total number of hours needed to prepare the information submission; (8) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (9) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection relquirement is described as follows:

**Notice of Submission of Proposed Information Collection to OMB**

**Proposal:** Lease Requirements, 24 CFR 966.4
Office: Public and Indian Housing
Description of the need for the information and its proposed use: The information is needed to carry out statutory requirements for lease agreements between Public Housing Agencies and Public Housing tenants. It is used for rent redeterminations, terminations of tenancy, and PHA and tenant responsibility for the maintenance of the project and dwelling
Form Number: None
Respondents: State or Local Governments
Frequency of Response: Recordkeeping
Estimated Burden Hours: 174,000
Status: Reinstatement
Contact: Edward D. Whipple, HUD, (202) 426-0744; John Allison, OMB, (202) 395-6880.

**Proposal:** Housing Quality Analysis—Evaluation of the Housing Voucher Demonstration
Office: Policy Development and Research
Description of The Need For the Information And Its Proposed Use: The information is needed to compare with information on the price that would be justified for similar quality housing on the basis of previous data and researches. The comparison will be used to determine whether voucher

holders get better value than certificate holders
Form Number: None
Respondents: Individuals or Households
Frequency of Response: Single-time
Estimated Burden Hours: 1,340
Status: New
Contact: David Einhorn, HUD, (202) 755–5575; John Allison, OMB, (202) 395–6880.

Proposal: Issuer's Monthly Accounting Reports
Office: Government National Mortgage Association
Description of The Need For the Information And Its Proposed Use: Information is necessary to assure issuers are performing pursuant to the terms of the guaranty agreement and investors are receiving all funds due them. Issuers use these forms to report monthly on their securities accounting
Form Number: HUD–11710A, 1710B, 1710C, 11710D, and 11710E
Respondents: Businesses or Other For-Profit
Frequency of Respondents: On Occasion and Monthly
Estimated Burden Hours: 31,000
Status: Extension
Contact: Patricia A. Gifford, HUD, (202) 755–5550; John Allison, OMB, (202) 395–6880.

Proposal: Civil Rights Tenant Characteristics/Occupancy Report Insured Unsubsidized Housing Programs
Office: Fair Housing and Equal Opportunity
Description of The Need For the Information And Its Proposed Use: The information is needed and used by the Department of HUD to assist them in assuring that Federal statutes that prohibit discrimination and provide for fair housing are met
Form Number: HUD–949
Respondents: Businesses or Other For-Profit
Frequency of Response: Annually
Estimated Burden Hours: 1,353
Status: Extension
Contact: Mary T. George, HUD, (202) 755–2286; John Allison, OMB, (202) 395–6880.

Proposal: PHA Application—Project Proposal and Legal Authority Forms
Office: Public and Indian Housing
Description of The Need For the Information And Its Proposed Use: The information is needed and used by HUD to determine relative funding priorities for localities, PHA eligibility to participate in the program, and whether project proposals meet program requirements
Form Number: HUD–9009, 51971–I, 52470, 52471, 52472, 52482, 52483–A, 52485, and 52851–A
Respondents: State or Local Governments and Non-Profit Institutions
Frequency of Response: On Occasion
Estimated Burden Hours: 3,123
Status: Reinstatement
Contact: Jane M. Taliaferro, HUD, (202) 426–3938; John Allison, OMB, (202) 395–6880.

Proposal: Construction Complaint
Office: Housing
Description of The Need For the Information And Its Proposed Use: The information is needed by HUD to identify defects in construction. The forms are used to identify the items of complaint in order to help the homebuyer obtain correction, identify builders not conforming to applicable standards, and determine eligibility for financial assistance
Form Number: HUD–92556 and 92556–SFA
Respondents: Individuals or Households and Businesses or Other For-Profit
Frequency of Response: On Occasion
Estimated Burden Hours: 2,300
Status: Reinstatement
Contact: William C. Park, HUD, (202) 755–5700; John Allison, OMB, (202) 395–6880.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act 42 U.S.C. 3535(d).

Dated: May 20, 1987.

### Bureau of Land Management

[ES–940–07–4520–13; ES–037388, Group 17]

### Filing of Plats of Dependent Resurvey, Subdivisions of Sections and Survey of Rend Lake Acquisition Boundary; Illinois

May 20, 1987.

1. The plat, in five sheets, of the dependent resurvey of the south boundary, Township 3 South, Range 2 East, a portion of the east boundary, Township 3 South, Range 1 East, a portion of the subdivisional lines, and the survey of the subdivision of sections 21, 28, 30, 32, 33 and 36, and the Rend Lake Acquisition Boundary, Township 3 South, Range 2 East, Third Principal Meridian, Illinois, will be officially filed in the Eastern States Office, Alexandria, Virginia at 7:30 a.m., on July 6, 1987.

2. The dependent resurvey and survey were made at the request of the Corps of Engineers.

3. All inquiries or protests concerning the technical aspects of the dependent resurvey and survey must be sent to the Deputy State Director for Cadastral Survey and Support Services, Eastern States Office, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304, prior to 7:30 a.m., July 6, 1987.

4. Copies of the plats will be made available upon request and prepayment of the reproduction fee of $4.00 per copy.

Lane J. Bouman,
*Deputy State Director for Cadastral Survey and Support Services.*

### Realty Action; Custer, Park, and Teller Counties, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action C–42884, C–44129, and C–44086 noncompetitive sale of public land in Custer, Park and Teller Counties, Colorado.

SUMMARY: The following described land has been examined and found suitable for direct sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at not less than the appraised fair market value. The land will not be offered for sale until July 27, 1987.

Sixth Principal Meridian

T. 22 S., R. 72 W.
Sec. 12, Lot 3
Containing 20.66 acres.

T. 10 S., R. 77 W.
Sec. 4, S½NE¼, SE¼NW¼, NW¼SE¼
Containing 160 acres.

T. 15 S., R. 70 W.
Sec. 3, lots 66, 67, 68, 69, 70, 89, 90, 91, 92, 95, and 99.

The above legal description contains 43.46 acres. The legal descriptions are preliminary data and unapproved, therefore lot numbers may change. The land sale will not take place until final approval of the legal land description.

The land described is hereby segregated from appropriation under the public land laws, including the mining laws, until a patent is issued or 270 days from the date of publication of this notice, whichever occurs first.

The first described land is being offered by direct sale to the Silver Cliff Land and Cattle Company as the surrounding landowner. The sale is consistent with the Raton Basin Land Use Plan because the tract is difficult and uneconomic for management by the BLM or any other Federal department or agency.

The patent will contain a reservation of all minerals to the United States and a protective covenant over development in a small floodplain that crosses the tract.

The second described parcel is being offered by direct sale to the County of Park for continued use as a landfill. The sale is consistent with the Royal Gorge Land Use Plan because the tract is difficult and uneconomic for management by the BLM or any other Federal department of agency.

The third group of parcels is being offered by direct sale to Golden Cycle Land Corporation. The sale will resolve title and boundary problems caused by the fragmented land pattern.

**DATE:** For a period of 45 days from the date of publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Canon City District, Bureau of Land Management, 3080 East Main, P.O. Box 311, Canon City, CO 81212. Objections will be reviewed and this realty action may be sustained, vacated, or modified. In the absence of any objection resulting in vacation or modification, this realty action will become the final determination of the Department of the Interior.

Stuart L. Freer,

*Associate District Manager.*

## Bureau of Reclamation

### San Joaquin Valley Conveyance Study Environmental Impact Statement, California; Withdrawal

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Withdrawal of notice of intent to prepare a separate environmental impact statement for the San Joaquin Valley conveyance study, California.

**SUMMARY:** The Bureau of Reclamation (Reclamation), Department of the Interior, on May 29, 1986 (51 FR 19420) published a Notice of Intent to prepare an Environmental Impact Statement (EIS) for the San Joaquin Valley Conveyance Study. The purpose of the project is to provide an additional water supply to the San Joaquin Valley to relieve the present ground-water overdraft. Alternatives under consideration include various canal alignments, new construction and enlargements of existing canals. Reclamation now will include the analysis of the San Joaquin Valley Conveyance Study in the Delta Export Water Contracting EIS being prepared for marketing Central Valley Project water south of the Sacramento-San Joaquin Delta.

**FOR FURTHER INFORMATION CONTACT:** Mr. Alan Solbert, Environmental Specialist, Mid-Pacific Region (MP-750), 2800 Cottage Way, Sacramento, California 95825-1898, telephone (916) 978-5131.

Dated: May 20, 1987.

C. Dale Duvall,

*Commissioner.*

## Minerals Management Service

### Outer Continental Shelf (OCS) Advisory Board Scientific Committee; Agenda of Subcommittee and Task Force Meetings

This notice is issued in accordance with the provisions of the Federal Advisory Committee Act, Pub. L. 92-463, 5 U.S.C., Appendix I, and the Office of Management and Budget Circular A-63, Revised.

The OCS Advisory Board Scientific Committee will meet in plenary session at the Sherator Anchorage Hotel, on Calista Square, 401 East 6th Avenue, Anchorage, Alaska 99501 (telephone number (907) 276-8700), from 9 a.m. to 5 p.m. on Thursday and Friday, July 23-24, 1987.

The agenda for the meeting will include the following subjects:

Update on the Environmental Studies Program (ESP) for the Regional and Headquarters Offices;

Fiscal Year 1988 Regional Studies Plans;

Update on the National Academy of Sciences Review of the ESP;

Discussion with Alaskan Representatives; and

Report on the ESP Monitoring Program.

This meeting is open to the public. Approximately 30 visitors can be accommodated on a first-come-first-served basis. All inquiries concerning this meeting should be addressed to: Dr. Don V. Aurand, Chief, Branch of Environmental Studies, Offshore Environmental Assessment Division, Room 4230, Minerals Management Service, U.S. Department of the Interior, 18th and C Streets, NW., Washington, DC 20240 (telephone number (202) 343-7744).

Carolita L. Kallaur,

*Acting Associate Director for Offshore Minerals Management.*

## INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 31019]

### Iowa Interstate Railroad Ltd.; Operation Exemption; Lincoln and Southern Railroad Co.

Iowa Interstate Railroad Ltd., has filed a notice of exemption to operate Lincoln and Southern Railroad Company's line between milepost 157.51 at Peoria, IL and milepost 114.85 at Bureau Junction, IL, a distance of 42.66 miles including trackage rights of Lincoln and Southern Railroad Company obtained from CSX Transportation, Inc., between milepost 126.94 at Henry, IL, and milepost 114.85 at Bureau Junction, IL. Any comments must be filed with the Commission and served on Harold L. Kaplan, Mayer, Brown & Platt; 190 South LaSalle Street, Chicago, IL 60603; (312) 701-7332.[1]

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: May 15, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

*Secretary.*

BILLING CODE 7035-01-M

[Finance Docket No. 31018]

### Knox and Kane Railroad Co.; Exemption

**AGENCY:** Interstate Commerce Commission.

[1] The Railway Labor Executives' Association (RLEA) filed an unsupported request for labor protection claiming that this transaction is subject to the mandatory labor protection provisions of 49 U.S.C. 11347. Since this transaction involves an exemption from 49 U.S.C. 10901, only a showing of exceptional circumstances will justify the imposition of labor protective conditions. RLEA's request is denied, because the requisite showing has not been made. *See Class Exemption—Acq. & Oper. of R. Lines under 49 U.S.C. 10901*, 1 I.C.C.2d 810 (1985).

**ACTION:** Notice of exemption.

**SUMMARY:** The Interstate Commerce Commission exempts from the requirements of prior approval under 49 U.S.C. 10901 the construction and operation of three miles of connecting railroad from Mt. Jewett to Kinzua Bridge State Park, PA.

**DATES:** This exemption will be effective on June 1, 1987. Petitions to reopen must be filed by June 16, 1987.

**ADDRESSES:** Send pleadings referring to Finance Docket No. 31018 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

(2) Daniel J. Sweeney, 1750 Pennsylvania Avenue, NW., Washington, DC 20006.

**FOR FURTHER INFORMATION CONTACT:** Joseph H. Dettmar, (202) 275–7345.

**SUPPLEMENTARY INFORMATION:** Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T. S. InforSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area).

Decided: May 13, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

Noreta R. McGee,

*Secretary.*

[No. 40136]

## Sam and Jerry Lines, Inc.; Exemption From Tariff Filing Requirements

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Notice of Proposed Exemption.

**SUMMARY:** Sam & Jerry Lines, Inc., a passenger motor contract carrier, seeks exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The Commission has issued a decision proposing to grant an exemption for existing and future contracts.

The petition for exemption from the tariff filing requirements may be inspected at the Public Docket Room (Room 1227) of the Commission in Washington, D.C. Any interested party may file a comment in this proceeding.

**DATES:** Comments are due on June 11, 1987. If no timely filed adverse comments are received, the sought relief will automatically become effective at the close of the comment period. If opposition comments are filed, the comments will be considered and, within 20 days of the close of the comment period, the Commission will issue a final decision.

**ADDRESS:** Send an original and 10 copies of comments referring to No. 40136 to;

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

**FOR FURTHER INFORMATION CONTACT:** Richard Hartley, (202) 275–7786; or Andrew Lyon, (202) 275–7691.

**SUPPLEMENTARY INFORMATION:** Additional information is contained in the Commission's decision. Copies may be purchased from T. S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washaington, DC 20423, or call 289–4357.

Decided: May 19, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons.

## DEPARTMENT OF LABOR

### Employment and Training Administration

[TA–W–18, 954 and TA–W–18, 955]

### The Anschutz Corporation, Denver, CO and The Anschutz Corp. Midland, TX; Dismissal of Application for Reconsideration

Pursuant to 29 CFR 90.18 an application for administrative reconsideration was filed with the Director of the Office of Trade Adjustment Assistance for workers at The Anschutz Corporation, Denver Colorado and Midland, Texas. The reviews indicated that the applications contained no new substantial information which would bear importantly on the Department's determination. Therefore, dismissal of the application was issued.

TA–W–18, 954; The Anschutz Corporation, Denver, Colorado (May 7, 1987)

TA–W–18, 955; The Anschutz Corporation, Midland, Texas (May 7, 1987)

Singed at Washington, DC, this 12th day of May 1987.

Marvin M. Fooks,

### Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221 (a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221 (a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 8, 1987.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 8, 1987.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 18th day of May 1987.

Glenn M. Zech,

*Acting Director, Office of Trade Adjustment Assistance.*

## Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period May 11, 1987–May 15, 1987.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

### Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–19,360; Twin Disc, Inc., Racine, WI

TA–W–19,347; Memtec Caribe, Inc., Luquillo, PR

TA–W–19,271; Becton-Dickinson, Distributing Center, Parsippany, NJ

TA–W–19,270; Becton-Dickinson Manufacturing Plant, Rutherford, NJ

TA–W–19,281; Belden & Blake Corp., North Canton, OH

TA–W–19,339; Evans Products Co., Aberdeen, WA

TA–W–19,379; Hyatt Clark Industries, Inc., Clark, NJ

TA–W–19,330; Wood & Hyde Co., Inc., Gloversville, NY

TA–W–19,352; Roanoke Fashions Co., Lakeside Plant, Salem, VA

TA–W–19,414; Vikron, Inc., St. Croix Falls, WI

TA–W–19,356; Tek-Hughes, Division of International Playtex, Watervliet, NY

TA–W–19,323; The Trane Company, LaCrosse, WI

TA–W–19,353; Robinson Steel Co., Philadelphia, PA

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA–W–19,540; Alpha, Seismic Services, Inc., Houston, TX

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–19,600; Parish, Inc., Virginia, MN

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–19,532; Ryan Brothers Transfer, Inc., Hibbing, MN

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–19,338; Control Data Corp., Minneapolis, MN

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,442; National Gypsum Co., Alpena, MI

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,295; Exxon Co., USA, Marketing Dept., Distribution & Fuel Products Div., Charleston, WV

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,324; USX Corp., US Diversified Group, Commerce City, CO

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,516; CSX Oil & Gas Corp. (formerly Texas Gas Exploration

Corp), Denver District Office, Denver, Co.

Increased imports did not contribute importantly to workers separations at the firm.

TA–W–19,627; Halliburton Service, Lafayette, LA

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W–19,305; Karg Brothers, Inc., Johnstown, NY

The investigation revealed that criterion (2) has not been met. Sales or production did not decline during the relevant period as required for certification.

TA–W–19,407, TA–W–19,408; TA–W–19,409; Schaper Manufacturing Co., Lakeville, Minnesota Distribution Center, Plymouth, MN

Increased imports did not contribute importantly to workers separations at the firm.

**Affirmative Determinations**

TA–W–19,292; Dilido Fashions, Miami, FL

A certification was issued covering all workers of the firm separated on or after February 28, 1986.

TA–W–19,359; Thomson-CCR Medical Corp., Columbia, MD

A certification was issued covering all workers of the firm separated on or after March 5, 1986.

TA–W–19,415; West Virginia Glass Specialty Co., Inc., Weston, WV

A certification was issued covering all workers of the firm separated on or after March 10, 1986.

TA–W–19,355; Tex-Sun Glove, Corsicana, TX

A certification was issued covering all workers of the firm separated on or after March 5, 1986.

TA–W–19,361; White Consolidated Industries, Inc., Machine Tools & System Group, Cincinnati, OH

A certification was issued covering all workers of the firm separated on or after March 5, 1986.

TA–W–19,357; The Meeker Co., Joplin, MO

A certification was issued covering all workers of the firm separated on or after February 28, 1986.

TA–W–19,427; Champlin Petroleum Co., Wilmington, CA, Production Unit, Wilmington, Refinery, Long Beach, CA

A certification was issued covering all workers of the firm separated on or after March 2, 1986.

TA–W–19,485; LTV Steel Co., Paramus Sales Office, Paramus, NJ.

A certification was issued covering all workers of the firm separated on or after March 30, 1986.

TA–W–19,365; Becton-Dickinson, Puerto Rico, Inc., Juncos, PR

A certification was issued covering all workers of the firm separated on or after March 16, 1986.

TA–W–19,345; Kardex Systems, Inc., Reno, OH

A certification was issued covering all workers of the firm separated on or after March 6, 1986.

TA–W–19,299; H.R.H., Inc., Hazelton, PA

A certification was issued covering all workers of the firm separated on or after February 24, 1986.

TA–W–19,369; Champlin Petroleum Co., Denver Co. Exploration & Production Unit, Denver, CO

A certification was issued covering all workers of the firm separated on or after March 2, 1986.

TA–W–19,426; Champlin Petroleum Co., Fort Worth, TX

A certification was issued covering all workers of the firm separated on or after March 2, 1986.

TA–W–19,428; Champlin Petroleum Co., Rock Springs Wyoming Exploration & Production Unit, Rock Springs, WY

A certification was issued covering all workers of the firm separated on or after March 2, 1986.

I hereby certify that the aforementioned determinations were issued during the period May 11, 1987–May 15, 1987. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: May 19, 1987.

Glenn M. Zech,

*Acting Director, Office of Trade Adjustment Assistance.*

## Federal-State Unemployment Compensation Program; Proposal for Eliminating Duplicative Reporting Systems in the Federal-State Unemployment Compensation (UC) Program

**AGENCY:** Employment and Training Administration, Labor.

**ACTION:** Notice of proposed changes.

**SUMMARY:** This notice describes a proposal to eliminate duplicative reporting systems in the Federal/State Unemployment Compensation program by September 30, 1987. Comments from the State agencies and the public are invited.

**DATE:** Written comments must be received before close of business on June 26, 1987.

**ADDRESS:** Submit written comments to Carolyn M. Golding, Director, Unemployment Insurance Service, Employment and Training Administration, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone: 202–535–0600.

**FOR FURTHER INFORMATION CONTACT:** Carolyn M. Golding, Director, Unemployment Insurance Service, Employment and Training Administration, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone: 202–535–0600.

**SUPPLEMENTARY INFORMATION:** The Unemployment Insurance Service within the Employment and Training Administration (ETA) requires all State Employment Security Agencies (SESAs) to generate inforamtional reports in order to evaluate and administer programs, plan policy, conduct research, and determine SESA funding levels.

Presently, two systems exist which enable the States to process these reports. The original, OMB approved, method is referred to as the Regular Reporting (RR) system and consists of hard copy reports generated at the State level which are mailed to the ETA via U.S. Postal Service.

An alternative data transmittal system, currently utilized on a voluntary basis by a majority of the States, is the Regional Cost Information System (RCIS). Originally designed as a Management Information System for Regions and States, RCIS allows States to electronically transmit the same report data which is required to be mailed in as part of the RR System.

RCIS and RR data are generated by the States, with RCIS data being entered into computer terminals, then automatically edited and telecommunicated to one of three ETA Regional Computer Systems Network (CSN) nodes or to the fourth ETA CSN node located in Washington, DC.

States currently utilizing RCIS, in order to comply with reporting requirements, must still generate hard copies of all reports and mail them to ETA (with the exception of ET 539 Weekly Claims and Extended Benefits Data). As RCIS has increased in size, a steady build up of duplicative data has

evolved. As a result, ETA is now receiving both paper and electronic transmittal of the same information in the majority of cases.

In an effort to avoid such redundancy, ETA proposes to eliminate any duplicative reporting generated by the two systems. Under consideration is the establishment of RCIS as the single reporting system effective October 1, 1987. Data entry could continue as currently constructed, or variations such as Regional or National Office data entry from RR data could be established.

Comments are invited on this proposal to eliminate duplicative reporting and should be received before close of business on June 26, 1987.

Signed at Washington, DC, on May 18, 1987.

Roberts T. Jones,

*Deputy Assistant Secretary of Labor.*

## Mine Safety and Health Administration

[Docket No. M-87-122-C]

## Beckley Lick Run Co.; Petition for Modification of Application of Mandatory Safety Standard

Beckley Lick Run Company, Rt. 1, 200 Bonny Lane, Beckley, West Virginia 25801 has filed a petition to modify the application of 30 CFR 75.1103 (automatic fire warning devices) to its Bonny Mine (I.D. No. 46-04388) located in Raleigh County, West Virginia. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that devices be installed on all belts which will give a warning automatically when a fire occurs on or near such belt.

2. As an alternate method, petitioner proposes to install an early warning fire detection system. A low-level carbon monoxide (CO) detection system will be installed in all belt entries used as intake aircourses and at each belt drive and tailpiece located in intake aircourses. The monitoring devices will be capable of giving warning of a fire for a minimum of four hours should the power fail; a visual alert signal will be activated when the CO level is 10 parts per million (ppm) above ambient air and an audible signal will sound at 15 ppm above ambient air. All persons will be withdrawn to a safe area at 10 ppm and evacuated at 15 ppm. The fire alarm signal will be activated at an attended surface location where there is two-way communication. The CO system will be capable of identifying any activated sensor and for monitoring electrical continuity to detect any malfunctions.

3. The CO system will be visually examined at least once each coal-producing shift and tested for functional operation weekly to insure the monitoring system is functioning properly. The monitoring system will be calibrated with known concentrations of CO and air mixtures at least monthly.

4. If the CO monitoring system is deenergized for routine maintenance or for failure of a sensor unit, the belt conveyor will continue to operate and qualified persons will patrol and monitor the belt conveyor using hand-held CO detecting devices.

5. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

### Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 26, 1987. Copies of the petition are available for inspection at that address.

Dated: May 18, 1987

BILLING CODE 4510-43-M

---

[Docket No. M-87-124-C]

## Lesco Mining Co.; Petition for Modification of Application of Mandatory Safety Standard

Lesco Mining Company, Route 1, Box 150, Woodbine, Kentucky 40771, has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its Mine No. 1 (I.D. No. 15-15084) located in Knox County, Kentucky. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a methane monitor be installed on any electric face cutting equipment, continuous miner, longwall face equipment and loading machine and shall be kept operative and properly maintained and frequently tested.

2. Petitioner states that no methane has been detected in the mine. The three wheel tractors are permissible DC powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time that the tractor is in use, it is used as a man trip and supply vehicle.

3. As an alternate method, petitioner proposes to use hand held continuous oxygen and methane monitors in lieu of methane monitors on three wheel tractors. In further support of this request, petitioner states that:

(a) Each three wheel tractor will be equipped with a hand held continuous monitoring methane and oxygen detector and all persons will be trained in the use of the detector;

(b) A gas test will be performed, prior to allowing the coal loading tractor in the face area, to determine the methane concentration inthe atmosphere. The air quality will be monitored continuously after each trip, provided the elapse time between trips does not exceed 20 minutes. This will provide continuous of the mine atmosphere for methane to assure any undetected methane buildup between trips;

(c) If one percent of methane is detected, the operator will manually deenergize his/her battery tractor immediately. Production will cease and will not resume until the methane level is lower than one percent;

(d) A spare continuous monitor will be available to assure that all coal hauling tractors will be equipped with a continuous monitor;

(e) Each monitor will be removed from the mine at the end of the shift, and will be inspected and charged by a qualified person. The monitor will also be calibrated monthly; and

(f) No alterations or modifications will be made in addition to the manufacturer's specifications.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

### Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 26, 1987. Copies of the petition are available for inspection at that address.

Dated: May 18, 1987.

## Mountain Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

Mountain Coal Company, P.O. Box 36, Ingram, Kentucky 40955 has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its Mine No. 3 (I.D. No. 15-15728) located in Bell County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that a methane monitor be installed on any electric face cutting equipment, continuous miner, longwall face equipment and loading machine and shall be kept operative and properly maintained and frequently tested.

2. Petitioner states that no methane has been detected in the mine. The three wheel tractors are permissible DC powered machines, with no hydraulics. The bucket is a drag type, where approximately 30-40% of the coal is hand loaded. Approximately 20% of the time that the tractor is in use, it is used as a man trip and supply vehicle.

3. As an alternate method, petitioner proposes to use hand held continuous oxygen and methane monitor in lieu of methane monitors of three wheel tractors. In further support of this request, petitioner states that:

(a) Each three wheel tractor will be equipped with a hand held continuous monitoring methane and oxygen detector and all persons will be trained in the use of the detector;

(b) A gas test will be performed, prior to allowing the coal loading tractor in the face area, to determine the methane concentration in the atmosphere. The air quality will be monitored continuously after each trip, provided the elapse time between trips does not exceed 20 minutes. This will provide continuous monitoring of the mine atmosphere for methane to assure any undetected methane building between trips;

(c) If one percent of methane is detected, the operator will manually deenergize his/her battery tractor immediately. Production will cease and will not resume until the methane level is lower than one percent;

(d) A space continuous monitor will be available to assure that all coal hauling tractors will be equipped with a continuous monitor;

(e) Each monitor will be removed from the mine at the end of the shift, and will be inspected and charged by a qualified person. The monitor will also be calibrated monthly; and

(f) No alterations of modifications will be made in addition to the manufacturer's specifications.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

### Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 26, 1987. Copies of the petition are available for inspection at that address.

Dated: May 18, 1987.

Patricia W. Silvey,

*Associate Assistant Secretary for Mine Safety and Health.*

[Docket No. M-87-118-C]

## Jim Walter Resources, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Jim Walter Resources, Inc., P.O. Box C-79, Birmingham, Alabama 35283 has filed a petition to modify the application of 30 CFR 75.1105 (housing of underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps) to its No. 4 Mine (I.D. No. 01-01247) located in Tuscaloosa County, Alabama. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that underground transformer stations, battery-charging stations, substations, compressor stations, shops, and permanent pumps be housed in fireproof structures.

2. Petitioner has electrical installations which are located such that all entries close to them are maintained as intake airways. There are no return airways available for ventilating these installations.

3. As an alternate method, petitioner proposes that:

(a) The electrical installation will be housed in a fireproof structure and, when necessary, equipped with automatic closing fire doors activated by thermal devices. The fire doors will be designed to enclose all associated electric components in a reasonably airtight enclosure in case of fire or excessive temperature;

(b) The electric equipment will be protected with thermal devices designed to remove incoming power. Grounded phase protective devices protecting three-phase equipment will be adjusted to remove incoming power at not more than 40 percent of the available fault current;

(c) An automatic fire suppression system will be installed;

(d) The electrical equipment will contain no flammable cooling liquid or flammable hydraulic oil;

(e) Rectifying substations providing power to trolley systems will be protected by direct current circuit breakers with reverse current protection;

(f) No combustible materials will be stored or allowed to accumulate in the fireproof enclosure;

(g) A signal, activated by a suitable sensor, will be located so that it can be seen or heard by a responsible person;

(h) Fire-fighting equipment will be provided on the outside of the fireproof structure; and

(i) The electrical equipment will be examined weekly, and tested and maintained by a qualified electrican.

4. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

### Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 26, 1987. Copies of the petition are available for inspection at that address.

Dated: May 19, 1987.

Patricia W. Silvey,

*Associate Assistant Secretary for Mine Safety and Health.*

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

### Arts in Education Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Arts in Education Advisory Panel (Special Projects Section) to the National Council on the Arts will be held on June 10-11, 1987, from 8:15 a.m.-8:00 p.m. and June 12, 1987, from 8:45 a.m.-5:00 p.m. in room 730 of the Nancy Hanks Center, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

A portion of this meeting will be open to the public on June 10, 1987 from 8:15 a.m.-8:45 a.m. and June 12, 1987 from 2:30-5:00 p.m. The topics for discussion will include introductions and policy issues.

The remaining sessions of this meeting on June 10, 1987 from 8:45 a.m.-8:00 p.m., June 11, 1987 from 8:15 a.m.-8:00 p.m. and June 12, 1987 from 8:45 a.m.-2:30 p.m. are for the purpose of application review. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsection (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

If you need special accommodations due to a disability, please contact the Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue NW., Washington, DC 20506, 202/682-5532, TTY 202/682-5496 at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call 202/682-5433.

## NUCLEAR REGULATORY COMMISSION

### Carolina Power & Light Co.; Environmental Assessment and Finding of No Significant Impact

[Docket Nos. 50-325 and 50-324]

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-71 and DPR-62 issued to the Carolina Power & Light Company, (the licensee), for operation of Brunswick Steam Electric Plant, Units 1 and 2, located in Brunswick County, North Carolina.

#### Environmental Assessment

*Identification of Proposed Action*

The proposed action would permit the licensee to implement changes to the Brunswick facility and to Technical Specifications (TSs), as described in their letter of November 7, 1986. The following assessment applies to Units 1 and 2.

*The Need for the Proposed Action:*

The B division battery bus for each of the Brunswick units is configured in such a way that it is the normal feed for a unit's lighting inverter and standby Uninterruptible Power Supply (UPS). In addition, the B division bus serves as the alternate feed for the opposite unit's lighting inverter. Each of the lighting inverters and the power conversion module for the UPS is currently rated at 37.5 kVA. Currently, TS Surveillance Requirement 4.8.2.3.1(b) requires verification at least once per seven days that there are no more than two of these 37.5 kVA power conversion modules aligned to the B division bus to prevent overloading the bus, which also feeds safety-related loads during a postulated design basis accident.

The UPS system is a non-1E system that feeds various loads throughout the Brunswick facility. The licensee states that the existing UPS system is approaching obsolescence and is considered to be beyond reasonable maintainability. The licensee proposes to replace the UPS system with currently available equipment that is rated at 50 kVA. To permit this upgrade, the licensee proposes to delete the reference to 37.5 kVA equipment from Surveillance Requirement 4.8.2.3.1(b). The proposed TS change would require verification that no more than two power conversion modules, consisting of either two lighting inverters or one lighting inverter and one plant UPS unit, are aligned to the B division bus. As currently exists, the load from two lighting inverters would be greater than from one lighting inverter and the proposed 50 kVA UPS module.

*Environmental Impacts of the Proposed Action*

Because the maximum load from the inverters and UPS module would not change, there would be no effect from this change on systems required to mitigate the effects of a postulated accident. Thus, post-accident radiological releases will not be greater than previously determined, nor do the proposed changes otherwise affect radiological plant effluents. Occupational exposures to radiation would also be unaffected. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed changes.

With regard to potential non-radiological impacts, the proposed

changes involve systems located within the restricted area, as defined in 10 CFR Part 20. No non-radiological effluents are affected, and no other environmental impact would occur. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed changes.

*Alternatives to the Proposed Action*

Since the Commission has concluded that there is no measureable environmental impact associated with the proposed changes to the TSs, any alternative to the amendments will either have no environmental impact or greater environmental impact. The principal alternative would be to deny the requested amendments. This would not reduce environmental impacts of plant operation.

*Alternative Use of Resources*

This action does not involve the use of resources not previously considered in the Final Environmental Statement for Brunswick Steam Electric Plant, Units 1 and 2, dated January 1974.

*Agencies and Persons Consulted*

The Commission's staff reviewed the licensee's request and did not consult other agencies or persons.

*Finding of No Significant Impact*

The Commission has determined not to prepare an environmental impact statement for the proposed license amendments.

Based on the foregoing environmental assessment, the Commission concludes that the proposed action will not have significant effect on the quality of the human environment.

For further information with respect to this action, see the application for the amendments dated November 7, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555 and at the University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403–3297.

Dated at Bethesda, Maryland this 22nd day of May 1987.

For the Nuclear Regulatory Commission.

Elinor G. Adensam,

*Director, Project Directorate II–1, Division of Reactor Projects—I/II.*

## OFFICE OF MANAGEMENT AND BUDGET

### Revision of OMB Circular A–122, "Cost Principles for Nonprofit Organizations"

**AGENCY:** Office of Management and Budget.

**ACTION:** Revision of OMB Circular A–122, "Cost Principles for Nonprofit Organizations".

**SUMMARY:** This notice revises Office of Management and Budget (OMB) Circular A–122, "Cost Principles for Nonprofit Organizations." Based on recommendations by the Defense Acquisition Council and the Civilian Agency Acquisition Council, this revision clarifies requirements for maintenance and access to records for costs associated with legislative lobbying and political activities. It does not alter the originally intended meaning of the affected section and will not result in the imposition of any additional recordkeeping requirements.

This revision maintains consistency with an identical technical revision to the Federal Acquisition Regulation (FAR) to cover all defense and civilian contractors. The FAR revision appears elsewhere in this issue of the Federal Register.

**SUPPLEMENTARY INFORMATION:** OMB Circular A–122, "Cost Principles for Nonprofit Organizations," establishes uniform rules for determining the costs of grants, contracts and other agreements between the Federal Government and nonprofit organizations. Attachment B, section B21, "Lobbying" makes unallowable the costs associated with most kinds of legislative lobbying and political activities.

According to the Department of Defense, contractors are misinterpreting paragraph c.(4), the so-called "25 percent rule," to either stop keeping records maintained to comply with the prior cost principle, or to deny access to their regularly-maintained accounting data. The paragraph was only intended to restrict requirements for additional special records, such as time logs and calenders, and not intended to restrict access to records regularly maintained in the ordinary course of business.

The Department of Defense, General Services Administration, and National Aeronautics and Space Administration published a proposed rule in the Federal Register on May 29, 1986 (51 FR 19506). Twenty-four comments were received, of which 20 were from Federal agencies. Twenty of the 24 either concurred or had no comment. The Defense Acquisition Regulatory Council and the Civilian Agency Acquisition Council considered the comments and incorporated technical changes to meet some of the recommendations in the four other comments.

The revision restructures paragraph c.(4) to make clear its original intent that records usually maintained to demonstrate the allowability of costs must continue to be maintained and made available for audit.

May 19, 1987.

[Circular No. A–122, Revised Transmittal Memorandum No. 2]

**To the Heads of Executive Departments and Agencies**

Subject: Cost Principles for Nonprofit Organizations.

This memorandum revises OMB Circular A–122, "Cost Principles for Nonprofit Organizations, to clarify requirements for maintenance and access to records for costs associated with legislative lobbying and political activities.

In attachment B, section B21, "Lobbying," paragraph c.(4) is revised as follows:

c.(4) Time logs, calendars, or similar records shall not be required to be created for purposes of complying with this section during any particular calendar month when: (1) the employee engages in lobbying (as defined in paragraphs (a) and (b) above) 25 percent or less of the employee's compensated hours of employment during that calendar month, and (2) within the preceding five-year period, the organization has not materially misstated allowable or unallowable costs of any nature, including legislative lobbying costs. When conditions (1) and (2) above are met, organizations are not required to establish records to support the allowability of claimed costs in addition to records already required or maintained. Also, when conditions (1) and (2) above are met, the absence of time logs, calendars, or similar records will not serve as a basis for disallowing costs by contesting estimates of lobbying time spent by employees during a calendar month.

James C. Miller III,

*Director.*

[FR Doc. 87–11883 Filed 5–26–87; 8:45 am]

BILLING CODE 3110–01–M

## OFFICE OF PERSONNEL MANAGEMENT

### Federal Prevailing Rate Advisory Committee; Meeting

According to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on—

Wednesday, June 3, 1987
Wednesday, June 10, 1987
Wednesday, June 17, 1987
Wednesday, June 24, 1987.

These meetings will start at 10 a.m. and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street, NW., Washington, DC.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives from five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives from five Federal agencies. Entitlement to membership of the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the Prevailing Rate System and other matters pertinent to establishing prevailing rates under Subchapter IV, Chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management.

These scheduled meetings will start in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would unacceptably impair the ability of the Committee to reach a consensus on the matters being considered and would disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public because of a determination made by the Director of the Office of Personnel Management under the provisions of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) and 5 U.S.C. 552b(c)(9)(B). These caucuses may, depending on the issues involved, consititute a substantial portion of the meeting.

Annually, the Committee publishes for the Office of Personnel Management, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations, and related activities. These reports are available to the public, upon written request to the Committee's Secretary.

The public in invited to submit material in writing to the Chairman of Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information on these meetings may be obtained by contacting the Committee's Secretary, Office of Personnel Management, Federal Prevailing Rate Advisory Committee, Room 1340, 1900 E Street, NW., Washington, DC 20415 (202) 632–9710.

Thomas E. Anfinson,

*Chairman, Federal Prevailing Rate Advisory Committee.*

May 21, 1987.

## PRESIDENT'S COMMISSION ON WHITE HOUSE FELLOWSHIPS

### Annual Meeting of the Commissioners

**AGENCY:** President's Commission on White House Fellowships.

**ACTION:** Notice of annual selection meeting of the President's Commission on White House Fellowships; closed to the public.

**SUMMARY:** Notice is hereby given that the Annual Selection Meeting of the President's Commission on White House Fellowships will be held at the Aspen Institute, Wye Plantation, Queenstown, Maryland, June 4 through 7, 1987, beginning at 5:00 P.M.

The Annual Selection Meeting is part of the screening process of the White House Fellowships program. During this three day meeting the application and screening process of the thirty-three applicants for White House Fellowships will be discussed and the applicants will be interviewed by the members of the Presidential Commission. At the conclusion of this meeting the Commissioners recommend to the President those they propose to be selected to serve as White House Fellows.

It has been determined by the Director of the Office of Personnel Management that, because of the nature of the screening process, wherein personnel records and confidential character references must be used which, if revealed to the public, would constitute a clear invasion of the individuals' privacy, the content of this meeting falls within the provisions of Section 552b(c)(6) of Title 5 of the United States Code. Accordingly, this meeting will be closed to the public.

**DATE:** The date of the Annual Selection Meeting of the President's Commission on White House Fellowships, which is closed to the public, is June 4–7, 1987.

**FOR FURTHER INFORMATION CONTACT:** President's Commission on White House Fellowships, 712 Jackson Place NW., Washington, DC 20503, (202) 395–4522.

Dated: May 19, 1987.

Signed:

Linda L. Tarr,

*Ph.D., Director, President's Commission on White House Fellowships.*

BILLING CODE 6325–01–M

## SECURITIES AND EXCHANGE COMMISSION

**[File No. 1–8696]**

### Issuer Delisting; Notice of Application To Withdraw From Listing and Registration; Kay Jewelers, Inc. (Common Stock, $1.00 Par Value)

May 18, 1987.

Kay Jewelers, Inc. ("Company"), has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the American Stock Exchange, Inc. ("Amex"). The Company's common stock recently began trading on the New York Stock Exchange ("NYSE").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

The Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of its common stock on the NYSE and the Amex. The Company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for its common stock.

Any interested person may, on or before June 9, 1987 submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

*Secretary.*

[FR Doc. 87-11989 Filed 5-26-87; 8:45 am]

BILLING CODE 8010-01-M

---

[Release No. 34-24481; File No. SR-PSE-87-16]

## Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by Pacific Stock Exchange Inc.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 13, 1987, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The PSE proposes to waive transaction and order book fees for trades executed in options on two over-the-counter ("OTC") stocks: Microsoft Corporation and Mentor Corporation. These fees will be waived retroactive to May 1, 1987 and through July 17, 1987.

In its filing, PSE states that its proposal is a competitive response to the Commission's decision to permit options on OTC stocks to be traded by more than one exchange.[1] The Exchange states that a fee waiver is "necessary to remain on a competitive footing with other options exchanges" and that the waiver "will encourage decisions regarding where to trade given options to be made on the basis of the strength of the marketplace." The PSE states that the statutory basis for the proposed rule change is Section 6(b)(5) of the Act.

As the foregoing rule change is concerned solely with an exchange fee, it has become effective immediately pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 under the Act.[2] The Commission finds good cause to allow the fee waiver to become effective retroactive to May 1, 1987. The PSE would like to waive fees immediately and has informed the Commission that its internal operations are such that it is very difficult to compute fees other than on a monthly basis. Accordingly, the fee waiver is extended back to May 1, 1987. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, D.C. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned, self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 17, 1987.

Dated: May 15, 1987.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

*Secretary.*

## Self-Regulatory Organizations; Applications of Midwest Stock Exchange Inc. for Unlisted Trading Privileges and of Opportunity for Hearing

May 18, 1987.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following securities:

Malaysia Fund Inc.
Common Stock, $.01 Par Value (File No. 7-0105)

Morgan Grenfell Smallcap Fund Inc.
Capital Stock, $.01 Par Value (File No. 7-0106)

Shearson Lehman Brothers Holdings Inc.
Common Stock, $.01 Par Value (File No. 7-0107)

RLI Corporation
Common Stock, $1.00 Par Value (File No. 7-0108)

A.O. Smith Corporation
Class A Common Stock, $5.00 Par Value (File No. 7-0109)

Fairchild Industries (Del.)
Common Stock, $.01 Par Value (File No. 7-0110)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 9, 1987 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

*Secretary.*

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 9, 1987 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Johathan G. Katz,
*Secretary.*

## SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2279]

## New York; Declaration of Disaster Loan Area

As a result of the President's major disaster declaration on May 15, 1987, I find that Delaware, Greene, Montgomery, Schoharie and Ulster Counties in the State of New York constitute a disaster loan area because of severe flooding during the period April 3–7, 1987. Eligible persons, firms, and organizations may file applications for physical damage until the close of business on July 14, 1987, and for economic injury until the close of business on February 15, 1988, at: Disaster Area 1 Office, Small Business Administration, 15–01 Broadway, Fair Lawn, New Jersey 07410, or other locally announced locations.

The interest rates are:

| | |
|---|---|
| Homeowners with Credit Available Elsewhere | 8.000% |
| Homeowners Without Credit Available Elsewhere | 4.000% |
| Businesses with Credit Available Elsewhere | 7.750% |
| Businesses Without Credit Available Elsewhere | 4.000% |
| Businesses (EIDL) Without Credit Available Elsewhere | 4.000% |
| Other (Non-Profit Organizations Including Charitable and Religious Organizations) | 9.500% |

The number assigned to this disaster is 227906 for physical damage and for economic injury the number is 652900.

(Catalog of Federal Domestic Assistance Programs Nos. 59002 and 59008)

Dated: May 18, 1987.

## DEPARTMENT OF TRANSPORTATION

## Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended May 15, 1987

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et. seq.). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

*Docket No. 44878*

*Date Filed:* May 11, 1987.

*Due Date for Answers, Conforming Applications, or Motion to Modify Scope:* June 8, 1987.

*Description:* Application of World Wide Air Charter Transport Systems Inc. d/b/a Air Charter Systems (A.C.S.), pursuant to Section 402 of the Act applies for an initial Foreign Air Carrier Permit authorizing charter air transportation of property and mail between points in the United States and points in Canada.

*Docket No. 44687*

*Date Filed:* May 15, 1987.

*Due Date for Answers, Conforming Applications, or Motions to Modify Scope:* June 12, 1987.

*Description:* Application of Command Airways, Inc. pursuant to Section 401 of the Act and Subpart Q of the Regulations for a certificate of public convenience and necessity for scheduled and charter interstate air transportation of persons, property and mail. Command Airways also requests pursuant to Part 215 of the Regulations to use the trade name, "American Eagle", as well its own name.

*Docket No. 43927*

*Date Filed:* May 15, 1987.

*Due Date for Answers, Conforming Applications, or Motions to Modify Scope:* June 12, 1987.

*Description:* Amendment to Application of Transbrasil S.A. Linhas Aereas pursuant to Section 302.1740 of the Act requesting authority to provide scheduled combination passenger, cargo and mail air transportation between the United States and Brazil.

## Federal Highway Administration

### Commercial Driver's License Information System (Clearinghouse); Public Meeting and Workshop

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Notice of public meeting and workshop.

**SUMMARY:** The Federal Highway Administration, Office of Motor Carriers, announces a July 14 and 15, 1987, public meeting and workshop to be conducted in the Washington, DC area regarding the Commercial Driver's License Information System (also called the Clearinghouse). The Clearinghouse is required by the Commerical Motor Vehicle Safety Act of 1986.

**DATE:** Reservations to participate in the workshop should be received by June 10, 1987.

**ADDRESS:** Submit written reservations for participating in the workshop to Mr. C. John MacGowan, Chief, Motor Carrier Information Division, HIA-10, Federal Highway Administration, Room 3110, 400 Seventh Street, SW., Washington, DC 20590.

**FOR FURTHER INFORMATION CONTACT:** Mr. C. John MacGowan, Office of Motor Carrier Information Management and Analysis, Room 3110, (202) 366-4023; Mr. George F. Duffy, Office of Environmental Policy, Room 3232, (202) 366-2066; or Mrs. Kathleen S. Markman, Office of Chief Counsel, HCC-20, Room 4224, (202) 366-0834, FHWA, DOT, 400 Seventh Street, SW., Washington, DC 20590. Office hours are 7:45 a.m. to 4:15 p.m., ET, Monday through Friday, except legal holidays.

**SUPPLEMENTARY INFORMATION:**

### Workshop Announcement

By January 1, 1989, FHWA must establish an information Clearinghouse pertaining to the licensing and identification of operators of commercial motor vehicles and the disqualification of such operator from operating commercial motor vehicles. This information is to be available to States, current and prospective employers, employees and the Secretary of Transportation to help ensure compliance with the single license requirement and disqualification provisions of the Commercial Motor Vehicle Safety Act of 1986 (the Act), Pub. L. 99-570, 100 Stat. 3207-176. Given the time constraints and to assure that as many affected parties as practical have had an opportunity to provide comments on the requirements of the Clearinghouse, a 2-day workshop will be held.

The workshop will coincide with the availability of the initial results from Phase I of the contract effort described below. The workshop will present the findings and solicit views and suggestions on the general requirements and specifications for the Clearinghouse. The workshop will be held at the Sheraton International Conference Center in Reston, Virginia, on July 14 and 15, 1987. A $37.00 registration fee will be charged to cover conference facilities and lunch arrangements for the two days. Both government and corporate room rates are available in the hotel. For planning purposes, State motor vehicle information systems and licensing personnel, motor carrier industry representatives, commercial motor vehicle operator representatives, and members of the public who are interested in participating in the workshop should express their desire in writing prior to June 10, 1987.

### Description of Contract Effort

Section 12007(b) of the Act requires that, by January 1, 1988, the Secretary of Transportation must review information systems utilized by the States pertaining to the driving status of operators of motor vehicles as well as other State-operated information systems. The Federal Highway Administration (FHWA) awarded a contract to develop the system requirements and preliminary system specifications for the Clearinghouse by November 1, 1987. RJO Enterprises, Inc., was selected as the prime contractor for this work and will be assisted by Farradyne Systems, Inc. and The Orkand Corporation.

Development of the Clearinghouse system specification will be performed in three phases:

Phase I (April-May) will consist of a thorough review of all materials developed to date, including a recent FHWA field inventory survey and the American Association of Motor Vehicle Administrators telecommunications network study, and visits to not more than nine States which have systems that may be adaptable to the Clearinghouse. Visits to the States will take place during May 1987. The requirements for the Clearinghouse will be produced at the end of this Phase.

Phase II (May-August) will consist of a symposium with States to discuss aspects of system development, meeting with the FHWA technical staff and others on possible system design, and a workshop to discuss technical aspects of the system. The results of Phase II will be a publication of the workshop proceedings and three draft functional system specifications. The published proceedings will be available for inspection from the Office of Motor Carrier Information Management and Analysis (202) 366-4023.

Phase III (September-October) will involve discussion between FHWA and key States regarding the proposed architecture for the Clearinghouse, selection of the final design, and production of the final specification.

## DEPARTMENT OF THE TREASURY

### Senior Executive Service; Departmental Performance Review Board

**ACTION:** This notice lists the membership of the Departmental Performance Review Board (PRB), superseding the list published in 51 FR 12013, April 8, 1986, in accordance with 5 U.S.C. 4313(c)(4).

Scope: This notice applies to all components within the Department of the Treasury.

Purpose: The purpose of the Board is to review proposed performance appraisals, ratings, bonuses and other appropriate personnel actions for incumbents of non-delegated SES positions. These positions include SES bureau heads, deputy bureau heads, bureau chief inspectors, Associate Commissioners of the Internal Revenue Service, and certain other positions. The Board makes recommendations to the Secretary or his designee as Appointing Authority. The Board will perform PRB functions for other top bureau positions if requested. In addition, the Board will review proposed SES bonus distributions and Presidential Rank nominations from the bureaus upon request.

Composition of PRB: Three members constitute a quorum, at least two of whom must be career appointees. The names and titles of the PRB members are as follows:

Chairperson, John F. W. Rogers, Assistant Secretary of the Treasury (Management)
Paul W. Bateman, Deputy Treasurer
Thomas J. Berger, Deputy Assistant Secretary (International Monetary Affairs)
James W. Conrow, Deputy Assistant Secretary (Developing Nations)
Roger M. Cooper, Deputy Assistant Secretary (Information Systems)
William E. Douglas, Commissioner, Financial Management Service
Stephen J. Entin, Deputy Assistant Secretary (Economic Forecasting)
Eugene H. Essner, Deputy Director, U.S. Mint
Richard L. Gregg, Commissioner, Bureau of Public Debt
Stephen E. Higgins, Director, Alcohol, Tobacco and Firearms
Michael F. Hill, Deputy Assistant Secretary for Administration
Michael R. Hill, Inspector General
Francis A. Keating II, Assistant Secretary (Enforcement)
Jill E. Kent, Deputy Assistant Secretary for Departmental Finance and Management
John A. Kilcoyne, Assistant Fiscal Assistant Secretary
Robert J. Lauver, Director, Bureau of Engraving and Printing
Samuel T. Mok, Comptroller
S.F. Timothy Mullen, Director, Office of Administrative Programs
Gerald Murphy, Fiscal Assistant Secretary
Howard W. Nester, Deputy Director (Revenue Estimating)
Thomas P. O'Malley, Director, Office of Procurement
Katherine D. Ortega, Treasurer of the United States
James I. Owens, Deputy Commissioner, Internal Revenue Service
Charles O. Sethness, Assistant Secretary (Domestic Finance)
John P. Simpson, Deputy Assistant Secretary (Regulatory, Trade and Tariff Enforcement)
Edward T. Stevenson, Special Assistant to the Assistant Secretary (Legislative Affairs)
Margaret D. Tutwiler, Assistant Secretary (Public Affairs and Public Liaison)
D. Edward Wilson, Jr., Deputy General Counsel
Robert B. Zoellick, Executive Secretary.

**FOR FURTHER INFORMATION CONTACT:** Charlene J. Robinson, Acting Director of Personnel, Room 7115, ICC Building, 1201 Constitution Avenue NW., Washington, DC 20220, Telephone: (202) 566-2701.

This notice does not meet the Department's criteria for significant regulations.

Dated: May 11, 1987.

John F. W. Rogers,

*Assistant Secretary of the Treasury (Management).*

## Office of the Secretary

**[Department Circular—Public Debt Series—No. 15-87]**

### Treasury Notes of August 15, 1992, Series K-1992

Washington, May 20, 1987.

#### 1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $8,000,000,000 of United States securities, designated Treasury Notes of August 15, 1992, Series K-1992 (CUSIP No. 912827 UY 6), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent to the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

#### 2. Description of Securities

2.1. The Notes will be dated June 3, 1987, and will accrue interest from that date, payable on a semiannual basis on February 15, 1988, and each subsequent 6 months on August 15 and February 15 through the date that the principal becomes payable. They will mature August 15, 1992, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next-succeeding business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR Part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in 51 FR 16260, *et seq.* (May 16, 1986), apply to the Notes offered in this circular.

#### 3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20239, prior to 1:00 p.m., Eastern Daylight Saving time, Wednesday, May 27, 1987. Noncompetitive tenders as defined below will be considered timely if

postmarked no later than Tuesday, May 26, 1987, and received no later than Wednesday, June 3, 1987.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose and defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.
